Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Introduction

The VIII Reunión Iberoamericana de Óptica / XI Reunión Iberoamericana de Óptica, Láseres y Aplicaciones - VIII Reunião Iberoamericana de Óptica/XI Reunião Iberoamericana de Óptica, Lasers e Aplicações, RIAO/OPTILAS 2013, ran very successfully in an exciting friendly and most pleasant way. Four hundred forty one (441) participants from 39 countries openly shared ideas and experiences discussing the remarkable and exciting developments in the last the three years in Optics in Iberoamerica presented at the conference.

The conference occurred July 22 to 26, 2013 at the University of Porto in Portugal. Twenty one years after the first Iberoamerican Optics Meeting (Reunión Iberoamericana de Óptica - Reunião Iberoamericana de Óptica, RIAO) in Barcelona, the reference meeting of the Iberoamerican Optics community returned to the Iberian Peninsula. It was the greatest of the honors for us, the Portuguese Society for Optics and Photonics (SPOF), to welcome colleagues from all over Iberoamerica and the world to Portugal renewing friendships and growing many more!

The success of the conference was only possible with the active support and commitment of the Red(e) Iberoamericana de Optica, the Spanish Optical Society, SEDOPTICA, the Mexican Academy of Optics, AMO, the Colombian Optics Network, RCO, the Venezuelan Optics Committee, CVO, and many colleagues and institutions from all over Iberoamerica. The endorsement and active support of the most important international scientific optics societies: ICO, SPIE, and OSA, represented at the highest level, and of several major institutions: Photonics21, EOS, LAM, SECPhO, EPIC, and national societies, committees and boards: STO, OPSS, APLO, SPF, FCT, as well as the SPIE and OSA student chapters of the University of Porto and the University of Aveiro, INESC, and the University of Porto was fundamental and much appreciated.

From the 605 works accepted, 581 were effectively presented. 13 high level plenary lectures, 61 key lectures covering all fields of optics and photonics, 135 oral communications and 372 posters were presented and attended by 441 participants, including over 158 students, from 39 countries all over Iberoamerica and the world. Two hundred fifty one (251) full papers were accepted for publication in the proceedings book. Two very interesting special sessions and round tables on "Entrepreneurship in Optics & Photonics" and "Women & Optics" were organized with strong active participation of the audience. These sessions were jointly organized between RIAO/OPTILAS 2013 and ETOP2013. The 12th Education and Training in Optics and Photonics Conference was very successfully organized in parallel and in an articulated way with RIAO/OPTILAS 2013. The participation of students (158) and young researchers was very positive and a very good sign of the growth potential of our Iberoamerican O&P research. SPIE

and OSA student prizes were awarded. RIAO/OPTILAS2013 also held the ceremony of the IUPAP Prize 2012 awarded to Nirit Dudovich, Weizmann Institute, Israel for the work "Resolving and manipulating attosecond processes via strong-field light-matter interactions".

The board of the Red(e) Iberoamericana de Optica met during the conference and Prof. Dr. Pedro Andrés Bou was sworn in as the new president. The recent activities of the Red(e) and very positive prospects of evolution were presented during the general assembly of RIAO/OPTILAS.

RIAO/OPTILAS, the reference meeting in optics in Iberoamerica and our main "window" to the world, will keep growing and re-enforce itself. The next edition to be held in Chile in the fall of 2016 will be another great success reflective of the decisive importance of Iberoamerica's contribution to the development of optics and photonics.

Hope to see you all there!

Manuel Filipe P. C. Martins Costa
