Front Matter: Volume 8806

, "Front Matter: Volume 8806," Proc. SPIE 8806, Metamaterials:
Fundamentals and Applications VI, 880601 (26 September 2013); doi:
10.1117/12.2034130

SPIE.

Event: SPIE NanoScience + Engineering, 2013, San Diego, California, United States

PROCEEDINGS OF SPIE

Metamaterials: Fundamentals and Applications VI

**Allan D. Boardman
Nader Engheta
Mikhail A. Noginov
Nikolay I. Zheludev**
Editors

**25–29 August 2013
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8806

Proceedings of SPIE 0277-786X, V. 8806

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Metamaterials: Fundamentals and Applications VI, edited by Allan D. Boardman,
Nader Engheta, Mikhail A. Noginov, Nikolay I. Zheludev, Proc. of SPIE Vol. 8806,
880601 · © 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2034130

Proc. of SPIE Vol. 8806 880601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Metamaterials: Fundamentals and Applications VI*, edited by Allan D. Boardman, Nader Engheta, Mikhail A. Noginov, Nikolay I. Zheludev, Proceedings of SPIE Vol. 8806 (SPIE, Bellingham, WA, 2013) Article CID Number.

ISSN: 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

TRANSFORMATION OPTICS

- 8806 03 **Transforming optical forces (Invited Paper)** [8806-2]
V. Ginis, Vrije Univ. Brussel (Belgium); P. Tassin, Chalmers Univ. (Sweden); C. M. Soukoulis, Iowa State Univ. (United States) and Institute of Electronic Structure and Lasers (Greece); I. Veretennicoff, Vrije Univ. Brussel (Belgium)

METASURFACES

- 8806 0F **Experimental validation of a new bianisotropic parameter retrieval technique using plasmonic metasurfaces made of V-shape antennas** [8806-14]
J. Liu, A. M. Shaltout, Purdue Univ. (United States); X. Ni, Purdue Univ. (United States) and Univ. of California, Berkeley (United States); V. M. Shalaev, A. V. Kildishev, Purdue Univ. (United States)

GRAPHENE

- 8806 0H **Efficient time-domain model of the graphene dielectric function (Invited Paper)** [8806-16]
L. J. Prokopeva, A. V. Kildishev, Purdue Univ. (United States)
- 8806 0I **Time-domain modeling of silver nanowires-graphene transparent conducting electrodes** [8806-17]
J. Fang, S. R. Das, L. J. Prokopeva, V. M. Shalaev, D. B. Janes, A. V. Kildishev, Purdue Univ. (United States)

HYPERBOLIC AND LAMELLAR METAMATERIALS II

- 8806 0T **Electric and magnetic dipole radiation and Purcell effect in hyperbolic metamaterials (Invited Paper)** [8806-24]
A. N. Poddubny, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation) and Ioffe Physical-Technical Institute (Russian Federation); P. A. Belov, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation); Y. S. Kivshar, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation) and Australian National Univ. (Australia)

INFRARED AND THERMAL METAMATERIALS

- 8806 10 **A characterization study of highly tailorable 3D metamaterials in the thermal infrared for selective emission behaviors** [8806-33]
B. M. Adomanis, Air Force Institute of Technology (United States) and Air Force Research Lab., Materials and Manufacturing Directorate (United States); D. B. Burckel, Sandia National Labs. (United States); M. A. Marciniak, Air Force Institute of Technology (United States)
- 8806 11 **Directional thermal emission from a leaky-wave frequency selective surface** [8806-34]
E. C. Kinzel, Missouri Univ. of Science and Technology (United States); J. C. Ginn, Plasmonics, Inc. (United States); E. Z. Tucker, Univ. of North Carolina at Charlotte (United States); J. A. D'Archangel, L. A. Florence, CREOL, Univ. of Central Florida (United States); B. A. Lail, Florida Institute of Technology (United States); G. D. Boreman, Univ. of North Carolina at Charlotte (United States)
- 8806 12 **Multiplex-bands spectral characteristics of infrared perfect absorber metamaterials** [8806-35]
Y. Li, L. Su, B. Wang, Y. Guo, Northwestern Polytechnical Univ. (China); Z. Zhu, Z. Zhou, Science and Technology on Metrology and Calibration Lab. (China)
- 8806 13 **Development of CMOS-compatible membrane projection lithography** [8806-36]
D. B. Burckel, S. Samora, M. Wiwi, J. R. Wendt, Sandia National Labs. (United States)

