Front Matter: Volume 8495
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X
ISBN: 9780819492128

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-12, 20-22, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
## Contents

### SESSION 1 SCATTERING THEORY I

<table>
<thead>
<tr>
<th>Session</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>8495 02</td>
<td>Domain of validity of the equation for total integrated scatter (TIS) (Invited Paper)</td>
<td>J. E. Harvey, N. Choi, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)</td>
</tr>
<tr>
<td>8495 03</td>
<td>Upper roughness limitations on the TIS/RMS relationship</td>
<td>J. C. Stover, The Scatter Works Inc. (United States); S. Schröder, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany); T. A. Germer, National Institute of Standards and Technology (United States)</td>
</tr>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>8495 09</td>
<td>Inter-laboratory comparison using integrating sphere spectrophotometers to measure reflectance and transmittance of specular, diffuse, and light-redirecting glazing products (Invited Paper)</td>
<td>J. C. Jonsson, C. Curcija, Lawrence Berkeley National Lab. (United States)</td>
</tr>
<tr>
<td>8495 0A</td>
<td>Comparison of NRC goniometric and integrating sphere methods for realizing an absolute diffuse reflectance scale</td>
<td>R. Baribeau, J. Zwinkels, National Research Council Canada (Canada)</td>
</tr>
</tbody>
</table>
Effective medium analysis on the optical properties of silicon nanowire arrays [8495-12]
H. Wang, Georgia Institute of Technology (United States) and Harbin Institute of Technology (China); X. Liu, Georgia Institute of Technology (United States); L. Wang, Georgia Institute of Technology (United States) and Arizona State Univ. (United States); Z. Zhang, Georgia Institute of Technology (United States)

SESSION 4 SCATTERING THEORY II

Estimating hemispherical scatter from incident plane measurements of isotropic samples (Invited Paper) [8495-15]
J. C. Stover, The Scatter Works Inc. (United States); S. Schröder, A. von Finck, A. Duparré, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany)

A BRDF model for scratches and digs [8495-16]
G. L. Peterson, Breault Research Organization, Inc. (United States)

Surface-plasmon mediated near-field light diffraction [8495-17]
D. Huang, L. D. Wellems, Air Force Research Lab. (United States)

How accurate is the Kubelka-Munk theory of diffuse reflection? A quantitative answer [8495-18]
R. I. Joseph, M. E. Thomas, Johns Hopkins Univ. Applied Physics Lab. (United States)

SESSION 5 MEASUREMENT INSTRUMENTATION AND APPLICATIONS I

Tunable supercontinuum fiber laser source for BRDF measurements in the STARR II gonioreflectometer [8495-20]
H. J. Patrick, National Institute of Standards and Technology (United States); C. J. Zarobila, National Institute of Standards and Technology (United States) and Jung Research and Development Corp. (United States); T. A. Germer, V. A. Ying, C. A. Cooksey, B. K. Tsai, National Institute of Standards and Technology (United States)

Scatterometer basing on a STAR GEM idea for optical measurements of microlenses [8495-22]
E. Kawate, National Institute of Advanced Industrial Science and Technology (Japan) and TRAS, Inc (Japan); M. Hain, National Institute of Advanced Industrial Science and Technology (Japan) and Institute of Measurement Science (Slovakia)

The Southwest Research Institute ultraviolet reflectance chamber (SwURC): a far ultraviolet reflectometer [8495-23]
SESSION 6  IMAGING METHODS AND APPLICATIONS II

8495 0O  The focusing of light scattered from diffuse reflectors using phase modulation (Invited Paper) [8495-24]
J. M. Schafer, M. A. Marciniak, Air Force Institute of Technology (United States)

8495 0P  Scattering computation for 3D laser imagery and reconstruction algorithms (Invited Paper) [8495-26]
I. Berechet, SISPIA (France); G. Berginc, Thales Optronique S.A.S. (France); S. Berechet, SISPIA (France)

8495 0Q  Matrix determination of hidden object reflectance by indirect photography [8495-27]
S. S. Ferrel, M. A. Marciniak, Air Force Institute of Technology (United States)

