, "Front Matter: Volume 8448," Proc. SPIE 8448, Observatory Operations: Strategies, Processes, and Systems IV, 844801 (13 September 2012); doi: 10.1117/12.2006268

Event: SPIE Astronomical Telescopes + Instrumentation, 2012, Amsterdam, Netherlands

PROCEEDINGS OF SPIE

Observatory Operations: Strategies, Processes, and Systems IV

**Alison B. Peck
Robert L. Seaman
Fernando Comeron**
Editors

**4–6 July 2012
Amsterdam, Netherlands**

Sponsored by
SPIE

Cooperating Organizations
American Astronomical Society (United States) • Netherlands Institute for Radio Astronomy (ASTRON) (Netherlands) • Ball Aerospace & Technologies Corporation (United States)
Canadian Astronomical Society (CASCA) (Canada) • European Astronomical Society (Switzerland) • ESO—European Southern Observatory (Germany) • International Astronomical Union • Korea Astronomy and Space Science Institute (KASI) (Republic of Korea) • National Radio Astronomy Observatory • POPSud (France) • TNO (Netherlands)

SPIE

Volume 8448

Proceedings of SPIE 0277-786X, V.8448

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Observatory Operations: Strategies, Processes, and Systems IV, edited by
Alison B. Peck, Robert L. Seaman, Fernando Comeron, Proc. of SPIE Vol. 8448,
844801 • © 2012 SPIE • CCC code: 0277-786X/12/\$18 • doi: 10.1117/12.2006268

Proc. of SPIE Vol. 8448 844801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- xiii *Conference Committee*
- xv *Introduction*
- xix *The cosmic microwave background: observing directly the early universe (Plenary Paper) [8442-506]*
P. de Bernardis, S. Masi, Univ. degli Studi di Roma La Sapienza (Italy)

SESSION 1 SCIENCE OPERATIONS PROCESSES I

- 8448 02 **ALMA: the first year of observations** [8448-1]
A. Lundgren, L.-A. Nyman, M. Saito, B. Vila Vilaro, G. Mathys, Joint ALMA Observatory (Chile); P. Andreani, European Southern Observatory (Germany); J. Hibbard, National Radio Astronomy Observatory (United States); S. K. Okumura, K. Tatematsu, National Astronomical Observatory of Japan (Japan); B. Dent, M. G. Rawlings, E. Villard, L. Ball, Joint ALMA Observatory (Chile)
- 8448 03 **The building blocks for JWST I&T to operations: from simulator to flight units** [8448-2]
F. Wasiak, W. Ochs, A. Johns, B. Seaton, C. Adams, C. Fatig, R. Jones, NASA Goddard Space Flight Ctr. (United States); W. Jackson, Northrop Grumman Aerospace Systems (United States)
- 8448 04 **Space-borne survey instrument operations: lessons learned and new concepts for the Euclid NISP instrument** [8448-3]
L. Valenziano, INAF - IASF Bologna (Italy); A. Gregorio, Univ. degli Studi di Trieste (Italy) and INAF - Osservatorio Astronomico di Trieste (Italy); R. Butler, INAF - IASF Bologna (Italy); J. Amiaux, Commissariat à l'Énergie Atomique (France); C. Bonoli, F. Bortoletto, INAF - Osservatorio Astronomico di Padova (Italy); C. Burigana, INAF - IASF Bologna (Italy); L. Corcione, INAF - Osservatorio Astronomico di Torino (Italy); A. Ealet, Ctr. de Estudios de Física del Cosmos de Aragón (France); M. Frailis, INAF - Osservatorio Astronomico di Trieste (Italy); K. Jahnke, Max Planck Institute for Astronomy (Germany); S. Ligorì, INAF - Osservatorio Astronomico di Torino (Italy); E. Maiorano, G. Morgante, L. Nicastro, INAF - IASF Bologna (Italy); F. Pasian, INAF - Osservatorio Astronomico di Trieste (Italy); M. Riva, INAF - Osservatorio Astronomico di Brera (Italy); R. Scaramella, INAF - Osservatorio Astronomico di Roma (Italy); F. Schiavone, INAF - IASF Bologna (Italy); D. Tavagnacco, INAF - Osservatorio Astronomico di Trieste (Italy); R. Toledo-Moreo, Univ. Politécnica de Cartagena (Spain); M. Trifoglio, INAF - IASF Bologna (Italy); A. Zacchei, INAF - Osservatorio Astronomico di Trieste (Italy); F. M. Zerbi, INAF - Osservatorio Astronomico di Brera (Italy); T. Maciaszek, Ctr. National d'Études Spatiales (France)

