Volume 8374

Proceedings of SPIE, 0277-786X, v. 8374

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Next-Generation Spectroscopic Technologies V, edited by Mark A. Druy, Richard A. Crocombe.
Proc. of SPIE Vol. 8374, 837401 · © 2012 SPIE · CCC code: 0277-786X/12/\$18 · doi: 10.1117/12.979220

Proc. of SPIE Vol. 8374 837401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 SPECTROMETERS IN THE FIELD

- 8374 02 **Progress in fieldable laser-induced breakdown spectroscopy (LIBS)** [8374-01]
A. W. Miziolek, U.S. Army Research Lab. (United States)
- 8374 03 **Field portable time resolved SORS sensor for the identification of concealed hazards**
[8374-02]
B. Cletus, W. Olds, E. L. Izake, S. Sundarajoo, P. M. Fredericks, E. Jaatinen, Queensland Univ.
of Technology (Australia)
- 8374 04 **Miniature near-infrared (NIR) spectrometer engine for handheld applications** [8374-03]
N. A. O'Brien, C. A. Hulse, D. M. Friedrich, F. J. Van Milligen, M. K. von Gunten, JDSU (United
States); F. Pfeifer, H. W. Siesler, Univ. of Duisburg-Essen (Germany)
- 8374 06 **Advances in handheld FT-IR instrumentation** [8374-05]
J. Arnó, L. Cardillo, K. Judge, M. Frayer, M. Frunzi, P. Hetherington, D. Levy, K. Oberndorfer,
W. Percec, T. Sauer, J. Stein, E. Zuidema, Smiths Detection (United States)

SESSION 2 ENABLING TECHNOLOGIES

- 8374 07 **Investigation of optically injected charge carrier dynamics in silicon wafers using terahertz
spectroscopic imaging** [8374-06]
T. Arnold, M. De Biasio, W. Muehleisen, R. Leitner, CTR Carinthian Tech Research AG (Austria)
- 8374 08 **Time-resolved absolute spectral analysis of IR countermeasure flares and its experimental
validation by using an optical emission spectrometer with PbSe array detector** [8374-08]
H. Lee, C. Oh, J. W. Hahn, Yonsei Univ. (Korea, Republic of)

SESSION 3 IMAGING AND CHEMOMETRICS I

- 8374 09 **Multi- and hyperspectral UAV imaging system for forest and agriculture applications**
[8374-09]
J. Mäkynen, H. Saari, C. Holmlund, R. Mannila, T. Antila, VTT Technical Research Ctr. of
Finland (Finland)
- 8374 0A **Simple XRD algorithm for direct determination of cotton crystallinity** [8374-10]
Y. Liu, USDA Agricultural Research Service(United States); D. Thibodeaux, Consultant (United
States); G. Gamble, P. Bauer, USDA Agricultural Research Service (United States);
D. VanDerveer, Clemson Univ. (United States)

- 8374 0B **A small, low-cost, hyperspectral imaging FTIR sensor design for standoff detection applications** [8374-11]
T. Gruber, Jr., B. Moore, B. Tercha, R. Bowe, MESH, Inc. (United States)
- 8374 0C **Video-rate chemical identification and visualization with snapshot hyperspectral imaging** [8374-12]
A. Bodkin, Bodkin Design & Engineering, LLC (United States); A. Sheinis, Univ. of Wisconsin-Madison (United States); A. Norton, Norton Engineered Optics (United States); J. Daly, C. Roberts, Bodkin Design & Engineering, LLC (United States); S. Beaven, J. Weinheimer, Space Computer Corp. (United States)
- 8374 0D **A regularized iterative reconstruction algorithm for x-ray diffraction tomography** [8374-13]
K. Chen, D. A. Castañón, Boston Univ. (United States)

