Proceedings of SPIE 0277-786X, V. 8781

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Integrated Optics: Physics and Simulations, edited by Pavel Cheben, Jirí Ctyroký, Iñigo Molina-Fernandez,
Proc. of SPIE Vol. 8781, 878101 · © 2013 SPIE · CCC code: 0277-786X/13/\$18
doi: 10.1117/12.2031439

Proc. of SPIE Vol. 8781 878101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 INTEGRATED PHOTONICS DESIGN I

8781 02	Integrated design for integrated photonics: from the physical to the circuit level and back (Invited Paper) [8781-1] W. Bogaerts, Y. Li, S. Pathak, A. Ruocco, M. Fiers, A. Ribeiro, E. Lambert, P. Dumon, IMEC, Univ. Gent (Belgium)
8781 04	Analysis of parasitic effects in PICs using circuit simulation [8781-2] E. Kleijn, M. K. Smit, X. J. M. Leijtens, Technische Univ. Eindhoven (Netherlands)
8781 05	Thermo-optic simulations of silicon nitride / polymer hybrid waveguides [8781-3] A. Liu, Z. Zhang, D. Liu, N. Keil, N. Grote, Fraunhofer-Institut für Nachrichtentechnik Heinrich-Hertz-Institut (Germany)
8781 06	Numerical simulation of multi-splitting widely tunable filter on SOI [8781-4] A. Tsarev, A.V. Rzhakov Institute of Semiconductor Physics (Russian Federation)

SESSION 2 SILICON INTEGRATED PHOTONICS

8781 07	A 30 GHz silicon photonic platform (Invited Paper) [8781-5] A. Novack, National Univ. of Singapore (Singapore) and A*STAR Institute of Microelectronics (Singapore); Y. Liu, R. Ding, Univ. of Delaware (United States); M. Gould, Univ. of Washington (United States); T. Baehr-Jones, Univ. of Delaware (United States); Q. Li, Columbia Univ. (United States); Y. Yang, Y. Ma, Y. Zhang, Univ. of Delaware (United States); K. Padmaraju, K. Bergmen, Columbia Univ. (United States); A. E.-J. Lim, G.-Q. Lo, A*STAR Institute of Microelectronics (Singapore); M. Hochberg, National Univ. of Singapore (Singapore), A*STAR Institute of Microelectronics (Singapore), and Univ. of Delaware (United States)
8781 09	A general approach for robust integrated polarization rotators [8781-7] C. Alonso-Ramos, R. Halir, A. Ortega-Moñux, Univ. Málaga (Spain); P. Cheben, National Research Council Canada (Canada); L. Vivien, Institut d'Electronique Fondamentale, CNRS, Univ. Paris-Sud (France); I. Molina-Fernández, Univ. Málaga (Spain); D. Marris-Morini, Institut d'Electronique Fondamentale, CNRS, Univ. Paris-Sud (France); S. Janz, D.-X. Xu, J. Schmid, National Research Council Canada (Canada)
8781 0A	Design and analysis of ultra small radius micro-ring resonator [8781-8] C. Y. Wang, National Sun Yat-Sen Univ. (Taiwan); C. W. Tseng, National Sun Yat-Sen Univ. (Taiwan) and National Tsing Hua Univ. (Taiwan); C. Y. Chen, C. T. Wang, Y. J. Chen, National Sun Yat-Sen Univ. (Taiwan)

- 8781 OB **Analysis of couplers between photonic nanowires and subwavelength grating waveguides** [8781-9]
J. Čtyroký, Institute of Photonics and Electronics of the ASCR, v.v.i. (Czech Republic);
P. Kwiecien, I. Richter, Czech Technical Univ. in Prague (Czech Republic); P. Cheben,
National Research Council Canada (Canada)

