Front Matter: Volume 8535

, "Front Matter: Volume 8535," Proc. SPIE 8535, Optics in Atmospheric Propagation and Adaptive Systems XV, 853501 (3 December 2012); doi: 10.1117/12.2015428

SPIE.

Event: SPIE Remote Sensing, 2012, Edinburgh, United Kingdom

PROCEEDINGS OF SPIE

Optics in Atmospheric Propagation and Adaptive Systems XV

**Karin Stein
John Gonglewski**
Editors

**25 September 2012
Edinburgh, United Kingdom**

Sponsored by
SPIE

Cosponsored by
SELEX GALILEO • THALES

Delivered with the support of
Scottish Development International • Scottish Enterprise

Cooperating Organisations
European Association of Remote Sensing Companies (Belgium) • Remote Sensing and
Photogrammetry Society (United Kingdom) • Scottish Optoelectronics Association (United
Kingdom) • Electronics Sensors and Photonics Knowledge Transfer Network (United Kingdom)

Published by
SPIE

Volume 8535

Proceedings of SPIE 0277-786X, V.8535

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics in Atmospheric Propagation and Adaptive Systems XV, edited by Karin Stein, John Gonglewski,
Proc. of SPIE Vol. 8535, 853501 • © 2012 SPIE • CCC code: 0277-7866/12/\$18 • doi: 10.1117/12.2015428

Proc. of SPIE Vol. 8535 853501-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- vii Conference Committee
- ix *Maximizing the use of EO products: how to leverage the potential of open geospatial service architectures (Plenary Paper) [8538-100]*
T. Usländer, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

SESSION 1 CHARACTERIZATION OF THE ENVIRONMENT

- 8535 04 **Characteristics of long-range scintillation data over maritime coastal areas [8535-1]**
A. N. de Jong, P. B. Schwering, TNO Defence, Security and Safety (Netherlands);
W. H. Gunter, G. Vrahimis, F. J. October, Institute for Maritime Technology (South Africa)
- 8535 05 **Joint French-German radar measurements for the determination of the refractive index in the maritime boundary layer [8535-2]**
H. Essen, Consultant (Germany); A. Danklmayer, Fraunhofer-Institut für Hochfrequenzphysik und Radartechnik (Germany); J. Förster, M. Behn, Technical Ctr. for Ships and Naval Weapons (Germany); Y. Hurtaud, Délégation Générale pour l'Armement (France);
V. Fabbro, L. Castanet, ONERA (France)
- 8535 07 **Field deployable TDLAS for long path atmospheric transmission [8535-4]**
C. A. Rice, G. P. Perram, Air Force Institute of Technology (United States)
- 8535 08 **Retrieving atmospheric turbulence features from differential laser tracking motion data [8535-5]**
D. G. Pérez, Á. Fernández, Pontificia Univ. Católica de Valparaíso (Chile); G. Funes,
D. Gulich, Ctr. de Investigaciones Ópticas (Argentina); L. Zunino, Ctr. de Investigaciones
Ópticas (Argentina) and Univ. Nacional de la Plata (Argentina)
- 8535 09 **Long-term measurements of refractive index structure constant in atmospheric boundary layer [8535-6]**
O. Jicha, P. Pechac, S. Zvanovec, Czech Technical Univ. in Prague (Czech Republic);
M. Grabner, V. Kvicera, Czech Metrology Institute (Czech Republic)
- 8535 0B **GPS derived spatial ionospheric total electron content variation over South-Indian latitudes during intense geomagnetic storms [8535-8]**
S. K. Panda, S. S. Gedam, Indian Institute of Technology Bombay (India)
- 8535 0C **Application of independent component analysis method in real-time spectral analysis of gaseous mixtures for acousto-optical spectrometers based on differential optical absorption spectroscopy [8535-9]**
A. V. Fadeyev, V. E. Pozhar, Scientific and Technological Ctr. of Unique Instrumentation
(Russian Federation)

