Event: SPIE Defense, Security, and Sensing, 2012, Baltimore, Maryland, United States

PROCEEDINGS OF SPIE

Radar Sensor Technology XVI

Kenneth I. Ranney
Armin W. Doerry
Editors

23–25 April 2012
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 8361

Proceedings of SPIE, 0277-786X, v. 8361

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Radar Sensor Technology XVI, edited by Kenneth I. Ranney, Armin W. Doerry, Proc. of SPIE Vol. 8361,
836101 · © 2012 SPIE · CCC code: 0277-786X/12/\$18 · doi: 10.1117/12.979017

Proc. of SPIE Vol. 8361 836101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix *Conference Committee*

SESSION 1 ALGORITHMS AND PROCESSING I

- 8361 02 **Interferometric measurement of the angular velocity of moving humans** [8361-01]
J. A. Nanzer, The Johns Hopkins Univ. Applied Physics Lab. (United States)
- 8361 03 **Adaptive waveform scheduling in radar: an information theoretic approach** [8361-02]
P. Setlur, N. Devroye, Univ. of Illinois at Chicago (United States)
- 8361 04 **Testing a transmission line model for homogeneous subsurface media using ground penetrating radar** [8361-03]
B. Rodriguez-Hervas, B. C. Flores, C. Pappu, R. F. von Borries, The Univ. of Texas at El Paso (United States); P. S. Debroux, U.S. Army Research Lab. (United States)
- 8361 05 **High-resolution time-frequency representations based on the local polynomial Fourier transform for over-the-horizon radars** [8361-04]
I. Djurović, S. Djukanović, Univ. of Montenegro (Montenegro); M. G. Amin, Y. D. Zhang, Villanova Univ. (United States); B. Himed, Air Force Research Lab. (United States)

SESSION 2 ALGORITHMS AND PROCESSING II

- 8361 06 **Refocusing vibrating targets in SAR images** [8361-05]
Q. Wang, The Univ. of New Mexico (United States) and Ctr. for High Technology Materials, Univ. of New Mexico (United States); B. Santhanam, The Univ. of New Mexico (United States); M. Pepin, The Univ. of New Mexico (United States) and Ctr. for High Technology Materials, Univ. of New Mexico (United States); T. Atwood, Sandia National Labs. (United States); M. M. Hayat, The Univ. of New Mexico (United States) and Ctr. for High Technology Materials, Univ. of New Mexico (United States)
- 8361 07 **2D and 3D ISAR image reconstruction through filtered back projection** [8361-06]
T. Ray, Y. Cao, Z. Qiao, The Univ. of Texas-Pan American (United States); G. Chen, I-Fusion Technologies, Inc (United States)
- 8361 08 **Features for landcover classification of fully polarimetric SAR data** [8361-07]
J. V. Geaga, Consultant (United States)
- 8361 09 **Accurate reconstruction of frequency-sparse signals from non-uniform samples** [8361-08]
K.-Y. Ni, X. Kong, R. M. Matic, M. Ahmed, HRL Labs., LLC (United States)

SESSION 3 SYSTEMS AND APPLICATIONS I

- 8361 0A **Multifunctional millimeter-wave radar system for helicopter safety** [8361-09]
D. S. Goshi, T. J. Case, J. B. McKitterick, L. Q. Bui, Honeywell International Inc. (United States)

- 8361 OB **Flexible end-to-end system design for synthetic aperture radar applications** [8361-10]
E. C. Zaugg, M. C. Edwards, J. P. Bradley, ARTEMIS, Inc. (United States)
- 8361 OC **Radar-based full-body screening of passengers with constant motion** [8361-11]
S. Hantscher, B. Schlenker, S. Lang, M. Högelen, H. Essen, Fraunhofer Institute for High Frequency Physics and Radar Techniques (Germany); A. Tessmann, Fraunhofer Institute for Applied Solid State Physics (Germany)
- 8361 OD **Radar tracking and classification of littoral targets** [8361-12]
J. Silvius, D. Tahmouh, U.S. Army Research Lab. (United States)
- 8361 OE **3-D synthetic aperture processing on high-frequency wide-beam microwave systems** [8361-14]
E. Cristofani, A. Brook, M. Vandewal, Royal Belgian Military Academy (Belgium)
- 8361 OF **Preliminary analysis of fully polarimetric air and spaceborne SAR measurements for security and reconnaissance purposes** [8361-13]
H. Suess, German Aerospace Ctr. (Germany); T. Rueckel, Federal Armed Forces Univ. Munich (Germany)

