Volume 8360

Proceedings of SPIE, 0277-786X, v. 8360

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Airborne Intelligence, Surveillance, Reconnaissance (ISR) Systems and Applications IX,
edited by D. J. Henry, D. A. Lange, D. L. von Berg, D. L. Young, K. L. Bernier, J. J. Guell, S. D. Rajan,
Proc. of SPIE Vol. 8360, 836001 · © 2012 SPIE · CCC code: 0277-786X/12/\$18 · doi: 10.1117/12.979016

Proc. of SPIE Vol. 8360 836001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 SENSORS AND SYSTEMS I

8360 02	Foveated imager providing reduced time-to-threat detection for micro unmanned aerial system [8360-01] R. Bates, K. Kubala, A. Greengard, FiveFocal LLC (United States)
8360 03	Condor TAC: EO/IR tactical aerial reconnaissance photography system [8360-02] V. Petrushevsky, D. Tsur, Elbit Systems Electro-Optics El-Op Ltd. (Israel)
8360 04	Airborne infrared hyperspectral imager for intelligence, surveillance, and reconnaissance applications [8360-03] E. Puckrin, C. S. Turcotte, Defence Research and Development Canada, Valcartier (Canada); M.-A. Gagnon, Telops, Inc. (Canada); J. Bastedo, PV Labs (Canada); V. Farley, M. Chamberland, Telops, Inc. (Canada)
8360 05	UAV-based multi-spectral environmental monitoring [8360-04] T. Arnold, M. De Biasio, A. Fritz, A. Frank, R. Leitner, Carinthian Tech Research AG (Austria)

SESSION 2 SENSORS AND SYSTEMS II

8360 06	Characterization and discrimination of large caliber gun blast and flash signatures [8360-05] B. J. Steward, K. C. Gross, G. P. Perram, Air Force Institute of Technology (United States)
8360 07	Fiber optic snapshot hyperspectral imager [8360-06] D. J. Mansur, J. Rentz Dupuis, R. Vaillancourt, OPTRA, Inc. (United States)
8360 08	Lidar flecks: modeling the influence of canopy type on tactical foliage penetration by airborne, active sensor platforms [8360-07] R. Massaro, U.S. Army Topographic Engineering Ctr. (United States); J. Zinnert, J. Anderson, J. Edwards, U.S. Army Topographic Engineering Ctr. (United States) and Virginia Commonwealth Univ. (United States); E. Crawford, D. Young, Virginia Commonwealth Univ. (United States)
8360 09	Image stabilization for moving platform surveillance [8360-08] Z. A. Ansari, Instruments Research & Development Establishment (India) and Indian Institute of Technology Kharagpur (India); S. Sengupta, Indian Institute of Technology Kharagpur (India); A. K. Singh, A. Kumar, Instruments Research & Development Establishment (India)
8360 0A	Enhanced intelligence through optimized TCPED concepts for airborne ISR [8360-09] M. Spitzer, E. Kappes, D. Böker, IABG mbH (Germany)

SESSION 3 IMAGE PROCESSING I

- 8360 0C **Shape-based topologies for real-time onboard image generation** [8360-11]
A. Bright, O. Kia, J. Graybill, S. Cruz, ITT Exelis (United States)
- 8360 0D **Saliency region selection in large aerial imagery using multiscale SLIC segmentation** [8360-12]
S. Sahli, Univ. Laval (Canada); D. A. Lavigne, Defence Research and Development Canada, Valcartier (Canada); Y. Sheng, Univ. Laval (Canada)
- 8360 0E **Context switching system and architecture for intelligence, surveillance, and reconnaissance** [8360-13]
P. C. Hershey, C. J. Graham, L. Ledda, M.-C. Wang, Raytheon Co. (United States)

SESSION 4 IMAGE PROCESSING II

- 8360 0F **Robust tracking and anomaly detection in video surveillance sequences** [8360-14]
H. F. Rueda, Univ. of Delaware (United States) and Univ. Industrial de Santander (United States); L. F. Polania, K. E. Barner, Univ. of Delaware (United States)
- 8360 0G **A static architecture for compressive target tracking** [8360-15]
P. K. Poon, College of Optical Sciences, The Univ. of Arizona (United States); D. Townsend, S. Wehrwein, The MITRE Corp. (United States); E. M. Vera, The Univ. of Arizona (United States); M. D. Stenner, The MITRE Corp. (United States); M. E. Gehm, College of Optical Sciences, The Univ. of Arizona (United States)
- 8360 0H **Parallax visualization of UAV FMV and WAMI imagery** [8360-16]
C. A. Mayhew, C. M. Mayhew, Vision III Imaging, Inc. (United States)
- 8360 0I **Kalman filter outputs for inclusion in video-stream metadata: accounting for the temporal correlation of errors for optimal target extraction** [8360-17]
J. T. Dolloff, National Geospatial-Intelligence Agency (United States)
- 8360 0J **Automated assessment of video image quality: implications for processing and exploitation** [8360-18]
J. M. Irvine, Charles Stark Draper Lab. (United States)