SESSION 4 IMAGING AND CHEMOMETRICS II

- 8374 0E **Thermal hyperspectral chemical imaging** [8374-14]
H. Holma, T. Hyvärinen, A.-J. Mattila, I. Kormano, Specim, Spectral Imaging Ltd. (Finland)
- 8374 0F **Spectral imaging device based on a tuneable MEMS Fabry-Perot interferometer** [8374-15]
J. Antila, R. Mannila, U. Kantojärvi, C. Holmlund, A. Rissanen, I. Näkki, J. Ollila, H. Saari, VTT Technical Research Ctr. of Finland (Finland)
- 8374 0G **Narrow band SWIR hyperspectral imaging: a new approach based on volume Bragg grating** [8374-16]
M. Verhaegen, S. Lessard, S. Blais-Ouellette, Photon etc. (Canada)

SESSION 5 LASER-BASED AND CAVITY RINGDOWN SPECTROSCOPY

- 8374 0H **Mid-IR interband cascade lasers operating with < 30 mW of input power** [8374-17]
W. W. Bewley, C. D. Merritt, C. S. Kim, U.S. Naval Research Lab. (United States); M. Kim, Sotera Defense Solutions, Inc. (United States); C. L. Canedy, I. Vurgaftman, J. Abell, J. R. Meyer, U.S. Naval Research Lab. (United States)
- 8374 0I **Monolithic integrated-optic TDLAS sensors** [8374-18]
M. B. Frish, D. R. Scherer, R. T. Wainner, M. G. Allen, Physical Sciences Inc. (United States); R. Shankar, M. Lončar, Harvard Univ. (United States)
- 8374 0K **Monolithic widely tunable quantum cascade laser** [8374-20]
K. M. Lascola, R. P. Leavitt, J. D. Bruno, J. L. Bradshaw, J. T. Pham, F. J. Towner, Maxion Technologies, Inc. (United States)
- 8374 0L **High-performance interband cascade lasers emitting between 3.3 and 3.5 microns** [8374-21]
J. D. Bruno, R. P. Leavitt, J. L. Bradshaw, K. M. Lascola, J. T. Pham, F. J. Towner, Maxion Technologies, Inc. (United States)

- 8374 OM **Detection and quantification of explosives and CWAs using a handheld widely tunable quantum cascade laser** [8374-22]
E. R. Deutsch, F. G. Haibach, A. Mazurenko, Block MEMS (United States)

SESSION 6 RAMAN, SERS, AND SECURITY APPLICATIONS

- 8374 ON **A time-resolved 128x128 SPAD camera for laser Raman spectroscopy** [8374-23]
Y. Maruyama, Delft Univ. of Technology (Netherlands); J. Blacksberg, Jet Propulsion Lab. (United States); E. Charbon, Delft Univ. of Technology (Netherlands)
- 8374 OO **Identification of targets at remote distances with Raman spectroscopy** [8374-24]
R. Cox, B. Williams, M. H. Harpster, DeltaNu, Inc. (United States)
- 8374 OP **Fiber-optic Raman probe based on single-crystal sapphire fiber** [8374-25]
T. Liu, M. Han, C. Raml, D. R. Alexander, X. He, Y. Lu, Univ. of Nebraska-Lincoln (United States)
- 8374 OQ **Portable Raman spectroscopy using retina-safe (1550 nm) laser excitation** [8374-26]
C. Brouillette, W. Smith, M. Donahue, H. Huang, C. Shende, A. Sengupta, F. Inscore, M. Patient, S. Farquharson, Real-Time Analyzers, Inc. (United States)
- 8374 OS **Industrial Raman mapping spectroscopy for mining applications** [8374-28]
M. De Biasio, T. Arnold, G. McGunnigle, R. Leitner, A. Tortschanoff, Carinthian Tech Research AG (Austria); N. Fietz, L. Weitzkämper, RWTH Aachen (Germany); D. Balthasar, V. Rehrmann, TOMRA Sorting GmbH (Germany)