SESSION 4 SYSTEMS AND APPLICATIONS II

- 8361 OG **SAR change detection for monitoring the impact of the rehabilitation of the Arghandab irrigation system in Afghanistan** [8361-15]
J. Busler, M. Ghazel, V. Kotamraju, MDA Systems Ltd. (Canada); L. Vandehei, Canadian International Development Agency (Canada); G. Aubé, Canadian Space Agency (Canada); C. Froese, Alberta Geological Survey (Canada)
- 8361 OH **Detection of clandestine tunnels in complex environments using a mobile focused-source electromagnetic data measurement and processing unit** [8361-16]
S. Davydcheva, M. Frenkel, Border Security Technologies, LLC (United States)
- 8361 OI **Cooperative control of MAVs for a hidden emitter localization** [8361-17]
M. Gates, R. Selmic, Louisiana Tech Univ. (United States); R. Ordonez, Univ. of Dayton (United States)

SESSION 5 SPECIAL TOPIC: THROUGH-THE-WALL SENSING

- 8361 OJ **Synthetic aperture radar imaging of a two-story building** [8361-18]
C. Le, T. Dogaru, U.S. Army Research Lab. (United States)
- 8361 OK **Indoor imagery with a 3-D through-wall synthetic aperture radar** [8361-19]
P. Sévigny, D. J. DiFilippo, T. Laneve, Defence Research and Development Canada, Ottawa (Canada); J. Fournier, Defence Research and Development Canada, Valcartier (Canada)
- 8361 OL **Micro-Doppler processing for ultra-wideband radar data** [8361-20]
G. E. Smith, The Ohio State Univ. (United States); F. Ahmad, M. G. Amin, Villanova Univ. (United States)

- 8361 OM **Histogram-based segmentation for stationary target detection in urban environments** [8361-21]
M. G. Amin, Villanova Univ. (United States); P. Setlur, Univ. of Illinois at Chicago (United States); F. Ahmad, Villanova Univ. (United States); P. Seigny, D. DiFilippo, Defence Research and Development Canada, Ottawa (Canada)
- 8361 OO **Evaluation of polarimetric through-the-wall radar measurements** [8361-23]
T. Johansson, A. Sume, J. Rahm, S. Nilsson, A. Örbom, Swedish Defence Research Agency (Sweden)

SESSION 6 COMPONENTS AND TECHNOLOGY

- 8361 OP **High efficiency switching power amplifiers for multi-band radar** [8361-24]
J. Lawler, J. Wells, S. Mendez, T. Wurth, NuWaves Engineering (United States)
- 8361 OQ **Antenna array devised for amplifier integration** [8361-25]
B. H. Strassner II, Sandia National Labs. (United States)
- 8361 OR **Compensating for inconsistent high power vircator microwave radar pulse sources** [8361-26]
A. D. McAulay, Lehigh Univ. (United States)
- 8361 OS **Developments in extraordinary transmission metallic lens** [8361-27]
M. Navarro-Cia, Imperial College London (United Kingdom); M. Beruete, F. Falcone, M. Sorolla, Univ. Pública de Navarra (Spain)

SESSION 7 ALGORITHMS AND PROCESSING III

- 8361 OT **Image-based target detection with multispectral UWB OFDM radar** [8361-28]
T. D. Bufler, D. S. Garmatyuk, Miami Univ. (United States)
- 8361 OU **A new phase space method for target discrimination** [8361-29]
F. J. Rachford, T. L. Carroll, U.S. Naval Research Lab. (United States)
- 8361 OV **Implementation of generalized detector for distributed sources using sensor arrays** [8361-30]
V. Tuzlukov, Kyungpook National Univ. (Korea, Republic of)
- 8361 OX **Classification and modeling of human activities using empirical mode decomposition with S-band and millimeter-wave micro-Doppler radars** [8361-32]
D. P. Fairchild, R. M. Narayanan, The Pennsylvania State Univ. (United States)

SESSION 8 PHENOMENOLOGY

- 8361 OY **Radar cross section statistics of cultural clutter at Ku-band** [8361-33]
A. M. Raynal, D. L. Bickel, D. F. Dubbert, Sandia National Labs. (United States); T. J. Verge, General Atomics Aeronautical Systems, Inc. (United States); B. L. Burns, Sandia National Labs. (United States); R. Dunkel, General Atomics Aeronautical Systems, Inc. (United States); A. W. Doerry, Sandia National Labs. (United States)

