Volume 8442

Proceedings of SPIE 0277-786X, V.8442

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Space Telescopes and Instrumentation 2012: Optical, Infrared, and Millimeter Wave, edited by Mark C. Clampin, Giovanni G. Fazio, Howard A. MacEwen, Jacobus M. Oschmann, Jr., Proc. of SPIE Vol. 8442, 844201
© 2012 SPIE • CCC code: 0277-786/12/\$18 • doi: 10.1117/12.2006272

Proc. of SPIE Vol. 8442 844201-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

xxxiii	Conference Committee
xxxvii	Introduction

PLENARY SESSION

8442 03	The cosmic microwave background: observing directly the early universe (Plenary Paper) [8442-506] P. de Bernardis, S. Masi, Univ. degli Studi di Roma La Sapienza (Italy)
---------	--

SESSION 1 EXOPLANET/CORONAGRAPHIC MISSIONS AND TECHNOLOGY I

8442 04	Review of small-angle coronagraphic techniques in the wake of ground-based second-generation adaptive optics systems (Invited Paper) [8442-1] D. Mawet, European Southern Observatory (Chile) and Jet Propulsion Lab. (United States); L. Pueyo, The Johns Hopkins Univ. (United States); P. Lawson, Jet Propulsion Lab. (United States); L. Mugnier, ONERA (France); W. Traub, Jet Propulsion Lab. (United States); A. Boccaletti, LESIA, CNRS, Observatoire de Paris (France); J. Trauger, Jet Propulsion Lab. (United States); S. Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany); E. Serabyn, Jet Propulsion Lab. (United States); J. Milli, European Southern Observatory (Chile) and Institut de Planétologie et d'Astrophysique de Grenoble (France); R. Belikov, NASA Ames Research Ctr. (United States); M. Kasper, European Southern Observatory (Germany); P. Baudoz, LESIA, CNRS, Observatoire de Paris (France); B. Macintosh, Lawrence Livermore National Lab. (United States); C. Marois, NRC Herzberg Institute of Astrophysics (Canada); B. Oppenheimer, American Museum of Natural History (United States); H. Barrett, College of Optical Sciences, The Univ. of Arizona (United States); J.-L. Beuzit, Institut de Planétologie et d'Astrophysique de Grenoble (France); N. Devaney, National Univ. of Ireland, Galway (Ireland); J. Girard, European Southern Observatory (Chile); O. Guyon, Subaru Telescope, National Astronomical Observatory of Japan (United States); J. Krist, B. Mennesson, Jet Propulsion Lab. (United States); D. Mouillet, Institut de Planétologie et d'Astrophysique de Grenoble (France); N. Murakami, Hokkaido Univ. (Japan); L. Poyneer, D. Savransky, Lawrence Livermore National Lab. (United States); C. Verinaud, Institut de Planétologie et d'Astrophysique de Grenoble (France); J. K. Wallace, Jet Propulsion Lab. (United States)
---------	--

- 8442 05 **Coronagraph focal-plane phase masks based on photonic crystal technology: recent progress and observational strategy** [8442-2]
N. Murakami, Hokkaido Univ. (Japan); J. Nishikawa, National Astronomical Observatory of Japan (Japan); W. A. Traub, Jet Propulsion Lab. (United States); D. Mawet, Jet Propulsion Lab. (United States) and European Southern Observatory (Chile); D. C. Moody, B. D. Kern, J. T. Trauger, E. Serabyn, Jet Propulsion Lab. (United States); S. Hamaguchi, F. Oshiyama, M. Sakamoto, A. Ise, K. Oka, N. Baba, Hokkaido Univ. (Japan); H. Murakami, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); M. Tamura, National Astronomical Observatory of Japan (Japan)
- 8442 06 **Status of the assessment phase of the ESA M3 mission candidate EChO** [8442-100]
L. Puig, K. G. Isaak, M. Linder, I. Escudero, D. Martin, P.-E. Crouzet, L. Gaspar Venancio, A. Zuccaro Marchi, European Space Research and Technology Ctr. (Netherlands)
- 8442 07 **The achromatic chessboard, a new concept of a phase shifter for nulling interferometry: IV. Advanced experimental measurements** [8442-179]
D. Pickel, LESIA, CNRS, Observatoire de Paris, Univ. Paris Diderot (France) and LUTH, Observatoire de Paris à Meudon, CNRS, Univ. Paris Diderot (France); D. Rouan, LESIA, CNRS, Observatoire de Paris, Univ. Paris Diderot (France); D. Pelat, LUTH, CNRS, Observatoire de Paris, Univ. Paris Diderot (France); J.-M. Reess, O. Dupuis, LESIA, CNRS, Observatoire de Paris, Univ. Paris Diderot (France); F. Chemla, M. Cohen, GEPI, Observatoire de Paris, CNRS, Univ. Paris Diderot (France)

SESSION 2 EXOPLANET/CORONAGRAPHIC MISSIONS AND TECHNOLOGY II

- 8442 08 **High contrast vacuum nuller testbed (VNT) contrast, performance, and null control** [8442-5]
R. G. Lyon, M. Clampin, NASA Goddard Space Flight Ctr. (United States); P. Petrone, Sigma Space Corp. (United States); U. Mallik, T. Madison, M. R. Bolcar, NASA Goddard Space Flight Ctr. (United States)
- 8442 09 **EXCEDE technology development I: first demonstrations of high contrast at $1.2 \lambda/D$ for an Explorer space telescope mission** [8442-6]
R. Belikov, E. Pluzhnik, F. C. Witteborn, T. P. Greene, D. H. Lynch, P. T. Zell, NASA Ames Research Ctr. (United States); G. Schneider, O. Guyon, The Univ. of Arizona (United States); D. Tenerelli, Lockheed Martin Space Systems Co. (United States)
- 8442 0A **Technology demonstration of starshade manufacturing for NASA's Exoplanet mission program** [8442-7]
N. J. Kasdin, Princeton Univ. (United States); D. Lisman, S. Shaklan, M. Thomson, E. Cady, S. Martin, L. Marchen, Jet Propulsion Lab. (United States); R. J. Vanderbei, Princeton Univ. (United States); B. Macintosh, R. E. Rudd, D. Savransky, Lawrence Livermore National Lab. (United States); J. Mikula, D. Lynch, NASA Ames Research Ctr. (United States)
- 8442 0B **Electric field reconstruction in the image plane of a high-contrast coronagraph using a set of pinholes around the Lyot plane** [8442-8]
A. Give'on, S. Shaklan, B. Kern, C. Noecker, Jet Propulsion Lab. (United States); S. Kendrick, Ball Aerospace & Technologies Corp. (United States); K. Wallace, Jet Propulsion Lab. (United States)

- 8442 0C **Broadband focal plane wavefront control of amplitude and phase aberrations** [8442-9]
T. D. Groff, N. J. Kasdin, A. Carlotti, A. J. E. Riggs, Princeton Univ. (United States)
- 8442 0D **A dark-hole correction test for the step-transmission filter based coronagraphic system** [8442-10]
J. Dou, Nanjing Institute of Astronomical Optics & Technology (China); D. Ren, Nanjing Institute of Astronomical Optics & Technology (China) and California State Univ., Northridge (United States); Y. Zhu, Nanjing Institute of Astronomical Optics & Technology (China); X. Zhang, R. Li, Nanjing Institute of Astronomical Optics & Technology (China) and Graduate Univ. of the Chinese Academy of Sciences (China)
- 8442 0E **PICTURE: a sounding rocket experiment for direct imaging of an extrasolar planetary environment** [8442-11]
C. B. Mendillo, Boston Univ. (United States); B. A. Hicks, T. A. Cook, Ctr. for Atmospheric Research, Univ. of Massachusetts Lowell (United States); T. G. Bifano, Photonics Ctr., Boston Univ. (United States); D. A. Content, NASA Goddard Space Flight Ctr. (United States); B. F. Lane, Draper Lab. (United States); B. M. Levine, Jet Propulsion Lab. (United States); D. Rabin, NASA Goddard Space Flight Ctr. (United States); S. R. Rao, Jet Propulsion Lab. (United States); R. Samuele, Northrop Grumman Corp. (United States); E. Schmidtlin, M. Shao, J. K. Wallace, Jet Propulsion Lab. (United States); S. Chakrabarti, Boston Univ. (United States)
- 8442 0F **SPICA coronagraph instrument: characterization of atmospheres and physical parameters of giant planets by direct imaging and spectroscopy** [8442-12]
T. Kotani, National Astronomical Observatory of Japan (Japan); K. Enya, T. Nakagawa, H. Matsuhara, H. Kataza, M. Kawada, M. Mita, K. Komatsu, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); H. Uchida, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); K. Fujiwara, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); S. Mitani, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); S. Sakai, K. Haze, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); H. Kaneda, S. Oyabu, D. Ishihara, Nagoya Univ. (Japan); T. Miyata, S. Sako, T. Nakamura, K. Asano, The Univ. of Tokyo (Japan); M. Tamura, National Astronomical Observatory of Japan (Japan) and GUAS (Japan); J. Nishikawa, T. Yamashita, N. Narita, National Astronomical Observatory of Japan (Japan); H. Hayano, S. Oya, Subaru Telescope, National Astronomical Observatory of Japan (United States); E. Kokubo, National Astronomical Observatory of Japan (Japan); Y. Itoh, Kobe Univ. (Japan); T. Matsuo, Kyoto Univ. (Japan); M. Fukagawa, Osaka Univ. (Japan); H. Shibai, Kyoto Univ. (Japan); M. Honda, Kanagawa Univ. (Japan); N. Baba, N. Murakami, Hokkaido Univ. (Japan); Y. K. Okamoto, Institute of Astrophysics and Planetary Sciences, Ibaraki Univ. (Japan); S. Ida, Tokyo Institute of Technology (Japan); M. Takami, Institute of Astronomy and Astrophysics (Taiwan); L. Abe, Lab. Hippolyte Fizeau, CNRS, Univ. de Nice Sophia-Antipolis (France); O. Guyon, Subaru Telescope, National Astronomical Observatory of Japan (United States); T. Yamamuro, OptCraft (Japan)

- 8442 OG **Coronagraphic imaging of debris disks from a high altitude balloon platform** [8442-13]
 S. Unwin, W. Traub, G. Bryden, P. Brugarolas, P. Chen, Jet Propulsion Lab. (United States);
 O. Guyon, National Observatory of Japan (United States); L. Hillenbrand, California Institute
 of Technology (United States); J. Krist, Jet Propulsion Lab. (United States);
 B. Macintosh, Lawrence Livermore National Lab. (United States); D. Mawet, European
 Southern Observatory (Chile); B. Mennesson, D. Moody, L. C. Roberts, Jr., Jet Propulsion
 Lab. (United States); K. Stapelfeldt, NASA Goddard Space Flight Ctr. (United States);
 D. Stuchlik, NASA Wallops Flight Facility (United States); J. Trauger, G. Vasisht, Jet Propulsion
 Lab. (United States)
- 8442 OH **ExoZodi Mapper: a starshade probe mission** [8442-14]
 T. Glassman, A. Lo, Northrop Grumman Aerospace Systems (United States)

SESSION 4 EXOPLANET/CORONAGRAPHIC MISSIONS AND TECHNOLOGY IV

- 8442 OI **SPICES: a 1.5-m space coronagraph for spectro-polarimetric characterization of cold exoplanets** [8442-15]
 A.-L. Maire, A. Boccaletti, LESIA, CNRS, Observatoire de Paris (France); J. Schneider, LUTH, CNRS, Observatoire de Paris (France); R. Galicher, NRC Herzberg Institute of Astrophysics (Canada); P. Baudoz, LESIA, CNRS, Observatoire de Paris (France); D. Stam, SRON Netherlands Institute for Space Research (Netherlands); W. Traub, Jet Propulsion Lab. (United States); P.-O. Lagage, Commissariat à l'Énergie Atomique (France); R. Gratton, INAF - Osservatorio Astronomico di Padova (Italy)
- 8442 OJ **NEAT: a spaceborne astrometric mission for the detection and characterization of nearby habitable planetary systems** [8442-16]
 F. Malbet, Institut de Planétologie et d'Astrophysique de Grenoble, CNRS, Univ. Joseph Fourier (France); R. Goullioud, Jet Propulsion Lab. (United States); P.-O. Lagage, Lab. AIM, CEA-IRFU, CNRS-INSU, Univ. Paris Diderot, CEA Saclay (France); A. Léger, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris Sud (France); M. Shao, Jet Propulsion Lab. (United States); A. Crouzier, Institut de Planétologie et d'Astrophysique de Grenoble, CNRS, Univ. Joseph Fourier (France)
- 8442 OK **Characterization of habitable exoplanets with simultaneous coronagraphy and astrometry with a single aperture telescope** [8442-17]
 O. Guyon, Steward Observatory, The Univ. of Arizona (United States) and Subaru Telescope, National Astronomical Observatory of Japan (United States) and College of Optical Sciences, The Univ. of Arizona (United States); E. Bendek, College of Optical Sciences, The Univ. of Arizona (United States); S. M. Ammons, Lawrence Livermore National Lab. (United States); M. Shao, S. Shaklan, Jet Propulsion Lab. (United States); R. A. Woodruff, Lockheed Martin Space Systems Co. (United States); R. Belikov, NASA Ames Research Ctr. (United States); T. Milster, College of Optical Sciences, The Univ. of Arizona (United States)
- 8442 OM **Direct imaging of exoEarths embedded in clumpy debris disks** [8442-19]
 D. Defrère, Max-Planck-Institut für Radioastronomie (Germany); C. Stark, Carnegie Institution of Washington (United States); K. Cahoy, I. Beerer, Massachusetts Institute of Technology (United States)

