Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 KEYNOTE AND NEW TRENDS

- 8676 02 **Dawn of the digital diagnosis assisting system, can it open a new age for pathology? (Keynote Paper)** [8676-1]
A. Saito, NEC Corp. (Japan); E. Cosatto, NEC Labs. America, Inc. (United States);
T. Kiyuna, NEC Corp. (Japan); M. Sakamoto, Keio Univ. (Japan)
- 8676 03 **Tensor-based computation and modeling in multi-resolution digital pathology imaging: application to follicular lymphoma grading** [8676-2]
E. Acar, Univ. of Copenhagen (Denmark); G. Lozanski, M. N. Gurcan, The Ohio State Univ. (United States)
- 8676 04 **Identifying in vivo DCE MRI parameters correlated with ex vivo quantitative microvessel architecture: A radiohistomorphometric approach** [8676-3]
A. Singanamalli, Case Western Reserve Univ. (United States); R. Sparks, Rutgers, The State Univ. of New Jersey (United States); M. Rusu, Case Western Reserve Univ. (United States); N. Shih, A. Ziober, Univ. of Pennsylvania (United States); J. Tomaszewski, Univ. at Buffalo (United States); M. Rosen, M. Feldman, Univ. of Pennsylvania (United States); A. Madabhushi, Case Western Reserve Univ. (United States)

SESSION 2 DETECTION, SEGMENTATION

- 8676 05 **Automated gastric cancer diagnosis on H&E-stained sections; training a classifier on a large scale with multiple instance machine learning** [8676-4]
E. Cosatto, P.-F. Laquerre, C. Malon, H. P. Graf, NEC Labs. America, Inc. (United States); A. Saito, T. Kiyuna, A. Marugame, K. Kamijo, NEC Corp. (Japan)
- 8676 06 **An automated method for counting cytotoxic T-cells from CD8 stained images of renal biopsies** [8676-5]
M. K. K. Niazi, A. A. Satoskar, M. N. Gurcan, The Ohio State Univ. (United States)
- 8676 07 **Detecting mitotic figures in breast cancer histopathology images** [8676-6]
M. Veta, P. J. van Diest, J. P. W. Pluim, Univ. Medical Ctr. Utrecht (Netherlands)
- 8676 08 **Novel chromatin texture features for the classification of pap smears** [8676-7]
B. E. Bejnordi, R. Moshavegh, Chalmers Univ. of Technology (Sweden) and Sahlgrenska Univ. Hospital (Sweden); K. Sujathan, Regional Cancer Ctr. (India); P. Malm, E. Bengtsson, Uppsala Univ. (Sweden); A. Mehnert, Chalmers Univ. of Technology (Sweden) and Sahlgrenska Univ. Hospital (Sweden)

- 8676 09 **Toward improved quantification of disease progression and treatment monitoring using dynamic or static steady-state tumor-model parameters** [8676-8]
J. Dey, R. Licho, Univ. of Massachusetts Medical School (United States)