- 8361 0Z **Radar micro-Doppler simulations of classification capability with frequency** [8361-34]
D. Tahmouh, J. Silvius, U.S. Army Research Lab. (United States)
- 8361 10 **Electromagnetic investigation on imaging of disturbed earth feature for buried target detection** [8361-35]
D. Liao, U.S. Army Research Lab. (United States)
- 8361 11 **In-situ permittivity measurements using ring resonators** [8361-36]
G. J. Mazzaro, U.S. Army Research Lab. (United States)

SESSION 9 SPECIAL TOPIC: NOISE RADAR I

- 8361 12 **Low-cost chaotic radar design** [8361-37]
G. M. Hall, E. J. Holder, Propagation Research Associates, Inc. (United States); S. D. Cohen, D. J. Gauthier, Duke Univ. (United States)
- 8361 13 **Information retrieval and cross-correlation function analysis of random noise radar signal through dispersive media** [8361-38]
A. V. Alejos, Univ. of Vigo (Spain); M. Dawood, New Mexico State Univ. (United States)
- 8361 14 **Analysis of the ambiguity function for an FM signal derived from the Lorenz chaotic flow** [8361-40]
C. S. Pappu, B. C. Flores, The Univ. of Texas at El Paso (United States); P. Debroux, U.S. Army Research Lab. (United States)
- 8361 15 **Preliminary performance analysis of the advanced pulse compression noise radar waveform** [8361-41]
M. A. Govoni, U.S. Army Research, Development and Engineering Command (United States); L. R. Moyer, Technology Service Corp. (United States)

SESSION 10 SPECIAL TOPIC: NOISE RADAR II

- 8361 16 **Noisy Stepped Frequency (NSF) waveform in RF tomography** [8361-42]
R. Vela, L. Lo Monte, Univ. of Dayton Research Lab. (United States)
- 8361 17 **Ultra-wideband noise radar based on optical waveform generation** [8361-43]
D. Grodensky, D. Kravitz, A. Zadok, Bar-Ilan Univ. (Israel)
- 8361 18 **Impulse response characterization of the propagation and scattering environment in through-wall applications using an S-band noise radar** [8361-44]
S. Smith, R. M. Narayanan, The Pennsylvania State Univ. (United States)
- 8361 19 **Simultaneous human detection and ranging using a millimeter-wave radar system transmitting wideband noise with an embedded tone** [8361-45]
K. A. Gallagher, R. M. Narayanan, The Pennsylvania State Univ. (United States)
- 8361 1A **Microwave noise field: active radiometry principles and applications** [8361-46]
J. Polivka, Spacek Labs. Inc. (United States)

POSTER SESSION

- 8361 1B **A better trihedral corner reflector for low grazing angles** [8361-47]
A. W. Doerry, B. C. Brock, Sandia National Labs. (United States)
- 8361 1C **What maritime ISAR designers should know about ship dynamics** [8361-48]
A. W. Doerry, Sandia National Labs. (United States)
- 8361 1D **Designing interpolation kernels for SAR data resampling** [8361-49]
A. W. Doerry, Sandia National Labs. (United States); E. Bishop, J. Miller, V. Horndt, General Atomics Aeronautical Systems, Inc. (United States); D. Small, Sandia National Labs. (United States)
- 8361 1E **Multitarget detection algorithm for automotive FMCW radar** [8361-50]
E. Hyun, Daegu Gyeongbuk Institute of Science & Technology (Korea, Republic of); W.-J. Oh, Kumoh National Institute of Technology (Korea, Republic of); J.-H. Lee, Daegu Gyeongbuk Institute of Science & Technology (Korea, Republic of)
- 8361 1F **Tunnel monitoring with an advanced InSAR technique** [8361-51]
B. Rabus, J. Eppler, J. Sharma, J. Busler, MacDonald, Dettwiler and Associates Ltd. (Canada)
- 8361 1G **Integrated radar-camera security system: range test** [8361-53]
M. Życzkowski, M. Szustakowski, W. Ciurapiński, M. Karol, P. Markowski, Military Univ. of Technology (Poland)
- 8361 1H **Fast stereo matching under variable illumination** [8361-56]
S. Arunagiri, A. Contreras, E. Gallardo, A. DattaGupta, P. J. Teller, The Univ. of Texas at El Paso (United States); J. C. Deroba, U.S. Army Intelligence and Information Warfare Directorate (United States); L. H. Nguyen, Army Research Lab (United States)
- 8361 1I **Novel nonlinear phase distortion estimation in wideband linear frequency modulated waveform** [8361-58]
H. Yang, J. Chun, KAIST (Korea, Republic of); S.-C. Song, Samsung Thales Co., Ltd. (Korea, Republic of)
- 8361 1J **Target detection using multi-resolution forward-looking SAR imagery** [8361-59]
R. Innocenti, K. Ranney, L. Nguyen, U.S. Army Research Lab. (United States)
- 8361 1K **Contrast-based moving target detection with the randomized linear receive array** [8361-60]
K. Ranney, A. Martone, R. Innocenti, L. Nguyen, U.S. Army Research Lab. (United States)
- 8361 1M **Lynx maritime radar in USN experiment Trident Warrior 2011** [8361-62]
R. Dunkel, Z. Link, T. Verge, J. Laue, General Atomics Aeronautical Systems, Inc. (United States)
- 8361 1N **An efficient means to mitigate wavefront curvature effects in polar format processed SAR imagery** [8361-63]
R. Linnehan, M. Yasuda, General Atomics Aeronautical Systems, Inc. (United States); A. Doerry, Sandia National Labs. (United States)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

