SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

MATERIALS FOR SPACE TELESCOPES: JOINT SESSION WITH CONFERENCES 8837 AND 8860

- 8837 02 **The market of huge monolithic mirror substrates for optical astronomy** [8837-1]
T. Döhring, Univ. of Applied Sciences Aschaffenburg (Germany)
- 8837 03 **Large silicon carbide optics for manufacturability** [8837-2]
J. W. Pepi, J. Robichaud, G. Milsap, L-3 Communications IOS-SSG (United States)

METAL MATERIALS

- 8837 04 **Aluminum alloy AA-6061 and RSA-6061 heat treatment for large mirror applications**
[8837-3]
T. Newswander, B. Crowther, Space Dynamics Lab. (United States); G. Gubbels, R. Senden,
RSP Technology (Netherlands)
- 8837 06 **Cost effective aluminum beryllium mirrors for critical optics applications** [8837-5]
C. Say, J. Duich, Inrad Optics (United States); C. Huskamp, R. White, IBC Advanced Alloys
(United States)
- 8837 07 **Isotropic behavior of an anisotropic material: single crystal silicon** [8837-6]
D. R. McCarter, R. A. Paquin, McCarter Machine, Inc. (United States)

TEST AND ANALYSIS OF MATERIALS

- 8837 09 **Optical test results of carbon composite mirrors from MISSE 7A** [8837-8]
R. C. Romeo, R. N. Martin, Composite Mirror Applications, Inc. (United States)
- 8837 0A **Processing of a stacked core mirror for UV applications** [8837-10]
G. W. Matthews, C. S. Kirk, S. P. Maffett, Exelis, Inc. (United States); H. P. Stahl, NASA
Marshall Space Flight Ctr. (United States); C. E. Abplanalp, Exelis, Inc. (United States);
R. Eng, W. R. Arnold Sr., NASA Marshall Space Flight Ctr. (United States)

- 8837 0B **Cryogenic optical performance of a lightweighted mirror assembly for future space astronomical telescopes: correlating optical test results and thermal optical model (Invited Paper)** [8837-11]
 R. Eng, W. R. Arnold Sr., M. A. Baker, NASA Marshall Space Flight Ctr. (United States); R. M. Bevan, NASA Marshall Space Flight Ctr. (United States) and The Univ. of Alabama in Huntsville (United States); G. Burdick, ITT Exelis (United States); M. R. Effinger, D. E. Gaddy, B. K. Goode, NASA Marshall Space Flight Ctr. (United States); C. Hanson, ITT Exelis (United States); W. D. Hogue, J. R. Kegley, NASA Marshall Space Flight Ctr. (United States); C. Kirk, S. P. Maffett, G. W. Matthews, ITT Exelis (United States); R. D. Siler, W. S. Smith, H. P. Stahl, J. M. Tucker, E. R. Wright, NASA Marshall Space Flight Ctr. (United States)

PANEL DISCUSSION: SPACE QUALIFICATION OF MATERIALS

- 8837 0C **ESA initiatives to improve mechanical design and verification methods for ceramic structures (Invited Paper)** [8837-12]
 G. Coe, European Space Research and Technology Ctr. (Netherlands); S. Behar-Lafenetre, L. Cornillon, M. Rancurel, Thales Alenia Space SAS (France); D. Denaux, EADS Astrium SAS (France); D. Ballhause, S. Lucarelli, EADS Astrium GmbH (Germany)
- 8837 0D **Influence of low-earth orbit exposure on the mechanical properties of silicon carbide** [8837-13]
 D. B. Witkin, I. A. Palusinski, The Aerospace Corp. (United States)