- 8448 05 **Updating Chandra high-radiation safing in response to changing observatory conditions** [8448-4]
M. Juda, Harvard-Smithsonian Ctr. for Astrophysics (United States); M. Baski, Northrop Grumman Aerospace Systems (United States); C. Eagan, Harvard-Smithsonian Ctr. for Astrophysics (United States); J. Holmes, Northrop Grumman Information Systems (United States); S. Hurley, D. Jones, E. Martin, Northrop Grumman Aerospace Systems (United States); H. Rice, Harvard-Smithsonian Ctr. for Astrophysics (United States); P. Viens, B. Williams, D. Wong, Northrop Grumman Aerospace Systems (United States)
- 8448 06 **Testing JWST's proposal planning system: early progress** [8448-73]
I. E. Jordan, A. Patterson, Computer Sciences Corp. (United States); W. DePriest, D. C. Taylor, R. Downes, Association of Universities for Research in Astronomy (United States); W. Kinzel, Computer Sciences Corp. (United States)
- 8448 07 **The slitmask alignment tool: robust, efficient, and astronomer-friendly software for aligning multi-object slitmasks** [8448-6]
M. Kassis, G. D. Wirth, W. M. Keck Observatory (United States); A. C. Phillips, Univ. of California Observatories, Lick Observatory, Univ. of California, Santa Cruz (United States); C. C. Steidel, California Institute of Technology (United States)

SESSION 2 SCIENCE OPERATIONS PROCESSES II

- 8448 08 **Operational concept of the VLT's adaptive optics facility and its instruments** [8448-7]
H. Kuntschner, P. Amico, J. Kolb, P. Madec, R. Arsenault, M. Sarazin, European Southern Observatory (Germany); D. Summers, W. M. Keck Observatory (United States)
- 8448 09 **Improving the observing efficiency of SINFONI and KMOS at the VLT by factors of 2 to 4: sophisticated sky subtraction algorithms** [8448-8]
N. A. Thatte, Univ. of Oxford (United Kingdom); N. Scott, Swinburne Univ. of Technology (Australia); R. Houghton, Univ. of Oxford (United Kingdom); D. Nuernberger, R. N. Abuter, European Southern Observatory (Germany); M. Tecza, Univ. of Oxford (United Kingdom)
- 8448 0A **Optimisation of solar synoptic observations** [8448-9]
M. Klvaňa, M. Sobotka, M. Švanda, Astronomical Institute of the AS CR, v.v.i. (Czech Republic)

SESSION 3 USER SUPPORT

- 8448 0B **User-support models at the Isaac Newton Group of Telescopes** [8448-10]
C. Benn, Isaac Newton Group of Telescopes (Spain)
- 8448 0C **User support to Guoshoujing Telescope (LAMOST)** [8448-11]
X. Chen, A. Luo, National Astronomical Observatories (China)

SESSION 4 ARCHIVES AND VIRTUAL OBSERVATORY

- 8448 0D **The role in the Virtual Astronomical Observatory in the era of massive data sets** [8448-12]
G. B. Berriman, California Institute of Technology (United States); R. J. Hanisch, U.S. Virtual Astronomical Observatory (United States) and Space Telescope Science Institute (United States); T. W. Lazio, Jet Propulsion Lab. (United States)
- 8448 0E **Running a distributed virtual observatory: U.S. Virtual Astronomical Observatory operations** [8448-13]
T. A. McGlynn, NASA Goddard Space Flight Ctr. (United States); R. J. Hanisch, U. S. Virtual Astronomical Observatory (United States) and Space Telescope Science Institute (United States); G. B. Berriman, California Institute of Technology (United States); A. R. Thakar, The Johns Hopkins Univ. (United States)
- 8448 0G **The Gran Telescopio Canarias and Calar Alto Virtual Observatory compliant archives** [8448-15]
E. Solano, R. Gutiérrez, J. M. Alacid, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain) and Spanish Virtual Observatory (Spain); F. Jiménez-Esteban, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain) and Spanish Virtual Observatory (Spain) and Saint Louis Univ. (Spain); A. Velasco Trasmonte, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain) (Spain) and Spanish Virtual Observatory (Spain)
- 8448 0H **All sky monitoring network with amateur telescopes** [8448-67]
Z. Fang, Shanghai Zhenheng Electro-Optical Systems Co., Ltd. (China); C. Xu, Shanghai Institute of Technical Physics (China)
- 8448 0I **The JWST data management system engineering database** [8448-17]
M. A. Nieto-Santisteban, Space Telescope Science Institute (United States)