Kenneth I. Ranney, U.S. Army Research Laboratory (United States)

Armin W. Doerry, Sandia National Laboratories (United States)

Program Committee

Fauzia Ahmad, Villanova University (United States)

Joseph C. Deroba, U.S. Army CERDEC Intelligence and Information Warfare Directorate (United States)

Doreen M. Dyck, Defence Research and Development Canada, Ottawa (Canada)

Benjamin C. Flores, The University of Texas at El Paso (United States)

Majeed M. Hayat, The University of New Mexico (United States)

Todd A. Kastle, Air Force Research Laboratory (United States)

Seong-Hwoon Kim, Raytheon Space & Airborne Systems (United States)

James L. Kurtz, University of Florida (United States)

Changzhi Li, Texas Tech University (United States)

Jenshan Lin, University of Florida (United States)

David G. Long, Brigham Young University (United States)

Jia-Jih Lu, General Atomics Aeronautical Systems, Inc. (United States)

Anthony F. Martone, U.S. Army Research Laboratory (United States)

George J. Moussally, Mirage Systems (United States)

Ram M. Narayanan, The Pennsylvania State University (United States)

Lam H. Nguyen, U.S. Army Research Laboratory (United States)

Hector A. Ochoa-Gutierrez, The University of Texas at Tyler (United States)

Meppalli K. Shandas, dB Control (United States)

Jerry Silvious, U.S. Army Research Laboratory (United States)

Brian Smith, U.S. Army Armament Research, Development and Engineering Center (United States)

Helmut H. Suess, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)

David Tahmouh, U.S. Army Research Laboratory (United States)

Steven J. Weiss, U.S. Army Research Laboratory (United States)
Lars M. Wells, Sandia National Laboratories (United States)

Session Chairs

- 1 Algorithms and Processing I
Jerry Silvius, U.S. Army Research Laboratory (United States)
- 2 Algorithms and Processing II
Lam H. Nguyen, U.S. Army Research Laboratory (United States)
- 3 Systems and Applications I
Ann Marie Raynal, Sandia National Laboratories (United States)
- 4 Systems and Applications II
David Tahmouh, U.S. Army Research Laboratory (United States)
- 5 Special Topic: Through-the-Wall Sensing
Gregory J. Mazzaro, U.S. Army Research Laboratory (United States)
Anthony F. Marfione, U.S. Army Research Laboratory (United States)
- 6 Components and Technology
Seong-Hwoon Kim, Raytheon Space & Airborne Systems
(United States)
- 7 Algorithms and Processing III
Fauzia Ahmad, Villanova University (United States)
- 8 Phenomenology
Gregory J. Mazzaro, U.S. Army Research Laboratory (United States)
- 9 Special Topic: Noise Radar I
Ram M. Narayanan, The Pennsylvania State University (United States)
- 10 Special Topic: Noise Radar II
Mark Govoni, U.S. Army Research, Development and Engineering
Command (United States)