SESSION 5 DEGRADED VISUAL ENVIRONMENTS (DVE) REQUIREMENTS AND FLIGHT SYSTEMS

- 8360 0L **Operational requirements for short-term solution in visual display specifically for Degraded Visual Environment (DVE)** [8360-20]
T. W. Eger, Combat Development Div. German Army Aviation (Germany)
- 8360 0M **BAE systems brownout landing aid system technology (BLAST) system overview and flight test results** [8360-21]
B. Sykora, BAE Systems (United States)
- 8360 0N **LandSafe precision flight instrumentation system: the DVE solution** [8360-22]
P. Mamidipudi, E. A. Dakin, D. C. Dakin, T. Bienlien, D. Vang, P. Rogers, Optical Air Data Systems, LLC (United States)

SESSION 6 DEGRADED VISUAL ENVIRONMENTS (DVE) SYMBOLOGY AND TECHNOLOGIES I

- 8360 0P **Evaluation of DVE landing display formats** [8360-24]
H.-U. Doepler, P. M. Knabl, S. Schmerwitz, German Aerospace Ctr., DLR (Germany); T. Eger, German Combat Development Div. Army Aviation Corps (Germany); O. Klein, Elbit Systems Ltd. (Israel)
- 8360 0Q **Use of 3D conformal symbology on HMD for a safer flight in degraded visual environment** [8360-25]
O. Klein, ELBIT Systems Ltd. (Israel); H.-U. Doepler, German Aerospace Ctr., DLR (Germany); T. Trousil, R. Peleg-Marzan, ELBIT Systems Ltd. (Israel)
- 8360 0R **Developing an obstacle display for helicopter brownout situations** [8360-26]
N. Peinecke, P. M. Knabl, S. Schmerwitz, H.-U. Döhler, German Aerospace Ctr., DLR (Germany)
- 8360 0S **High dynamic range fusion for enhanced vision** [8360-28]
Y. Liu, Tsinghua Univ. (China) and Radar Academy (China); Y. Li, Q. Dai, Tsinghua Univ. (China)

SESSION 7 DEGRADED VISUAL ENVIRONMENTS (DVE) SYMBOLOGY AND TECHNOLOGIES II

- 8360 0T **Enhancement of vision systems based on runway detection by image processing techniques** [8360-30]
N. Gulec, N. Sen Koktas, SDT Space and Defence Technologies Inc. (Turkey)
- 8360 0W **Visual information, sparse decomposition, and transmission for multi-UAV visual navigation** [8360-29]
H. Liu, Q. Dai, Tsinghua Univ. (China)

POSTER SESSION

- 8360 0X **Part-template matching-based target detection and identification in UAV videos** [8360-31]
H. Kim, J. Im, T. Kim, Chung-Ang Univ. (Korea, Republic of); J. Bae, S. Lee, Hanwha Corp. (Korea, Republic of); J. Paik, Chung-Ang Univ. (Korea, Republic of)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chair

Daniel J. Henry, Rockwell Collins, Inc. (United States)

Conference Cochairs

Davis A. Lange, Goodrich Corporation (United States)

Dale Linne von Berg, U.S. Naval Research Laboratory (United States)

Darrell L. Young, Raytheon Intelligence & Information Systems
(United States)

Kenneth L. Bernier, The Boeing Company (United States)

Jeff J. Guell, The Boeing Company (United States)

Sreekanth D. Rajan, ITT Exelis (United States)

Session Chairs

- 1 Sensors and Systems I
Davis A. Lange, Goodrich Corporation (United States)
- 2 Sensors and Systems II
Dale Linne von Berg, U.S. Naval Research Laboratory (United States)
- 3 Image Processing I
Sreekanth D. Rajan, ITT Exelis (United States)
- 4 Image Processing II
Darrell L. Young, Raytheon Intelligence & Information Systems
(United States)
- 5 Degraded Visual Environments (DVE) Requirements and Flight Systems
Kenneth L. Bernier, The Boeing Company (United States)
- 6 Degraded Visual Environments (DVE) Symbolology and Technologies I
Jeff J. Guell, The Boeing Company (United States)

- 7 Degraded Visual Environments (DVE) Symbology and Technologies II
Jeff J. Guell, The Boeing Company (United States)

Introduction

This year's conference brought a wide range of papers related to ISR Systems and Applications. We had papers that addressed the entire TCPED image chain (Tasking, Capture, Processing, Exploitation, and Dissemination). Several novel sensor types, processing methods, and dissemination strategies were presented. We also had papers that addressed application of ISR technology to characterize infrared/electro-optic phenomena and accurately quantify data quality.

In our second day, we had the privilege of including three sessions that addressed Degraded Visual Environment (DVE) for aircraft. The papers presented novel solutions to address this challenging problem.

I would like to thank all the authors for their efforts to write and present their excellent papers. Their advances in this exciting field make our conference such a success, and I look forward to the 2013 conference to see what advances have been made in these areas, as well as discovering new technologies that have been developed.

See you at DSS 2013!
