PROGRESS IN BIOMEDICAL OPTICS AND IMAGING
Vol. 14, No. 15

Optical Interactions with Tissue and Cells XXIV

**E. Duco Jansen
Robert J. Thomas**
Editors

**4–5 February 2013
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 8579

Proceedings of SPIE 0277-786-786X, V.8579

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Interactions with Tissue and Cells XXIV, edited by E. Duco Jansen, Robert J. Thomas, Proc. of SPIE
Vol. 8579, 857901 · © 2013 SPIE · CCC code: 1605-7422/13/\$18 · doi: 10.1117/12.2021416

Proc. of SPIE Vol. 8579 857901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii Conference Committee

SESSION 1 SHORT PULSE PHOTOMECHANICAL RESPONSE

- 8579 03 **Impact of a temporal pulse overlap on laser-tissue-interaction of modern ophthalmic laser systems** [8579-2]
N. Tinne, G. Knoop, N. Kallweit, E. Lübking, Laser Zentrum Hannover e.V. (Germany);
H. Lubatschowski, Rowiak GmbH (Germany); A. Krüger, T. Ripken, Laser Zentrum Hannover e.V. (Germany)
- 8579 04 **Investigation of the morphology of the features generated via femtosecond lasers in the interior of a bovine cornea sections** [8579-3]
S. Vukelic, Bucknell Univ. (United States); P. Kongsuwan, Y. L. Yao, Columbia Univ. (United States)

SESSION 2 PHOTOTHERMAL RESPONSE

- 8579 08 **Green's function representation of laser induced thermal dynamics and determination of thermal criteria for optically induced neural activation** [8579-8]
B. Norton, Lockheed Martin Aculight (United States); M. Bowler, Lockheed Martin Aculight (United States) and Vanderbilt Univ. (United States)
- 8579 09 **Infrared nerve stimulation: modelling of photon transport and heat conduction** [8579-9]
A. C. Thompson, S. A. Wade, P. J. Cadusch, W. G. A. Brown, P. R. Stoddart, Swinburne Univ. of Technology (Australia)

SESSION 3 PHOTOCHEMICAL RESPONSE

- 8579 0A **Discovery of photochemical damage mechanisms using *in vitro* and *in silico* models (Invited Paper)** [8579-39]
P. K. Fink, Saint Mary's Univ. (United States); M. L. Denton, TASC, Inc. (United States); C. C. Castellanos, Air Force Research Lab. (United States); A. J. Tijerina, Conceptual Mindworks, Inc. (United States); K. J. Schuster, TASC, Inc. (United States); J. W. Oliver, Conceptual Mindworks, Inc. (United States)
- 8579 0C **Plasmonic properties of gold nanoparticles can promote neuronal activity** [8579-11]
C. Paviolo, Swinburne Univ. of Technology (Australia); J. W. Haycock, Univ. of Sheffield (United Kingdom); J. Yong, A. Yu, S. L. McArthur, P. R. Stoddart, Swinburne Univ. of Technology (Australia)
- 8579 0D **Study of photosensitization reaction progress in a 96 well plate with photosensitizer rich condition using Talaporfin sodium** [8579-12]
E. Ogawa, M. Takahashi, T. Arai, Keio Univ. (Japan)

- 8579 OE **Detection of oxidative stress biomarker-induced assembly of gold nanoparticles in retinal pigment epithelial cells** [8579-34]
Z. Yasmin, Univ. of Texas at San Antonio (United States); Y. Lee, S. Maswadi, R. Glickman, Univ. of Texas Health Science Ctr. at San Antonio (United States); K. L. Nash, Univ. of Texas at San Antonio (United States)
- 8579 OF **Ursolic acid mediates photosensitization by initiating mitochondrial-dependent apoptosis** [8579-13]
Y.-H. Lee, E. Wang, N. Kumar, R. D. Glickman, Univ. of Texas Health Science Ctr. at San Antonio (United States)
- 8579 OG **Photoinduced conformational changes of human serum albumin bound to protoporphyrin IX and hemin** [8579-14]
S. C. Rozinek, L. Brancalion, Univ. of Texas at San Antonio (United States)