CERAMIC MATERIALS I

- 8837 0E **Comparison of SiC mirror approaches** [8837-14]
 K. Carrigan, M. Riso, S. Khatri, C. Douglas, L-3 Communications IOS-SSG (United States)
- 8837 0F **HoneySiC: a new optomechanical material for low-areal cost and density** [8837-15]
 W. A. Goodman, Trex Enterprises Corp. (United States)
- 8837 0G **State-of-the-art silicon carbide optical telescope assembly for the JMAPS mission** [8837-16]
 D. Catropa, F. Azad, L-3 Communications IOS-SSG (United States)
- 8837 0H **Novel reactive chemical mechanical polishing technology for fabrication of SiC mirrors** [8837-17]
 R. K. Singh, A. C. Arjunan, K. Balasundaram, P. Jawali, G. Ling, D. Singh, Sinmat, Inc. (United States); W. Everson, The Pennsylvania State Univ. (United States)
- 8837 0I **Manufacturing and optical testing of 800 mm lightweight all C/SiC optics** [8837-18]
 H. Kaneda, Nagoya Univ. (Japan); M. Naitoh, T. Nakagawa, T. Imai, H. Katayama, M. Suganuma, Y. Tange, R. Sato, K. Enya, M. Kotani, K. Maruyama, Japan Aerospace Exploration Agency (Japan); T. Onaka, The Univ. of Tokyo (Japan); T. Kokusho, Nagoya Univ. (Japan)

- 8837 OJ **Effect of grain size on microstructure, properties, and surface roughness of reaction bonded SiC ceramics** [8837-19]
M. Aghajanian, C. Emmons, M Cubed Technologies, Inc. (United States); S. Rummel, P. Barber, II-VI Inc. (United States); C. Robb, D. Hibbard, LightWorks Optical Systems (United States)

CERAMIC MATERIALS II

- 8837 OK **Cryogenic silicon carbide mirrors for infrared astronomical telescopes: lessons learnt from AKARI for SPICA (Invited Paper)** [8837-20]
T. Onaka, The Univ. of Tokyo (Japan); H. Kaneda, Nagoya Univ. (Japan); M. Kawada, K. Enya, T. Nakagawa, Japan Aerospace Exploration Agency (Japan)
- 8837 OM **Fabrication of SiC aspheric mirrors with low mid-spatial error** [8837-22]
F. Tinker, K. Xin, Aperture Optical Sciences Inc. (United States)
- 8837 ON **Correlation of mid-spatial features to image performance in aspheric mirrors** [8837-23]
F. Tinker, K. Xin, Aperture Optical Sciences Inc. (United States)

COMPOSITE MATERIALS

- 8837 OP **Development of CFRP mirrors for space telescopes** [8837-25]
S. Utsunomiya, T. Kamiya, R. Shimizu, Japan Aerospace Exploration Agency (Japan)
- 8837 OQ **Composite tube and plate manufacturing repeatability as determined by precision measurements of thermal strain** [8837-26]
L. A. Riddle, J. R. Tucker, A. M. Bluth, ATK Space Structures (United States)
- 8837 OR **Prediction and measurement of composite tube twist and bending due to thermal loading** [8837-27]
A. M. Bluth, J. R. Tucker, T. Thompson, ATK Space Structures (United States)

GLASSES AND WINDOWS

- 8837 OS **Development of transparent polycrystalline beta-silicon carbide** [8837-28]
S. S. Bayya, G. R. Villalobos, U.S. Naval Research Lab. (United States); M. P. Hunt, University Research Foundation (United States); J. S. Sanghera, U.S. Naval Research Lab. (United States); B. M. Sadowski, I. D. Aggarwal, Sotera Defense Solutions, Inc. (United States); M. Cinibulk, Air Force Research Lab. (United States); C. Carney, K. Keller, UES, Inc. (United States)
- 8837 OT **Novel rapid polishing process for fabrication of sapphire windows** [8837-29]
R. K. Singh, A. C. Arjunan, K. Balasundaram, Sinmat, Inc. (United States); J. Lee, Univ. of Florida (United States); G. Ling, D. Singh, Sinmat, Inc. (United States)

- 8837 0U **Silicate and direct bonding of low thermal expansion materials** [8837-30]
G. Kalkowski, S. Fabian, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany); C. Rothhardt, Friedrich-Schiller-Univ. Jena (Germany); P. Zeller, Astrium GmbH (Germany); S. Risse, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany)
- 8837 0V **Recent developments in transparent spinel ceramic and composite windows** [8837-31]
S. Bayya, G. Villalobos, W. Kim, J. Sanghera, U.S. Naval Research Lab. (United States); G. Chin, M. Hunt, University Research Foundation (United States); B. Sadowski, F. Miklos, I. Aggarwal, Sotera Defense Solutions, Inc. (United States)
- 8837 0W **Investigation of negative index in dispersive, chiral materials via contra-propagating velocities under second-order dispersion (GVD)** [8837-32]
M. R. Chatterjee, T. Algadey, Univ. of Dayton (United States)