SESSION 7 NOVEL SPECTROMETERS I

- 8374 OT **Pulsed and high-speed FTIR spectroscopy** [8374-36]
S. P. Heussler, National Univ. of Singapore (Singapore); H. O. Moser, Karlsruhe Institute of Technology (Germany); S. M. P. Kalaiselvi, C. Quan, C. J. Tay, S. P. Turaga, M. Breese, National Univ. of Singapore (Singapore)
- 8374 OU **High-speed resonant FTIR spectrometer** [8374-30]
J. Rentz Dupuis, D. Carlson, D. J. Mansur, S. P. Newbry, R. Vaillancourt, J. R. Engel, OPTRA, Inc. (United States); B. Engel, Nelson Air Corp. (United States)
- 8374 OV **A new high-resolution, high-throughput spectrometer: first experience as applied to Raman spectroscopy** [8374-31]
J. T. Meade, Arjae Spectral (Canada); B. B. Behr, Arjae Spectral (United States); A. R. Hajian, Tornado Medical Systems (Canada)

SESSION 8 NOVEL SPECTROMETERS II

- 8374 OW **Realization of a hybrid-integrated MEMS scanning grating spectrometer** [8374-32]
T. Pügner, J. Knobbe, H. Gröger, H. Schenk, Fraunhofer Institute for Photonic Microsystems (Germany)

- 8374 0X **Widely tunable Fabry-Perot filter based MWIR and LWIR microspectrometers** [8374-33]
M. Ebermann, N. Neumann, InfraTec GmbH (Germany); K. Hiller, Chemnitz Univ. of Technology (Germany); E. Gittler, Jenoptik Optical Systems GmbH (Germany); M. Meinig, S. Kurth, Fraunhofer ENAS (Germany)
- 8374 0Y **A compact optical spectrometer based on a single-grating Fresnel diffractive optical element** [8374-34]
C. Yang, P. S. Edwards, K. Shi, Z. Liu, The Pennsylvania State Univ. (United States)
- 8374 0Z **Compact low-cost waveguide-based optical spectrometer for detection of chemical/biological agents** [8374-35]
B. Bergner, Spectrum Scientific, Inc. (United States); P. Kumar, Wayne State Univ. (United States); D. Cook, Spectrum Scientific, Inc (United States); I. Avrutsky, Wayne State Univ. (United States)
- 8374 10 **Fourier transform infrared phase shift cavity ring down spectrometer** [8374-29]
J. Rentz Dupuis, J. R. Engel, OPTRA, Inc. (United States)
- 8374 11 **Chemical imaging using infrared photothermal microspectroscopy** [8374-37]
R. Furstenberg, C. A. Kendziora, M. R. Papantonakis, V. Nguyen, R. A. McGill, U.S. Naval Research Lab. (United States)

POSTER SESSION

- 8374 13 **Snapshot spectral imaging using optimized diffractive optical elements** [8374-39]
M. De Biasio, T. Arnold, A. Tortschanoff, CTR Carinthian Tech Research AG (Austria); A. Hermerschmidt, HOLOEYE Photonics AG (Germany); R. Leitner, CTR Carinthian Tech Research AG (Austria)
- 8374 14 **NO and N₂O detection employing cavity-enhanced technique** [8374-40]
J. Wojtas, R. Medrzycki, B. Rutecka, J. Mikołajczyk, M. Nowakowski, D. Szabra, M. Gutowska, Military Univ. of Technology (Poland); T. Stacewicz, Univ. of Warsaw (Poland); Z. Bielecki, Military Univ. of Technology (Poland)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

Mark A. Druy, Physical Sciences Inc. (United States)

Richard A. Crocombe, Thermo Fisher Scientific Inc. (United States)

Program Committee

John Marcell Dell, The University of Western Australia (Australia)

Richard D. Driver, Headwall Photonics Inc. (United States)

Michael B. Frish, Physical Sciences Inc. (United States)

David M. Haaland, Spectral Resolutions (United States)

