PROCEEDINGS OF SPIE

Eighteenth International Symposium on **Atmospheric and Ocean Optics/ Atmospheric Physics**

Gennadii G. Matvienko
Vladimir I. Kurkin
Oleg A. Romanovskii
Editors

2–6 July 2012
Irkutsk, Russian Federation

Organized by
V.E. Zuev Institute of Atmospheric Optics SB RAS, Tomsk (Russian Federation)
Institute of Solar-Terrestrial Physics SB RAS, Irkutsk (Russian Federation)

Sponsored by
Ministry of Education and Science of Russian Federation
Russian Foundation for Basic Research
Siberian Branch of Russian Academy of Sciences

Volume 8696

Proceedings of SPIE 0277-786X, V. 8696

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Eighteenth International Symposium on: Atmospheric and Ocean Optics/Atmospheric Physics, edited by
Gennadii G. Matvienko, Vladimir I. Kurkin, Oleg A. Romanovskii, Proc. of SPIE Vol. 8696, 869601
© 2012 SPIE · CCC code: 0277-786/12/\$18 · doi: 10.1117/12.2016949

Proc. of SPIE Vol. 8696 869601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first

online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Symposium Committees</i>
xi	<i>Introduction</i>

MOLECULAR SPECTROSCOPY AND ATMOSPHERIC RADIATIVE PROCESSES

8696 02	Observations of solar radiation in atmosphere and ocean during 55th Russian Antarctic expedition on Academic Fyodorov research vessel [8696-7] A. Volchkov, V. Malyshev, Research and Production Association Typhoon (Russian Federation); L. Lutsko, Main Geophysical Observatory (Russian Federation)
8696 03	Ground-based spectroscopic measurements of atmospheric oxygen complexes (O₂)₂ [8696-8] S. S. Vasilchenko, L. N. Sinitsa, V. I. Serdyukov, B. A. Voronin, E. R. Polovtseva, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
8696 04	Method of averaged energy differences of coupled states and other approaches for calculation line broadening parameters of HD¹⁶O transitions [8696-24] A. S. Dudaryonok, B. A. Voronin, N. N. Lavrentieva, A. A. Lugovskoy, V.E. Zuev Institute of Atmospheric Optics (Russian Federation); V. I. Starikov, Tomsk State Univ. of Control Systems and Radioelectronics (Russian Federation) and Tomsk Polytechnic Univ. (Russian Federation)
8696 05	Systematization of published data on phosphine isotopologues [8696-38] A. Yu. Akhlestin, S. S. Voronina, A. I. Privezentsev, A. Z. Fazliev, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)

OPTICAL RADIATION PROPAGATION IN THE ATMOSPHERE AND OCEAN

8696 06	The investigation of spectrum shape of atmospheric inhomogeneities over an extended dynamic range [8696-29] P. G. Kovadlo, A. Y. Shihovtsev, O. S. Kochetkova, Institute of Solar-Terrestrial Physics (Russian Federation)
8696 07	Variance of fluctuations of the orbital angular momentum of Bessel beam in turbulent atmosphere [8696-18] I. P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
8696 08	Coherence radius and integrated scale of degree of coherence of Bessel beam in turbulent atmosphere [8696-19] I. P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
8696 09	Stability of partially coherent vortex Bessel beams [8696-20] I. P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)

- 8696 0A **Coherence of the higher modes of Bessel beams in turbulent atmosphere** [8696-21]
I. P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 8696 0B **Estimation of atmospheric turbulence parameters with wave front sensor data** [8696-33]
N. G. Iroshnikov, A. V. Koryabin, A. V. Larichev, V. I. Shmalhausen, M. S. Andreeva,
Lomonosov Moscow State Univ. (Russian Federation)
- 8696 0C **Statistical simulation of acoustic radiation propagation in the lower atmosphere by the Monte Carlo method** [8696-42]
L. G. Shamanaeva, V.E. Zuev Institute of Atmospheric Optics (Russian Federation);
V. V. Belov, V.E. Zuev Institute of Atmospheric Optics (Russian Federation) and National
Research Tomsk State Univ. (Russian Federation); Yu. B. Burkatovskaya, National Research
Tomsk State Univ. (Russian Federation) and National Research Tomsk Polytechnic Univ.
(Russian Federation); N. P. Krasnenko, Institute of Monitoring of Climatic and Ecological
Systems (Russian Federation) and Tomsk State Univ. of Control Systems and
Radioelectronics (Russian Federation)
- 8696 0D **The relationship of detection limits with electron impact excitation rate constants** [8696-27]
A. A. Ilyin, E. B. Sokolova, Institute of Automation and Control Processes (Russian
Federation) and Far Eastern Federal Univ. (Russian Federation)