SESSION 2 PROPAGATION THROUGH TURBULENT MEDIA

- 8535 0D **GPU-based simulation of optical propagation through turbulence for active and passive imaging (Invited Paper)** [8535-10]
G. Monnier, F.-R. Duval, S. Amram, ALYOTECH Technologies (France)
- 8535 0F **The nonlinear OPC technique for laser beam control in turbulent atmosphere** [8535-12]
P. Sprangle, U.S. Naval Research Lab. (United States) and Univ. of Maryland, College Park (United States); J. R. Penano, U.S. Naval Research Lab. (United States); V. B. Markov, Advanced Systems & Technologies, Inc. (United States); A. Khizhnyak, Advanced Systems & Technologies, Inc. (United States); A. Ting, U.S. Naval Research Lab. (United States); B. Hafizi, C. C. Davis, Univ. of Maryland, College Park (United States); L. DeSandre, Office of Naval Research (United States)
- 8535 0G **Laser beam propagation through an ensemble of vortex rings in air** [8535-13]
F. V. Shugaev, E. N. Terentiev, L. S. Shtemenko, O. A. Nikolaeva, O. A. Solenaya, Lomonosov Moscow State Univ. (Russian Federation)
- 8535 0H **Scintillation of pseudo-partially coherent Gaussian beam in atmospheric turbulence: application for free-space optical communications** [8535-14]
X. Qian, W. Zhu, R. Rao, Anhui Institute of Optics and Fine Mechanics (China)

SESSION 3 WAVEFRONT CORRECTION

- 8535 0I **Holographic wavefront sensing with spatial light modulator in context of horizontal light propagation** [8535-15]
A. Zepp, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 8535 0J **New wavefront sensing concepts for adaptive optics instrumentation** [8535-16]
K. El Hadi, M. Gray, Lab. d'Astrophysique de Marseille, CRNS, Aix-Marseille Univ. (France); T. Fusco, ONERA (France) and Lab. d'Astrophysique de Marseille, CRNS, Aix-Marseille Univ. (France); B. Le Roux, Lab. d'Astrophysique de Marseille, CRNS, Aix-Marseille Univ. (France)

SESSION 4 IMAGE RECONSTRUCTION

- 8535 0L **Simulation of atmospheric turbulence for a qualitative evaluation of image restoration algorithms with motion detection** [8535-18]
C. S. Huebner, S. Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 8535 0M **Image reconstruction of extended objects: demonstration with the Starfire Optical Range 3.5m telescope** [8535-19]
S. Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany); R. Baena Gallé, Univ. de Barcelona (Spain) and Royal Academy of Sciences and Arts of Barcelona (Spain); R. L. Johnson, L. Kann, Air Force Research Lab. (United States)

8535 ON **Multi-frame restoration of turbulence degraded underwater images (Invited Paper)**
[8535-20]
A. V. Kanaev, U.S. Naval Research Lab. (United States)

Author Index

Conference Committee

Symposium Chair

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Symposium Co-Chair

Charles R. Bostater Jr., Florida Institute of Technology (United States)

Conference Chairs

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

John Goglewski, European Office of Aerospace Research and Development (United Kingdom)

Conference Programme Committee

Ivo Buske, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)

Sylvain Cheinet, Institut Franco-Allemand de Recherches de Saint-Louis (France)

David C. Dayton, Applied Technology Associates (United States)

Gregory C. Dente, Consultant (United States)

Denis Dion Jr., Defence Research and Development Canada, Valcartier (Canada)

Stephen M. Hammel, Space and Naval Warfare Systems Command (United States)

Vladimir P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)

Charles L. Matson, Air Force Research Laboratory (United States)

Sergio R. Restaino, U.S. Naval Research Laboratory (United States)

Jim Riker, Air Force Research Laboratory (United States)

Marc J. F. Séchaud, ONERA (France)

Alexander M. J. van Eijk, TNO Defence, Security and Safety (Netherlands)

Arthur D. van Rheenen, Norwegian Defence Research Establishment (Norway)

Mikhail A. Vorontsov, University of Dayton (United States)

Session Chairs

- 1 Characterization of the Environment
Arthur D. van Rheenen, Norwegian Defence Research Establishment
(Norway)
- 2 Propagation through Turbulent Media
John D. Gonglewski, European Office of Aerospace Research and
Development (United Kingdom)
- 3 Wavefront Correction
John D. Gonglewski, European Office of Aerospace Research and
Development (United Kingdom)
- 4 Image Reconstruction
Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)