SESSION 5 OBSERVATORY METRICS, LEGACY, AND BIBLIOGRAPHY

- 8448 0J **Meaningful metrics for observatory publication statistics** [8448-18]
A. H. Rots, S. L. Winkelman, G. E. Becker, Smithsonian Astrophysical Observatory (United States)
- 8448 0K **Telescope bibliographies: an essential component of archival data management and operations** [8448-19]
A. Accomazzi, E. Henneken, C. Erdmann, A. Rots, Smithsonian Astrophysical Observatory (United States)
- 8448 0L **DOMES: operational metrics under one roof** [8448-20]
F. Primas, S. Marteau, L. E. Tacconi-Garman, V. Mainieri, M. Rejkuba, S. Mysore, European Southern Observatory (Germany)

8448 OM **Introduction to the CFHT Legacy Survey final release (CFHTLS T0007)** [8448-21]
 J. J. Cuillandre, K. Withington, Canada-France-Hawaii Telescope (United States);
 P. Hudelot, Y. Goranova, H. McCracken, F. C. Magnard, Y. Mellier, Institut d'Astrophysique
 de Paris (France); N. Regnault, M. Bétoule, Lab. de Physique Nucléaire et des Hautes
 Energies (France); H. Aussel, Service d'Astrophysique, CEA, Saclay (France); J. Kavelaars,
 Canadian Astronomy Data Ctr., Herzberg Institute of Astrophysics, NRC (Canada);
 P. Fernique, F. Bonnarel, F. Ochsenbein, Ctr. de Données astronomiques de Strasbourg,
 Observatoire de Strasbourg (France); O. Ilbert, Observatoire Astronomique de Marseille-
 Provence (France)

8448 ON **Applying decades of HST experience to JWST data processing** [8448-22]
 F. Pierfederici, M. Swam, G. Greene, Space Telescope Science Institute (United States)

SESSION 6 TIME DOMAIN, TARGET OF OPPORTUNITY, AND TRANSIENT EVENTS

8448 OP **Connecting the time domain community with the Virtual Astronomical Observatory**
 [8448-24]
 M. J. Graham, S. Djorgovski, C. Donalek, A. J. Drake, A. A. Mahabal, California Institute of
 Technology (United States); R. L. Plante, Univ. of Illinois at Urbana-Champaign (United
 States); J. Kantor, LSST Corp. (United States); J. C. Good, California Institute of Technology
 (United States)

8448 OQ **Rapid alerts for following up gravitational wave event candidates** [8448-25]
 P. S. Shawhan, Univ. of Maryland, College Park and Joint Space-Science Institute (United
 States)

8448 OR **Responding to the event deluge** [8448-26]
 R. D. Williams, California Institute of Technology (United States); S. D. Barthelmy, NASA
 Goddard Space Flight Ctr. (United States); R. B. Denny, DC-3 Dreams SP (United States);
 M. J. Graham, California Institute of Technology (United States); J. Swinbank, Univ. van
 Amsterdam (Netherlands)

8448 OS **High-level simulation of JWST event-driven operations** [8448-27]
 R. Henry, W. Kinzel, Space Telescope Science Institute (United States)

SESSION 7 REMOTE AND ROBOTIC OPERATIONS

8448 OT **Remote observing with NASA's Deep Space Network** [8448-28]
 T. H. Kuiper, W. A. Majid, Jet Propulsion Lab. (United States); S. Martinez, European Space
 Astronomy Ctr. (Spain); C. Garcia-Miro, Madrid Deep Space Communications Complex
 (Spain); J. Rizzo, Ctr. de Astrobiología, Instituto Nacional de Técnica Aeroespacial (Spain)

SESSION 8 SCHEDULING AND DATA FLOW MANAGEMENT

8448 OW **A genetic algorithm for ground-based telescope observation scheduling** [8448-31]
 W. Mahoney, C. Veillet, K. Thanjavur, Canada-France-Hawaii Telescope Corp. (United
 States)