Test and Analysis of Materials

Joseph L. Robichaud, L-3 Communications IOS-SSG (United States)

Panel Discussion: Space Qualification of Materials

Joseph L. Robichaud, L-3 Communications IOS-SSG (United States)

Matthias Krödel, ECM GmbH (Germany)

Ceramic Materials I

William A. Goodman, Trex Enterprises Corporation (United States) and

Optical Materials Solutions LLC (United States)

Ceramic Materials II

Chris Wainer, L-3 Communications IOS-SSG (United States)

Composite Materials

Lynn N. Allen, ITT Exelis (United States)

Glasses and Windows

John Pepi, L-3 Communications IOS-SSG (United States)

Introduction

These proceedings document the 2013 conference on Material Technologies and Applications to Optics, Structures, Components, and Sub-Systems. The conference took place from 26 August to 28 August 2013, as part of the broader Optics + Photonics Meeting in San Diego, California, USA. This was the inaugural conference in this area, expanding upon the scope of the previous conference on Optical Materials and Structures Technologies. The conference began with a Joint Session with the UV/Optical/IR Space Telescopes and Instruments: Innovative Technologies and Concepts conference, we thank those Conference Chairs, Dr. Howard A. MacEwen (Reviresco LLC) and Dr. James B. Breckinridge (Univ. of Arizona and Cal Tech), for collaborating with us and coordinating a well-attended and interesting opening session which covered a wide range of topics including low expansion glasses, SiC, and refractive materials, with an excellent capstone presentation from Dr. H. Philip Stahl, describing mirror technology development activities being led by the NASA Marshall Space Flight Center.

The next two days covered seven additional Sessions. The Metal Materials Session was chaired by Mr. Robert Michel (Materion) and provided updates on aluminum, beryllium-aluminum composites, and single crystal silicon material technologies. A Test and Analysis Session focused on a novel ULE mirror technology from ITT Exelis, and included results from radiation testing of Carbon fiber mirrors which were exposed to low earth orbit radiation on the International Space Station. Mr. Chris Wainer (L-3 Communications) worked as Session Chair for one of two Sessions on Ceramic Materials. These two Sessions covered a broad range of topics including a novel HoneySiC opto-mechanical material, mature reaction bonded SiC and Ceric® materials, applications of ceramics to high profile space programs (AKARI and JMAPS), and polishing and assembly of SiC systems. Mr. Lynn Allen (ITT) chaired a session on Composite Materials which described mature composite structures from ATK and maturing composite mirror technologies being explored by JAXA. The final session was on Glasses and Windows, Mr. John Pepi (L-3 Communications) chaired this session providing updates on novel window materials being developed at NRL, a newly developed bonding approach for low-expansion glasses, and the emerging area of negative index of dispersion materials.

One of the highlights of the conference was a panel discussion on the topic of "Space Qualification of Materials". We were extremely pleased to have experts from around the world provide their different insights during this panel discussion, and the talks which preceded the panel discussion. Mr. Graham Coe (European Space Agency - Research and Technology Center), Dr. Vince M. Cowan (Air Force Research Laboratory), Prof. Takao Nakagawa (Japan Aerospace Exploration Agency), Mr. John W. Pepi (L-3 Communications IOS-Wilmington), and Dr. David B. Witkin (The Aerospace Corporation) engaged the attendees with an

active discussion on this controversial topic. We want to thank the panel participants for allowing us to create this unique opportunity for the community. At its core, this is what the entire Optics + Photonics Meeting is looking to do, create opportunities for an open dialogue on topical subjects, and create a venue where the world's leading subject matter experts can be available for both formal presentations and informal hallway discussions. Thank you to all of the SPIE staff, our Program Committee, contributing authors, and conference attendees. We hope all participants came away from the meeting feeling re-energized about their areas of research and development and re-engaged with their broad community of collaborators, competitors, and customers.

Joseph L. Robichaud