SESSION 3 REGISTRATION, RECONSTRUCTION, TRACKING

- 8676 0A **3D prostate histology reconstruction: an evaluation of image-based and fiducial-based algorithms** [8676-9]
E. Gibson, M. Gaed, J. A. Gómez, M. Moussa, C. Romagnoli, J. L. Chin, C. Crukley, G. S. Bauman, A. Fenster, A. D. Ward, The Univ. of Western Ontario (Canada)
- 8676 0B **Dynamically constrained pipeline for tracking neural progenitor cells** [8676-10]
J. S. Vestergaard, A. L. Dahl, Technical Univ. of Denmark (Denmark); P. Holm, Copenhagen Univ. (Denmark); R. Larsen, Technical Univ. of Denmark (Denmark)
- 8676 0C **A statistical deformation model (SDM) based regularizer for non-rigid image registration: application to registration of multimodal prostate MRI and histology** [8676-11]
S. Babu Prabu, R. Toth, Rutgers, The State Univ. of New Jersey (United States); A. Madabhushi, Case Western Reserve Univ. (United States)
- 8676 0D **Reconstruction of vessel structures from serial whole slide sections of murine liver samples** [8676-12]
M. Schwier, H. K. Hahn, Fraunhofer MEVIS (Germany); U. Dahmen, O. Dirsch, Jena Univ. Hospital (Germany)
- 8676 0E **Registration of whole-mount histology and tomography of the prostate using particle filtering** [8676-13]
G. Nir, S. E. Salcudean, The Univ. of British Columbia (Canada)
- 8676 0F **Toward quantitative digital histopathology for prostate cancer: comparison of inter-slide interpolation methods for tumour measurement** [8676-14]
M. Salarian, The Univ. of Western Ontario (Canada); M. Shahedi, The Univ. of Western Ontario (Canada) and Robarts Research Institute (Canada); E. Gibson, Robarts Research Institute (Canada); M. Gaed, London Health Sciences Ctr. (Canada); J. A. Gómez, M. Moussa, G. S. Bauman, The Univ. of Western Ontario (Canada) and London Health Sciences Ctr. (Canada); A. D. Ward, The Univ. of Western Ontario (Canada)

SESSION 4 QUALITY CONTROL, IHC ANALYSIS

- 8676 0G **EM-based segmentation-driven color standardization of digitized histopathology** [8676-15]
A. Basavanahally, Rutgers, The State Univ. of New Jersey (United States); A. Madabhushi, Case Western Reserve Univ. (United States)
- 8676 0H **Cell cluster graph for prediction of biochemical recurrence in prostate cancer patients from tissue microarrays** [8676-16]
S. Ali, Case Western Reserve Univ. (United States); R. Veltri, J. A. Epstein, C. Christudass, The Johns Hopkins Hospital (United States); A. Madabhushi, Case Western Reserve Univ. (United States)

- 8676 0I **Entropy based quantification of Ki-67 positive cell images and its evaluation by a reader study** [8676-17]
M. K. K. Niazi, M. Pennell, C. Elkins, J. Hemminger, M. Jin, S. Kirby, H. Kurt, B. Miller, E. Plocharczyk, R. Roth, R. Ziegler, A. Shana'ah, F. Racke, G. Lozanski, M. N. Gurcan, The Ohio State Univ. (United States)
- 8676 0J **Psycho-visual evaluation of image quality attributes in digital pathology slides viewed on a medical color LCD display** [8676-18]
L. Platiša, L. Van Brantegem, Univ. Gent (Belgium); Y. Vander Haeghen, Univ. Gent Hospital (Belgium); C. Marchessoux, Barco N.V. (Belgium); E. Vansteenkiste, W. Philips, Univ. Gent (Belgium)
- 8676 0K **Comparison study of five different display modalities for whole slide images in surgical pathology and cytopathology in Europe** [8676-19]
N. D'Haene, C. Maris, Erasme Univ. Hospital, Univ. Libre de Bruxelles (Belgium); S. Rorive, Erasme Univ. Hospital, Univ. Libre de Bruxelles (Belgium) and DIAPATH - Ctr. for Microscopy and Molecular Imaging (Belgium); X. Moles Lopez, DIAPATH - Ctr. for Microscopy and Molecular Imaging (Belgium) and Ecole Polytechnique de Bruxelles, Univ. Libre de Bruxelles (Belgium); J. Rostang, C. Marchessoux, Barco N.V. (Belgium); L. Pantanowitz, A. V. Parwani, Univ. of Pittsburgh Medical Ctr. (United States); I. Salmon, Erasme Univ. Hospital, Univ. Libre de Bruxelles (Belgium) and DIAPATH - Ctr. for Microscopy and Molecular Imaging (Belgium)
- 8676 0L **Content-based white blood cell retrieval on bright-field pathology images** [8676-20]
X. Qi, R. H. Gensure, Univ. of Medicine & Dentistry of New Jersey (United States) and The Cancer Institute of New Jersey (United States); D. J. Foran, Univ. of Medicine & Dentistry of New Jersey (United States) and The Cancer Institute of New Jersey (United States); L. Yang, Univ. of Kentucky (United States)