- 8448 0X **The 4MOST facility simulator: instrument and science optimisation** [8448-32]
T. Boller, T. Dwelly, Max-Planck-Institut für extraterrestrische Physik (Germany)
- 8448 0Y **eROSITA in-orbit calibration strategy and plan: from the ground to the science** [8448-33]
M. J. Freyberg, K. Dennerl, Max-Planck-Institut für extraterrestrische Physik (Germany)

SESSION 9 PROGRAM AND OBSERVATION SCHEDULING

- 8448 0Z **JWST observation specification and expansion to support planning and scheduling** [8448-34]
W. M. Kinzel, Computer Sciences Corp. (United States) and Space Telescope Science Institute (United States); R. E. Douglas, Space Telescope Science Institute (United States)
- 8448 10 **Measuring the effectiveness of simulated LSST observing programs** [8448-35]
S. T. Ridgway, S. Chandrasekharan, National Optical Astronomy Observatory (United States); K. H. Cook, Eureka Scientific, Inc. (United States); R. Jones, K. Krughoff, Univ. of Washington (United States); C. Petry, Steward Observatory, The Univ. of Arizona (United States); Ž. Ivezić, Univ. of Washington (United States)
- 8448 11 **RTS2: meta-queues scheduling and its realisation for FLWO 1.2m telescope** [8448-36]
P. Kubánek, Institute of Physics of the ASCR, v.v.i. (Czech Republic); E. Falco, SAO/FLWO (United States); M. Jelinek, Instituto de Astrofísica de Andalucía, CSIC (Spain); M. Prouza, Institute of Physics of the ASCR, v.v.i. (Czech Republic); J. Štrobl, Astronomical Institute of the ASCR, v.v.i. (Czech Republic); M. Fuchs, Štefánik Observatory (Czech Republic); J. Gorosabel, Instituto de Astrofísica de Andalucía, CSIC (Spain)

SESSION 10 SITE AND FACILITY OPERATIONS I

- 8448 13 **Keeping the Hubble Space Telescope operating efficiently in its third decade** [8448-39]
D. S. Adler, Space Telescope Science Institute (United States)
- 8448 14 **Science commissioning of JWST: applying Hubble's lessons to the Webb** [8448-40]
C. P. Biagetti, Space Telescope Science Institute (United States)
- 8448 15 **Mixing completion, commissioning, and operations at the LBT** [8448-41]
R. F. Green, J. M. Hill, J. Brynnel, J. H. Slagle, D. S. Ashby, N. J. Cushing, J. K. Little, R. Wagner, Large Binocular Telescope Observatory (United States)
- 8448 16 **Organizational transformation into the operational phase of the GTC** [8448-42]
M. van der Hoeven, R. Rutten, P. Alvarez Martin, Instituto de Astrofísica de Canarias (Spain)

SESSION 11 SITE AND FACILITY OPERATIONS II

- 8448 17 **66 antennas, up to 16km baselines, 5000m elevation, 28 km from support: the coming challenge of ALMA Observatory antenna group operations and maintenance** [8448-43]
D. Chalmers, F. Daruich, B. Hoff, C. Jara, Atacama Large Millimeter/submillimeter Array Observatory (Chile)