SESSION 3 INTEGRATED ACTIVE DEVICES I

- 8781 OD **Simultaneous optimization of confinement and thermal performance for heteroepitaxial InP on Si hybrid lasers** [8781-11]
C. Pang, H. Benisty, M. Besbes, Lab. Charles Fabry, CNRS, Univ. Paris Sud (France)
- 8781 OF **Dual-wavelength operation of monolithically integrated arrayed waveguide grating lasers for optical heterodyning** [8781-13]
R. C. Guzmán M., Á. Jimenez, Univ. Carlos III de Madrid (Spain); K. Lawniczuk, Warsaw Univ. of Technology (Poland); A. Corradi, X. J. M. Leijtens, E. A. J. M. Bente, Technische Univ. Eindhoven (Netherlands); G. Carpintero, Univ. Carlos III de Madrid (Spain)
- 8781 OG **Chirp reduction and on/off contrast enhancement via optical injection locking and coherent carrier manipulation** [8781-14]
R. Slavík, Univ. of Southampton (United Kingdom); J. Kakande, Alcatel-Lucent Bell Labs. (United States); R. Phelan, J. O'Carroll, B. Kelly, Eblana Photonics Ltd. (Ireland);
D. J. Richardson, Univ. of Southampton (United Kingdom)

SESSION 4 INTEGRATED ACTIVE DEVICES II

- 8781 OJ **Selective amplification of frequency comb modes via optical injection locking of a semiconductor laser: influence of adjacent unlocked comb modes** [8781-17]
D. S. Wu, D. J. Richardson, R. Slavík, Univ. of Southampton (United Kingdom)
- 8781 OK **Enhancement of the optical power stimulated by impact ionization in GaSb-based heterostructures with deep quantum wells** [8781-18]
M. Mikhailova, G. Zegrya, L. Danilov, E. Ivanov, K. Kalinina, N. Stoyanov, K. Salikhov, Y. Yakovlev, Ioffe Physico-Technical Institute (Russian Federation); E. Hulicius, A. Hospodkova, J. Pangrac, M. Zikova, Institute of Physics of the ASCR, v.v.i. (Czech Republic)

SESSION 5 INTEGRATED PHOTONICS DESIGN II

- 8781 OM **Ultra-long and ultra high quality fibre Bragg gratings** [8781-20]
M. Gagné, R. Kashyap, Ecole Polytechnique de Montréal (Canada)
- 8781 ON **New insight in guided resonances with negative refracting photonic crystals** [8781-21]
S. Romano, I. Rendina, IMM-CNR, Univ. degli Studi di Napoli Federico II (Italy); S. Cabrini, Lawrence Berkeley National Lab. (United States); V. Mocella, IMM-CNR, Univ. degli Studi di Napoli Federico II (Italy)

- 8781 OP **A parallel computational FDTD approach to the analysis of the light scattering from an opal photonic crystal** [8781-23]
 A. Vaccari, A. Cala' Lesina, Fondazione Bruno Kessler (Italy); L. Cristoforetti, Provincia Autonoma di Trento (Italy); A. Chiappini, CSMFO Lab., Institute of Photonics and Nanotechnology, IFN-CNR (Italy); F. Prudeniano, Politecnico di Bari (Italy); A. Bozzoli, Fondazione Bruno Kessler (Italy); M. Ferrari, CSMFO Lab., Institute of Photonics and Nanotechnology, IFN-CNR (Italy)

SESSION 6 PLASMONICS

- 8781 OQ **Low-power nanophotonics: material and device technology (Invited Paper)** [8781-24]
 L. Thylén, Royal Institute of Technology (Sweden), Hewlett-Packard Labs. (United States), and Joint Research Ctr. of Photonics (China); P. Holmstrom, Royal Institute of Technology (Sweden); L. Wosinski, Royal Institute of Technology (Sweden) and Joint Research Ctr. of Photonics (China); S. Lourdudoss, Royal Institute of Technology (Sweden)
- 8781 OR **Energy-per-bit and noise limits in plasmonic integrated photodetectors** [8781-25]
 P. Wahl, Vrije Univ. Brussel (Belgium) and Stanford Univ. (United States); T. Tanemura, The Univ. of Tokyo (Japan); C. Debaes, N. Vermeulen, J. Van Erps, Vrije Univ. Brussel (Belgium); D. A. B. Miller, Stanford Univ. (United States); H. Thienpont, Vrije Univ. Brussel (Belgium)
- 8781 OT **Energetic analysis of the plasmonic lens structure: a first step to simplification** [8781-27]
 Q. Levesque, ONERA, CNRS (France) and LPN-CNRS (France); P. Bouchon, ONERA, CNRS (France); F. Pardo, J. Pelouard, LPN-CNRS (France); R. Haïdar, ONERA, CNRS (France) and École Polytechnique (France)
- 8781 OU **Resonance effects in the optical antennas shaped as finite comb-like gratings of noble-metal nanostrips** [8781-28]
 O. V. Shapoval, A. I. Nosich, Institute of Radio-Physics and Electronics (Ukraine); J. Čtyroký, Institute of Photonics and Electronics ASCR, v.v.i. (Czech Republic)