POSTER SESSION

- 8676 0M **An algorithm to evaluate the number of trabecular cell layers using nucleus arrangement applied to hepatocellular carcinoma** [8676-21]
H. Komagata, N. Kobayashi, A. Katoh, Y. Ohnuki, Saitama Medical Univ. (Japan); M. Ishikawa, Tokyo Institute of Technology (Japan); K. Shinoda, Saitama Medical Univ. (Japan); M. Yamaguchi, Tokyo Institute of Technology (Japan); T. Abe, A. Hashiguchi, M. Sakamoto, Keio Univ. (Japan)
- 8676 0N **Quantitative analysis of TDLUs using adaptive morphological shape techniques** [8676-22]
A. Rosebrock, Univ. of Maryland, Baltimore County (United States); J. J. Caban, Walter Reed National Military Medical Ctr. (United States); J. Figueroa, G. Gierach, L. Linville, National Cancer Institute, National Institutes of Health (United States); S. Hewitt, M. Sherman, Applied Molecular Pathology Lab., National Cancer Institute, National Institutes of Health (United States)
- 8676 0O **Assessing color reproducibility of whole-slide imaging scanners** [8676-23]
W.-C. Cheng, T. Keay, N. O'Flaherty, J. Wang, A. Ivansky, M. A. Gavrielides, B. D. Gallas, A. Badano, U.S. Food and Drug Administration (United States)

- 8676 OP **Calibration and test of a hyperspectral imaging prototype for intra-operative surgical assistance** [8676-24]
D. Nouri, Y. Lucas, S. Treuillet, Univ. d'Orléans (France)
- 8676 OQ **An adaptive image representation learned from data for cervix cancer tumor detection (Cum Laude Poster Award)** [8676-25]
A. Cruz-Roa, E. Romero, F. González, Univ. Nacional de Colombia (Colombia)
- 8676 OR **A level-set method for pathology segmentation in fluorescein angiograms and en face retinal images of patients with age-related macular degeneration** [8676-26]
F. Mohammad, R. Ansari, M. Shahidi, Univ. of Illinois at Chicago (United States)
- 8676 OS **Meningioma subtype classification using morphology features and random forests** [8676-27]
H. Strange, R. Zwigelaar, Aberystwyth Univ. (United Kingdom)
- 8676 OT **Quantification of relative chromatin content in flow cytometry standards using 3D OPTM imaging technique** [8676-28]
N. Agarwal, Univ. of Washington (United States); A. M. Biancardi, Cornell Univ. (United States); F. W. Patten, VisionGate, Inc. (United States); A. P. Reeves, Cornell Univ. (United States); E. J. Seibel, Univ. of Washington (United States)
- 8676 OU **Learning semantic histopathological representation for basal cell carcinoma classification** [8676-29]
R. Gutiérrez, A. Rueda, E. Romero, Univ. Nacional de Colombia (Colombia)
- 8676 OV **Analysis of the spatial distribution of prostate cancer obtained from histopathological images** [8676-30]
K. Diaz, B. Castaneda, M. L. Montero, Pontificia Univ. Católica del Perú (Peru); J. Yao, J. Joseph, D. Rubens, Univ. of Rochester Medical Ctr. (United States); K. J. Parker, Univ. of Rochester (United States)
- 8676 OW **Computer assisted detection of regions of interest in histopathology using a hybrid supervised and unsupervised approach** [8676-31]
A. Gherardi, Univ. degli Studi di Bologna (Italy); S. Bravaccini, Istituto Scientifico Romagnolo per lo Studio e la Cura dei Tumori S.r.l. (Italy); A. Bevilacqua, Univ. degli Studi di Bologna (Italy)
- 8676 OX **Fast GPU-based segmentation of H&E stained squamous epithelium from multi-gigapixel tiled virtual slides** [8676-32]
B. Bryant, H. Sari-Sarraf, M. Wachtel, Texas Tech Univ. (United States); R. Long, S. Antani, National Library of Medicine (United States)
- 8676 OY **Automatic classification of hepatocellular carcinoma images based on nuclear and structural features** [8676-33]
T. Kiyuna, A. Saito, A. Marugame, Y. Yamashita, M. Ogura, NEC Corp. (Japan); E. Cosatto, NEC Labs. America, Inc. (United States); T. Abe, A. Hashiguchi, M. Sakamoto, Keio Univ. (Japan)
- 8676 OZ **Marked point processes with simple and complex shape objects for cell nuclei extraction from breast cancer H&E images** [8676-34]
C. Avenel, Univ. Pierre et Marie Curie (France); M. S. Kulikova, CNRS IPAL UMI (Singapore)