- 8448 18 **New challenges for the maintenance strategies on large astronomical facilities at remote observing sites** [8448-44]
A. Silber, European Southern Observatory (Germany)
- 8448 19 **Taming the beast: operating the world's largest low-frequency radio observatory LOFAR** [8448-45]
A. P. Schoenmakers, ASTRON (Netherlands)
- 8448 1A **The Observatorio Astrofísico de Javalambre: goals and current status** [8448-52]
A. J. Cenarro, M. Moles, D. Cristóbal-Hornillos, A. Marín-Franch, N. Gruel, A. Yanes-Díaz, S. Chueca, J. Varela, A. Ederoclite, F. Rueda-Teruel, S. Rueda-Teruel, Ctr. de Estudios de Física del Cosmos de Aragón (Spain); N. Benítez, Instituto de Astrofísica de Andalucía, CSIC (Spain); J. Cepa, Instituto de Astrofísica de Canarias (Spain); R. Dupke, Observatorio Nacional (Brazil); A. Fernández-Soto, Instituto de Física de Cantabria, CSIC (Spain); C. Mendes de Oliveira, L. Sodré, K. Taylor, Institute of Astronomy, Univ. de São Paulo (Brazil); O. Pirnay, AMOS Ltd. (Belgium); J. L. Antón, L. A. Díaz-García, M. C. Díaz-Martín, S. Gracia-Gracia, L. Guillén-Civera, J. Hernández-Fuertes, C. Hernández-Monteaagudo, J. L. Lamadrid, A. López-Sainz, C. López-Sanjuan, R. Luis-Simoes, N. Maícas, L. Valdivielso, K. Viironen, Ctr. de Estudios de Física del Cosmos de Aragón (Spain)
- 8448 1B **Goals and strategies in the global control design of the OAJ Robotic Observatory** [8448-87]
A. Yanes-Díaz, S. Rueda-Teruel, J. L. Antón, F. Rueda-Teruel, M. Moles, A. Cenarro, A. Marín-Franch, A. Ederoclite, N. Gruel, J. Varela, D. Cristóbal-Hornillos, S. Chueca, M. Díaz-Martín, L. Guillén, R. Luis-Simoes, N. Maícas, J. Lamadrid, A. López-Sainz, J. Hernández-Fuertes, L. Valdivielso, Ctr. de Estudios de Física del Cosmos de Aragón (Spain); C. Mendes de Oliveira, P. Penteado, Univ. de São Paulo (Brazil); W. Schoenell, Instituto de Astrofísica de Andalucía-CSIC (Spain); A. Kanaan, Univ. Federal de Santa Catarina Florianopolis (Brazil)

SESSION 12 SITE AND FACILITY OPERATIONS III

- 8448 1C **Paranal instruments: installation, maintenance, optimization, and operation** [8448-48]
F. Gonte, A. Smette, European Southern Observatory (Chile)
- 8448 1D **The Keck way: vision and reality of technical operations at Keck** [8448-49]
H. A. Lewis, R. H. Matsuda, W. M. Keck Observatory (United States)
- 8448 1E **Spitzer warm mission: maximizing the science return in the extended mission phase** [8448-46]
L. J. Storrie-Lombardi, Spitzer Science Ctr., California Institute of Technology (United States); S. R. Dodd, Jet Propulsion Lab. (United States)
- 8448 1G **A minimalist operating mode for UKIRT** [8448-51]
T. Kerr, G. R. Davis, Joint Astronomy Ctr. (United States); S. C. Craig, Joint Astronomy Ctr. (United States) and National Solar Observatory (United States); C. Walther, T. Chuter, Joint Astronomy Ctr. (United States)

- 8448 1H **All-sky mid-infrared imagery to characterize sky conditions and improve STELLA's observational performance** [8448-53]
M. Weber, Leibniz-Institut für Astrophysik Potsdam (Germany); D. Klebe, Denver Museum of Nature and Science (United States); K. Strassmeier, T. Granzer, Leibniz-Institut für Astrophysik Potsdam (Germany); R. D. Blatherwick, Univ. of Denver (United States); M. Müller, Leibniz-Institut für Astrophysik Potsdam (Germany)

