Volume 8808

Proceedings of SPIE 0277-786X, V. 8808

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Active Photonic Materials V, edited by Ganapathi S. Subramania, Stavroula Foteinopoulou,
Proc. of SPIE Vol. 8808, 880801 · © 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2034136

Proc. of SPIE Vol. 8808 880801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	Conference Committee
ix	Introduction

NANOPHOTONIC SOLAR ENERGY HARVESTING I

8808 04	3D photonic crystals for photon management in solar cells (Invited Paper) [8808-3] S. L. Schweizer, A. N. Sprafke, Martin-Luther Univ. Halle-Wittenberg (Germany); R. B. Wehrspohn, Martin-Luther Univ. Halle-Wittenberg (Germany) and Fraunhofer Institute for Mechanics of Materials (Germany)
---------	--

NANOPHOTONIC SOLAR ENERGY HARVESTING II

8808 07	Photon extraction: the key physics for approaching solar cell efficiency limits (Invited Paper) [8808-6] O. D. Miller, Massachusetts Institute of Technology (United States); E. Yablonovitch, Lawrence Berkeley National Lab. (United States) and Univ. of California, Berkeley (United States)
---------	--

TAILORING LIGHT ABSORPTION, DETECTION, AND EXTRACTION II

8808 0D	Enhancement of light extraction in silicon-rich oxide light-emitting diodes by one-dimensional photonic crystal gratings (Invited Paper) [8808-12] J. M. Llorens, P. A. Postigo, IMM Instituto de Microelectrónica de Madrid (Spain); J. Juvert, A. González, C. Domínguez, IMB-CNM, CSIC (Spain)
---------	--

SPONTANEOUS AND STIMULATED EMISSION CONTROL

8808 0J	Semiconductor nanowire photoluminescence: spatial/polarization averaged coupling into leaky modes [8808-18] R. Paniagua-Domínguez, Instituto de Estructura de la Materia, CSIC (Spain); G. Grzela, FOM Institute for Atomic and Molecular Physics (Netherlands); J. Gómez Rivas, FOM Institute for Atomic and Molecular Physics (Netherlands) and Eindhoven Univ. of Technology (Netherlands); J. A. Sánchez-Gil, Instituto de Estructura de la Materia, CSIC (Spain)
---------	--

CARBON-BASED PHOTONICS I

8808 0Q	Carbon nanotube and graphene for photonic applications (Invited Paper) [8808-25] S. Yamashita, A. Martinez, B. Xu, The Univ. of Tokyo (Japan)
---------	---

NANOPHOTONIC SENSING AND TRAPPING

- 8808 OR **Plasmonic nanoparticle based nanobiosensors and nanophotodetectors (Invited Paper)** [8808-26]
N. A. Cinel, Bilkent Univ. (Turkey); S. Bütün, Northwestern Univ. (United States); E. Özbay, Bilkent Univ. (Turkey)

THERMAL EMISSION

- 8808 OV **Selective thermal emission from thin-film metasurfaces (Invited Paper)** [8808-31]
W. Streyer, S. Law, Univ. of Illinois at Urbana-Champaign (United States); J. Mason, D. C. Adams, Univ. of Massachusetts Lowell (United States); G. Rooney, T. Jacobs, D. Wasserman, Univ. of Illinois at Urbana-Champaign (United States)

CARBON-BASED PHOTONICS II

- 8808 10 **Terahertz reconfigurable devices using graphene (Invited Paper)** [8808-35]
B. Sensale Rodriguez, The Univ. of Utah (United States) and Univ. of Notre Dame (United States); H. G. Xing, Univ. of Notre Dame (United States)

EXOTIC EM FIELDS AND SYMMETRY II

- 8808 14 **Novel phenomena in macroscopic photonic crystals (Invited Paper)** [8808-40]
B. Zhen, S.-L. Chua, J. Lee, W. Qiu, A. W. Rodriguez, X. Liang, S. G. Johnson, J. D. Joannopoulos, O. Shapira, M. Soljacic, Massachusetts Institute of Technology (United States)
- 8808 15 **Photonic Floquet topological insulators (Invited Paper)** [8808-41]
M. C. Rechtsman, Technion-Israel Institute of Technology (Israel); J. M. Zeuner, Friedrich-Schiller-Univ. Jena (Germany); Y. Plotnik, Y. Lumer, D. Podolsky, Technion-Israel Institute of Technology (Israel); F. Dreisow, S. Nolte, Friedrich-Schiller-Univ. Jena (Germany); M. Segev, Technion-Israel Institute of Technology (Israel); A. Szameit, Friedrich-Schiller-Univ. Jena (Germany)

SLOW-LIGHT PHYSICS AND APPLICATIONS

- 8808 19 **Engineered SOI slot photonic crystal waveguides** [8808-45]
C. Caer, X. Le Roux, L. Vivien, E. Cassan, Institut d'Électronique Fondamentale, Univ. Paris-Sud, CNRS (France)
- 8808 1A **Slow light tuning in photonic crystals (Invited Paper)** [8808-46]
T. Baba, Yokohama National Univ. (Japan)

NOVEL NON-LINEAR PHOTONIC PLATFORMS

- 8808 1B **On-chip stimulated Brillouin scattering and its applications (Invited Paper)** [8808-47]
B. J. Eggleton, The Univ. of Sydney (Australia); C. G. Poulton, Univ. of Technology, Sydney (Australia); D. Marpaung, B. Morrison, I. V. Kabakova, The Univ. of Sydney (Australia); D.-Y. Choi, S. J. Madden, B. Luther-Davies, The Australian National Univ. (Australia); R. Pant, The Univ. of Sydney (Australia)
- 8808 1E **Si/chalcogenide glass hybrid waveguide design for efficient four wave mixing** [8808-50]
J. Schilling, C. Bohley, P. W. Nolte, Martin-Luther-Univ. Halle-Wittenberg (Germany)
- 8808 1F **The resonant nonlinear scattering theory with bound states in the radiation continuum and the second harmonic generation** [8808-51]
F. R. Ndangali, Amherst College (United States); S. V. Shabanov, Univ. of Florida (United States)

