SPIE

Volume 8398

Proceedings of SPIE, 0277-786X, v. 8398

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optical Pattern Recognition XXIII*, edited by David P. Casasent, Tien-Hsin Chao, Proceedings of SPIE Vol. 8398 (SPIE, Bellingham, WA, 2012) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 INVITED SESSION ON OPTICAL PATTERN RECOGNITION

- 8398 02 **Identification and detection of oil and oil-derived substances at the surface and subsurface levels via hyperspectral imaging (Invited Paper)** [8398-01]
M. S. Alam, R. P. Gollapalli, P. Sidike, Univ. of South Alabama (United States)
- 8398 03 **A self-organized learning strategy for object recognition by an embedded line of attraction (Invited Paper)** [8398-02]
M.-J. Seow, BRS Labs. (United States); A. T. Alex, V. K. Asari, Univ. of Dayton (United States)
- 8398 04 **A compressive sensor concept for target detection (Invited Paper)** [8398-03]
A. Mahalanobis, R. Muise, Lockheed Martin Missiles and Fire Control (United States)

SESSION 3 OBJECT CLASSIFICATION AND DETECTION

- 8398 06 **Optimization of support vector machine (SVM) for object classification** [8398-05]
M. Scholten, California State Univ. (United States); N. Dhirga, Univ. of Michigan (United States); T. T. Lu, T.-H. Chao, Jet Propulsion Lab. (United States)
- 8398 07 **Active imaging processing technique for sensor data reconstruction and identification** [8398-07]
A. Sokolnikov, Visual Solutions and Applications (United States)
- 8398 08 **A computationally efficient appearance-based algorithm for geospatial object detection** [8398-08]
D. Arslan, A. A. Alatan, Middle East Technical Univ. (Turkey)

SESSION 3 CORRELATORS FOR OPTICAL PATTERN RECOGNITION

- 8398 09 **Towards all-numerical implementation of correlation** [8398-09]
A. Alfalou, Institut Supérieur de l'Electronique et du Numerique (France); C. Brosseau, Lab-STICC, CNRS, Univ. de Bretagne Occidentale (France); B.-E. Benkelfat, Institut Télécom, CNRS (France); S. Qasmi, I. Léonard, Institut Supérieur de l'Electronique et du Numerique (France)
- 8398 0A **Sensitivity of optical correlation to color change of target images** [8398-10]
M. Elbouz, A. Alfalou, Institut Supérieur de l'Electronique et du Numerique (France); C. Brosseau, Lab-STICC, CNRS, Univ. de Bretagne Occidentale (France); M. S. Alam, Univ. of South Alabama (United States); S. Qasmi, Y. Ouerhani, Institut Supérieur de l'Electronique et du Numerique (France)

- 8398 0B **Target tracking using nonlinear reference phase-encoded joint transform correlation** [8398-11]
M. N. Islam, Farmingdale State College, SUNY (United States); V. K. Asari, Univ. of Dayton (United States); M. A. Karim, Old Dominion Univ. (United States); M. S. Alam, Univ. of South Alabama (United States)
- 8398 0C **Optical multichannel correlators for high-speed targets detection and localization** [8398-12]
V. Perju, National Council for Accreditation and Attestation (Moldova); D. Casasent, Carnegie Mellon Univ. (United States)

SESSION 4 CORRELATION FILTERS FOR OPTICAL PATTERN RECOGNITION

- 8398 0D **Improving OT-MACH filter performance for target recognition applications with the use of a Rayleigh distribution filter** [8398-13]
A. Alkandri, N. Bangalore, A. Gardezi, P. Birch, R. Young, C. Chatwin, Univ. of Sussex (United Kingdom)
- 8398 0E **Composite wavelet filters for enhanced automated target recognition** [8398-14]
J. N. Chiang, Univ. of California, Los Angeles (United States); Y. Zhang, Onescreen Inc. (United States); T. T. Lu, T.-H. Chao, Jet Propulsion Lab. (United States)
- 8398 0G **Variants of minimum correlation energy filters: comparative study** [8398-16]
N. N. Evfikhiev, D. V. Shaulskiy, E. Yu. Zlokazov, R. S. Starikov, National Research Nuclear Univ. MEPhI (Russian Federation)