Frederick G. Haibach, Block Engineering, LLC (United States)

Martin Kraft, Carinthian Tech Research AG (Austria)

Jouko O. Malinen, VTT Technical Research Centre of Finland (Finland)

Curtis A. Marcott, Light Light Solutions, LLC (United States)

Ellen V. Miseo, Analytical Answers, Inc. (United States)

David W. Schiering, Smiths Detection (United States)

Eric B. Takeuchi, Daylight Solutions Inc. (United States)

Christopher J. White, Active Spectrum, Inc. (United States)

Session Chairs

- 1 Spectrometers in the Field
Mark A. Druy, Physical Sciences Inc. (United States)
- 2 Enabling Technologies
Michael Radunsky, Daylight Solutions Inc. (United States)
- 3 Imaging and Chemometrics I
Richard A. Crocombe, Thermo Fisher Scientific Inc. (United States)
- 4 Imaging and Chemometrics II
Richard A. Crocombe, Thermo Fisher Scientific Inc. (United States)

- 5 Laser-based and Cavity Ringdown Spectroscopy
Michael B. Frish, Physical Sciences Inc. (United States)
- 6 Raman, SERS, and Security Applications
David W. Schiering, Smiths Detection (United States)
- 7 Novel Spectrometers I
Richard A. Crocombe, Thermo Fisher Scientific Inc. (United States)
- 8 Novel Spectrometers II
Frederick G. Haibach, Block Engineering, LLC (United States)

Introduction

The past twenty years have seen a massive investment in photonics, electronics and MEMS, aimed at developing new telecommunications capabilities and innovative consumer products. These investments have led to advances in miniature optics, light sources, tunable filters, array detectors, fiber optic sensors, and a range of other photonic devices, across the whole electromagnetic spectrum, along with technologies for their mass production. In addition, there have been remarkable developments in handheld consumer electronics (cell phones, RF technology, processors, operating systems, displays, user interfaces, memory, Bluetooth, WiFi, cameras, accelerometers, GPS, etc.). All of these advances are increasingly being exploited in new spectroscopic instruments, and are now poised to be the basis of next generation handheld scientific instruments.

Portable and handheld instruments are being developed that are often more sensitive and selective, smaller, cheaper, and more robust than their laboratory predecessors. Concurrent improvements in analytical theory, data analysis methods and portable processors enable these spectroscopic devices to give specific, actionable, answers to their non-specialist operators. Spectroscopy-based systems are now making critical judgments in environments and applications that were unreachable twenty years ago, from hazardous materials to the operating theater, and from field geologists to customs and border personnel.

Advances in array detectors (CCD, CID, InGaAs, InSb, MCT, CMOS, etc.) are enabling a new generation of faster imaging spectrometers, with both laboratory and field applications. Lower-cost infrared arrays have been developed, employing MEMS techniques. Again, advances in laser sources, particularly the mid-infrared are for the first time being used in combination with advances in detector technology to create new spectroscopic platforms.

The emphasis in this conference is on advanced technologies for spectroscopic instrumentation, particularly the infrared, near-infrared, and Raman molecular techniques, but also including advances enabling miniature and portable spectrometers across the electromagnetic spectrum, including x-ray fluorescence, teraHertz, electron spin resonance, nuclear magnetic resonance and mass spectrometry.

This conference premiered at Optics East 2007 in Boston, MA and is now part of the Defense Sensing & Security Symposium. In 2012, the conference spanned two days, and was divided into sessions focusing on: Spectrometers in the Field; Enabling Technologies; Imaging and Chemometrics; Laser-Based and Cavity Ringdown Spectroscopy; Raman, SERS and Security Applications; and Novel

Spectrometers. In all 38 papers were presented, and we are pleased to be able to bring you 35 of them in these proceedings.

On behalf of our program committee members, we hope that we can count on your participation in a future Next-Generation Spectroscopic Technologies conference.

Mark A. Druy
Richard A. Crocombe
