, "Front Matter: Volume 8472," Proc. SPIE 8472, Reliability of Photovoltaic Cells, Modules, Components, and Systems V, 847201 (31 October 2012); doi: 10.1117/12.2011788

Event: SPIE Solar Energy + Technology, 2012, San Diego, California, United States

PROCEEDINGS OF SPIE

Reliability of Photovoltaic Cells, Modules, Components, and Systems V

**Neelkanth G. Dhere
John H. Wohlgemuth**
Editors

**13–16 August 2012
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8472

Proceedings of SPIE 0277-786X, V.8472

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Reliability of Photovoltaic Cells, Modules, Components, and Systems V, edited
by Neelkanth G. Dhere, John H. Wohlgemuth, Proc. of SPIE Vol. 8472, 847201 · ©
2012 SPIE · CCC code: 0277-786/12/\$18 · doi: 10.1117/12.2011788

Proc. of SPIE Vol. 8472 847201-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Reliability of Photovoltaic Cells, Modules, Components, and Systems V*, edited by Neelkanth G. Dhere, John H. Wohlgemuth, Proceedings of SPIE Vol. 8472 (SPIE, Bellingham, WA, 2012) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii Conference Committee

SESSION 1 PROGRESS TOWARDS STABLE ORGANIC SOLAR CELLS: JOINT SESSION WITH CONFERENCE 8472 AND 8477

- 8472 03 **Combined characterization techniques to understand the stability of a variety of organic photovoltaic device: the ISOS-3 inter-laboratory collaboration (Invited Paper)** [8472-2]
M. Lira-Cantu, CIN2, CSIC (Spain); D. M. Tanenbaum, Technial Univ. of Denmark (Denmark) and Pomona College (United States); K. Norrman, Technial Univ. of Denmark (Denmark); E. Voroshazi, IMEC (Belgium) and Katholieke Univ. Leuven (Belgium); M. Hermenau, Technische Univ. Dresden (Germany); M. T. Lloyd, National Renewable Energy Lab. (United States); G. Teran-Escobar, CIN2, CSIC (Spain); Y. Galagan, Holst Ctr. (Netherlands); B. Zimmermann, Fraunhofer-Institut für Solare Energiesysteme (Germany); M. Hösel, H. F. Dam, M. Jørgensen, S. Gevorgyan, Technial Univ. of Denmark (Denmark); L. Lutsen, IMEC, (Belgium); D. Vanderzande, Univ. Hasselt (Belgium); H. Hoppe, R. Rösch, Technische Univ. Ilmenau (Germany); U. Würfel, Fraunhofer-Institut für Solare Energiesysteme (Germany); R. Andriessen, Holst Ctr. (Netherlands); A. Rivaton, Univ. Blaise Pascal (France); G. Y. Uzunoğlu, TÜBITAK National Metrology Institute (Turkey); D. Germack, Brookhaven National Lab. (United States); B. Andreasen, M. V. Madsen, E. Bundgaard, F. C. Krebs, Technial Univ. of Denmark (Denmark)

SESSION 2 CPV/ RELIABILITY: JOINT SESSION WITH CONFERENCE 8468 AND 8472

- 8472 05 **Degradation of back-surface acrylic mirrors for low concentration and mirror-augmented photovoltaics** [8472-4]
M. P. Murray, L. S. Bruckman, D. Gordon, S. Richardson, Case Western Reserve Univ. (United States); G. Reinbolt, M. Schuetz, Replex Plastics (United States); R. H. French, Case Western Reserve Univ. (United States)

SESSION 3 PV MODULE RELIABILITY

- 8472 0C **Statistical analysis of 10+ years field exposed c-Si modules performance degradation** [8472-11]
J. M. Kuitche, G. TamizhMani, R. Pan, Arizona State Univ. (United States)
- 8472 0D **Systematic reliability studies of back-contact photovoltaic modules** [8472-12]
V. Rosca, I. J. Bennett, W. Eerenstein, ECN Solar Energy (Netherlands)

SESSION 4 RELIABILITY OF THIN-FILM PV MODULES

- 8472 0G **Electrical bias as an alternate method for reproducible measurement of copper indium gallium diselenide (CIGS) photovoltaic modules** [8472-15]
C. Deline, A. Stokes, T. J. Silverman, S. Rummel, D. Jordan, S. Kurtz, National Renewable Energy Lab. (United States)
- 8472 0H **Comparative study of single-junction and triple-junction a-Si:H PV modules in hot and humid climate** [8472-16]
N. G. Dhere, A. Kaul, S. A. Pethe, Florida Solar Energy Ctr. (United States)
- 8472 0I **Investigation of some transparent metal oxides as damp heat protective coating for CIGS solar cells** [8472-17]
F. J. Pern, F. Yan, K. Zaunbrecher, B. To, J. Perkins, R. Noufi, National Renewable Energy Lab. (United States)
- 8472 0J **Stability of CIGS solar cells and component materials evaluated by a step-stress accelerated degradation test method** [8472-18]
F. J. Pern, R. Noufi, National Renewable Energy Lab. (United States)