SESSION 5 TECHNIQUES AND APPLICATIONS

- 8398 0H **Compact liquid crystal waveguide Fourier transform spectrometer for real-time gas sensing in NIR spectral band** [8398-17]
T.-H. Chao, T. T. Lu, Jet Propulsion Lab. (United States); S. R. Davis, S. D. Rommel, G. Farca, B. Luey, A. Martin, M. H. Anderson, Vescent Photonics Inc. (United States)
- 8398 0I **A secure approach for encrypting and compressing biometric information employing orthogonal code and steganography** [8398-18]
M. F. Islam, George Washington Univ. (United States); M. N. Islam, Farmingdale State College, SUNY (United States)
- 8398 0J **Spatial domain sharpening of color image employing bidimensional empirical mode decomposition** [8398-19]
S. M. A. Bhuiyan, Univ. of South Alabama (United States); J. F. Khan, Tuskegee Univ. (United States); M. S. Alam, Univ. of South Alabama (United States)
- 8398 0K **Automated detection of semagram-laden images using adaptive neural networks** [8398-20]
P. S. Cerkez, Nova Southeastern Univ. (United States) and DCS Corp. (United States); J. D. Cannady, Nova Southeastern Univ. (United States)

- 8398 OM **A new time-adaptive discrete bionic wavelet transform for enhancing speech from adverse noise environment** [8398-22]
S. Palaniswamy, Bannari Amman Institute of Technology (India); P. Duraisamy, Univ. of North Texas (United States); M. S. Alam, Univ. of South Alabama (United States); X. Yuan, Univ. of North Texas (United States)

POSTER SESSION

- 8398 ON **Design and simulation of a multiport neural network heteroassociative memory for optical pattern recognitions** [8398-23]
V. Krasilenko, Vinnitsa Social Economy Institute (Ukraine); A. Lazarev, Vinnitsa National Technical Univ. (Ukraine); S. Grabovlyak, Vinnitsa Social Economy Institute (Ukraine)
- 8398 OO **The investigation of the Fourier spectrum-based image complexity metrics for recognition applications** [8398-24]
V. Perju, National Council for Accreditation and Attestation (Moldova); D. Casasent, Carnegie Mellon Univ. (United States)
- 8398 OP **Hybrid optical-digital encryption system based on wavefront coding paradigm** [8398-25]
M. V. Konnik, The Univ. of Newcastle (Australia)
- 8398 OQ **Development of a novel image processing method: the LPED method** [8398-26]
C. J. Hu, Southern Illinois Univ. Carbondale (United States) and SunnyFuture (United States)
- 8398 OR **Using wavefront coding technique as an optical encryption system: reliability analysis and vulnerabilities assessment** [8398-27]
M. V. Konnik, The Univ. of Newcastle (Australia)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

David P. Casasent, Carnegie Mellon University (United States)

Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

Program Committee

Mohammad Showkat Alam, University of South Alabama (United States)

Don A. Gregory, The University of Alabama in Huntsville (United States)

Bahram Javidi, University of Connecticut (United States)

B. V. K. Vijaya Kumar, Carnegie Mellon University (United States)

Yunlong Sheng, Université Laval (Canada)

Robert C. Stibbl, Jet Propulsion Laboratory (United States)

Ashit Talukder, National Institute of Standards and Technology (United States)

Shizhuo Yin, The Pennsylvania State University (United States)

Rupert C. Young, University of Sussex (United Kingdom)

Session Chairs

- 1 Invited Session on Optical Pattern Recognition
David P. Casasent, Carnegie Mellon University (United States)
- 2 Object Classification and Detection
Tien-Hsin Chao, Jet Propulsion Laboratory (United States)
- 3 Correlators for Optical Pattern Recognition
Rupert C. Young, University of Sussex (United Kingdom)
David P. Casasent, Carnegie Mellon University (United States)
- 4 Correlation Filters for Optical Pattern Recognition
Ashit Talukder, National Institute of Standards and Technology (United States)
Rupert C. Young, University of Sussex (United Kingdom)

- 5 Techniques and Applications
 Mohammad Showkat Alam, University of South Alabama (United States)
 Tien-Hsin Chao, Jet Propulsion Laboratory (United States)