- 8676 10 **Medical image fusion based on spiking cortical model** [8676-35]
R. Wang, Y. Wu, M. Ding, X. Zhang, Huazhong Univ. of Science and Technology (China)
- 8676 11 **Automatic segmentation of hepatocellular structure from HE-stained liver tissue** [8676-36]
M. Ishikawa, S. T. Ahi, Y. Murakami, F. Kimura, M. Yamaguchi, Tokyo Institute of Technology (Japan); T. Abe, A. Hashiguchi, M. Sakamoto, Keio Univ. (Japan)

Conference Committee

Symposium Chairs

Nico Karssemeijer, Radboud Universiteit Nijmegen Medical Center
(Netherlands)

Ehsan Samei, Duke University (United States)

Conference Chairs

Metin N. Gurcan, The Ohio State University Medical Center
(United States)

Anant Madabhushi, Case Western Reserve University (United States)

Conference Program Committee

Eric Cosatto, NEC Laboratories America, Inc. (United States)

M. Murat Dundar, Indiana University-Purdue University Indianapolis
(United States)

Andinet Enquobahrie, Kitware, Inc. (United States)

Michael D. Feldman, The University of Pennsylvania Health System
(United States)

David J. Foran, University of Medicine & Dentistry of New Jersey
(United States)

Brandon D. Gallas, U.S. Food and Drug Administration (United States)

Marios A. Gavrielides, U.S. Food and Drug Administration
(United States)

Leo Grady, Siemens Corporate Research (United States)

Stephen M. Hewitt, National Cancer Institute/NIH (United States)

Elizabeth A. Krupinski, The University of Arizona (United States)

Richard M. Levenson, University of California, Davis Medical
Center (United States)

Olivier Lezoray, Université de Caen Basse-Normandie (France)

Anne L. Martel, University of Toronto (Canada)

James P. Monaco, VuCOMP, Inc. (United States)

Tim Wilhelm Nattkemper, Universität Bielefeld (Germany)

Daniel Racocceanu, Université Pierre and Marie Curie (France)

Nasir M. Rajpoot, Qatar University (Qatar) and The University of
Warwick (United Kingdom)

Badrinath Roysam, University of Houston (United States)

Berkman Sahiner, U.S. Food and Drug Administration (United States)

Olcay Sertel, Ventana Medical Systems, Inc. (United States)

John E. Tomaszewski, SUNY at the University at Buffalo
(United States)

Martin J. Yaffe, Sunnybrook Research Institute (Canada)
Bulent Yener, Rensselaer Polytechnic Institute (United States)

Session Chairs

- 1 Keynote and New Trends
Metin N. Gurcan, The Ohio State University Medical Center
(United States)
Anant Madabhushi, Case Western Reserve University (United States)
- 2 Detection, Segmentation
Eric Cosatto, NEC Laboratories America, Inc. (United States)
- 3 Registration, Reconstruction, Tracking
Anne L. Martel, Sunnybrook Research Institute, University of Toronto
(Canada)
- 4 Quality Control, IHC Analysis
Elizabeth A. Krupinski, The University of Arizona (United States)