SESSION 7 NOVEL MATERIALS AND BIOSENSING

- 8781 OV **Group IV platforms for the mid-infrared (Invited Paper)** [8781-29]
 G. Z. Mashanovich, M. Nedeljkovic, X. Chen, T. M. Ben Masaud, Univ. of Southampton (United Kingdom); M. Muneeb, Univ. Gent (Belgium); M. Strain, M. Sorel, Univ. of Glasgow (United Kingdom); T. F. Krauss, Univ. of York (United Kingdom); G. C. Roelkens, Univ. Gent (Belgium); A. C. Peacock, H. M. H. Chong, G. T. Reed, Univ. of Southampton (United Kingdom)
- 8781 OW **Silicon nitride back-end optics for biosensor applications (Invited Paper)** [8781-30]
 S. Romero-García, F. Merget, RWTH Aachen (Germany); F. C. Zhong, H. Finkelstein, Illumina, Inc. (United States); J. Witzens, RWTH Aachen (Germany)
- 8781 OX **Hybrid plasmonic microdisk resonators for optical interconnect applications** [8775-51]
 F. Lou, Royal Institute of Technology (Sweden); L. Thylén, L. Wosinski, Royal Institute of Technology (Sweden) and Joint Research Ctr. of Photonics (China)

SESSION 8 INTEGRATED PHOTONIC DESIGN III

- 8781 0Y **Ge/SiGe quantum well optical modulator (Invited Paper)** [8781-32]
D. Marris-Morini, P. Chaisakul, M.-S. Rouifed, Institut d'Électronique Fondamentale, CNRS, Univ. Paris Sud (France); J. Frigerio, G. Isella, D. Chrastina, Politecnico di Milano (Italy); X. Le Roux, S. Edmond, J.-R. Coudeville, L. Vivien, Institut d'Électronique Fondamentale, CNRS, Univ. Paris Sud (France)
- 8781 0Z **Multi-scale simulation of an optical device using a novel approach for combining ray-tracing and FDTD** [8781-33]
C. Leiner, S. Schweitzer, V. Schmidt, M. Beleggratis, F.-P. Wenzl, P. Hartmann, JOANNEUM RESEARCH Forschungsgesellschaft mbH (Austria); U. Hohenester, Karl-Franzens-Univ. Graz (Austria); C. Sommer, JOANNEUM RESEARCH Forschungsgesellschaft mbH (Austria)
- 8781 11 **Mirror transformation and super-focusing of Airy pulses under the action of third order dispersion** [8781-35]
R. Driben, Tel Aviv Univ. (Israel) and Univ. Paderborn (Germany); Y. Hu, Institut National de la Recherche Scientifique (Canada); Z. Chen, San Francisco State Univ. (United States); B. A. Malomed, Tel-Aviv Univ. (Israel); R. Morandotti, Institut National de la Recherche Scientifique (Canada)

POSTER SESSION

- 8781 12 **Almost lossless multiple crossing of silicon wires by means of vertical coupling with a polymer strip waveguide** [8781-37]
A. Tsarev, E. Kolosovsky, A.V. Rzhano Institute of Semiconductor Physics (Russian Federation)
- 8781 13 **Recent progress in opto-mechanical design of cavity developed for the OSQAR experiment** [8781-38]
K. Macúchová, J. Hošek, Š. Němcová, Czech Technical Univ. in Prague (Czech Republic); M. Šulc, Technical Univ. of Liberec (Czech Republic); J. Zicha, Czech Technical Univ. in Prague (Czech Republic)
- 8781 15 **Near infrared elastic light scattering by a silicon microsphere** [8781-40]
U. S. Gökay, A. Serpengüzel, Koç Univ. (Turkey)
- 8781 16 **Determination of amplifying parameters of LMA Yb:silica fiber amplifier** [8781-41]
M. Ilchi-Ghazaani, P. Parvin, S. Mohammadian, Amirkabir Univ. of Technology (Iran, Islamic Republic of)
- 8781 17 **Fabrication and evaluation of chalcogenide glass molding lens for car night-vision system** [8781-42]
D. H. Cha, Y. Hwang, J.-H. Kim, H.-J. Kim, Korea Photonics Technology Institute (Korea, Republic of)
- 8781 18 **Modeling of CW Yb-doped silica fiber laser by considering loss mechanism** [8781-43]
M. Ilchi-Ghazaani, P. Parvin, Amirkabir Univ. of Technology (Iran, Islamic Republic of)

