SPIE.

Event: SPIE Solar Energy + Technology, 2012, San Diego, California, United States

PROCEEDINGS OF SPIE

High and Low Concentrator Systems for Solar Electric Applications VII

**Kaitlyn VanSant
Adam P. Plesniak**
Editors

**13–15 August 2012
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8468

Proceedings of SPIE 0277-786X, V.8468

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High and Low Concentrator Systems for Solar Electric Applications VII, edited by Kaitlyn VanSant, Adam P. Plesniak,
Proc. of SPIE Vol. 8468, 846801 · © 2012 SPIE · CCC code: 0277-786/12/\$18 · doi: 10.1117/12.2011784

Proc. of SPIE Vol. 8468 846801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *High and Low Concentrator Systems for Solar Electric Applications VII*, edited by Kaitlyn VanSant, Adam P. Plesniak, Proceedings of SPIE Vol. 8468 (SPIE, Bellingham, WA, 2012) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 LOW- TO MID-CONCENTRATION SYSTEMS

- 8468 04 **Comparison of collection and land use efficiency for various solar concentrating field geometries** [8468-3]
K. Stephens, J. R. P. Angel, The Univ. of Arizona (United States)

SESSION 2 CPV/ RELIABILITY: JOINT SESSION WITH CONFERENCE 8472

- 8468 05 **Designing reliability into a 1000X concentration CPV system through targeted stress testing (Invited Paper)** [8468-5]
M. R. Winter, I. Aeby, J. Foresi, EMCORE Corp. (United States)
- 8468 06 **Radiometric ratio characterization for low-to-mid CPV modules operating in variable irradiance conditions** [8468-4]
S. Vorndran, College of Optical Sciences, The Univ. of Arizona (United States); J. Russo, D. Zhang, The Univ. of Arizona (United States); M. Gordon, College of Optical Sciences, The Univ. of Arizona (United States); R. Kostuk, The Univ. of Arizona (United States)

SESSION 3 HOLOGRAPHIC SOLAR CONCENTRATORS

- 8468 07 **Reflection hologram solar spectrum-splitting filters** [8468-8]
D. Zhang, The Univ. of Arizona (United States); M. Gordon, College of Optical Sciences, The Univ. of Arizona (United States); J. M. Russo, The Univ. of Arizona (United States); S. Vorndran, College of Optical Sciences, The Univ. of Arizona (United States); M. Escarra, H. Atwater, California Institute of Technology (United States); R. K. Kostuk, The Univ. of Arizona (United States) and College of Optical Sciences, The Univ. of Arizona (United States)
- 8468 08 **Planar holographic spectrum-splitting PV module design** [8468-9]
M. Gordon, College of Optical Sciences, The Univ. of Arizona (United States); D. Zhang, The Univ. of Arizona (United States); S. Vorndran, College of Optical Sciences, The Univ. of Arizona (United States); J. M. Russo, The Univ. of Arizona (United States); C. K. Luscombe, Univ. of Washington (United States); S. E. Shaheen, Univ. of Denver (United States); R. K. Kostuk, The Univ. of Arizona (United States)

SESSION 4 LUMINESCENT SOLAR CONCENTRATORS

- 8468 0B **Photocurrent enhancement in plasmonic solar cells attached to luminescent solar concentrators** [8468-12]
R. Wang, X. Wang, Z. Zhou, Peking Univ. (China)