POSTER SESSION

- 8448 1I **Pointing effects and their consequences for Spitzer IRAC exoplanet observations** [8448-47]
C. J. Grillmair, S. J. Carey, J. R. Stauffer, Spitzer Science Ctr., California Institute of Technology (United States); M. E. Fisher, R. Olds, Lockheed Martin Space Systems Co. (United States); J. G. Ingalls, J. E. Krick, W. J. Glaccum, S. Laine, P. J. Lowrance, J. A. Surace, Spitzer Science Ctr., California Institute of Technology (United States)
- 8448 1J **Fermi Large Area Telescope operations: progress over 4 years** [8448-57]
R. A. Cameron, SLAC National Accelerator Lab. (United States)
- 8448 1L **Research on schedulers for astronomical observatories** [8448-59]
J. Colome, Institut de Ciències de l'Espai, CSIC (Spain); P. Colomer, GTD Sistemas de Información (Spain); J. Guàrdia, I. Ribas, J. Campreciós, Institut de Ciències de l'Espai, CSIC (Spain); T. Coiffard, GTD Sistemas de Información (Spain); L. Gesa, F. Martínez, F. Rodler, Institut de Ciències de l'Espai, CSIC (Spain)
- 8448 1M **MABEL at IPAC: managing address books and email lists at the Infrared Processing and Analysis Center** [8448-60]
M. Crane, C. Brinkworth, D. Gelino, E. O'Leary, California Institute of Technology (United States)
- 8448 1N **Cryogenics maintenance strategy** [8448-61]
F. Cruzat, ALMA Observatory (Chile)
- 8448 1O **Challenges and peculiarities of ESPRESSO data flow cycle: from target choice to scientific results** [8448-62]
P. Di Marcantonio, INAF - Osservatorio Astronomico di Trieste (Italy); D. Sosnowska, C. Lovis, Observatoire Astronomique de l'Univ. de Genève (Switzerland); V. D'Odorico, G. Cupani, INAF - Osservatorio Astronomico di Trieste (Italy); S. Sousa, Ctr. de Astrofísica, Univ. do Porto (Portugal); J. I. González Hernández, Instituto de Astrofísica de Canarias (Spain); R. Cirami, INAF - Osservatorio Astronomico di Trieste (Italy); G. Lo Curto, European Southern Observatory (Germany); D. Mégevand, Observatoire Astronomique de l'Univ. de Genève (Switzerland); S. Cristiani, INAF - Osservatorio Astronomico di Trieste (Italy)
- 8448 1P **Long-term performance of the VISIR/VLT instrument before the upgrade** [8448-63]
D. Dobrzycka, European Southern Observatory (Germany); Y. Momany, European Southern Observatory (Chile); L. Lundin, R. Siebenmorgen, H. U. Käufel, European Southern Observatory (Germany); A. Smette, European Southern Observatory (Chile); F. Kerber, M. Van Den Ancker, European Southern Observatory (Germany)

- 8448 1R **Scheduler software for the Observatorio Astrofísico de Javalambre** [8448-65]
A. Ederoclite, D. Cristóbal-Hornillos, Ctr. de Estudios de Física del Cosmos de Aragón (Spain); M. Moles, Ctr. de Estudios de Física del Cosmos de Aragón (Spain) and Instituto de Astrofísica de Andalucía, CSIC (Spain); A. J. Cenarro, A. Marín-Franch, A. Yanes-Díaz, N. Gruel, J. Varela, S. Chueca, F. Rueda-Teruel, S. Rueda-Teruel, R. Luis-Simoes, J. Hernández-Fuertes, Á. López-Sainz, M. Díaz-Martín, Ctr. de Estudios de Física del Cosmos de Aragón (Spain)
- 8448 1S **Conceptual design of the data handling system for the European Solar Telescope** [8448-66]
I. Ermolli, INAF - Osservatorio Astronomico di Roma (Italy); G. Cauzzi, INAF - Osservatorio Astrofisico di Arcetri (Italy); M. Collados, Instituto de Astrofísica de Canarias (Spain); F. Paletou, Univ. de Toulouse, CNRS (France); K. Reardon, INAF - Osservatorio Astrofisico di Arcetri (Italy); J. Aboudarham, Observatoire de Paris (France); R. Cirami, INAF - Osservatorio Astronomico di Trieste (Italy); R. Cosentino, INAF - Osservatorio Astrofisico di Catania (Italy); D. Del Moro, Univ. degli Studi di Roma Tor Vergata (Italy); P. Di Marcantonio, INAF - Osservatorio Astronomico di Trieste (Italy); F. Giorgi, INAF - Osservatorio Astronomico di Roma (Italy); M. Lafon, Univ. de Toulouse, CNRS (France); E. Pietropaolo, Univ. degli Studi dell'Aquila (Italy); P. Romano, INAF - Osservatorio Astrofisico di Catania (Italy)
- 8448 1U **Optimizing the observing efficiency of the James Webb Space Telescope** [8448-70]
K. D. Gordon, V. Balzano, W. Blair, H. Ferguson, W. Kinzel, J. Lotz, Space Telescope Science Institute (United States); J. R. Rigby, G. Sonneborn, NASA Goddard Space Flight Ctr. (United States); J. Tumlinson, Space Telescope Science Institute (United States)
- 8448 1V **Calibration plan for J-PAS and J-PLUS surveys** [8448-71]
N. Gruel, Ctr. de Estudios de Física del Cosmos de Aragón (Spain); M. Moles, Ctr. de Estudios de Física del Cosmos de Aragón (Spain) and Instituto de Astrofísica de Andalucía, CSIC (Spain); J. Varela, D. Cristóbal-Hornillos, A. Ederoclite, A. J. Cenarro, A. Marín-Franch, S. Chueca, A. Yanes-Díaz, F. Rueda-Teruel, S. Rueda-Teruel, R. Luis-Simoes, A. López-Sainz, J. Hernández Fuertes, Ctr. de Estudios de Física del Cosmos de Aragón (Spain)
- 8448 1W **An observation planning algorithm applied to multi-objective astronomical observations and its simulation in COSMOS field** [8448-72]
Y. Jin, Y. Gu, C. Zhai, Univ. of Science and Technology of China (China)
- 8448 1X **Observatory bibliographies: current practices** [8448-74]
J. Lagerstrom, Space Telescope Science Institute (United States); S. Winkelman, Smithsonian Astrophysical Observatory (United States); U. Grothkopf, European Southern Observatory (Germany); M. Bishop, National Radio Astronomy Observatory (United States)
- 8448 1Y **Autonomous real-time all-sky cloud detection over Mauna Kea** [8448-75]
W. Mahoney, Canada-France-Hawaii Telescope Corp. (United States); G. Morrison, Institute for Astronomy, Univ. of Hawai'i (United States) and Canada-France-Hawaii Telescope Corp. (United States); G. Matsushige, Canada-France-Hawaii Telescope Corp. (United States)
- 8448 1Z **Spitzer operations: scheduling the out years** [8448-76]
W. A. Mahoney, California Institute of Technology (United States); M. J. Effertz, M. E. Fisher, Lockheed Martin Space Systems Co. (United States); L. J. Author Index