SESSION 7  MEASUREMENT INSTRUMENTATION AND APPLICATIONS II

8495 0R  Measuring grazing-angle DHR with the infrared grazing angle reflectometer [8495-28]
M. R. Benson, M. A. Marciniak, Air Force Institute of Technology (United States); J. W. Burks, Air Force Research Lab. (United States)

8495 0T  Advanced gloss sensing for robotic applications [8495-30]
C. Deinhammer, M. Brandner, Technische Univ. Graz (Austria)

SESSION 8  MEASUREMENT AND ANALYSIS TECHNIQUES

8495 0V  Sophisticated light scattering techniques from the VUV to the IR regions (Invited Paper) [8495-31]
S. Schröder, M. Trost, T. Herffurth, A. von Finck, A. Duparré, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany)

8495 0W  Effects of a measurement floor on Mueller matrix measurements in a DRR BSDF system [8495-32]
S. E. Nauyoks, M. A. Marciniak, Air Force Institute of Technology (United States)

8495 0X  Using differential ray tracing in stray light analysis [8495-33]
D. F. Rock, The Aerospace Corp. (United States)

8495 0Y  Optical non-contact micrometer thickness measurement system for silica thick films [8495-34]
K. Thambiratnam, H. Ahmad, Univ. of Malaya (Malaysia); M. Yasin, Univ. Airlangga (Indonesia); A. Z. Zulkifli, S. W. Harun, Univ. of Malaya (Malaysia)

Author Index
Conference Committee

Program Track Chair

Katherine Creath, 4D Technology Corporation (United States), Optineering (United States), and The University of Arizona (United States)

Conference Chair

Leonard M. Hanssen, National Institute of Standards and Technology (United States)

Conference Program Committee

Gérard Berginc, Thales Optronique S.A. (France)
Andrea M. Brown, The Johns Hopkins University Applied Physics Laboratory (United States)
Michael G. Dittman, Ball Aerospace & Technologies Corporation (United States)
Aristide C. Dogariu, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
John C. Fleming, Ball Aerospace & Technologies Corporation (United States)
Greg Gbur, The University of North Carolina at Charlotte (United States)
Hsueh-Mei W. Graham, Lockheed Martin Aeronautics Company (United States)
Brian G. Hoover, Advanced Optical Technologies (United States)
Danhong Huang, Air Force Research Laboratory (United States)
Alexei A. Maradudin, University of California, Irvine (United States)
Richard N. Pfisterer, Photon Engineering LLC (United States)
Arne Roos, Uppsala University (Sweden)
Hendrik Rothe, Helmut-Schmidt University (Germany)
Shouhong Tang, KLA-Tencor Corporation (United States)
Benjamin K. Tsai, National Institute of Standards and Technology (United States)

Session Chairs

1 Scattering Theory I
   John C. Fleming, Ball Aerospace & Technologies Corporation (United States)
2 Imaging Methods and Applications I  
Richard N. Pfisterer, Photon Engineering LLC (United States)  

3 Optical Properties: Theory and Measurement  
Brian G. Hoover, Advanced Optical Technologies (United States)  

4 Scattering Theory II  
Alexei A. Maradudin, University of California, Irvine (United States)  

5 Measurement Instrumentation and Applications I  
Hsueh-Mei W. Graham, Lockheed Martin Aeronautics Company  
(United States)  

6 Imaging Methods and Applications II  
Hendrik Rothe, Helmut-Schmidt University (Germany)  

7 Measurement Instrumentation and Applications II  
Dan Hong Huang, Air Force Research Laboratory (United States)  

8 Measurement and Analysis Techniques  
Andrea M. Brown, Johns Hopkins University Applied Physics Laboratory  
(United States)  

9 Measurement Instrumentation and Applications III  
Benjamin K. Tsai, National Institute of Standards and Technology  
(United States)  

Panel Discussion: Methods and Applications of Deflectometry  
Peng Su, Moderator, College of Optical Sciences, The University of  
Arizona (United States)  
Jan Burke, Moderator, Bremer Institut für angewandte Strahltechnik  
Christian Faber, Panelist, Universität Erlangen-Nürnberg (Germany)  
Robert E. Parks, Panelist, College of Optical Sciences, The University of  
Arizona (United States)