- 8442 0O **The next-generation infrared space telescope SPICA (Invited Paper)** [8442-21]
T. Nakagawa, H. Matsuhara, Y. Kawakatsu, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan)
- 8442 0P **Progress toward BLISS, the background-limited infrared-submillimeter spectrograph for SPICA** [8442-22]
C. M. Bradford, A. Beyer, Jet Propulsion Lab. (United States) and California Institute of Technology (United States); M. Kenyon, Jet Propulsion Lab. (United States); M. C. Runyan, California Institute of Technology (United States); B. Bumble, P. Echternach, Jet Propulsion Lab. (United States); T. Prouvé, California Institute of Technology (United States); W. A. Holmes, Jet Propulsion Lab. (United States); J. J. Bock, Jet Propulsion Lab. (United States) and California Institute of Technology (United States); K. Irwin, National Institute of Standards and Technology (United States)
- 8442 0Q **Mid-infrared camera and spectrometer on board SPICA** [8442-23]
H. Katata, T. Wada, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); I. Sakon, The Univ. of Tokyo (Japan); N. Kobayashi, Institute of Astronomy, The Univ. of Tokyo (Japan); Y. Sarugaku, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); N. Fujishiro, Kyoto-Sangyo Univ. (Japan); Y. Ikeda, Kyoto-Sangyo Univ. (Japan) and Photocoding (Japan); S. Oyabu, Nagoya Univ. (Japan)
- 8442 0R **The SAFARI imaging spectrometer for the SPICA space observatory** [8442-24]
P. Roelfsema, SRON Netherlands Institute for Space Research (Netherlands) and Kapteyn Astronomical Institute, Univ. of Groningen (Netherlands); M. Giard, Univ. de Toulouse (France) and Institut de Recherche en Astrophysique et Planétologie, CNRS, Univ. de Toulouse (France); F. Najarro, Instituto Nacional de Técnica Aeroespacial (Spain); K. Wafelbakker, SRON Netherlands Institute for Space Research (Netherlands); W. Jellema, SRON Netherlands Institute for Space Research (Netherlands) and Kapteyn Astronomical Institute, Univ. of Groningen (Netherlands); B. Jackson, SRON Netherlands Institute for Space Research (Netherlands); B. Swinyard, Rutherford Appleton Lab. (United Kingdom) and Univ. College London (United Kingdom); M. Audard, ISDC Data Ctr. for Astrophysics, Univ. of Geneva (Switzerland); Y. Doi, The Univ. of Tokyo (Japan); M. Griffin, Univ. of Cardiff (United Kingdom); F. Helmich, SRON Netherlands Institute for Space Research (Netherlands) and Kapteyn Astronomical Institute, Univ. of Groningen (Netherlands); F. Kerschbaum, Univ. of Vienna (Austria); M. Meyer, ETH Zürich (Switzerland); D. Naylor, Univ. of Lethbridge (Canada); H. Nielsen, Univ. of Denmark (Denmark); G. Olofsson, Univ. of Stockholm (Sweden); A. Poglitsch, Max-Planck-Institut für extraterrestrische Physik (Germany); L. Spinoglio, Istituto di Fisica dello Spazio Interplanetario (Italy); B. Vandenbussche, Katholieke Univ. Leuven (Belgium); K. Isaak, European Space Research and Technology Ctr. (Netherlands); J. R. Goicoechea, Instituto Nacional de Técnica Aeroespacial (Spain)

- 8442 OS **The optical design concept of SPICA-SAFARI** [8442-25]
 W. Jellema, SRON Netherlands Institute for Space Research (Netherlands) and Kapteyn Astronomical Institute, Univ. of Groningen (Netherlands); B. Kruizinga, H. Visser, TNO Optics (Netherlands); T. van den Dool, TNO Optomechatronics (Netherlands); C. Pastor Santos, Instituto Nacional de Técnica Aeroespacial (Spain); J. Torres Redondo, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain); M. Eggens, SRON Netherlands Institute for Space Research (Netherlands); M. Ferlet, B. Swinyard, Rutherford Appleton Lab. (United Kingdom); K. Dohlen, Lab. d'Astrophysique de Marseille, CNRS, Univ. de Provence (France); D. Griffin, Rutherford Appleton Lab. (United Kingdom); L. M. Gonzalez Fernandez, T. Belenguer, Instituto Nacional de Técnica Aeroespacial (Spain); H. Matsuhara, M. Kawada, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); Y. Doi, The Univ. of Tokyo (Japan)

SESSION 6 EUCLID/WFIRST

- 8442 OT **Euclid: ESA's mission to map the geometry of the dark universe (Invited Paper)** [8442-26]
 R. Laureijs, P. Gondoin, L. Duvet, G. Saavedra Criado, European Space Research and Technology Ctr. (Netherlands); J. Hoar, European Space Astronomy Ctr. (Spain); J. Amiaux, J.-L. Auguères, Commissariat à l'Énergie Atomique (France); R. Cole, M. Cropper, Mullard Space Science Lab., Univ. College London (United Kingdom); A. Ealet, Ctr. de Physique des Particules de Marseille (France); P. Ferruit, I. Escudero Sanz, European Space Research and Technology Ctr. (Netherlands); K. Jahnke, Max-Planck-Institut für Astronomie (Germany); R. Kohley, European Space Astronomy Ctr. (Spain); T. Maciaszek, Observatoire Astronomique de Marseille Provence (France); Y. Mellier, Institut d'Astrophysique de Paris (France); T. Oosterbroek, European Space Research and Technology Ctr. (Netherlands); F. Pasian, INAF - Osservatorio Astronomico di Trieste (Italy); M. Sauvage, Commissariat à l'Énergie Atomique (France); R. Scaramella, INAF - Osservatorio Astronomico di Roma (Italy); M. Sirianni, European Space Research and Technology Ctr. (Netherlands); L. Valenziano, INAF - IASF Bologna (Italy)
- 8442 OV **VIS: the visible imager for Euclid** [8442-28]
 M. Cropper, R. Cole, A. James, Mullard Space Science Lab., Univ. College London (United Kingdom); Y. Mellier, Institut d'Astrophysique de Paris (France); J. Martignac, Commissariat à l'Énergie Atomique (France); A.-M. Di Giorgio, Istituto di Fisica dello Spazio Interplanetario (Italy); S. Paltani, L. Genolet, ISDC Data Ctr. for Astrophysics, Univ. of Geneva (Switzerland); J.-J. Fourmond, Univ. d'Orsay (France); C. Cara, J. Amiaux, Commissariat à l'Énergie Atomique (France); P. Guttridge, D. Walton, P. Thomas, K. Rees, Mullard Space Science Lab., Univ. College London (United Kingdom); P. Pool, J. Endicott, A. Holland, J. Gow, N. Murray, e2v technologies plc (United Kingdom); L. Duvet, European Space Research and Technology Ctr. (Netherlands); J.-L. Auguères, Commissariat à l'Énergie Atomique (France); R. Laureijs, P. Gondoin, European Space Research and Technology Ctr. (Netherlands); T. Kitching, Institute for Astronomy, The Univ. of Edinburgh, Royal Observatory (United Kingdom); R. Massey, Institute for Astronomy, The Univ. of Edinburgh, Royal Observatory (United Kingdom) and Durham Univ. (United Kingdom); H. Hoekstra, Leiden Observatory, Huygens Lab. (Netherlands)

- 8442 OW **Euclid near-infrared spectrophotometer instrument concept at the end of the phase A study** [8442-29]
 E. Prieto, LAM, CNRS, Aix Marseille Univ. (France); J. Amiaux, J.-L. Auguères, J.-C. Barrière, Commissariat à l'Énergie Atomique (France); C. Bonoli, F. Bortoletto, INAF - Osservatorio Astronomico di Padova (Italy); C. Cerna, Ctr. de Physique des Particules de Marseille, CNRS, Aix Marseille Univ. (France); L. Corcione, INAF - Osservatorio Astronomico di Torino (Italy); L. Duvet, European Space Research and Technology Ctr. (Netherlands); A. Ealet, Ctr. de Physique des Particules de Marseille, CNRS, Aix Marseille Univ. (France); B. Garilli, INAF - IASF Milano (Italy); P. Gondoin, European Space Research and Technology Ctr. (Netherlands); F. Grupp, Max-Planck-Institut für extraterrestrische Physik (Germany); K. Jahnke, Max-Planck-Institut für Astronomie (Germany); R. J. Laureijs, European Space Research and Technology Ctr. (Netherlands); S. Ligi, INAF - Osservatorio Astronomico di Torino (Italy); O. Le Fèvre, LAM, CNRS, Aix Marseille Univ. (France); T. Maciaszek, Ctr. National d'Études Spatiales (France); F. Madrid, Institut d'Estudis Espacials de Catalunya (Spain); J. Martignac, Commissariat à l'Énergie Atomique (France); L. Martin, LAM, CNRS, Aix Marseille Univ. (France); G. Morgante, INAF - IASF Bologna (Italy); Y. Mellier, Institut d'Astrophysique de Paris (France); T. Pamplona, LAM, CNRS, Aix Marseille Univ. (France); R. Holmes, Max-Planck-Institut für Astronomie (Germany); R. Grange, LAM, CNRS, Aix Marseille Univ. (France); M. Riva, INAF - Osservatorio Astronomico di Brera (Italy); C. Rossin, LAM, CNRS, Aix Marseille Univ. (France); G. Seidel, Max-Planck-Institut für Astronomie (Germany); G. Smadja, Institut de Physique Nucléaire de Lyon (France); R. Toledo-Moreo, Univ. Politécnica de Cartagena (Spain); M. Trifoglio, L. Valenziano, INAF - IASF Bologna (Italy); F. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy)
- 8442 OX **The optical baseline concept of the NISP near infrared spectrometer and photometer on board of the ESA/EUCLID satellite** [8442-30]
 F. Grupp, Max-Planck-Institut für extraterrestrische Physik (Germany) and Univ. Observatory Munich (Germany); E. Prieto, Observatoire Astronomique de Marseille-Provence (France); N. Geis, A. Bode, R. Katterloher, Max-Planck-Institut für extraterrestrische Physik (Germany); R. Grange, Observatoire Astronomique de Marseille-Provence (France); V. Junk, R. Bender, Max-Planck-Institut für extraterrestrische Physik (Germany) and Univ. Observatory Munich (Germany)
- 8442 OY **First optical tests of the Euclid grisms made by photolithography** [8442-31]
 R. Grange, A. Caillat, S. Pascal, C. Ong, M. Ellouzi, E. Prieto, K. Dohlen, Lab. d'Astrophysique de Marseille, CNRS, Univ. de Provence (France)
- 8442 OZ **Euclid mission: building of a reference survey** [8442-32]
 J. Amiaux, Commissariat à l'Énergie Atomique (France); R. Scaramella, INAF - Osservatorio Astronomico di Roma (Italy); Y. Mellier, Institut d'Astrophysique de Paris (France); B. Altieri, European Space Astronomy Ctr. (Spain); C. Burigana, INAF - IASF Bologna (Italy); A. Da Silva, Ctr. de Astrofísica, Univ. do Porto (Portugal); P. Gomez, J. Hoar, European Space Astronomy Ctr. (Spain); R. Laureijs, European Space Research and Technology Ctr. (Netherlands); E. Maiorano, INAF - IASF Bologna (Italy); D. Magalhães Oliveira, Ctr. de Astrofísica, Univ. do Porto (Portugal); F. Renk, European Space Operations Ctr. (Germany); G. Saavedra Criado, European Space Research and Technology Ctr. (Netherlands); I. Tereno, Ctr. de Astronomia e Astrofísica, Univ. de Lisboa (Portugal); J. L. Auguères, Commissariat à l'Énergie Atomique (France); J. Brinchmann, Leiden Observatory, Leiden Univ. (Netherlands); M. Cropper, Mullard Space Science Lab., Univ. College London (United Kingdom); L. Duvet, European Space Research and Technology Ctr. (Netherlands); A. Ealet, Ctr. de Physique des Particules de Marseille (France); P. Franzetti, B. Garilli, INAF - IASF Milano (Italy); P. Gondoin, European Space Research and Technology Ctr.