NON-CLASSICAL LIGHT

- 8808 1K **Plasmon amplification by strong coupling in a layered structure** [8808-56]
A. Castani, B. Guizal, M. Antezza, D. Felbacq, Univ. Montpellier 2 (France)

NANOFABRICATION OF ADVANCED PHOTONIC MATERIALS

- 8808 1N **Synthesis of core-shell Y_2O_3 nanoparticles for enhanced luminescence efficiency** [8808-59]
J. H. Choi, J. Y. Hyun, K. H. Kim, J. P. Kim, Korea Photonics Technology Institute (Korea, Republic of)

Author Index

Conference Committee

Symposium Chairs

Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Cochairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Ganapathi S. Subramania, Sandia National Laboratories (United States)
Stavroula Foteinopoulou, University of Exeter (United Kingdom)

Conference Program Committee

Paul V. Braun, University of Illinois at Urbana-Champaign (United States)
Kurt Busch, Humboldt-Universität zu Berlin (Germany)
Allan Chang, Lawrence Livermore National Laboratory (United States)
Shanhui Fan, Stanford University (United States)
Didier Felbacq, Université Montpellier 2 (France)
Stephen H. Foulger, Clemson University (United States)
Rachel Jakubiak, Air Force Research Laboratory (United States)
Alexander V. Kildishev, Purdue University (United States)
Michal F. Lipson, Cornell University (United States)
Cefe López, Consejo Superior de Investigaciones Científicas (Spain)
Masaya Notomi, NTT Basic Research Laboratories (Japan)
Michelle L. Povinelli, The University of Southern California (United States)
Michael J. Sailor, University of California, San Diego (United States)
Jörg Schilling, Martin-Luther-Universität Halle-Wittenberg (Germany)
Andrey A. Sukhorukov, The Australian National University (Australia)
Ralf B. Wehrspohn, Fraunhofer-Institut für Werkstoffmechanik (Germany)
Daniel M. Wasserman, University of Illinois at Urbana-Champaign (United States)
William Whelan-Curtin, University of St. Andrews (United Kingdom)
Pierre Wiltzius, University of Illinois at Urbana-Champaign (United States)

Session Chairs

- 1 Nanophotonic Solar Energy Harvesting I
Shawn-Yu Lin, Rensselaer Polytechnic Institute (United States)
- 2 Nanophotonic Solar Energy Harvesting II
Kai-Ming Ho, Iowa State University (United States)

- 3 Tailoring Light Absorption, Detection, and Extraction I
Owen D. Miller, Massachusetts Institute of Technology (United States)
- 4 Tailoring Light Absorption, Detection, and Extraction II
Rana Biswas, Iowa State University (United States)
- 5 Lasing in the Nanoscale
Philippe Tassin, Chalmers University of Technology (Sweden)
- 6 Spontaneous and Stimulated Emission Control
Marin Soljacic, Massachusetts Institute of Technology (United States)
- 7 Carbon-Based Photonics I
Huili Grace Xing, University of Notre Dame (United States)
- 8 Nanophotonic Sensing and Trapping
Yuri S. Kivshar, The Australian National University (Australia)
- 9 Thermal Emission
Ganapathi S. Subramania, Sandia National Laboratories (United States)
- 10 Carbon-Based Photonics II
Swastik Kar, Northeastern University (United States)
- 11 Exotic EM Fields and Symmetry I
Marin Soljacic, Massachusetts Institute of Technology (United States)
- 12 Exotic EM Fields and Symmetry II
Shanhui Fan, Stanford University (United States)
- 13 Slow-Light Physics and Applications
Benjamin J. Eggleton, The University of Sydney (Australia)
- 14 Novel Non-Linear Photonic Platforms
David J. Norris, ETH Zürich (Switzerland)
- 15 Non-Classical Light
Andrey A. Sukhorukov, The Australian National University (Australia)
- 16 Nanofabrication of Advanced Photonic Materials
Jörg Schilling, Martin-Luther-Universität Halle-Wittenberg (Germany)

Introduction

Advanced structuring in materials enables unprecedented photonic capabilities emanating from a cleverly designed synergy between the material's optical properties and patterned features. Of particular interest in this symposium is how these new capabilities interface with active components or quantum emitters that can take us further to a new class of dynamic electromagnetic phenomena and device platforms applicable in photodetectors, energy, biological/chemical sensing, nanoscale thresholdless lasing, solid state lighting as well as chipscale optical computing. This vast potential for high impact applications has been a continual driving force in active photonic materials research.

The field continues to grow with carbon-based materials bringing new capabilities to tuneable photonic devices; our Active Photonic Materials V conference featured two exciting sessions with the current advances on the topic. Other topics in the many engaging presentations in our sessions encompassed a wide thematic range including extreme absorption management, photodetectors, fabrication of active photonic structures, slow light, photonic Bohm-Aharonov effect, topologically protected states, exotic electromagnetism by symmetry manipulation, spontaneous emission, nanolasing, strong coupling and cavity QED systems, as well as single photons.

Active Photonic Materials V has brought together theorists and experimentalists to exchange state-of-the art results in this rapidly growing area of research. As conference chairs, we would like to express our sincere thanks to all the participants of the 8808 conference who contributed with their presentations, as well as manuscripts to make this conference a successful and stimulating event.

Ganapathi S. Subramania