MAGNETIC METAMATERIALS

- 8806 1A **Magneto-induced anisotropy of Voigt effect and other magneto-optical phenomena in ordered metal-dielectric metamaterials** [8806-43]
Y. M. Strelniker, Bar-Ilan Univ. (Israel); D. J. Bergman, Tel Aviv Univ. (Israel)

QUANTUM METAMATERIALS

- 8806 1D **Quantum plasmonics (Invited Paper)** [8806-46]
I. Fyodorov, Moscow Institute of Physics and Technology (Russian Federation); A. K. Sarychev, Institute for Theoretical and Applied Electrodynamics (Russian Federation); G. Tartakovsky, Advanced Systems and Technologies, Inc. (United States)
- 8806 1F **Nonlocal modification and quantum optical generalization of effective-medium theory for metamaterials (Invited Paper)** [8806-48]
M. Wubs, W. Yan, Technical Univ. of Denmark (Denmark); E. Amooghorban, Shahrekord Univ. (Iran, Islamic Republic of); N. A. Mortensen, Technical Univ. of Denmark (Denmark)

GAIN AND LOSS IN METAMATERIALS

- 8806 1K **Bichromatic wave mixing to reach optically lossless semiconductors** [8806-53]
A.-G. Kussow, Y. Aoud, A. Akyurtlu, Univ. of Massachusetts Lowell (United States)

- 8806 1L **Low-index metamaterials comprised of plasmonic dimers of aluminum-doped zinc oxide** [8806-54]

H. Alisafaei, P. M. Cox, M. A. Fiddy, Univ. of North Carolina at Charlotte (United States)

METAMATERIALS: FROM THZ TO RF

- 8806 1V **Modified bow-tie antenna with strong broadband field enhancement for RF photonic applications** [8806-64]

S. Wang, Q. Zhan, Univ. of Dayton (United States)

NONLINEAR METAMATERIALS

- 8806 1Y **Advanced solitonic metamaterial structures under external magnetophotonic control (Keynote Paper)** [8806-67]

A. D. Boardman, P. Egan, Univ. of Salford (United Kingdom)

DIELECTRIC METAMATERIALS

- 8806 26 **All-dielectric nanoantennas** [8806-74]

A. E. Krasnok, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation); A. E. Miroshnichenko, Australian National Univ. (Australia); P. A. Belov, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation); Y. S. Kivshar, National Research Univ. for Information Technologies, Mechanics and Optics (Russian Federation) and Australian National Univ. (Australia)

- 8806 2A **Probing the transition between the long-wavelength and the short-wavelength regimes of light propagation in all-dielectric metamaterials** [8806-78]

E. Cassan, Institut d'Électronique Fondamentale, Univ. Paris-Sud, CNRS (France); J. Dellinger, Lab. Interdisciplinaire Carnot de Bourgogne, Univ. de Bourgogne, CNRS (France); X. Le Roux, K. V. Do, C. Caer, Institut d'Électronique Fondamentale, Univ. Paris-Sud, CNRS (France); F. de Fornel, B. Cluzel, Lab. Interdisciplinaire Carnot de Bourgogne, Univ. de Bourgogne, CNRS (France)

- 8806 2B **Fishnet metamaterial with double negative refractive index in blue region of visible spectrum** [8806-97]

S. Zhou, Y. M. Xie, RMIT Univ. (Australia); Q. Li, The Univ. of Sydney (Australia); X. Huang, RMIT Univ. (Australia)

METAMATERIALS: ROTATE

- 8806 2F **Effect of rotational symmetry on the optical rotation of using asymmetrical nanostructures** [8806-83]
Y. L. Hor, W. K. Phua, A*STAR Institute of High Performance Computing (Singapore); Y. J. Liu, S. Wu, A*STAR Institute of Materials Research and Engineering (Singapore); D. Popp, A*STAR Institute of Molecular and Cell Biology (Singapore); E. S. P. Leong, A*STAR Institute of Materials Research and Engineering (Singapore); K. L. Mok, A*STAR Institute of Molecular and Cell Biology (Singapore); J. H. Teng, A*STAR Institute of Materials Research and Engineering (Singapore); R. Robinson, A*STAR Institute of Molecular and Cell Biology (Singapore); E. P. Li, E. H. Khoo, A*STAR Institute of High Performance Computing (Singapore)