SESSION 5 RELIABILITY OF PV SYSTEM AND COMPONENTS

- 8472 0K **Firefighter safety and photovoltaic installations research project (Invited Paper)** [8472-19]
R. Backstrom, D. Dini, UL LLC (United States)
- 8472 0L **Method for site characterization of anisotropic diffuse illumination of photovoltaic systems** [8472-20]
J. M. Russo, D. Zhang, S. Vorndran, The Univ. of Arizona (United States); M. Gordon, College of Optical Sciences, The Univ. of Arizona (United States); J. Castillo, Prism Solar Technologies, Inc. (United States); A. Brooks, V. Lonij, A. Cronin, R. Kostuk, The Univ. of Arizona (United States)
- 8472 0M **Examination of a junction-box adhesion test for use in photovoltaic module qualification** [8472-22]
D. C. Miller, J. H. Wohlgemuth, National Renewable Energy Lab. (United States)

SESSION 6 ENCAPSULANT, BACKSHEET, AND PACKAGING MATERIALS

- 8472 0O **Measurement of moisture content in photovoltaic panel encapsulants using spectroscopic optical coherence tomography: a feasibility study** [8472-24]
S. Rashtchi, P. D. Ruiz, Loughborough Univ. (United Kingdom); R. Wildman, I. Ashcroft, Univ. of Nottingham (United Kingdom)
- 8472 0P **Interdependency of mechanical failure rate of encapsulated solar cells and module design parameters** [8472-25]
S. Dietrich, M. Sander, M. Pander, M. Ebert, Fraunhofer-Ctr. für Silizium-Photovoltaik (Germany)

- 8472 OT **Examination of a size-change test for photovoltaic encapsulation materials** [8472-29]
D. C. Miller, National Renewable Energy Lab. (United States); X. Gu, National Institute of Standards and Technology (United States); L. Ji, Underwriters Labs. Inc. (United States); G. Kelly, BP Solar International Inc. (United States); N. Nickel, The Dow Chemical Co. (United States); P. Norum, SolarWorld Industries America (United States); T. Shioda, Mitsui Chemicals, Inc. (Japan); G. Tamizhmani, TÜV Rheinland PTL (United States); J. H. Wohlgemuth, National Renewable Energy Lab. (United States)
- 8472 OU **Permeation impact on metallization degradation** [8472-30]
C. Peike, S. Hoffmann, P. Hülsmann, K. A. Weiß, M. Koehl, Fraunhofer-Institut für Solare Energiesysteme (Germany); P. Bentz, Solar-Fabrik AG (Germany)
- 8472 OV **Indoor vs. outdoor aging: polymer degradation in PV modules investigated by Raman spectroscopy** [8472-31]
C. Peike, T. Kaltenbach, K.-A. Weiß, M. Koehl, Fraunhofer-Institut für Solare Energiesysteme (Germany)
- 8472 OY **Predicting the reliability of polyisobutylene seal for photovoltaic application** [8472-34]
H. Liu, J. Feng, E. Nicoli, L. López, K. Kauffmann, K. Yang, N. Ramesh, The Dow Chemical Co. (United States)

POSTER SESSION

- 8472 OZ **Electric current generation by sulfur-reducing bacteria in microbial-anode fuel cell** [8472-35]
O. M. Vasylyv, O. I. Bilyy, Y. P. Ferensovych, S. O. Hnatush, Ivan Franko National Univ. of L'viv (Ukraine)

Author Index

Conference Committee

Symposium Chair

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

Conference Chair

Neelkanth G. Dhere, University of Central Florida (United States)

Conference CoChairs

John H. Wohlgemuth, National Renewable Energy Laboratory
(United States)

Kevin W. Lynn, U.S. Dept. of Energy (United States)

Conference Program Committee

David S. Albin, National Renewable Energy Laboratory
(United States)

Glenn B. Alers, University of California, Santa Cruz (United States)

Ward I. Bower, Sandia National Laboratories (United States)

Leila R. O. Cruz, Instituto Militar de Engenharia (Brazil)

Takuya Doi, National Institute of Advanced Industrial Science and
Technology (Japan)

Fernando Fabero, Centro de Investigaciones Energéticas,
Medioambientales y Tecnológicas (Spain)

Vivek S. Gade, Jabil Circuit, Inc. (United States)

William J. Gambogi Jr., Dupont (United States)

Werner Herrmann, TÜV Rheinland Group (Germany)

Stephen J. Hogan, Spire Corporation (United States)

Michael Köhl, Fraunhofer-Institut für Solare Energiesysteme (Germany)

Ralf Leutz, Concentrator Optics GmbH (Germany)

Xavier Mathew, Centro de Investigación en Energía (Mexico)

Robert McConnell, Amonix Inc. (United States)

Yoichi Murakami, Japan Electrical Safety & Environment Technology
Laboratories (Japan)

F. J. John Pern, National Renewable Energy Laboratory
(United States)

Shirish Pethe, Solopower, Inc. (United States)

Marianne Rodgers, University of Central Florida (United States)

Ivan Sinicco, Oerlikon Solar Ltd. (Switzerland)

Bolko von Roedern, Consultant (United States)

Session Chairs

- 1 Progress towards Stable Organic Solar Cells: Joint Session with Conference 8472 and 8477
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
- 2 CPV/ Reliability: Joint Session with Conference 8468 and 8472
Neelkanth G. Dhere, University of Central Florida (United States)
- 3 PV Module Reliability
Bolko von Roedern, Consultant (United States)
- 4 Reliability of Thin-Film PV Modules
Michael Köhl, Fraunhofer-Institut für Solare Energiesysteme (Germany)
- 5 Reliability of PV System and Components
Takuya Doi, National Institute of Advanced Industrial Science and Technology (Japan)
- 6 Encapsulant, Backsheet, and Packaging Materials
F. J. John Pern, National Renewable Energy Laboratory (United States)