SESSION 4 NOVEL RESPONSE AND SAFETY

- 8579 OH **Influence of different output powers on the efficacy of photodynamic therapy with 809-nm diode laser and indocyanine green** [8579-15]
N. Topaloglu, S. Yuksel, M. Gulsoy, Bogazici Univ. (Turkey)
- 8579 OI **Trigger effect of infrared femtosecond laser irradiation on neoplasm in experimental cervical cancer** [8579-16]
T. Gening, O. Voronova, I. Zolotovskii, Ulyanovsk State Univ. (Russian Federation); A. Sysoliatin, Fiber Optics Research Ctr. (Russian Federation); D. Dolgova, T. Abakumova, Ulyanovsk State Univ. (Russian Federation)
- 8579 OJ **Thermodynamic finite-element-method (FEM) eye model for laser safety considerations** [8579-17]
N. Heussner, Forschungszentrum Informatik (Germany); L. Holl, Karlsruhe Institute of Technology (Germany); A. Shults, Illinois Institute of Technology (United States); T. Beuth, H. Umesh Babu, L. Shinohara, S. Bogatscher, M. Wippler, Karlsruhe Institute of Technology (Germany); W. Stork, Forschungszentrum Informatik (Germany) and Karlsruhe Institute of Technology (Germany)
- 8579 OK **Visualization of thermal lensing induced image distortion using Zemax ray tracing and BTEC thermal modeling** [8579-18]
E. L. Towle, NRC Research Associate Program (United States) and Univ. of Texas at Austin (United States); C. D. Clark III, Fort Hays State Univ. (United States) and TASC, Inc. (United States); M. T. Aaron, Air Force Research Lab. (United States); A. K. Dunn, A. J. Welch, Univ. of Texas at Austin (United States); R. J. Thomas, Air Force Research Lab. (United States)

SESSION 5 SPECTROSCOPY AND IMAGING I

- 8579 OL **Raman fiberoptic probe for monitoring human tissue engineered oral mucosa constructs** [8579-19]
A. Khmaladze, S. Kuo, P. Okagbare, C. L. Marcelo, S. E. Feinberg, M. D. Morris, Univ. of Michigan (United States)

8579 ON **Hyperspectral imaging of tissue mimicking phantoms: principle component analysis** [8579-21]
P. Wong, Lawson Health Research Institute (Canada) and Western Univ. (Canada);
F. Vasefi, Lawson Health Research Institute (Canada) and Western Univ. (Canada) and
Simon Fraser Univ. (Canada); M. Brackstone, Lawson Health Research Institute (Canada)
and London Regional Cancer Program (Canada); B. Kaminska, Simon Fraser Univ.
(Canada); J. Carson, Lawson Health Research Institute (Canada) and Western Univ.
(Canada)

8579 OO **Frequency-modulated light scattering interferometry used for assessment of optical properties in turbid media** [8579-22]
L. Mei, G. Somesfalean, Lund Univ. (Sweden), Zhejiang Univ. (China), and Zhejiang Univ.,
Royal Institute of Technology, Lund Univ. (China); S. Svanberg, Lund Univ. (Sweden),
Zhejiang Univ., Royal Institute of Technology, Lund Univ. (China), and South China Normal
Univ. (China)

SESSION 6 SPECTROSCOPY AND IMAGING II

8579 OR **Skin microvascular and metabolic response to pressure relief maneuvers in people with spinal cord injury** [8579-25]
J. C. Ramella-Roman, D. V. N. Le, P. Ghassemi, T. A. Nguyen, Catholic Univ. of America
(United States); A. Lichy, S. Groah, National Rehabilitation Hospital (United States)