POSTER SESSION

- 8806 2H **Achieving multifrequency cloaking with a single shell of multiple plasmonic constituents** [8806-85]
Y. Liu, Y. Meng, P. Li, Nanjing Univ. of Aeronautics and Astronautics (China)
- 8806 2I **Band-gap structure for N-fold layers inside bilayer cell of photonic crystal for THz frequencies** [8806-86]
A. Kh. Denisultanov, M. K. Khodzitsky, National Research Univ. of Information Technologies, Mechanics and Optics (Russian Federation)
- 8806 2P **Realistic electric field modeling of multilayered nanostructures by classic electrodynamics and first principles theory** [8806-31]
L. G. Il'chenko, V. V. Il'chenko, National Univ. of Kyiv (Ukraine); A. V. Gavrilenko, V. I. Gavrilenko, Norfolk State Univ. (United States)
- 8806 2Q **The influence of period between U-shaped resonators on metasurface response at terahertz frequency range** [8806-96]
Y. E. Terekhov, Lomonosov Moscow State Univ. (Russian Federation); M. K. Khodzitsky, Y. V. Grachev, E. A. Sedykh, National Research Univ. of Information Technologies, Mechanics and Optics (Russian Federation); G. V. Belokopytov, Lomonosov Moscow State Univ. (Russian Federation); X.-C. Zhang, The Institute of Optics, Univ. of Rochester (United States)

Author Index

Conference Committee

Symposium Chairs

Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Cochairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Allan D. Boardman, University of Salford (United Kingdom)
Nader Engheta, University of Pennsylvania (United States)
Mikhail A. Noginov, Norfolk State University (United States)
Nikolay I. Zheludev, University of Southampton (United Kingdom)

Conference Program Committee

Andrea Alù, The University of Texas at Austin (United States)
David L. Andrews, University of East Anglia Norwich (United Kingdom)
Koray Aydin, Northwestern University (United States)
Pavel A. Belov, National Research University of Information Technologies,
Mechanics and Optics (Russian Federation)
Alexandra Boltasseva, Purdue University (United States)
Igal Brener, Sandia National Laboratories (United States)
Mark Brongersma, Geballe Laboratory for Advanced Materials (GLAM)
(United States)
Harald W. Giessen, Universität Stuttgart (Germany)
F. Javier García de Abajo, Consejo Superior de Investigaciones
Científicas (Spain)
Satoshi Kawata, Osaka University (Japan)
Jacob B. Khurgin, Johns Hopkins University (United States)
Yuri S. Kivshar, The Australian National University (Australia)
Uriel Levy, The Hebrew University of Jerusalem (Israel)
Natalia M. Litchinitser, University at Buffalo (United States)
Martin W. McCall, Imperial College London (United Kingdom)
John B. Pendry, Imperial College London (United Kingdom)
Gennady B. Shvets, Institute for Fusion Studies (United States)
David R. Smith, Duke University (United States)
Costas M. Soukoulis, Iowa State University (United States)
Mark I. Stockman, Georgia State University (United States)
Sergei Tretyakov, Aalto University School of Science and Technology
(Finland)
Din Ping Tsai, National Taiwan University (Taiwan)

Augustine Urbas, Air Force Research Laboratory (United States)
Martin Wegener, Karlsruher Institut für Technologie (Germany)

Session Chairs

- 1 Transformation Optics
Mikhail A. Noginov, Norfolk State University (United States)
- 2 Hyperbolic and Lamellar Metamaterials I
Nikolay I. Zheludev, University of Southampton (United Kingdom)
- 3 Metasurfaces
F. Javier García de Abajo, ICFO - Institut de Ciències Fotòniques (Spain)
- 4 Graphene
Dean P. Brown, UES, Inc. (United States)
- 5 Beyond Plasmonics
Zubin Jacob, University of Alberta (Canada)
- 6 Hyperbolic and Lamellar Metamaterials II
Ekaterina Poutina, Air Force Research Laboratory (United States)
- 7 Infrared and Thermal Metamaterials
Chase Ellis, U.S. Naval Research Laboratory (United States)
- 8 Magnetic Metamaterials
Sergei Tretyakov, Aalto University School of Science and Technology (Finland)
- 9 Quantum Metamaterials
Koray Aydin, Northwestern University (United States)
- 10 Gain and Loss in Metamaterials
Daniel M. Wasserman, University of Illinois at Urbana-Champaign (United States)
- 11 New Phenomena and Trends
David Powell, The Australian National University (Australia)
- 12 Metamaterials: From THz to RF
Maria Kafesaki, Foundation for Research and Technology-Hellas (Greece)
- 13 Nonlinear Metamaterials
Vladimir P. Drachev, University of North Texas (United States)
- 14 Active Metamaterials
Maria Farsari, Foundation for Research and Technology-Hellas (Greece)

- 15 Dielectric Metamaterials
Igor I. Smolyaninov, BAE Systems (United States)
- 16 Metamaterials: Rotate
Philippe Tassin, Chalmers University of Technology (Sweden)