(Netherlands); L. Guzzo, INAF - Osservatorio Astronomico di Brera (Italy); H. Hoekstra, Leiden Observatory, Leiden Univ. (Netherlands); R. Holmes, K. Jahnke, Max-Planck-Institut für Astronomie (Germany); T. Kitching, The Royal Observatory, Edinburgh (United Kingdom); M. Meneghetti, INAF - Osservatorio Astronomico di Bologna (Italy); W. Percival, Univ. of Portsmouth (United Kingdom); S. Warren, Imperial College London (United Kingdom)

- 8442 10 **Wavefront sensing for WFIRST with a linear optical model** [8442-33]
A. S. Jurling, NASA Goddard Space Flight Ctr. (United States) and Institute of Optics, Univ. of Rochester (United States); D. A. Content, NASA Goddard Space Flight Ctr. (United States)
- 8442 11 **Euclid NISP GWA and compensating mechanism** [8442-34]
M. Riva, INAF - Osservatorio Astronomico di Brera (Italy); J.-C. Barriere, CEA-Saclay (France);
D. Ferrand, Observatoire Astronomique de Marseille-Provence (France); T. Maciaszek, Ctr. National d'Études Spatiales (France); E. Prieto, Observatoire Astronomique de Marseille-Provence (France); L. Valenziano, INAF - IASF Bologna (Italy); F. M. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy)

SESSION 7 SMALL MISSIONS/EXPLORERS I

- 8442 13 **Summary of observations of the infrared camera (IRC) onboard AKARI (Invited Paper)** [8442-36]
T. Onaka, The Univ. of Tokyo (Japan); H. Matsuhara, T. Wada, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); D. Ishihara, Nagoya Univ. (Japan); Y. Ohyama, Institute of Astronomy and Astrophysics (Taiwan); I. Sakon, The Univ. of Tokyo (Japan); T. Shimonishi, The Univ. of Tokyo (Japan) and Kobe Univ. (Japan); R. Ohsawa, T. I. Mori, The Univ. of Tokyo (Japan); F. Egusa, F. Usui, S. Takita, H. Murakami, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); S. Oyabu, M. Yamagishi, T. Mori, A. Mouri, T. Kondo, S. Suzuki, H. Kaneda, Nagoya Univ. (Japan); Y. Ita, T. Ootsubo, Astronomical Institute, Tohoku Univ. (Japan)
- 8442 14 **Breakthrough capability for the NASA astrophysics explorer program: reaching the darkest sky** [8442-37]
M. A. Greenhouse, NASA Goddard Space Flight Ctr. (United States); S. W. Benson, R. D. Falck, NASA Glenn Research Ctr. (United States); D. J. Fixsen, Univ. of Maryland, College Park (United States); J. P. Gardner, J. B. Garvin, J. W. Kruk, NASA Goddard Space Flight Ctr. (United States); S. R. Oleson, NASA Glenn Research Ctr. (United States); H. A. Thronson, NASA Goddard Space Flight Ctr. (United States)
- 8442 15 **CASTOR: the Cosmological Advanced Survey Telescope for Optical and Ultraviolet Research** [8442-38]
P. Côte, Herzberg Institute of Astrophysics, National Research Council Canada (Canada); A. Scott, COM DEV Canada (Canada); M. Balogh, Univ. of Waterloo (Canada); R. Buckingham, Northeast Scape (Canada); D. Aldridge, COM DEV Canada (Canada); R. Carlberg, Univ. of Toronto (Canada); W. Chen, COM DEV Canada (Canada); J. Dupuis, Canadian Space Agency (Canada); C. Evans, COM DEV Canada (Canada); L. Drissen, Univ. de Laval (Canada); W. Fraser, Herzberg Institute of Astrophysics, National Research Council Canada (Canada); F. Grandmont, ABB Bomem, Inc. (Canada); P. Harrison, Magellan Aerospace (Canada); J. Hutchings, J. J. Kavelaars, Herzberg Institute of Astrophysics, National Research Council Canada (Canada); J.-T. Landry, ABB Bomem, Inc.

(Canada); C. Lange, D. Laurin, Canadian Space Agency (Canada); T. Patel, V. Pillay, Magellan Aerospace (Canada); L. Piche, A. Rader, COM DEV Canada (Canada); C. Robert, Univ. de Laval (Canada); M. Sawicki, R. Sorba, Saint Mary's Univ. (Canada); G. Theriault, ABB Bomem, Inc. (Canada); L. Van Waerbeke, The Univ. of British Columbia (Canada)

SESSION 8 SMALL MISSIONS/EXPLORERS II

- 8442 19 **LiteBIRD: a small satellite for the study of B-mode polarization and inflation from cosmic background radiation detection** [8442-42]
M. Hazumi, High Energy Accelerator Research Organization (Japan) and The Graduate Univ. for Advanced Studies (Japan); J. Borrill, Lawrence Berkeley National Lab. (United States); Y. Chinone, High Energy Accelerator Research Organization (Japan); M. A. Dobbs, McGill Univ. (Canada); H. Fuke, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); A. Ghribi, Univ. of California, Berkeley (United States); M. Hasegawa, K. Hattori, High Energy Accelerator Research Organization (Japan); M. Hattori, Tohoku Univ. (Japan); W. L. Holzapfel, Univ. of California, Berkeley (United States); Y. Inoue, The Graduate Univ. for Advanced Studies (Japan); K. Ishidoshiro, High Energy Accelerator Research Organization (Japan); H. Ishino, Okayama Univ. (Japan); K. Karatsu, National Astronomical Observatory of Japan (Japan); N. Katayama, IPMU, The Univ. of Tokyo (Japan); I. Kawano, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); A. Kibayashi, Y. Kibe, Okayama Univ. (Japan); N. Kimura, High Energy Accelerator Research Organization (Japan); K. Koga, RIKEN (Japan); E. Komatsu, The Univ. of Texas at Austin (United States); A. T. Lee, Univ. of California, Berkeley (United States); H. Matsuhara, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); T. Matsumura, High Energy Accelerator Research Organization (Japan); S. Mima, Okayama Univ. (Japan); K. Mitsuda, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); H. Morii, High Energy Accelerator Research Organization (Japan); S. Murayama, Yokohama National Univ. (Japan); M. Nagai, R. Nagata, High Energy Accelerator Research Organization (Japan); S. Nakamura, K. Natsume, Yokohama National Univ. (Japan); H. Nishino, Univ. of California, Berkeley (United States); A. Noda, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); T. Noguchi, National Astronomical Observatory of Japan (Japan); I. Ohta, Kinki Univ. (Japan); C. Otani, RIKEN (Japan); P. L. Richards, Univ. of California, Berkeley (United States); S. Sakai, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); N. Sato, High Energy Accelerator Research Organization (Japan); Y. Sato, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); Y. Sekimoto, National Astronomical Observatory of Japan (Japan); A. Shimizu, The Graduate Univ. for Advanced Studies (Japan); K. Shinozaki, H. Sugita, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); A. Suzuki, Univ. of California, Berkeley (United States); T. Suzuki, O. Tajima, High Energy Accelerator Research Organization (Japan); S. Takada, Univ. of Tsukuba (Japan); Y. Takagi, Yokohama National Univ. (Japan); Y. Takei, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); T. Tomaru, High Energy Accelerator Research Organization (Japan); Y. Uzawa, National Astronomical Observatory of Japan (Japan); H. Watanabe, The Graduate Univ. for Advanced Studies (Japan); N. Yamasaki, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); M. Yoshida, High Energy Accelerator Research Organization (Japan); T. Yoshida, ISAS, Institute of Space and Aeronautical Science, Japan Aerospace

Exploration Agency (Japan); K. Yotsumoto, ARD, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan)

8442 1A **WISH for deep and wide NIR surveys [8442-43]**

T. Yamada, Astronomical Institute, Tohoku Univ. (Japan); I. Iwata, Subaru Telescope, National Astronomical Observatory of Japan (United States); M. Ando, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); M. Doi, Institute for Astronomy, The Univ. of Tokyo (Japan); T. Goto, Institute for Astronomy, Univ. of Hawai'i (United States); Y. Ikeda, Photocoding Inc. (Japan); M. Imanishi, Subaru Telescope, National Astronomical Observatory of Japan (United States); A. K. Inoue, Osaka Sangyo Univ. (Japan); S. Iwamura, MRJ (Japan); N. Kawai, Tokyo Institute of Technology (Japan); M. A. R. Kobayashi, National Astronomical Observatory of Japan (Japan); T. Kodama, Subaru Telescope, National Astronomical Observatory of Japan (Japan); Y. Komiyama, National Astronomical Observatory of Japan (Japan); M. Kubo, Astronomical Institute, Tohoku Univ. (Japan); H. Matsuhara, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); K. Mawatari, Astronomical Institute, Tohoku Univ. (Japan); Y. Matsuoka, Nagoya Univ. (Japan); T. Morokuma, Institute of Astronomy, The Univ. of Tokyo (Japan); H. Nakaya, National Astronomical Observatory of Japan (Japan); K. Ohta, Kyoto Univ. (Japan); A. Okamoto, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); S. Oyabu, Nagoya Univ. (Japan); Y. Sato, H. Sugita, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); R. Tsutsui, Research Ctr. for the Early Universe, The Univ. of Tokyo (Japan); C. Tokoku, Institute of Cosmic Ray Research, The Univ. of Tokyo (Japan); J. Toshikawa, S. Tsuneta, National Astronomical Observatory of Japan (Japan); T. Wada, Institute of Space and Aeronautical Science, Japan Aerospace Exploration Agency (Japan); K. Yabe, National Astronomical Observatory of Japan (Japan); N. Yasuda, Kavli Institute for the Physics and Mathematics of the Universe, The Univ. of Tokyo (Japan); D. Yonetoku, Kanazawa Univ. (Japan)

8442 1B **The i-INSPIRE satellite: a university pico-satellite project [8442-44]**

L. M. R. Fogarty, S. Z. A. Xiao, J. Funamoto, I. H. Cairns, J. Bland-Hawthorn, X. Wu, C. H. Betters, S. G. Leon-Saval, A. G. Monger, The Univ. of Sydney (Australia)

8442 1C **FalconSAT-7: a membrane photon sieve CubeSat solar telescope [8442-45]**

G. Andersen, O. Asmolov, M. E. Dearborn, M. G. McHarg, U.S. Air Force Academy (United States)

8442 1D **A conceptual design of a near infrared satellite for PAH survey [8442-46]**

C. Xu, Shanghai Institute of Technical Physics (China); J. Deng, National Astronomical Observatories (China); Y. Zhang, Institute of Microsystem and Information Technology (China)

- 8442 1F **The Exoplanet Characterization Observatory (EChO): performance model *EclipseSim* and applications** [8442-48]
 R. van Boekel, Max-Planck-Institut für Astronomie (Germany); B. Benneke, Massachusetts Institute of Technology (United States); K. Heng, Institute for Astronomy, ETH Zürich (Switzerland); R. Hu, Massachusetts Institute of Technology (United States); N. Madhusudhan, Yale Univ. (United States); S. Quanz, Institute for Astronomy, ETH Zürich (Switzerland); Y. Bétrémieux, J. Bouwman, G. Chen, Max-Planck-Institut für Astronomie (Germany); L. Decin, Institute of Astronomy, Katholieke Univ. Leuven (Belgium); R. de Kok, SRON Netherlands Institute for Space Research (Netherlands); A. Glauser, Max-Planck-Institut für Astronomie (Germany); M. Güdel, Univ. of Vienna (Austria); P. Hauschildt, Hamburger Sternwarte (Germany); T. Henning, Max-Planck-Institut für Astronomie (Germany); S. Jeffers, Institut für Astrophysik Göttingen (Germany); S. Jin, Max-Planck-Institut für Astronomie (Germany); L. Kaltenegger, Max-Planck-Institut für Astronomie (Germany) and Harvard-Smithsonian Ctr. for Astrophysics (United States); F. Kerschbaum, Univ. of Vienna (Austria); O. Krause, Max-Planck-Institut für Astronomie (Germany); H. Lammer, Institut für Weltraumforschung (Austria); A. Luntzer, Univ. of Vienna (Austria); M. Meyer, Institute for Astronomy, ETH Zürich (Switzerland); Y. Miguel, C. Mordasini, Max-Planck-Institut für Astronomie (Germany); R. Ottensamer, T. Rank-Lueffinger, Univ. of Vienna (Austria); A. Reiners, T. Reinhold, Institut für Astrophysik Göttingen (Germany); H. Schmid, Institute for Astronomy, ETH Zürich (Switzerland); I. Snellen, Leiden Observatory, Leiden Univ. (Netherlands); D. Stam, SRON Netherlands Institute for Space Research (Netherlands); Z. Sun, Max-Planck-Institut für Astronomie (Germany); B. Vandenbussche, Institute of Astronomy, Katholieke Univ. Leuven (Belgium)
- 8442 1G **An integrated payload design for the Exoplanet Characterisation Observatory (EChO)** [8442-49]
 B. Swinyard, Univ. College London (United Kingdom) and Rutherford Appleton Lab. (United Kingdom); G. Tinetti, Univ. College London (United Kingdom); P. Eccleston, Rutherford Appleton Lab. (United Kingdom); A. Adriani, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); J.-P. Beaulieu, Institut d'Astrophysique, CNRS, Univ. Paris VI (France); A. Coustenis, LESIA, CNRS, Observatoire de Paris (France); T. Belenger Davila, Instituto Nacional de Técnica Aeroespacial (Spain); N. Bowles, Oxford Univ. (United Kingdom); I. Bryson, UK Astronomy Technology Ctr., Royal Observatory (United Kingdom); V. Coudé du Foresto, LESIA, CNRS, Observatoire de Paris (France); M. Ferlet, Rutherford Appleton Lab. (United Kingdom); P. Hartogh, Max-Planck-Institute for Solar System Research (Germany); P.-O. Lagage, Service d'Astrophysique, CEA-Saclay (France); T. Lim, Rutherford Appleton Lab. (United Kingdom); G. Malaguti, INAF - IASF Bologna (Italy); M. López-Morales, Institut de Ciències de l'Espai (Spain); G. Micela, INAF - Osservatorio Astronomico di Palermo (Italy); G. Morgante, INAF - IASF Bologna (Italy); H. U. Nørgaard-Nielsen, DTU Space (Denmark); M. Ollivier, Institut d'Astrophysique Spatiale, CNRS, Univ. de Paris-Sud (France); E. Pace, Univ. degli studi di Firenze (Italy); E. Pascale, Cardiff Univ. (United Kingdom); G. Piccioni, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); G. Ramos Zapata, Instituto Nacional de Técnica Aeroespacial (Spain); J.-M. Reess, LESIA, CNRS, Observatoire de Paris (France); I. Ribas, Institut de Ciències de l'Espai (Spain); A. Sozzetti, INAF - Osservatorio Astrofisico di Torino (Italy); J. Tennyson, M. Tessenyi, Univ. College London (United Kingdom); M. R. Swain, Jet Propulsion Lab. (United States); B. Winter, Mullard Space Science Lab., Univ. College London (United Kingdom); I. Waldmann, Univ. College London (United Kingdom); G. Wright, UK Astronomy Technology Ctr., Royal Observatory (United Kingdom); M. Zapatero Osorio, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain);