Conference Committee

Symposium Chairs

Mark M. Casali, European Southern Observatory (Germany)
Kathryn A. Flanagan, Space Telescope Science Institute (United States)

Symposium Cochairs

Gillian S. Wright, UK Astronomy Technology Centre (United Kingdom)
Luc Smiard, National Research Council Canada (Canada)

Conference Chairs

Alison B. Peck, Joint ALMA Observatory (Chile) and National Radio Astronomy Observatory (Chile)
Robert L. Seaman, National Optical Astronomy Observatory (United States)
Fernando Comeron, European Southern Observatory (Germany)

Conference Program Committee

David S. Adler, Space Telescope Science Institute (United States)
Lori E. Allen, National Optical Astronomy Observatory (United States)
Joshua Simon Bloom, University of California, Berkeley (United States)
Dennis R. Crabtree, Gemini Observatory (Canada) and National Research Council Canada (Canada)
Suzanne R. Dodd, Jet Propulsion Laboratory (United States)
Richard F. Green, Large Binocular Telescope (United States) and The University of Arizona (United States)
Andreas Kaufer, European Southern Observatory (Chile)
Douglas Pierce-Price, European Southern Observatory (Germany)
Nicole M. Radziwill, James Madison University (United States)
Arnold H. Rots, Harvard-Smithsonian Center for Astrophysics (United States)

Session Chairs

- 1 Science Operations Processes I
Alison B. Peck, Joint ALMA Observatory (Chile) and National Radio Astronomy Observatory (Chile)
- 2 Science Operations Processes II
Fernando Comeron, European Southern Observatory (Germany)

- 3 User Support
Fernando Comeron, European Southern Observatory (Germany)
- 4 Archives and Virtual Observatory
Suzanne R. Dodd, Jet Propulsion Laboratory (United States)
- 5 Observatory Metrics, Legacy, and Bibliography
David S. Adler, Space Telescope Science Institute (United States)
- 6 Time Domain, Target of Opportunity, and Transient Events
Arnold H. Rots, Harvard-Smithsonian Center for Astrophysics (United States)
- 7 Remote and Robotic Operations
Alison B. Peck, Joint ALMA Observatory (Chile) and National Radio Astronomy Observatory (Chile)
- 8 Scheduling and Data Flow Management
Alison B. Peck, Joint ALMA Observatory (Chile) and National Radio Astronomy Observatory (Chile)
- 9 Program and Observation Scheduling
David S. Adler, Space Telescope Science Institute (United States)
- 10 Site and Facility Operations I
Suzanne R. Dodd, Jet Propulsion Laboratory (United States)
- 11 Site and Facility Operations II
Richard F. Green, Large Binocular Telescope (United States) and The University of Arizona (United States)
- 12 Site and Facility Operations III
Fernando Comeron, European Southern Observatory (Germany)