- 8781 19 **Competition between various techniques for power scaling of fiber laser output power** [8781-44]
M. Ilchi-Ghazaani, P. Parvin, V. Daneshafrooz, Amirkabir Univ. of Technology (Iran, Islamic Republic of)
- 8781 1A **Silicon nitride waveguides and micro ring-resonators for astronomical optical frequency comb generation** [8781-45]
T. Fremberg, J. M. Chavez Boggio, D. Bodenmüller, R. Haynes, M. M. Roth, Leibniz-Institut für Astrophysik Potsdam (Germany); R. Eisermann, L. Zimmermann, IHP GmbH (Germany); M. Böhm, Univ. Potsdam (Germany)
- 8781 1B **Numerical investigation of propagation constant in silicon nitride waveguides with different refractive index profiles** [8781-46]
D. Bodenmüller, J. M. Chavez Boggio, Leibniz-Institut für Astrophysik Potsdam (Germany); M. Böhm, Univ. Potsdam (Germany); T. Fremberg, R. Haynes, M. M. Roth, Leibniz-Institut für Astrophysik Potsdam (Germany)
- 8781 1C **Optical characterization of the aperiodic multilayered anisotropic structure based on Kolakoski sequence** [8781-47]
V. R. Tuz, Institute of Radio Astronomy (Ukraine) and V.N. Karazin Kharkiv National Univ. (Ukraine); V. I. Fesenko, Institute of Radio Astronomy (Ukraine) and Kharkov National Univ. of Radio Electronics (Ukraine); I. A. Sukhoivanov, Univ. de Guanajuato (Mexico)
- 8781 1D **Revisiting the superprism effect: a theory close to the Bragg condition** [8781-48]
P. Ciancia, I. Rendina, IMM, CNR, Univ. degli Studi di Napoli Federico II (Italy); G. Cocorullo, Univ. della Calabria (Italy); V. Mocella, IMM, CNR, Univ. degli Studi di Napoli Federico II (Italy)
- 8781 1F **A performance comparison between 33RZ-POMUX-DQPSK and 33RZ-DC-DQPSK using coherent detection for 1.6 Tb/s (16×100 Gb/s) over 1200 km** [8781-50]
A. Hraghi, M. Menif, Univ. of Carthage (Tunisia)

Introduction

Recent advances in integrated optics have created the possibility of entertaining the implementation of complex functionalities into optoelectronics (OE) integrated circuits. OE circuits have the potential to be miniaturized and mass-produced at an affordable cost for many applications and markets, including telecommunications, optical interconnects, medical screening, and biological and chemical sensing, to name a few. Recent developments in diverse areas such as light sources, modulators, switches, detectors, photonic crystals, waveguide structures, resonators, sensors, and various sub-systems, indicate that integrated optics remains an extremely active and firmly established research field.

This conference on Integrated Optics: Physics and Simulations is part of the SPIE 2013 Optics and Optoelectronic Symposium. It focuses on the physics, design and simulation of integrated optical structures, devices and systems. The conference aims to provide an international forum for researchers from academia, industry and government laboratories for sharing the latest advancements relevant to integrated optics physics, design and simulations. The conference covers a wide range of topics, including: simulation and design of optoelectronic devices; waveguide photonic bandgap engineering and microcavities; passive and active waveguide devices; diffractive and subwavelength structures; integrated optical circuits for datacom, WDM networks and coherent communications; waveguide based light sources; photodetectors, modulators, amplifiers, wavelength converters, switches, couplers, resonators, filters and subsystems; waveguide devices for aerospace applications and defence; optical interconnects; photonic design automation, manufacturing and verification tools; and novel algorithms and photonic CAD software for photonics and integration with electronics.

These Conference Proceedings include original research papers presented at the conference, including a number of invited papers from leading authorities in the field. We thank all the contributors for submitting their interesting work. We hope that these Integrated Optics: Physics and Simulation Conference Proceedings will prove valuable to those working in integrated optics and will help advance research in this field.