- 8442 1H **Visible/infrared spectrometer for EChO** [8442-50]
 O. Krause, A. M. Glauser, R. van Boekel, Max-Planck-Institut für Astronomie (Germany);
 M. Güdel, Univ. Wien (Austria); T. Henning, Max-Planck-Institut für Astronomie (Germany);
 M. R. Meyer, Institute for Astronomy, ETH Zürich (Switzerland); D. M. Stam, SRON Netherlands
 Institute for Space Research (Netherlands); B. Vandenbussche, Katholieke Univ. Leuven
 (Belgium); U. Grözing, U. Klaas, R. Lenzen, F. Müller, Max-Planck-Institut für Astronomie
 (Germany); R. Ottensamer, Univ. Wien (Austria); S. P. Quanz, Institute for Astronomy, ETH
 Zürich (Switzerland); E. Renotte, Ctr. Spatial de Liège, Univ. de Liège (Belgium); R.-R. Rohloff,
 Max-Planck-Institut für Astronomie (Germany); H. M. Schmid, Institute for Astronomy, ETH
 Zürich (Switzerland); J.-R. Schrader, SRON Netherlands Institute for Space Research
 (Netherlands); U. J. Wehmeier, ETH Zürich (Switzerland)
- 8442 1I **Design of the MWIR channels of EChO** [8442-51]
 J. M. Reess, LESIA, CNRS, Observatoire de Paris (France); G. Tinetti, Univ. College London
 (United Kingdom); N. Baier, CEA-LETI MINATEC (France); J. F. Beaulieu, Institut
 d'Astrophysique de Paris (France); P. Bernardi, LESIA, CNRS, Observatoire de Paris (France);
 O. Boulade, Lab. AIM, CNRS, Univ. Paris Diderot (France); J. T. Buey, LESIA, CNRS,
 Observatoire de Paris (France); C. Cara, Lab. AIM, CNRS, Univ. Paris Diderot (France);
 V. Coudé du Foresto, LESIA, CNRS, Observatoire de Paris (France); O. Gravrand, F. Guellec,
 CEA-LETI MINATEC (France); P. O. Lagage, Lab. AIM, CNRS, Univ. Paris Diderot (France);
 J. C. Leclech, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris-Sud (France); L. Mollard,
 CEA-LETI MINATEC (France); V. Moreau, Lab. AIM, CNRS, Univ. Paris Diderot (France);
 G. Morinaud, M. Ollivier, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris-Sud (France);
 F. Pinsard, Lab. AIM, CNRS, Univ. Paris Diderot (France); J. P. Zanatta, CEA-LETI MINATEC
 (France); D. Zeganadin, LESIA, CNRS, Observatoire de Paris (France)

SESSION 10 TECHNOLOGY

- 8442 1J **Mirror coatings with atomic layer deposition: initial results** [8442-52]
 F. Greer, S. Nikzad, W. Traub, Jet Propulsion Lab. (United States)
- 8442 1L **The thermal sieve: a diffractive baffle that provides thermal isolation of a cryogenic optical system from an ambient temperature collimator** [8442-55]
 J. H. Burge, D. W. Kim, College of Optical Sciences, The Univ. of Arizona (United States)
- 8442 1M **Innovative optical setup for testing a stereo camera for space applications** [8442-56]
 G. Naleto, Univ. degli Studi di Padova (Italy), CNR-Istituto di Fotonica e Nanotecnologie
 (Italy), and INAF - Osservatorio Astronomico di Padova (Italy); M. Cesaro, Univ. degli Studi
 di Padova (Italy) and CNR-Istituto di Fotonica e Nanotecnologie (Italy); A. Albasini, Univ.
 degli Studi di Padova (Italy); G. Cremonese, INAF - Osservatorio Astronomico di Padova
 (Italy); V. Da Deppo, CNR-Istituto di Fotonica e Nanotecnologie (Italy) and INAF -
 Osservatorio Astronomico di Padova (Italy); G. Forlani, Univ. degli Studi di Parma (Italy);
 C. Re, Univ. degli Studi di Padova (Italy) and Univ. degli Studi di Parma (Italy); R. Roncella,
 Univ. degli Studi di Parma (Italy); G. Salemi, Univ. degli Studi di Padova (Italy); E. Simioni,
 CNR-Istituto di Fotonica e Nanotecnologie (Italy)

SESSION 11 ASTROMETRY/GAIA

- 8442 1O **A metrology concept for multiple telescope astrometry** [8442-58]
M. Gai, D. Busonero, A. Riva, INAF - Osservatorio Astronomico di Torino (Italy)
- 8442 1P **Gaia's FPA: sampling the sky in silicon** [8442-59]
R. Kohley, European Space Astronomy Ctr. (Spain); P. Garé, European Space Research and Technology Ctr. (Netherlands); C. Vétel, D. Marchais, F. Chassat, EADS Astrium (France)
- 8442 1Q **Gaia in-orbit realignment: overview and data analysis** [8442-60]
A. Mora, European Space Astronomy Ctr. (Spain) and Aurora Technology (Netherlands); A. Vosteen, TNO (Netherlands)
- 8442 1R **Gaia basic angle monitoring system** [8442-61]
W. Giesen, D. de Bruijn, T. van den Dool, F. Kamphues, E. Meijer, TNO (Netherlands); B. Calvel, A. Laborie, D. Monteiro, C. Coatantiec, S. Touzeau, EADS Astrium (France); M. Erdmann, P. Gare, European Space Research and Technology Ctr. (Netherlands)

Part Two

SESSION 12 EXOPLANET AND COMBINED MISSIONS

- 8442 1S **The EXoplanetary Circumstellar Environments and Disk Explorer (EXCEDE)** [8442-62]
O. Guyon, G. Schneider, Steward Observatory, The Univ. of Arizona (United States); R. Belikov, NASA Ames Research Ctr. (United States); D. J. Tenerelli, Lockheed Martin Space Systems Co. (United States)
- 8442 1T **Using the ISS as a testbed to prepare for the next generation of space-based telescopes** [8442-63]
M. Postman, W. B. Sparks, Space Telescope Science Institute (United States); F. Liu, Jet Propulsion Lab. (United States); K. Ess, NASA Johnson Space Flight Ctr. (United States); J. Green, Jet Propulsion Lab. (United States); K. G. Carpenter, H. Thronson, NASA Goddard Space Flight Ctr. (United States); R. Goullioud, Jet Propulsion Lab. (United States)
- 8442 1U **Wide Field Infrared Survey Telescope [WFIRST]: telescope design and simulated performance** [8442-64]
R. Goullioud, Jet Propulsion Lab. (United States); D. A. Content, NASA Goddard Space Flight Ctr. (United States); G. M. Kuan, J. D. Moore, Z. Chang, E. T. Sunada, Jet Propulsion Lab. (United States); J. Villalvazo, Applied Sciences Lab., Inc. (United States); J. P. Hawk, NASA Goddard Space Flight Ctr. (United States); N. V. Armani, SGT, Inc. (United States); E. L. Johnson, C. A. Powell, NASA Goddard Space Flight Ctr. (United States)

SESSION 13 HUBBLE SPACE TELESCOPE SM4/SPITZER

- 8442 1V **Performance and calibration of the HST Wide Field Camera 3** [8442-65]
J. W. MacKenty, Space Telescope Science Institute (United States)

- 8442 1W **Characterizing persistence in the IR detector within the Wide Field Camera 3 instrument on the Hubble Space Telescope** [8442-66]
K. S. Long, S. M. Baggett, J. W. MacKenty, A. G. Riess, Space Telescope Science Institute (United States)
- 8442 1X **A Spitzer IRAC measure of the zodiacal light** [8442-67]
J. E. Krick, W. J. Glaccum, S. J. Carey, P. J. Lowrance, J. A. Surace, J. G. Ingalls, Spitzer Science Ctr., California Institute of Technology (United States); J. L. Hora, Harvard-Smithsonian Ctr. for Astrophysics (United States); W. T. Reach, SOFIA, NASA Ames Research Ctr. (United States)
- 8442 1Y **Intra-pixel gain variations and high-precision photometry with the Infrared Array Camera (IRAC)** [8442-68]
J. G. Ingalls, J. E. Krick, S. J. Carey, S. Laine, J. A. Surace, W. J. Glaccum, C. C. Grillmair, P. J. Lowrance, Spitzer Science Ctr., California Institute of Technology (United States)
- 8442 1Z **Absolute photometric calibration of IRAC: lessons learned using nine years of flight data** [8442-69]
S. Carey, J. Ingalls, Spitzer Science Ctr., California Institute of Technology (United States); J. Hora, Harvard-Smithsonian Ctr. for Astrophysics (United States); J. Surace, W. Glaccum, P. Lowrance, J. Krick, D. Cole, S. Laine, Spitzer Science Ctr., California Institute of Technology (United States); C. Engelke, S. Price, Institute for Scientific Research, Boston College (United States); R. Bohlin, K. Gordon, Space Telescope Science Institute (United States)

SESSION 14 LARGE SPACE OPTICS

- 8442 20 **Space active optics: performance of a deformable mirror for in-situ wave-front correction in space telescopes** [8442-70]
M. Laslandes, C. Hourtoule, E. Hugot, M. Ferrari, Lab. d'Astrophysique de Marseille, CNRS, Aix Marseille Univ. (France); C. Lopez, Thales SESO (France); C. Devilliers, A. Liotard, Thales Alenia Space (France); F. Chazallet, Shaktiware (France)
- 8442 21 **MOIRE: initial demonstration of a transmissive diffractive membrane optic for large lightweight optical telescopes** [8442-71]
P. D. Atcheson, C. Stewart, J. Domber, K. Whiteaker, J. Cole, P. Spuhler, A. Seltzer, Ball Aerospace & Technologies Corp. (United States); J. A. Britten, S. N. Dixit, Lawrence Livermore National Lab. (United States); B. Farmer, L. Smith, NeXolve Corp. (United States)
- 8442 22 **Spherical primary optical telescope (SPOT) segments** [8442-72]
C. Hall, QED Technologies, Inc. (United States); J. Hagopian, NASA Goddard Space Flight Ctr. (United States); M. DeMarco, QED Technologies, Inc. (United States)
- 8442 23 **The path to far-IR interferometry in space: recent developments, plans, and prospects** [8442-73]
D. Leisawitz, S. A. Rinehart, NASA Goddard Space Flight Ctr. (United States)

- 8442 24 **Update on multivariable parametric cost models for ground and space telescopes** [8442-75]
H. P. Stahl, NASA Marshall Space Flight Ctr. (United States); T. Henrichs, Middle Tennessee State Univ. (United States); A. Luedtke, Brown Univ. (United States); M. West, The Univ. of Texas at Austin (United States)