SESSION 5 HIGH-CONCENTRATION SYSTEMS I

- 8468 0C **1000x shadow-free mirror-based Köhler concentrator (Invited Paper)** [8468-13]
M. Hernandez, Light Prescriptions Innovators Europe, S. L. (Spain); P. Benítez, Light Prescriptions Innovators Europe, S. L. (Spain) and Univ. Politécnica de Madrid (Spain); J. Mendes-Lopes, Univ. Politécnica de Madrid (Spain); A. Cvetkovic, Light Prescriptions Innovators Europe, S. L. (Spain); Y. Sun, Light Prescriptions Innovators, LLC (United States); J. C. Miñano, Light Prescriptions Innovators Europe, S. L. (Spain) and Univ. Politécnica de Madrid (Spain); J. Chaves, R. Mohedano, Light Prescriptions Innovators Europe, S. L. (Spain)
- 8468 0D **Photovoltaic performance of the dome-shaped Fresnel-Köhler concentrator** [8468-14]
P. Zamora, Univ. Politécnica de Madrid (Spain); P. Benítez, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); L. Yang, Technical Univ. of Madrid (Spain); J. Miñano, Technical Univ. of Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); J. Mendes-Lopes, Politécnica de Madrid (Spain); K. Araki, Daido Steel (Japan)
- 8468 0E **Illumination characterization of glass and metal secondary concentrator elements in a photovoltaic solar concentration system** [8468-15]
B. Coughenour, B. Wheelwright, College of Optical Sciences, The Univ. of Arizona (United States); J. R. P. Angel, College of Optical Sciences, The Univ. of Arizona (United States) and The Univ. of Arizona (United States)

SESSION 6 HIGH-CONCENTRATION SYSTEMS II

- 8468 0F **On-sun performance of an improved dish-based HCPV system (Invited Paper)** [8468-16]
T. Stalcup Jr., Rehnu, Inc. (United States) and The Univ. of Arizona (United States); J. R. P. Angel, Rehnu, Inc. (United States), College of Optical Sciences, The Univ. of Arizona (United States), and The Univ. of Arizona (United States); B. Coughenour, B. Wheelwright, College of Optical Sciences, The Univ. of Arizona (United States); T. Connors, W. Davison, D. Lesser, The Univ. of Arizona (United States); J. Elliott, J. Schaefer, Rehnu, Inc. (United States)
- 8468 0G **Performance of silicone-on-glass Fresnel lenses in EMCORE's Gen 3 high-concentration concentrator photovoltaic system (Invited Paper)** [8468-17]
J. S. Foresi, R. Hoffman, D. King, P. Ponsardin, EMCORE Corp. (United States)
- 8468 0H **The BOS-X approach: achieving drastic cost reduction in CPV through holistic power plant level innovation (Invited Paper)** [8468-6]
A. Plesniak, V. Garboushian, Amonix Inc. (United States)

- 8468 0I **CPV semi-dense array design for dish and tower collectors** [8468-18]
H. Hayden, P. Thomas, N. Fette, Z. Farkas, M. Bading, B. Stone, M. Miner, O. Stickroth,
N. Bagewadi, Southwest Solar Technologies, Inc. (United States); M. Romero, B. Sonuparlak,
MaxQ Technology, LLC (United States); R. Eichholz, M. Ziegler, E. Pawlowski, Schott AG
(Germany)

POSTER SESSION

- 8468 0K **A concentrator photovoltaic system based on branched planar waveguides** [8468-19]
K. Arizono, R. Amano, Y. Okuda, I. Fujieda, Ritsumeikan Univ. (Japan)

Author Index

Conference Committee

Symposium Chair

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

Conference Chairs

Kaitlyn VanSant, National Renewable Energy Laboratory
(United States)

Adam P. Plesniak, Amonix Inc. (United States)

Conference Program Committee

Lori E. Greene, University of California, Irvine (United States)

Raed A. Sherif, Ra3 Solar Consulting (United States)

Daniel J. Friedman, National Renewable Energy Laboratory
(United States)

Kanchan Ghosal, Semprius, Inc. (United States)

Raymond K. Kostuk, The University of Arizona (United States)

Session Chairs

- 1 Low- to Mid-Concentration Systems
Adam P. Plesniak, Amonix Inc. (United States)
- 2 CPV/ Reliability: Joint Session with Conference 8472
Neelkanth G. Dhere, University of Central Florida (United States)
- 3 Holographic Solar Concentrators
Kaitlyn VanSant, National Renewable Energy Laboratory
(United States)
- 4 Luminescent Solar Concentrators
Adam P. Plesniak, Amonix Inc. (United States)
- 5 High-Concentration Systems I
Kaitlyn VanSant, National Renewable Energy Laboratory
(United States)
- 6 High-Concentration Systems II
Julio Chaves, Light Prescriptions Innovators Europe, S. L. (Spain)