OPTICAL INVESTIGATION OF ATMOSPHERE AND OCEAN

- 8696 0E **Automatically controlled adjustment unit of lidar for sending the laser radiation to the atmosphere** [8696-1]
A. V. Nevzorov, Y. V. Usoltsev, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 8696 0F **Effect of ozone anomaly during spring of 2011 on long-term (1996-2011) trends of the total ozone content according to ground-based (Tomsk: 56.48°N, 85.05°E) and satellite spectrophotometric measurements** [8696-3]
O. E. Bazhenov, A. V. Nevzorov, V.E. Zuev Institute of Atmospheric Optics (Russian
Federation)
- 8696 0G **Anomalous behavior of the total nitrogen dioxide content in the stratosphere over Tomsk in 2011** [8696-4]
A. V. Nevzorov, M. V. Grishaev, N. S. Salnikova, V.E. Zuev Institute of Atmospheric Optics
(Russian Federation)
- 8696 0H **Oil spills detection on different underlying surfaces** [8696-5]
Yu. V. Fedotov, M. L. Belov, O. A. Matrosova, V. A. Gorodnichev, Bauman Moscow State
Technical Univ. (Russian Federation)
- 8696 0I **Aerosol disturbances of the stratosphere after eruption of Grimsvötn volcano (Iceland, May 21, 2011) according to observations at lidar network stations of CIS countries CIS-LiNet in Minsk, Tomsk, and Vladivostok** [8696-13]
S. I. Dolgii, V. D. Burlakov, A. P. Makeev, A. V. Nevzorov, V.E. Zuev Institute of Atmospheric
Optics (Russian Federation); K. A. Shmirko, A. N. Pavlov, S. Y. Stolyarchuk, Institute for
Automation and Control Processes (Russian Federation); O. A. Bukin, Admiral Nevelsky
Maritime Univ. (Russian Federation); A. P. Chaykovskii, F. P. Osipenko, B.I. Stepanov Institute
of Physics (Belarus); D. A. Trifonov, Institute for Nuclear Research and Nuclear Energy
(Bulgaria)

- 8696 OJ **Aerosol disturbances of the stratosphere over Tomsk according to data of lidar observations in volcanic activity period 2006–2011** [8696-6]
A. P. Makeev, V. D. Burlakov, S. I. Dolgii, A. V. Nevzorov, D. A. Trifonov, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 8696 OK **Video system for monitoring sea-surface characteristics in coastal zone** [8696-22]
O. G. Konstantinov, V.I. Il'ichev Pacific Oceanological Institute (Russian Federation);
A. N. Pavlov, Institute for Automation and Control Processes (Russian Federation)
- 8696 OL **Methodical aspects of lidar sensing of trace gases in atmosphere by differential absorption method** [8696-39]
O. A. Romanovskii, V.E. Zuev Institute of Atmospheric Optics (Russian Federation) and Tomsk State Univ. (Russian Federation); O. V. Kharchenko, V.E. Zuev Institute of Atmospheric Optics (Russian Federation); S. V. Yakovlev, V.E. Zuev Institute of Atmospheric Optics (Russian Federation) and Tomsk State Univ. (Russian Federation)
- 8696 OM **Peculiarities of condensation transformation of the atmospheric aerosol parameters at phase transition** [8696-40]
S. A. Terpugova, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 8696 ON **Study of condensation transformation of the size spectrum of atmospheric aerosol with nephelometer and photoelectric counter** [8696-41]
S. A. Terpugova, V. V. Polkin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 8696 OO **Preliminary results of satellite and ground-based lidar observations for aerosol perturbations in Northern hemisphere stratosphere after Grimsvotn eruption, May 2011** [8696-44]
K. A. Shmirko, A. N. Pavlov, S. Yu. Stolyarchuk, Institute for Automation and Control Processes (Russian Federation)