SESSION 15 SOLAR MISSIONS

- 8442 25 **Design of large aperture solar optical telescope for the SOLAR-C mission** [8442-76]
Y. Suematsu, Y. Katsukawa, H. Hara, National Astronomical Observatory of Japan (Japan); T. Shimizu, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); K. Ichimoto, Hida Observatory, Kyoto Univ. (Japan)
- 8442 26 **In-orbit determination of the straylight in the SOHO/LASCO-C2 coronagraph and its temporal evolution** [8442-77]
A. Llebaria, J. Loirat, P. Lamy, Observatoire Astronomique de Marseille-Provence, CNRS, Univ. de Provence (France)
- 8442 27 **Optimization of the occulter for the Solar Orbiter/METIS coronagraph** [8442-78]
F. Landini, Univ. degli Studi di Firenze (Italy); S. Vivès, Lab. d'Astrophysique de Marseille (France); M. Romoli, Univ. degli Studi di Firenze (Italy); C. Guillon, Lab. d'Astrophysique de Marseille (France); M. Pancrazzi, Univ. degli Studi di Firenze (Italy); C. Escolle, Lab. d'Astrophysique de Marseille (France); M. Focardi, Univ. degli Studi di Firenze (Italy); E. Antonucci, S. Fineschi, INAF - Osservatorio Astronomico di Torino (Italy); G. Naletto, Univ. degli Studi di Padova (Italy); G. Nicolini, INAF - Osservatorio Astronomico di Torino (Italy); P. Nicolosi, Univ. degli Studi di Padova (Italy); D. Spadaro, INAF - Osservatorio Astrofisico di Catania (Italy)

SESSION 16 JWST OVERVIEW

- 8442 28 **The James Webb Space Telescope: extending the science** [8442-79]
J. P. Gardner, NASA Goddard Space Flight Ctr. (United States)
- 8442 29 **Science operations with the James Webb Space Telescope** [8442-80]
J. Rigby, G. Sonneborn, NASA Goddard Space Flight Ctr. (United States); J. Pollizzi, T. Brown, J. Isaacs, Space Telescope Science Institute (United States)
- 8442 2A **Status of the James Webb Space Telescope Observatory** [8442-81]
M. Clampin, NASA Goddard Space Flight Ctr. (United States)
- 8442 2B **James Webb Space Telescope optical telescope element mirror development history and results** [8442-82]
L. D. Feinberg, M. Clampin, R. Keski-Kuha, NASA Goddard Space Flight Ctr. (United States); C. Atkinson, S. Texter, Northrop Grumman Aerospace Systems (United States); M. Bergeland, B. B. Gallagher, Ball Aerospace & Technologies Corp. (United States)
- 8442 2C **Observatory alignment of the James Webb Space Telescope** [8442-131]
J. S. Knight, D. S. Acton, P. Lightsey, A. Contos, A. Barto, Ball Aerospace & Technologies Corp. (United States)

SESSION 17 JWST OPTICS/I&T I

- 8442 2E **Status of the JWST optical telescope element** [8442-84]
C. Atkinson, S. Texter, Northrop Grumman Aerospace Systems (United States); R. Keski-Kuha, L. Feinberg, NASA Goddard Space Flight Ctr. (United States)
- 8442 2F **Statistical analysis of the surface figure of the James Webb Space Telescope** [8442-85]
P. A. Lightsey, D. Chaney, B. B. Gallagher, B. J. Brown, K. Smith, J. Schwenker, Ball Aerospace & Technologies Corp. (United States)
- 8442 2G **Predicted JWST imaging performance** [8442-86]
J. S. Knight, P. Lightsey, A. Barto, Ball Aerospace & Technologies Corp. (United States)
- 8442 2H **Wavefront sensing and controls for the James Webb Space Telescope** [8442-87]
D. S. Acton, J. S. Knight, A. Contos, S. Grimaldi, J. Terry, P. Lightsey, A. Barto, B. League, Ball Aerospace & Technologies Corp. (United States); B. Dean, J. S. Smith, C. Bowers, D. Aronstein, L. Feinberg, W. Hayden, NASA Goddard Space Flight Ctr. (United States); T. Comeau, R. Soummer, E. Elliott, M. Perrin, Space Telescope Science Institute (United States); C. W. Starr, Northrop Grumman Aerospace Systems (United States)

SESSION 18 JWST OPTICS/I&T II

- 8442 2I **Actuator usage and fault tolerance of the James Webb Space Telescope optical element mirror actuators** [8442-88]
A. Barto, D. S. Acton, P. Finley, B. Gallagher, B. Hardy, J. S. Knight, P. Lightsey, Ball Aerospace & Technologies Corp. (United States)
- 8442 2J **James Webb Space Telescope optical telescope element mirror coatings** [8442-89]
R. A. Keski-Kuha, C. W. Bowers, M. A. Quijada, NASA Goddard Space Flight Ctr. (United States); J. B. Heaney, SGT, Inc. (United States); B. Gallagher, Ball Aerospace & Technologies Corp. (United States); A. McKay, Northrop Grumman Aerospace Systems (United States); I. Stevenson, Quantum Coating Inc. (United States)
- 8442 2K **The integration and test program of the James Webb Space Telescope** [8442-90]
R. A. Kimble, P. S. Davila, C. E. Diaz, L. D. Feinberg, S. D. Glazer, NASA Goddard Space Flight Ctr. (United States); G. S. Jones, Northrop Grumman Aerospace Systems (United States); J. M. Marsh, NASA Goddard Space Flight Ctr (United States); G. W. Matthews, ITT Exelis Geospatial Systems (United States); D. B. McGuffey, NASA Goddard Space Flight Ctr. (United States); P. H. O'Rear, NASA Johnson Space Flight Ctr. (United States); D. D. Ramey, NASA Goddard Space Flight Ctr. (United States); C. A. Reis, NASA Johnson Space Flight Ctr. (United States); S. C. Texter, Northrop Grumman Aerospace Systems (United States); T. L. Whitman, ITT Exelis Geospatial Systems (United States)
- 8442 2L **JWST's cryogenic position metrology system** [8442-91]
T. L. Whitman, ITT Exelis Geospatial Systems (United States); R. P. Hammond, J. Orndorff, S. Hope, S. A. Smee, The Johns Hopkins Univ. (United States); T. Scorse, K. A. Havey, Jr., ITT Exelis Geospatial Systems (United States)

- 8442 2M **Status of the James Webb Space Telescope integrated science instrument module** [8442-92]
R. A. Lundquist, NASA Goddard Space Flight Ctr. (United States); V. Balzano, Space Telescope Science Institute (United States); P. Davila, M. P. Drury, J. L. Dunn, S. D. Glazer, M. A. Greenhouse, E. Greville, G. Henegar, E. L. Johnson, J. C. McCloskey, R. G. Ohl IV, R. A. Rashford, G. C. Hobbs, S. Lambros, D. McGuffey, M. F. Voyton, NASA Goddard Space Flight Ctr. (United States)

SESSION 19 JWST INSTRUMENTS

- 8442 2N **Science opportunities with the near-IR camera (NIRCam) on the James Webb Space Telescope (JWST)** [8442-93]
C. A. Beichman, NASA Exoplanet Science Institute, IPAC (United States) and Jet Propulsion Lab. (United States); M. Rieke, Steward Observatory, The Univ. of Arizona (United States); D. Eisenstein, Harvard Univ. (United States); T. P. Greene, NASA Ames Research Ctr. (United States); J. Krist, Jet Propulsion Lab. (United States); D. McCarthy, Steward Observatory, The Univ. of Arizona (United States); M. Meyer, Institute for Astronomy, ETH Zürich (Switzerland); J. Stansberry, Jet Propulsion Lab. (United States)
- 8442 2O **The JWST near-infrared spectrograph NIRSpec: status** [8442-94]
P. Ferruit, G. Bagnasco, European Space Research and Technology Ctr. (Netherlands); R. Barho, EADS Astrium GmbH (Germany); S. Birkmann, T. Böker, G. De Marchi, European Space Research and Technology Ctr. (Netherlands); B. Dorner, Univ. de Lyon (France), Observatoire de Lyon (France), and Ctr. de Recherche Astrophysique de Lyon, CNRS (France); R. Ehrenwinkler, EADS Astrium GmbH (Germany); M. Falcolini, G. Giardino, European Space Research and Technology Ctr. (Netherlands); X. Gnata, K. Honnen, EADS Astrium GmbH (Germany); P. Jakobsen, DARK Cosmology Ctr., Univ. of Copenhagen (Denmark); P. Jensen, European Space Research and Technology Ctr. (Netherlands); M. Kolm, H.-U. Maier, R. Maurer, M. Melf, P. Mosner, EADS Astrium GmbH (Germany); P. Rumler, J.-C. Salvignol, M. Sirianni, P. Strada, M. te Plate, European Space Research and Technology Ctr. (Netherlands); T. Wettemann, EADS Astrium GmbH (Germany)
- 8442 2Q **Ambient alignment verification of JWST-MIRI** [8442-96]
M. Ferlet, Rutherford Appleton Lab. (United Kingdom); M. Wells, UK Astronomy Technology Ctr. (United Kingdom)
- 8442 2R **The JWST Fine Guidance Sensor (FGS) and Near-Infrared Imager and Slitless Spectrograph (NIRISS)** [8442-97]
R. Doyon, Univ. de Montréal (Canada); J. Hutchings, NRC Herzberg Institute of Astrophysics, (Canada); M. Beaulieu, L. Albert, D. Lafrenière, Univ. de Montréal (Canada); C. Willott, NRC Herzberg Institute of Astrophysics (Canada); D. Touahri, N. Rowlands, COM DEV Canada (Canada); M. Maszkiewicz, Canadian Space Agency (Canada); A. Fullerton, K. Volk, A. Martel, P. Chayer, A. Sivaramakrishnan, Space Telescope Science Institute (United States); R. Abraham, Univ. of Toronto (Canada); L. Ferrarese, NRC Herzberg Institute of Astrophysics (Canada); R. Jayawardhana, Univ. of Toronto (Canada); D. Johnstone, NRC Herzberg Institute of Astrophysics (Canada); M. Meyer, Institute for Astronomy, ETH Zürich (Switzerland); J. Pipher, Univ. of Rochester (United States); M. Sawicki, Saint Mary's Univ. (Canada)

- 8442 2S **Non-redundant Aperture Masking Interferometry (AMI) and segment phasing with JWST-NIRISS** [8442-98]
 A. Sivaramakrishnan, Space Telescope Science Institute (United States) and American Museum of Natural History (United States); D. Lafrenière, Univ. de Montréal (Canada); K. E. Saavik Ford, B. McKernan, Borough of Manhattan Community College (United States) and American Museum of Natural History (United States) and CUNY Graduate Ctr. (United States); A. Cheetham, The Univ. of Sydney (Australia); A. Z. Greenbaum, The Johns Hopkins Univ. (United States); P. G. Tuthill, The Univ. of Sydney (Australia); J. P. Lloyd, Cornell Univ. (United States); M. J. Ireland, Macquarie Univ. (Australia); R. Doyon, M. Beaulieu, Univ. de Montréal (Canada); A. Martel, A. Koekemoer, Space Telescope Science Institute (United States); F. Martinache, Subaru Telescope, National Astronomical Observatory of Japan (United States); P. Teuben, Univ. of Maryland, College Park (United States)

POSTER SESSION: ECHO

- 8442 2T **The Exoplanet Characterisation Observatory (EChO) payload electronics** [8442-99]
 M. Focardi, M. Pancrazzi, Univ. degli studi di Firenze (Italy); A. M. Di Giorgio, S. Pezzuto, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); G. Micela, INAF - Osservatorio Astronomico di Palermo (Italy); E. Pace, Univ. degli studi di Firenze (Italy)
- 8442 2U **Mechanical and thermal architecture of an integrated payload instrument for the Exoplanet Characterisation Observatory** [8442-102]
 P. Eccleston, T. Bradshaw, Rutherford Appleton Lab. (United Kingdom); J. Coker, Mullard Space Science Lab., Univ. College London (United Kingdom); M. Crook, Rutherford Appleton Lab. (United Kingdom); G. Morgante, L. Terenzi, INAF - IASF Bologna (Italy); B. M. Swinyard, Rutherford Appleton Lab. (United Kingdom); B. Winter, Mullard Space Science Lab., Univ. College London (United Kingdom)
- 8442 2V **EChO SWIR: exoplanet atmospheres characterization observatory sort-wave infrared channel of the EChO payload** [8442-103]
 G. Ramos Zapata, T. Belenguer, A. Balado, J. Barandiarán, I. Armendáriz, M. Reina, C. Arza, S. Rodríguez, M. Alcacera, J. A. Fernández, E. Muñoz, Instituto Nacional de Técnica Aeroespacial (Spain); G. Tinetti, Univ. College London (United Kingdom); P. Eccleston, Rutherford Appleton Lab. (United Kingdom); B. Swinyard, Univ. College London (United Kingdom) and Rutherford Appleton Lab. (United Kingdom); M. Ferlet, Rutherford Appleton Lab. (United Kingdom); I. Bryson, UK Astronomy Technology Ctr. (United Kingdom); M. R. Zapatero, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain)
- 8442 2W **The visible and near infrared (VNIR) spectrometer of EChO** [8442-104]
 A. Adriani, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); E. Oliva, INAF - Osservatorio Astrofisico di Arcetri (Italy); G. Piccioni, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); E. Pace, M. Focardi, Univ. degli Studi di Firenze (Italy); C. Di Turi, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy) and Univ. degli Studi di Roma La Sapienza (Italy); G. Filacchione, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); M. Pancrazzi, Univ. degli Studi di Firenze (Italy); A. Tozzi, D. Ferruzzi, C. Del Vecchio, INAF - Osservatorio Astrofisico di Arcetri (Italy); F. Capaccioni, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); G. Micela, INAF - Osservatorio Astronomico di Palermo (Italy)