Introduction

Motivation

While every ground and space observatory has its own individual and unique characteristics, each shares with the others a common need to execute technical and science operations in the most efficient and cost-effective way possible. This need is driven by the upward pressure from users for more services and capabilities in opposition to the downward pressure by funding agencies to contain or reduce costs. Tension at the interface between users and funders is particularly acute in this time of global economic turmoil. At the same time, the technical and logistical challenges are growing with the systems and network complexity of new observing modes, coordinated multi-facility and multi-messenger observing campaigns, fully or partially robotic facilities, integrated instrument pipelines and science archives, and the need to integrate more complex cyber-infrastructure such as the Grid and the Virtual Observatory. The subtle intricacies and mega-scales of new instrumentation will demand correspondingly creative operations modalities.

Building on previous successful conferences, we have invited the observatory operations community to gather to discuss lessons learned, progress made and future initiatives. As before, we are particularly interested in discussions of what works versus what does not work, as well as what was planned versus what actually happened. Discussion of the interplay of science operations, technical operations, data management operations, and observatory development is particularly encouraged - especially as it impacts the maximization of science value return. The interplay of available funding, delivered capabilities/services, and user expectation management and how that informs observatory operations models is another important discussion topic. An additional topic of this conference **is** the rising support challenge of time-domain investigations. Demand for such support is steadily increasing, driven by the desire to study rare, random events as well as long-term, synoptic phenomena. Such studies are particularly challenging when they require coordination, often unpredictable, between multiple space and ground based observatories. While this trend has recently been driven by space-based detections of gamma ray bursts, the startup of ground-based time-domain survey facilities (ramping up to the Large Synoptic Survey Telescope in the second half of this decade) will quickly take this challenge to a new level. Progress reports from new facilities coming on-line and existing facilities facing major new operational challenges are particularly welcome.

Here are some of the main discussion areas that we have tried to address:

Optimizing Operations Management for Scientific Productivity

- Defining effective operations products and goals
- Productivity and efficiency metrics: "lies, damn lies, and statistics"
- Observation execution efficiency: maximizing science target integration time
- Orbit and site selection strategies - impact on observing and calibration efficiencies
- Pre-launch versus post-launch calibrations: What is right balance?
- Calibration standards: quality, re-use, the challenge of increased sensitivity (e.g., more collecting area, more sensitive detectors)
- Calibration strategies: dealing with the effects of weather, atmosphere, and on-orbit conditions
- Fundamental limits to calibration accuracy: physics, process, or variability (instrumental, atmospheric or from the space environment)
- Fault analysis and resource allocation to minimize lost time
- Proposal submission, evaluation, and selection: processes and strategies
- Queue operations and dynamic scheduling: case studies and lessons learned
- Engineering and technical support models, staffing requirements, and costs
- Remote observing: case studies and lessons learned
- The advent of "mobile apps:" observatory operations, remote observing, archive access, and access to literature
- Coping with random events: the impact of atmospheric and space conditions
- Plans versus steady-state reality: lessons learned
- Transitioning from construction to operations: approaches and lessons
- The future: the impact of evolving technology on models, plans, and budgets.

Observatory Operations in the Era of Massive Data

- Science product definition: what is good enough?
- Science product creation: the observatory or the community?
- Science product archiving and curation; in particular, the planning and creation of legacy data sets
- Science product models, staffing requirements, and costs
- End-to-end information management systems: from proposal to product
- Establishing and maintaining bibliographic databases
- Operating survey telescopes
- Data centers: costs and benefits, lessons learned
- The role of the virtual observatory
- System performance monitoring: what is good enough?

- User support models, staffing requirements, and costs
- Innovative operations of small aperture telescopes.

Process Coordination for the Time Domain

- Space-based transient discovery and follow-up
- Radio and non-EM transients
- Observatory operations for target-of-opportunity modes
- Transient event alert publishing in the Virtual Observatory
- Systems architectures for transient follow-up observing
- Integrating data management into time domain workflows
- Distributed QA and user support management
- Coordinated scheduling for multi-wavelength and multi-observatory collaborations.
