Front Matter: Volume 8617

, "Front Matter: Volume 8617," Proc. SPIE 8617, MEMS Adaptive Optics VII, 861701 (18 March 2013); doi: 10.1117/12.2022913

SPIE.

Event: SPIE MOEMS-MEMS, 2013, San Francisco, California, United States

PROCEEDINGS OF SPIE

MEMS Adaptive Optics VII

**Scot S. Olivier
Thomas G. Bifano
Joel Kubby**
Editors

**5 and 7 February 2013
San Francisco, California, United States**

Sponsored by
SPIE

Cosponsored by
VUZIX Corporation (United States)

Supported by
Fraunhofer Institute for Photonic Microsystems (Germany)

Published by
SPIE

Volume 8617

Proceedings of SPIE 0277-786X, V.8617

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

MEMS Adaptive Optics VII, edited by Scot S. Olivier, Thomas G. Bifano, Joel Kubby, Proc. of SPIE
Vol. 8617, 861701 · © 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2022913

Proc. of SPIE Vol. 8617 861701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- v *Conference Committee*
- vii *Towards future systems with nano-optics contributions (Plenary Paper) [8616-101]*
B. Kaminska, Simon Fraser Univ. (Canada) and NanoTech Security Corp. (Canada);
M. Najiminaini, Simon Fraser Univ. (Canada), Lawson Health Research Institute (Canada),
and The Univ. of Western Ontario (Canada); Y. Chuo, C. Landrock, B. Omrane, Simon
Fraser Univ. (Canada) and NanoTech Security Corp. (Canada); J. J. L. Carson, Lawson
Health Research Institute (Canada) and The Univ. of Western Ontario (Canada)
- xxiii *MOEMS pressure sensors for geothermal well monitoring (Plenary Paper) [8616-102]*
W. Challener, S. Palit, General Electric Global Research (United States); R. Jones, L. Airey,
R. Craddock, General Electric Measurement and Control (United Kingdom); A. Knobloch,
General Electric Global Research (United States)

SESSION 1 DEFORMABLE MIRRORS

- 8617 02 **A 19-element segmented MEMS deformable mirror based on electrostatic repulsive-force actuator (Invited Paper) [8617-1]**
W. Wang, Institute of Optics and Electronics (China), Univ. of Electronic Science and Technology of China (China), and Univ. of Chinese Academy of Sciences (China); F. Tao, Q. Wang, C. Qiu, Institute of Optics and Electronics (China); Z. Chen, Univ. of Electronic Science and Technology of China (China); J. Yao, Institute of Optics and Electronics (China)
- 8617 04 **A continuous single-crystal-silicon membrane deformable mirror using bimorph spring [8617-3]**
T. Wu, T. Sasaki, M. Akiyama, K. Hane, Tohoku Univ. (Japan)
- 8617 05 **Performance analysis of two high actuator count MEMS deformable mirrors (Invited Paper) [8617-4]**
P. J. Ryan, S. A. Cornelissen, C. V. Lam, P. A. Bierden, Boston Micromachines Corp. (United States)
- 8617 06 **Development of variable-focus lens with liquid-membrane-liquid structure and 30 mm optical aperture [8617-5]**
L. Wang, H. Oku, M. Ishikawa, The Univ. of Tokyo (Japan)
- 8617 07 **Electrostatic-pneumatic membrane mirror with positive or negative variable optical power [8617-6]**
M. J. Moghimi, Montana State Univ. (United States); C. Wilson, Bridger Photonics, Inc. (United States); D. L. Dickensheets, Montana State Univ. (United States)

SESSION 2 ASTRONOMY

- 8617 08 **Wavefront control in space with MEMS deformable mirrors (Invited Paper)** [8617-7]
K. L. Cahoy, A. D. Marinan, B. Novak, C. Kerr, M. Webber, Massachusetts Institute of Technology (United States)
- 8617 09 **KAPAO: a MEMS-based natural guide star adaptive optics system** [8617-8]
S. A. Severson, Sonoma State Univ. (United States); P. I. Choi, D. S. Contreras, Pomona College (United States); B. N. Gilbreth, Sonoma State Univ. (United States); E. Littleton, L. P. McGonigle, W. A. Morrison, A. R. Rudy, J. R. Wong, Pomona College (United States); A. Xue, E. Spjut, Harvey Mudd College (United States); C. Baranec, R. Riddle, California Institute of Technology (United States)
- 8617 0A **Performance assessment of a candidate architecture for real-time woofer-tweeter controllers: simulation and experimental results** [8617-9]
A. Norton, D. Gavel, R. Kupke, M. Reinig, S. Srinath, D. Dillon, Univ. of California, Santa Cruz (United States)

SESSION 3 BIOLOGICAL IMAGING

- 8617 0D **Focusing polychromatic light through scattering media (Invited Paper)** [8617-12]
H. P. Paudel, C. Stockbridge, J. Mertz, T. Bifano, Boston Univ. (United States)
- 8617 0E **Interferometric focusing of guide-stars for direct wavefront sensing (Invited Paper)** [8617-13]
X. Tao, Univ. of California, Santa Cruz (United States); Z. Dean, Univ. of Michigan (United States); C. Chien, O. Azucena, J. Kubby, Univ. of California, Santa Cruz (United States)
- 8617 0I **High-speed phase-control of wavefronts with binary amplitude DMD for light control through dynamic turbid media (Invited Paper)** [8617-17]
D. B. Conkey, A. M. Caravaca-Aguirre, E. Niv, R. Piestun, Univ. of Colorado at Boulder (United States)

POSTER SESSION

- 8617 0J **Characterization of a MEMS deformable mirror by far field intensity evaluation** [8617-18]
C. Greiner, S. Finn, S. Choi, N. Doble, New England College of Optometry (United States)

Author Index

Conference Committee

Symposium Chair

Harald Schenk, Fraunhofer Institute for Photonic Microsystems
(Germany)

Symposium Cochair

David L. Dickensheets, Montana State University (United States)

Conference Chairs

Scot S. Olivier, Lawrence Livermore National Laboratory
(United States)

Thomas G. Bifano, Boston University (United States)

Joel Kubby, University of California, Santa Cruz (United States)

Conference Program Committee

William D. Cowan, Sandia National Laboratories (United States)

Chris Dainty, National University of Ireland, Galway (Ireland)

Donald Gavel, University of California, Santa Cruz (United States)

Andreas Gehner, Fraunhofer Institute for Photonic Microsystems
(Germany)

Wen-Han Jiang, Institute of Optics and Electronics (China)

Peter A. Kner, The University of Georgia (United States)

Alexis V. Kudryashov, Moscow State Open University (Russian
Federation)

Sergio R. Restaino, U.S. Naval Research Laboratory (United States)

Ulrich Wittrock, Fachhochschule Münster (Germany)

Session Chairs

- 1 Deformable Mirrors
Thomas G. Bifano, Boston University (United States)
- 2 Astronomy
Thomas G. Bifano, Boston University (United States)
- 3 Biological Imaging
Joel Kubby, University of California, Santa Cruz (United States)