- 8442 27 **A detector technology investigation for the Exoplanet Characterisation Observatory (EChO)** [8442-107]
E. Pascale, Cardiff Univ. (United Kingdom); S. Forder, P. Knowles, SELEX Galileo Infrared Ltd. (United Kingdom); R. V. Sudiwala, Cardiff Univ. (United Kingdom); B. Swinyard, M. Tessenyi, Univ. College London (United Kingdom)
- 8442 30 **The study of magnetic activity and exoplanet magnetospheres using EChO VNIR-channel spectropolarimetry** [8442-108]
M. Focardi, M. Pancrazzi, E. Pace, Univ. degli studi di Firenze (Italy); S. N. Shore, Univ. degli studi di Pisa (Italy) and National Institute of Nuclear Physics (Italy)

POSTER SESSION: EUCLID

- 8442 31 **An end-to-end approach to the EUCLID NISP on-board pre-processing operations: tests and latest results** [8442-109]
C. Bonoli, F. Bortoletto, M. D'Alessandro, INAF - Osservatorio Astronomico di Padova (Italy); L. Corcione, S. Ligi, INAF - Osservatorio Astronomico di Torino (Italy); L. Nicastro, M. Trifoglio, L. Valenziano, INAF - IASF Bologna (Italy); F. M. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy); P.-E. Crouzet, A. Jung, European Space Research and Technology Ctr. (Netherlands)
- 8442 32 **The on-board electronics for the near infrared spectrograph and photometer (NISP) of the EUCLID Mission** [8442-110]
L. Corcione, S. Ligi, INAF - Osservatorio Astrofisico di Torino (Italy); F. Bortoletto, C. Bonoli, INAF - Osservatorio Astronomico di Padova (Italy); L. Valenziano, INAF - IASF Bologna (Italy); R. Toledo-Moreo, Univ. Politcnica de Cartagena (Spain); M. D'Alessandro, INAF - Osservatorio Astronomico di Padova (Italy); M. Trifoglio, G. Morgante, INAF - IASF Bologna (Italy); C. Colodro-Conde, Univ. Politcnica de Cartagena (Spain); R. Rebolo-Lpez, Instituto de Astrofsica de Canarias (Spain); J. Muoz, SENER Ingeniera y Sistemas SA (Spain); I. Vill, Univ. Politcnica de Cartagena (Spain)
- 8442 33 **The command and data processing unit of the EUCLID visible imager: impact of the data compression needs on the unit design** [8442-111]
A. M. Di Giorgio, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); P. Bastia, Thales Alenia Space (Italy); S. J. Liu, G. Giusi, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); R. Scaramella, INAF - Osservatorio Astronomico di Roma (Italy); M. Cropper, R. Cole, A. James, Mullard Space Science Lab., Univ. College London (United Kingdom); J. Amiaux, Commissariat l'nergie Atomique (France); Y. Mellier, Institut d'Astrophysique de Paris (France)
- 8442 34 **Euclid NISP thermal control design** [8442-112]
G. Morgante, INAF - IASF Bologna (Italy); T. Maciaszek, Ctr. National d'Etudes Spatiales (France); L. Martin, Lab. d'Astrophysique de Marseille (France); M. Riva, INAF - Osservatorio Astronomico di Brera (Italy); F. Bortoletto, INAF - Osservatorio Astronomico di Padova (Italy); E. Prieto, Lab. d'Astrophysique de Marseille (France); C. Bonoli, INAF - Osservatorio Astronomico di Padova (Italy); L. Corcione, INAF - Osservatorio Astronomico di Torino (Italy); V. De Caprio, INAF - IASF Milano (Italy); F. Grupp, Max-Planck-Institut fr extraterrestrische Physik (Germany); S. Ligi, INAF - Osservatorio Astronomico di Torino (Italy); M. Trifoglio, L. Valenziano, INAF - IASF Bologna (Italy); F. M. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy)

- 8442 35 **Design concept of the electrical ground support equipment for the AIV and calibration of the Euclid NISP instrument** [8442-113]
M. Trifoglio, INAF - IASF Bologna (Italy); C. Bonoli, F. Bortoletto, INAF - Osservatorio Astronomico di Padova (Italy); A. Bulgarelli, C. R. Butler, INAF - IASF Bologna (Italy); C. Colodro-Conde, Univ. Politcnica de Cartagena (Spain); V. Conforti, INAF - IASF Bologna (Italy); L. Corcione, INAF - Osservatorio Astronomico di Torino (Italy); E. Franceschi, F. Gianotti, INAF - IASF Bologna (Italy); S. Ligori, INAF - Osservatorio Astronomico di Torino (Italy); T. Maciaszek, Ctr. National d'tudes Spatiales (France); G. Morgante, INAF - IASF Bologna (Italy); J. Muoz, SENER Ingeniera y Sistemas S.A. (Spain); L. Nicastro, INAF - IASF Bologna (Italy); E. Prieto, Observatoire Astronomique de Marseille-Provence (France); R. Rebolo-Lpez, Instituto de Astrofsica de Canarias (Spain); M. Riva, P. Spano, INAF - Osservatorio Astronomico di Brera (Italy); R. Toledo-Moreo, Univ. Politcnica de Cartagena (Spain); L. Valenziano, INAF - IASF Bologna (Italy); I. Vill, Univ. Politcnica de Cartagena (Spain); F. M. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy)

POSTER SESSION: HUBBLE AND SPITZER

- 8442 37 **Keeping the Hubble Space Telescope in focus** [8442-115]
C. Cox, M. Lallo, Space Telescope Science Institute (United States)
- 8442 38 **Modifications to the warm Spitzer data reduction pipeline** [8442-117]
P. J. Lowrance, S. J. Carey, J. E. Krick, J. A. Surace, W. J. Glaccum, I. Khan, J. G. Ingalls, S. Laine, C. Grillmair, Spitzer Science Ctr., California Institute of Technology (United States)
- 8442 39 **The IRAC point response function in the warm Spitzer mission** [8442-118]
J. L. Hora, Harvard-Smithsonian Ctr. for Astrophysics (United States); M. Marengo, R. Park, D. Wood, Iowa State Univ. (United States); W. F. Hoffmann, The Univ. of Arizona (United States); P. J. Lowrance, S. J. Carey, J. A. Surace, J. E. Krick, W. J. Glaccum, J. G. Ingalls, S. Laine, Spitzer Science Ctr., California Institute of Technology (United States); G. G. Fazio, M. L. Ashby, Z. Wang, Harvard-Smithsonian Ctr. for Astrophysics (United States)

POSTER SESSION: JWST

- 8442 3A **Optical transmission for the James Webb Space Telescope** [8442-119]
P. A. Lightsey, B. B. Gallagher, N. Nickles, T. Copp, Ball Aerospace & Technologies Corp. (United States)
- 8442 3B **James Webb Space Telescope stray light performance status update** [8442-120]
P. A. Lightsey, Z. Wei, Ball Aerospace & Technologies Corp. (United States)
- 8442 3C **Multi-field alignment of the James Webb Space Telescope** [8442-121]
D. S. Acton, J. S. Knight, Ball Aerospace & Technologies Corp. (United States)
- 8442 3D **Simulating point spread functions for the James Webb Space Telescope with WebbPSF** [8442-122]
M. D. Perrin, R. Soummer, E. M. Elliott, M. D. Lallo, A. Sivaramakrishnan, Space Telescope Science Institute (United States)

- 8442 3E **The Near Infrared Spectrograph (NIRSpec) on-ground calibration campaign** [8442-123]
S. M. Birkmann, P. Ferruit, T. Böker, G. De Marchi, G. Giardino, M. Sirianni, European Space Research and Technology Ctr. (Netherlands); M. Stuhlinger, European Space Astronomy Ctr. (Spain); P. Jensen, M. B. J. te Plate, P. Rumler, European Space Research and Technology Ctr. (Netherlands); B. Dorner, Observatoire de Lyon, Ctr. de Recherche Astrophysique de Lyon, CNRS, Univ. de Lyon (France); X. Gnata, T. Wettemann, EADS Astrium GmbH (Germany)
- 8442 3F **The spectro-photometric calibration of the JWST NIRSpec instrument** [8442-124]
T. Böker, S. Birkmann, G. de Marchi, P. Ferruit, G. Giardino, M. Sirianni, European Space Research and Technology Ctr. (Netherlands); T. Beck, Space Telescope Science Institute (United States)
- 8442 3G **The accuracy of the NIRSpec grating wheel position sensors** [8442-125]
G. De Marchi, S. M. Birkmann, T. Böker, P. Ferruit, G. Giardino, M. Sirianni, European Space Research and Technology Ctr. (Netherlands); M. Stuhlinger, European Space Astronomy Ctr. (Spain); M. B. te Plate, J.-C. Salvignol, European Space Research and Technology Ctr. (Netherlands); R. Barho, X. Gnata, R. Lemke, M. Kosse, P. Mosner, EADS Astrium GmbH (Germany)
- 8442 3H **James Webb Space Telescope first light boresight to spacecraft alignment determination** [8442-126]
P. A. Lightsey, D. S. Acton, J. S. Knight, A. Contos, Ball Aerospace & Technologies Corp. (United States)
- 8442 3I **Global alignment optimization strategies, procedures, and tools for the James Webb Space Telescope (JWST) Integrated Science Instrument Module (ISIM)** [8442-127]
B. J. Bos, J. M. Howard, NASA Goddard Space Flight Ctr. (United States); P. J. Young, Young Engineering Services (United States); R. Gracey, Ball Aerospace & Technologies Corp. (United States); L. T. Seals, R. G. Ohl, NASA Goddard Space Flight Ctr. (United States)
- 8442 3J **Measuring segmented primary mirror WFE in the presence of vibration and thermal drift on the light-weighted JWST** [8442-128]
T. L. Whitman, K. J. Dziak, C. Wells, G. Olczak, ITT Exelis Geospatial Systems (United States)
- 8442 3K **Cryogenic performance test results for the flight model JWST fine guidance sensor** [8442-130]
N. Rowlands, S. Delamer, C. Haley, E. Harpell, M. B. Vila, G. Warner, J. Zhou, COM DEV Space Systems (Canada)
- 8442 3M **Space environment challenges with the tunable Fabry-Pérot etalon for the JWST fine guidance sensor** [8442-133]
C. Haley, N. Roy, Z. Osman, N. Rowlands, A. Scott, COM DEV Canada (Canada)

POSTER SESSION: SPICA

- 8442 3P **The focal plane camera for fine guiding and NIR survey on SPICA** [8442-138]
D.-H. Lee, W.-S. Jeong, Korea Astronomy and Space Science Institute (Korea, Republic of); T. Matsumoto, Korea Astronomy and Space Science Institute (Korea, Republic of) and Institute of Astronomy and Astrophysics (Taiwan); B. Moon, W. Han, Y. Park, K. Park, U.-W. Nam, Korea Astronomy and Space Science Institute (Korea, Republic of); C. Lee, Korea Advanced Institute of Science and Technology (Korea, Republic of); S. Mitani, Japan Aerospace Exploration Agency (Japan)
- 8442 3Q **High-resolution and high-precision color-differential astrometry for direct spectroscopy of extrasolar planets onboard SPICA: science and validation experiment** [8442-139]
L. Abe, M. Vannier, J.-P. Rivet, C. Gouvret, A. Marcotto, R. Petrov, Lab. J.-L. Lagrange, CNRS, Univ. of Nice Sophia Antipolis, Observatoire de la Côte d'Azur (France); K. Enya, H. Kataza, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan)
- 8442 3R **SPICA/SAFARI Fourier transform spectrometer mechanism evolutionary design** [8442-140]
T. C. van den Dool, B. Kruizinga, B. C. Braam, TNO (Netherlands); R. F. M. M. Hamelinck, Entechna Engineering (Netherlands); N. Loix, Micromega Dynamics S.A. (Belgium); D. Van Loon, SRON Netherlands Institute for Space Research (Netherlands); J. Dams, Magnetic Innovations BV (Netherlands)
- 8442 3S **Recent progress in the development of mid-infrared medium resolution spectrometer (MRS) installed in SPICA/MCS** [8442-141]
I. Sakon, The Univ. of Tokyo (Japan); H. Kataza, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); T. Onaka, R. Ohsawa, The Univ. of Tokyo (Japan); Y. Okada, Univ. zu Köln (Germany); Y. Ikeda, N. Fujishiro, Photocoding Inc. (Japan) and Kyoto Sangyo Univ. (Japan); K. Mitsui, N. Okada, National Astronomical Observatory of Japan (Japan)
- 8442 3T **Experimental and numerical study of stitching interferometry for the optical testing of the SPICA Telescope** [8442-142]
H. Kaneda, Nagoya Univ. (Japan); M. Naitoh, T. Imai, H. Katayama, Earth Observation Research Ctr., Japan Aerospace Exploration Agency (Japan); T. Onaka, The Univ. of Tokyo (Japan); T. Nakagawa, M. Kawada, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); M. Yamagishi, T. Kokusho, Nagoya Univ. (Japan)
- 8442 3U **Cooled scientific instrument assembly onboard SPICA** [8442-143]
H. Matsuhara, T. Nakagawa, Y. Kawakatsu, H. Murakami, M. Kawada, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); H. Sugita, T. Yamawaki, S. Mitani, K. Shinozaki, Y. Sato, Aerospace Research and Development Directorate, Japan Aerospace Exploration Agency (Japan); G. Crone, K. Isaak, A. Heske, European Space Research and Technology Ctr. (Netherlands)
- 8442 3V **Detector systems for the mid-infrared camera and spectrometer on board SPICA** [8442-145]
T. Wada, H. Kataza, H. Matsuhara, M. Kawada, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); D. Ishihara, Nagoya Univ. (Japan)