ATMOSPHERIC PHYSICS

- 8696 OP **Extensive air showers radio emission spatial distribution at 32 MHz frequency from measurements of Yakutsk Array** [8696-11]
D. S. Borschevsky, Institute of Cosmophysical Research and Aeronomy (Russian Federation); S. P. Knurenko, Yu. G. Institute of Cosmophysical Research and Aeronomy (Russian Federation); I. S. Petrov, Z. E. Petrov, Yu. G. Shafer Institute of Cosmophysical Research and Aeronomy (Russian Federation)
- 8696 OQ **On maximum amplitude of radio pulse correlation and energy of primary particles producing extensive air showers** [8696-12]
S. P. Knurenko, D. S. Borschevsky, Z. E. Petrov, I. S. Petrov, Institute of Cosmophysical Research and Aeronomy (Russian Federation)
- 8696 OR **Mesopause temperature variability from hydroxyl emission observations in Eastern Siberia and European Russia** [8696-17]
I. V. Medvedeva, Institute of Solar-Terrestrial Physics (Russian Federation); V. I. Perminov, A. I. Semenov, A.M. Obukhov Institute of Atmospheric Physics (Russian Federation)

- 8696 OS **Seasonal variations of temperature and emission intensities of mesopause on variation of solar activity** [8696-25]
A. M. Ammosova, P. P. Ammosov, Institute of Cosmophysical Research and Aeronomy (Russian Federation)
- 8696 OT **The geodynamic reasons of decade changes of climate** [8696-26]
N. S. Sidorenkov, Hydrometeorological Research Ctr. of the Russian Federation (Russian Federation)
- 8696 OV **Temporal dynamics of vertical profiles of the velocity structure functions in the lower atmosphere** [8696-43]
P. G. Stafeev, Institute for Monitoring of Climatic and Ecological Systems (Russian Federation) and Tomsk State Univ. of Control Systems and Radioelectronics (Russian Federation); O. F. Kapegesheva, National Research Tomsk State Univ. (Russian Federation); N. P. Krasnenko, Institute for Monitoring of Climatic and Ecological Systems (Russian Federation) and Tomsk State Univ. of Control Systems and Radioelectronics (Russian Federation); L. G. Shamanaeva, V.E. Introduction

In accordance with the schedule of meeting and conferences approved by the Presidium of the Siberian Branch of the Russian Academy of Sciences (SB RAS) for 2012, the Institute of Atmospheric Optics SB RAS and the Institute of Solar-Terrestrial Physics SB RAS organized the Eighteenth International Symposium titled Atmospheric and Ocean Optics/Atmospheric Physics in Irkutsk, Russia, 2–6 July 2012.

We wish to thank our sponsors for their contribution to the success of the symposium: Siberian Branch of the Russian Academy of Sciences, Russian Foundation for Basic Research, and the Ministry of Education and Science of Russian Federation.

English and Russian were the working languages of the symposium. All poster presentations were in English and oral presentations were made in English and Russian (using synchronous translation via personal audio-equipment).

We conducted four conferences titled:

- A. Molecular Spectroscopy and Atmospheric Radiative Processes
- B. Optical Radiation Propagation in the Atmosphere and Ocean
- C. Optical Investigation of Atmosphere and Ocean
- D. Atmospheric Physics

The main topics of the Eighteenth International Symposium on Atmospheric and Ocean Optics/Atmospheric Physics included:

- Molecular spectroscopy of atmospheric gases
- Absorption of radiation in atmosphere and ocean
- Radiative regime and climate problems
- Models and data bases for atmospheric optics and physics
- Wave propagation in random inhomogeneous media
- Adaptive optics
- Nonlinear effects at radiation propagation in atmosphere
- Multiple scattering in optical remote sensing
- Image transfer and processing
- Optical and microphysical properties of atmospheric aerosol and suspension in water media
- Transport and transformation of aerosol and gas components in the atmosphere
- Laser and acoustic sounding of atmosphere and ocean
- Diagnostics of state and functioning of plants bio systems

- Structure and dynamics of the lower and middle atmosphere
- Dynamics of the atmosphere and climate of the Asian region
- Physical processes and phenomena in the atmosphere
- Optic techniques for probing the atmosphere

History: a symposium on Atmospheric and Ocean Optics has been held annually 1994 by the Institute of Atmospheric Optics SB RAS. From 1971 to 2012 the IAO SB RAS organized more than 50 conferences on different scientific topics. Current symposium is the only one in Russia where fundamental problems of propagation in inhomogeneous media and the scattering and absorption radiation are considered. Very few conferences in the world have such a spectrum of interest. It is very attractive for participants from former 15 countries that the official languages of symposium are Russian and English.

In the field listed here, the Siberian scientific schools are leaders in our country and well known in the world. This fact can be attributed to the interest in symposium from the scientists of Russia and other countries of the former.

Present: the Eighteenth International Symposium Atmospheric and Ocean Optics/ Atmospheric Physics" was successfully held in Irkutsk, Russia, 2–6 July 2012.

The program of the symposium included 22 invited and plenary papers, 172 oral presentations, and more than 120 poster presentations during four poster sessions.