8579 OS **Effects of combined xenon and hypothermia on cerebral blood flow and oxygen consumption in newborn piglets measured with a time-resolved near-infrared technique** [8579-26]
M. Fazel Bakhsheshi, Lawson Health Research Institute (Canada), Robarts Research Institute
(Canada), and Univ. of Western Ontario (Canada); J. Hadway, Lawson Health Research
Institute (Canada) and Univ. of Western Ontario (Canada); L. B. Morrison, M. Diop, Lawson
Health Research Institute (Canada); K. St. Lawrence, Lawson Health Research Institute
(Canada) and Univ. of Western Ontario (Canada); T.-Y. Lee, Lawson Health Research
Institute (Canada), Robarts Research Institute (Canada), and Univ. of Western Ontario
(Canada)

8579 OT **Optical properties of tumor tissues grown on the chorioallantoic membrane of chicken eggs measured with a double integrating sphere and inverse Monte Carlo method in the wavelength range of 350–1000 nm** [8579-27]
N. Honda, Osaka Univ. (Japan) and Research Fellow of the Japan Society for the
Promotion of Science (Japan); Y. Kariyama, Osaka Univ. (Japan); T. Ishii, C. Abe, K. Inoue,
M. Ishizuka, T. Tanaka, SBI Pharmaceuticals Co., Ltd. (Japan); H. Hazama, K. Awazu, Osaka
Univ. (Japan)

SESSION 7 OPTICAL PROPERTIES OF TISSUES

8579 OW **Two-dimensional angular filter array for angular domain imaging with 3D printed angular filters** [8579-30]
E. Ng, J. J. L. Carson, Lawson Health Research Institute (Canada) and Univ. of Western
Ontario (Canada)

- 8579 0Z **Monte Carlo simulation of radiation transfer in human skin with geometrically correct treatment of boundaries between different tissues** [8579-33]
J. Premru, M. Milanič, Jožef Stefan Institute (Slovenia); B. Majaron, Jožef Stefan Institute (Slovenia) and Univ. of Ljubljana (Slovenia)

POSTER SESSION

- 8579 12 **A non-destructive diffuse reflectance calibration-free method to determine optical parameters of biological tissues** [8579-37]
A. V. Lappa, A. N. Kulikovskiy, A. N. Kulikovskiy, T. A. Makarova, Chelyabinsk State Univ. (Russian Federation)
- 8579 13 **Resolution analysis of an angular domain imaging system with two dimensional angular filters** [8579-38]
E. Ng, J. J. Carson, Lawson Health Research Institute (Canada) and Univ. of Western Ontario (Canada)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

Rox Anderson M.D., Wellman Center for Photomedicine,
Massachusetts General Hospital (United States) and Harvard
School of Medicine (United States)

Program Track Chairs

Steven L. Jacques, Oregon Health & Science University
(United States)

William P. Roach, U.S. Air Force (United States)

Conference Chairs

E. Duco Jansen, Vanderbilt University (United States)

Robert J. Thomas, Air Force Research Laboratory (United States)

Conference Program Committee

Randolph D. Glickman, The University of Texas Health Science Center
at San Antonio (United States)

Steven L. Jacques, Oregon Health & Science University
(United States)

Duncan J. Maitland, The Texas A&M University System (United States)

Jessica C. Ramella-Roman, The Catholic University of America
(United States)

William P. Roach, Air Force Research Laboratory (United States)

Marissa Nicole Rylander, Virginia Polytechnic Institute and State
University (United States)

Alfred Vogel, Universität zu Lübeck (Germany)

Lihong V. Wang, Washington University in St. Louis (United States)

Gerald J. Wilmink, Air Force Research Laboratory (United States)

Session Chairs

- 1 Short Pulse Photomechanical Response

David J. Stolarski, Air Force Research Laboratory (United States)

- 2 Photothermal Response

Randolph D. Glickman, The University of Texas Health Science Center
at San Antonio (United States)

- 3 Photochemical Response
Randolph D. Glickman, The University of Texas Health Science Center
at San Antonio (United States)
- 4 Novel Response and Safety
David J. Stolarski, Air Force Research Laboratory (United States)
- 5 Spectroscopy and Imaging I
E. Duco Jansen, Vanderbilt University (United States)
- 6 Spectroscopy and Imaging II
Duncan J. Maitland, The Texas A&M University System (United States)
- 7 Optical Properties of Tissues
David J. Stolarski, Air Force Research Laboratory (United States)