- 8442 3W **The instrument control unit of SPICA SAFARI: a macro-unit to host all the digital control functionalities of the spectrometer** [8442-146]
A. M. Di Giorgio, D. Biondi, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); B. Saggin, I. Shatalina, Politecnico di Milano (Italy); M. Viterbini, Istituto di Scienze dell'Atmosfera e del Clima, CNR (Italy); G. Giusi, S. J. Liu, P. Cerulli-Irelli, INAF - Istituto di Astrofisica e Planetologia Spaziali (Italy); D. Van Loon, SRON Netherlands Institute for Space Research (Netherlands); C. Cara, Commissariat à l'Énergie Atomique (France)
- 8442 3Y **Wideband infrared spectrometer for characterization of transiting exoplanets with space telescopes** [8442-148]
K. Enya, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan)

POSTER SESSION: MISSIONS/CONCEPTS

- 8442 41 **Spectroscopy of exoplanet atmospheres with the FINESSE Explorer mission** [8442-151]
P. Deroo, M. R. Swain, R. O. Green, Jet Propulsion Lab. (United States)
- 8442 42 **The GAIA photometric data processing** [8442-152]
G. Busso, Leiden Observatory, Leiden Univ. (Netherlands); F. De Angeli, Institute of Astronomy, Univ. of Cambridge (United Kingdom); P. Montegriffo, INAF - Osservatorio Astronomico di Bologna (Italy)
- 8442 43 **High precision astrometry laboratory demonstration for exoplanet detection using a diffractive pupil telescope** [8442-153]
E. A. Bendek, Steward Observatory, The Univ. of Arizona (United States); S. M. Ammons, Lawrence Livermore National Lab. (United States); R. Belikov, E. Pluzhnik, NASA Ames Research Ctr. (United States); O. Guyon, Steward Observatory, The Univ. of Arizona (United States)
- 8442 44 **Supplementary information on the near-infrared spectroscopic data of the infrared camera (IRC) onboard AKARI** [8442-154]
I. Sakon, T. Onaka, The Univ. of Tokyo (Japan); T. Ootsubo, Tohoku Univ. (Japan); H. Matsuhara, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); J. Noble, Lab. PIIM, CNRS, Aix-Marseille Univ. (France)
- 8442 45 **Herschel-SPIRE satellite instrument: configurable on-board software for autonomous and real time operation** [8442-155]
S. J. Liu, S. Molinari, A. M. Di Giorgio, S. Pezzuto, Istituto di Fisica dello Spazio Interplanetario (Italy); S. Sidher, Rutherford Appleton Lab. (United Kingdom); P. Cerulli-Irelli, Istituto di Fisica dello Spazio Interplanetario (Italy); K. King, Rutherford Appleton Lab. (United Kingdom)
- 8442 46 **ACCESS: design and sub-system performance** [8442-156]
M. E. Kaiser, M. J. Morris, S. R. McCandliss, The Johns Hopkins Univ. (United States); B. J. Rauscher, R. A. Kimble, J. W. Kruk, NASA Goddard Space Flight Ctr. (United States); R. Pelton, The Johns Hopkins Univ. (United States); D. B. Mott, Y. Wen, R. Foltz, M. A. Quijada, J. S. Gum, J. P. Gardner, D. M. Kahle, D. J. Benford, B. E. Woodgate, NASA Goddard Space Flight Ctr. (United States); E. L. Wright, Univ. of California, Los Angeles (United States); P. D. Feldman, M. W. Hart, H. W. Moos, The Johns Hopkins Univ. (United States); A. G. Riess, The Johns Hopkins Univ. (United States) and Space Telescope Science Institute (United States); R. Bohlin, S. E. Deustua, W. V. Dixon, D. J. Sahnaw, Space Telescope Science

Institute (United States); R. Kurucz, Harvard-Smithsonian Ctr. for Astrophysics (United States); M. Lampton, Space Sciences Lab. (United States); S. Perlmutter, Univ. of California, Berkeley (United States)

- 8442 47 **Nano-JASMINE: cosmic radiation degradation of CCD performance and centroid detection** [8442-157]
Y. Kobayashi, National Astronomical Observatory of Japan (Japan) and The Univ. of Tokyo (Japan) and The Graduate Univ. for Advanced Studies (Japan); Y. Shimura, The Univ. of Tokyo (Japan); Y. Niwa, National Astronomical Observatory of Japan (Japan); T. Yano, National Astronomical Observatory of Japan (Japan) and The Graduate Univ. for Advanced Studies (Japan); N. Gouda, National Astronomical Observatory of Japan (Japan) and The Univ. of Tokyo (Japan) and The Graduate Univ. for Advanced Studies (Japan); Y. Yamada, Kyoto Univ. (Japan)
- 8442 49 **To PLANetary Transit or not? An extremely large field of view camera with a CaF₂ component tested in thermo-vacuum** [8442-159]
M. Bergomi, INAF - Osservatorio Astronomico di Padova (Italy) and Univ. degli Studi di Padova (Italy); D. Magrin, J. Farinato, V. Viotto, R. Ragazzoni, A. Brunelli, M. Dima, INAF - Osservatorio Astronomico di Padova (Italy); P. Christiansen, Univ. of Bern (Switzerland); M. Ghigo, INAF - Osservatorio Astronomico di Brera (Italy); D. Laubier, H. Pasquier, Ctr. National d'Études Spatiales (France); D. Piazza, Univ. of Bern (Switzerland); I. Pagano, INAF - Osservatorio Astrofisico di Catania (Italy); G. Piotto, Univ. degli Studi di Padova (Italy); G. Basile, SELEX Galileo S.p.A. (Italy); C. Catala, LESIA, CNRS, Observatoire de Paris (France)
- 8442 4A **Habitable planet finder** [8442-160]
T. D. Ditto, 3DeWitt LLC (United States)
- 8442 4B **NanoSpec: a diffraction limited micro-spectrograph for pico- and nano-satellites** [8442-161]
C. H. Bettters, Institute for Optical Science, The Univ. of Sydney (Australia) and Sydney Institute for Astronomy, The Univ. of Sydney (Australia); S. G. Leon-Saval, Institute for Optical Science, The Univ. of Sydney (Australia); J. Bland-Hawthorn, Institute for Optical Science, The Univ. of Sydney (Australia) and Sydney Institute for Astronomy, The Univ. of Sydney (Australia)
- 8442 4C **Space mission Millimetron for terahertz astronomy** [8442-162]
A. V. Smirnov, Astro Space Ctr., P.N. Lebedev Physical Institute (Russian Federation); A. M. Baryshev, SRON Netherlands Institute for Space Research (Netherlands) and Kapteyn Astronomical Institute, Univ. of Groningen (Netherlands); S. V. Pilipenko, N. V. Myshonkova, V. B. Bulanov, M. Y. Arkhipov, I. S. Vinogradov, S. V. Likhachev, N. S. Kardashev, Astro Space Ctr., P.N. Lebedev Physical Institute (Russian Federation)
- 8442 4E **Optical telescope BIRT in ORIGIN for gamma ray burst observing** [8442-164]
R. Content, Australian Astronomical Observatory (Australia) and Durham Univ. (United Kingdom); R. Sharples, Durham Univ. (United Kingdom); M. J. Page, R. Cole, D. M. Walton, B. Winter, Univ. College London (United Kingdom); K. Pedersen, J. Hjorth, M. Andersen, Univ. of Copenhagen (Denmark); A. Hornstrup, DTU Space (Denmark); J.-W. A. den Herder, SRON Netherlands Institute for Space Research (Netherlands); L. Piro, INAF - IASF Roma (Italy)

- 8442 4F **CubeSat deformable mirror demonstration** [8442-165]
K. Cahoy, A. Marinan, C. Kerr, K. Cheng, Massachusetts Institute of Technology (United States); S. Jamil, Institut Supérieur de l'Aéronautique et de l'Espace (France)
- 8442 4G **Atmospheric characterization of cold exoplanets with a 1.5-m space coronagraph** [8442-166]
A.-L. Maire, LESIA, CNRS, Observatoire de Paris (France); R. Galicher, NRC Herzberg Institute of Astrophysics (Canada); A. Boccaletti, P. Baudoz, LESIA, CNRS, Observatoire de Paris (France); J. Schneider, LUTH, CNRS, Observatoire de Paris (France); K. Cahoy, NASA Ames Research Ctr. (United States); D. Stam, SRON Netherlands Institute for Space Research (Netherlands); W. Traub, Jet Propulsion Lab. (United States)
- 8442 4H **Starshade design driven by stray light from edge scatter** [8442-167]
S. Casement, M. Flannery, T. Glassman, A. Lo, Northrop Grumman Aerospace Systems (United States)

POSTER SESSION: SOLAR SYSTEM

- 8442 4I **The processing and power unit of the METIS coronagraph aboard the Solar Orbiter space mission** [8442-169]
M. Focardi, M. Pancrazzi, Univ. degli Studi di Firenze (Italy); M. Uslenghi, INAF - IASF Milano (Italy); G. Nicolini, INAF - Osservatorio Astronomico di Torino (Italy); E. Magli, Politecnico di Torino (Italy); F. Landini, M. Romoli, Univ. degli Studi di Firenze (Italy); E. Antonucci, S. Fineschi, INAF - Osservatorio Astronomico di Torino (Italy); G. Naletto, Univ. degli Studi di Padova (Italy) and CNR-Istituto di Fotonica e Nanotecnologie (Italy); P. Nicolosi, Univ. degli Studi di Padova (Italy) and CNR-Istituto di Fotonica e Nanotecnologie di Fotonica e Nanotecnologie, CNR (Italy); D. Spadaro, INAF - Osservatorio Astrofisico di Catania (Italy); V. Andretta, INAF - Osservatorio Astronomico di Capodimonte (Italy); C. Gennaro, G. Zoppo, A. Stevoli, Thales Alenia Space (Italy); E. Battistelli, A. Rusconi, SELEX Galileo S.p.A. (Italy)
- 8442 4J **Stray light control for asteroid detection at low solar elongation for the NEOSat micro-satellite telescope** [8442-170]
V. Isbrucker, Isbrucker Consulting Inc. (Canada); J. Stauder, Utah State Univ. Research Foundation (United States); D. Laurin, A. Hollinger, Canadian Space Agency (Canada)
- 8442 4K **Determination of ghost images for the wide angle camera of the Rosetta ESA mission** [8442-171]
V. Da Deppo, LUXOR Lab., CNR-Istituto di Fotonica e Nanotecnologie (Italy); F. La Forgia, Univ. degli Studi di Padova (Italy); G. Naletto, Univ. degli Studi di Padova (Italy) and LUXOR Lab., Istituto di Fotonica e Nanotecnologie, CNR (Italy); M. G. Pelizzo, LUXOR Lab., CNR-Istituto di Fotonica e Nanotecnologie (Italy); C. Barbieri, Univ. degli Studi di Padova (Italy) and INAF - Osservatorio Astronomico di Padova (Italy)