Poster Session

Nasir M. Rajpoot, Qatar University (Qatar) and The University of
Warwick (United Kingdom)
Brandon D. Gallas, U.S. Food and Drug Administration (United States)

Introduction

This year, 2013, saw the introduction of a new conference on Digital Pathology at the SPIE Medical Imaging Symposium in Lake Buena Vista, FL. Encouraged by the success of a special session on digital pathology which was held in conjunction with the three other conferences at the SPIE Medical Imaging Symposium in 2012, the symposium chairs Drs. Nico Karssemeijer and Joseph Reinhardt approached us to initiate an independent conference on Digital Pathology for the 2013 symposium. We have been organizing several meetings annually since 2007 on this topic in North America and Europe, usually held in conjunction with other conferences and we thought that SPIE Medical Imaging would be a good home for our ongoing meetings. Thus, Digital Pathology became the ninth conference to be included within the SPIE Medical Imaging Symposium. When we reached out to the leading scientists/researchers in this area in academia, government, and industry, they enthusiastically supported this effort. We had 23 people in our program committee.

Although this was the inaugural meeting, we received a relatively large (50) number of submissions to be presented as poster or oral presentations. Each submission was rigorously evaluated for possible inclusion by at least two experienced reviewers from within the program committee. Following the review phase, a total of 36 submissions were accepted (representing an overall acceptance rate of 72%) for inclusion in the conference as either an oral or poster presentation. Based on the reviewer scores assigned to the individual papers, the top 20 were included as oral talks and an additional 16 were selected as poster presentations.

The Digital Pathology conference took place on February 10th and February 11th and began with a keynote presentation by Dr. Akira Saito from NEC Corp. Japan entitled “*Dawn of the digital diagnosis assisting system, can it open a new age for pathology?*”. The presentation was very enthusiastically received by a packed audience in attendance. The conference over the course of the two days was heavily attended. The keynote session saw 182 registered participants in attendance (third highest among all 9 conferences at the symposium). The presented papers covered such diverse topics as color standardization, detection/segmentation, IHC analysis, personalized medicine, computer aided diagnosis, and multimodal image registration with histopathology. The best poster award in the DP conference was awarded to Angel Cruz Roa, Eduardo Romero Castro, and Fabio González Osorio from Univ. Nacional de Colombia (Colombia). The posters by Wei-Chung Cheng, U.S. Food and Drug Administration (United States); Tyler Keay, Neil O’Flaherty, Joel Wang, Adam Ivansky, U.S. Food and Drug Administration (United States); Marios A. Gavrielides, Brandon D. Gallas, Aldo Badano, U.S. Food and Drug Administration (United States); and Masahiro

Ishikawa, Serkan Taha Ahi, Yuri Murakami, Fumikazu Kimura, Masahiro Yamaguchi, Tokyo Institute of Technology (Japan); Tokiya Abe, Akinori Hashiguchi M.D., Michiie Sakamoto M.D., Keio Univ. (Japan), received honorable mention awards. Of particular note was the fact that Asha Singanamally for her paper entitled "Identifying in vivo DCE MRI parameters correlated with ex vivo quantitative microvessel architecture: A radiohistomorphometric approach" was awarded the runner up prize for the Michael Merrick Best Student Paper award.

The success of the new DP conference was in no small part due to the outstanding efforts of the program committee who carefully constructed the program and SPIE Conference Chairs Drs. Nico Karssemeijer and Ehsan Samei and SPIE staff, who kindly guided us through all the steps of the program organization.

Next year, the Digital Pathology conference at SPIE Medical Imaging will take place in San Diego, CA. We look forward to seeing you there for another successful conference.