- 8442 4L **SOLAR-T: terahertz photometers to observe solar flare emission on stratospheric balloon flights** [8442-172]
P. Kaufmann, Univ. Presbiteriana Mackenzie (Brazil) and Univ. Estadual de Campinas (Brazil); A. Abrantes, Propertech Tecnologia Ltda. (Brazil); E. Bortolucci, Univ. Estadual de Campinas (Brazil); E. Correia, Univ. Presbiteriana Mackenzie (Brazil) and Instituto Nacional de Pesquisas Espaciais (Brazil); J. Diniz, Univ. Estadual de Campinas (Brazil); G. Fernandez, Complejo Astronómico El Leoncito (Argentina); L. O. T. Fernandes, Univ. Presbiteriana Mackenzie (Brazil) and Univ. Estadual de Campinas (Brazil); C. G. Giménez de Castro, Univ. Presbiteriana Mackenzie (Brazil); R. Godoy, Complejo Astronómico El Leoncito (Argentina); G. Hurford, Univ. of California, Berkeley (United States); A. S. Kudaka, Univ. Presbiteriana Mackenzie (Brazil); M. Lebedev, Special Astrophysical Observatory (Russian Federation); R. P. Lin, Univ. of California, Berkeley (United States); N. Machado, Propertech Tecnologia Ltda. (Brazil); V. S. Makhmutov, P.N. Lebedev Physical Institute (Russian Federation); R. Marcon, Univ. Estadual de Campinas (Brazil) and Observatório Solar Bernard Lyot (Brazil); A. Marun, Complejo Astronómico El Leoncito (Argentina); V. A. Nicolaev, Tydex (Russian Federation); P. Pereyra, Complejo Astronómico El Leoncito (Argentina); J.-P. Raulin, Univ. Presbiteriana Mackenzie (Brazil); C. M. da Silva, Neuron Eletrônica Ltd. (Brazil); A. Shih, NASA Goddard Space Flight Ctr. (United States); Y. I. Stozhkov, P.N. Lebedev Physical Institute (Russian Federation); J. W. Swart, Univ. Estadual de Campinas (Brazil); A. V. Timofeevsky, Tydex (Russian Federation); A. Valio, Univ. Presbiteriana Mackenzie (Brazil); T. Villela, Instituto Nacional de Pesquisas Espaciais (Brazil); M. B. Zakia, Univ. Estadual de Campinas (Brazil)
- 8442 4M **Echoes: a new instrumental concept of spectro-imaging for Jovian seismology** [8442-173]
L. Soulat, F.-X. Schmider, S. Robbe-Dubois, Lab. J.-L. Lagrange, CNRS, Univ. of Nice Sophia Antipolis (France); T. Appourchaux, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris XI (France); Y. Bresson, J.-B. Daban, Lab. J.-L. Lagrange, CNRS, Univ. of Nice Sophia Antipolis (France); P. Gaulme, New Mexico State Univ. (United States); J. Gay, C. Gouvret, Lab. J.-L. Lagrange, CNRS, Univ. of Nice Sophia Antipolis (France)
- 8442 4N **Preliminary internal straylight analysis of the METIS instrument for the Solar Orbiter ESA mission** [8442-174]
E. Verroi, Univ. degli Studi di Padova (Italy); V. Da Deppo, CNR-Istituto di Fotonica e Nanotecnologie (Italy); G. Nalletto, Univ. degli Studi di Padova (Italy) and CNR-Istituto di Fotonica e Nanotecnologie (Italy) and CISAS, Univ. degli Studi di Padova (Italy); S. Fineschi, E. Antonucci, INAF - Osservatorio Astronomico di Torino (Italy)
- 8442 4O **THERMAP: a mid-infrared spectro-imager based on an uncooled micro-bolometer for space missions to small bodies of the solar system** [8442-175]
E. Brageot, O. Groussin, P. Lamy, J.-L. Reynaud, Lab. d'Astrophysique de Marseille, CNRS, Univ. d'Aix-Marseille (France); G. Fargant, Thales Alenia Space (France); J. Licandro, Instituto de Astrofísica de Canarias (Spain); J. Helbert, J. Knollenberg, E. Kührt, DLR Institute for Planetary Research (Germany)
- 8442 4P **Image stabilisation system of the photospheric and helioseismic imager** [8442-176]
R. Volkmer, Kiepenheuer-Institut für Sonnenphysik (Germany); J. Bosch, Univ. de Barcelona (Spain); B. Feger, Kiepenheuer-Institut für Sonnenphysik (Germany); J. M. Gomez, Univ. de Barcelona (Spain); F. Heidecke, W. Schmidt, T. Scheiffelen, M. Sigwarth, D. Soltau, Kiepenheuer-Institut für Sonnenphysik (Germany)

POSTER SESSION: TECHNOLOGIES

- 8442 4Q **Complex apodization Lyot coronagraphy for the direct imaging of exoplanet systems: design, fabrication, and laboratory demonstration** [8442-4]
J. Trauger, D. Moody, B. Gordon, J. Krist, Jet Propulsion Lab. (United States); D. Mawet, European Southern Observatory (Chile)
- 8442 4U **Kalman filter estimation for focal plane wavefront correction** [8442-181]
T. D. Groff, N. J. Kasdin, Princeton Univ. (United States)
- 8442 4V **Phase induced amplitude apodization (PIAA) coronagraphy: recent results and future prospects** [8442-182]
O. Guyon, Steward Observatory, The Univ. of Arizona (United States) and Subaru Telescope, National Astronomical Observatory of Japan (United States); B. Kern, Jet Propulsion Lab. (United States); R. Belikov, NASA Ames Research Ctr. (United States); S. Shaklan, A. Kuhnert, A. Give'on, Jet Propulsion Lab. (United States); F. Martinache, Subaru Telescope, National Astronomical Observatory of Japan (United States)
- 8442 4W **Count rate nonlinearity in near infrared detectors: inverse persistence** [8442-183]
M. Regan, E. Bergeron, K. Lindsay, R. Anderson, Space Telescope Science Institute (United States)
- 8442 4X **Photometry of infrared space telescope images using the grid PRF method Dphot** [8442-185]
D. G. Elliott, Consultant (United States)
- 8442 4Y **Phase retrieval on extended sources in the visible and infrared** [8442-186]
D. H. Pamplin, Abilene Christian Univ. (United States); D. S. Acton, J. S. Knight, Ball Aerospace & Technologies Corp. (United States)
- 8442 4Z **Investigation on the high efficiency volume Bragg gratings performances for spectrometry in space environment: preliminary results** [8442-187]
J. Loicq, Ctr. Spatial de Liège, Univ. de Liège (Belgium); L. M. Gaspar Venancio, European Space Research and Technology Ctr. (Netherlands); M. Georges, Ctr. Spatial de Liège, Univ. de Liège (Belgium)
- 8442 50 **Experimental parametric study of the self-coherent camera** [8442-188]
J. Mazoyer, P. Baudoz, LESIA, CNRS, Observatoire de Paris, Univ. Pierre et Marie Curie, Univ. Paris-Diderot (France); M. Mas, LESIA, CNRS, Observatoire de Paris, Univ. Pierre et Marie Curie, Univ. Paris-Diderot (France) and Lab. d'Astrophysique de Marseille, CNRS-INSU, Univ. d'Aix-Marseille (France); G. Rousset, LESIA, CNRS, Observatoire de Paris, Univ. Pierre et Marie Curie, Univ. Paris-Diderot (France); R. Galicher, NRC Herzberg Institute of Astrophysics, (Canada) and Univ. de Montréal (Canada)
- 8442 51 **Qualification of a null lens using image-based phase retrieval** [8442-189]
M. R. Bolcar, D. L. Aronstein, P. C. Hill, J. S. Smith, T. P. Zielinski, NASA Goddard Space Flight Ctr. (United States)
- 8442 53 **End-to-end coronagraphic modeling including a low-order wavefront sensor** [8442-192]
J. E. Krist, J. T. Trauger, S. C. Unwin, W. A. Traub, Jet Propulsion Lab. (United States)

- 8442 54 **Optimized shaped pupil masks for pupil with obscuration** [8442-193]
A. Carloti, N. J. Kasdin, R. J. Vanderbei, Princeton Univ. (United States); J.-R. Delorme, Univ. Paris-Sud XI (France)
- 8442 55 **Adaptive optics operation with two wavefront sensors in a coronagraph for exoplanet observations** [8442-194]
M. Oya, Nihon Univ. (Japan) and National Astronomical Observatory of Japan (Japan); J. Nishikawa, National Astronomical Observatory of Japan (Japan); M. Horie, Nihon Univ. (Japan) and National Astronomical Observatory of Japan (Japan); N. Murakami, Hokkaido Univ. (Japan); T. Kotani, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); L. Abe, Lab. Hippolyte Fizeau, CNRS, Univ. de Nice-Sophia Antipolis (France); S. Kumagai, Nihon Univ. (Japan); M. Tamura, National Astronomical Observatory of Japan (Japan); T. Kurokawa, Tokyo Univ. of Agriculture and Technology (Japan); H. Murakami, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan)
- 8442 57 **Development of CdZnTe immersion grating for spaceborne application** [8442-197]
Y. Sarugaku, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); Y. Ikeda, Photocoding Inc. (Japan) and Kyoto-Sangyo Univ. (Japan); N. Kobayashi, Institute of Astronomy, The Univ. of Tokyo (Japan); T. Sukegawa, S. Sugiyama, Canon Inc. (Japan); K. Enya, H. Kataza, H. Matsuhara, T. Nakagawa, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); H. Kawakita, S. Kondo, Kyoto-Sangyo Univ. (Japan); Y. Hirahara, Nagoya Univ. (Japan); C. Yasui, The Univ. of Tokyo (Japan)
- 8442 5A **How Earth atmospheric radiations may affect astronomical observations from low-orbit satellites** [8442-200]
A. Irbah, M. Meftah, A. Hauchecorne, E. M. Cisse, M. Lin, LATMOS, CNRS, Univ. Paris VI, Univ. de Versailles St.-Quentin-en-Yvelines (France); M. Rouzé, Ctr. National Etude Spatiale (France)
- 8442 5B **A laboratory experiment for a new free-standing pupil mask coronagraph** [8442-201]
K. Haze, K. Enya, T. Kotani, Japan Aerospace Exploration Agency (Japan); L. Abe, Lab. J.-L. Lagrange, CNRS, Univ. of Nice Sophia Antipolis (France); T. Nakagawa, Japan Aerospace Exploration Agency (Japan); H. Matsuhara, Japan Aerospace Exploration Agency (Japan); T. Sato, Agency of Industrial Science and Technology (Japan); T. Yamamuro, OptCraft (Japan)
- 8442 5C **Prototype-testbed for infrared optics and coronagraph (PINOCO)** [8442-203]
K. Enya, K. Haze, K. Arimatsu, H. Kataza, T. Wada, T. Kotani, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan); L. Abe, Lab. Hippolyte Fizeau, CNRS, Univ. de Nice-Sophia Antipolis (France); T. Yamamuro, OptCraft (Japan)

8442 5D **A coronagraph system with unbalanced nulling interferometer: progress of dynamic range**
[8442-205]

J. Nishikawa, National Astronomical Observatory of Japan (Japan); K. Yokochi, Tokyo Univ. of Agriculture and Technology (Japan); N. Murakami, Hokkaido Univ. (Japan); L. Abe, Lab. Hippolyte Fizeau, CNRS, Univ. de Nice-Sophia Antipolis (France); T. Kotani, National Astronomical Observatory of Japan (Japan); M. Tamura, National Astronomical Observatory of Japan (Japan) and Graduate Univ. for Advanced Studies (Japan); T. Kurokawa, Tokyo Univ. of Agriculture and Technology (Japan); A. Tavrov, Space Research Institute (Russian Federation); M. Takeda, Utsunomiya Univ. (Japan); H. Murakami, Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency (Japan)

Wednesday Plenary Session

Luc Simard, National Research Council Canada (Canada)

Thursday Plenary Session

Gillian S. Wright, UK Astronomy Technology Centre (United Kingdom)

Introduction

A broad range of optical, infrared, and millimeter wave space telescopes and instruments are enabling a dramatically increased understanding of the origin and structure of the universe, the numbers and characteristics of exosolar planets, and other questions of profound astrophysics importance. The same foundational instrument technologies are also providing increasingly detailed solar studies and enabling new lunar and planetary missions. This conference, part of a continuing series of biannual symposia, was structured to provide a broad overview of these concepts and technologies, including performance and early results from recently launched systems, status reports on planned systems, and insights into new technologies and concepts for future systems.

The conference consisted of a total of 96 oral presentations divided among 19 sessions that were conducted over a total of six days. These were supplemented by a one day poster session that included 87 poster presentations.

Currently active and planned missions addressed within the conference included:

- Astrophysics: Current and recent missions included Hubble, Spitzer, AKARI, and Herschel. Planned missions under active development included GAIA, JWST, WFIRST, EUCLID, EChO, and several Explorer class missions.
- Solar System Missions: SOHO, SOLAR-C, and Rosetta.

The Conference explored the current state of the art of space telescope and observatory concepts, technologies from the visible through the infrared to millimeter wave. The meeting elicited ideas responsive to current risks and opportunities. Papers were presented that addressed multiple topic areas, including the following:

- Optical, IR, and millimeter wave astronomical space telescopes and instruments including their on-orbit performance:
 - Concepts and technologies for exoplanet detection and characterization
 - Approaches to increasing insight into dark matter and dark energy and the origin, evolution, and structure of the universe
- Innovative telescopes and instrumentation for solar system studies:
 - Solar astrophysics
 - Structure and evolution of the constituent bodies, large and small, of the solar system
- Highly innovative space telescope and instrument concepts
- Smaller and more affordable mission concepts:
 - Technology demonstrations
 - Expanded performance of space telescopes against additional science questions

- Life cycles and costs that support student involvement while producing valuable science
- Enabling subsystem and component technologies for space telescopes, such as:
 - Innovative real time metrology and wavefront sensing and control
 - Technologies and architectures for achieving high thermal stability of large telescopes
 - New detector and sensor technologies
 - Enhanced spectrometers
 - Coating technologies
- Approaches that leverage results and programs in other areas:
 - Balloon and sounding rocket astronomical observatories and instruments
 - Synergism with science missions in other spectral regions
 - Earth observation concepts and technologies
- Systems engineering for space telescopes, to include:
 - System modeling of telescopes and space observatories and simulations of their performance
 - Ground fabrication, integration, and testing of telescopes, instruments, and complete telescope structures and observatories
