Proceedings of SPIE 0277-786X, V. 8849

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

X-Ray Lasers and Coherent X-Ray Sources: Development and Applications X, edited by Annie Klisnick,
Carmen S. Menoni, Proc. of SPIE Vol. 8849, 884901 · © 2013 SPIE
CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2048379

Proc. of SPIE Vol. 8849 884901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 X-RAY LASERS I

- 8849 03 **Sub-10-nm Ni-like soft-x-ray lasers** [8849-2]
F. Jia, F. Staub, J. E. Balmer, Univ. of Bern (Switzerland)
- 8849 04 **Development and applications of x-ray lasers at PALS Centre** [8849-3]
M. Kozlova, J. Nejd, Institute of Physics of the ASCR, v.v.i. (Czech Republic); A. Klisnick, A. Le Marec, L. Meng, Univ. Paris-Sud 11 (France); F. Tissandier, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); T. Fok, L. Wegrzynski, A. Bartnik, P. Wachulak, R. Jarocki, H. Fiedorowicz, Military Univ. of Technology (Poland)

SESSION 2 HIGH-ORDER HARMONICS

- 8849 07 **Generation of a beat-wave pulse train for quasi-phase-matched high-harmonic generation** [8849-6]
C.-H. Yang, S.-C. Kao, National Central Univ. (Taiwan); J. Wang, National Central Univ. (Taiwan), Institute of Atomic and Molecular Sciences (Taiwan), and National Taiwan Univ. (Taiwan); H. Chu, National Central Univ. (Taiwan)
- 8849 08 **Transmission imaging of sodium in the vacuum ultra-violet spectral range: new application for an intense VUV source** [8849-7]
H. Daido, Y. Suzuki, T. Kawachi, Japan Atomic Energy Agency (Japan); T. Fukuda, Osaka Univ. (Japan); T. Nakagiri, Japan Atomic Energy Agency (Japan); M. Kaku, S. Kubodera, Univ. of Miyazaki (Japan); A. S. Pirozhkov, Japan Atomic Energy Agency (Japan)

SESSION 3 DIAGNOSTICS AND OPTICS

- 8849 0A **The optical design of the soft x-ray self-seeding at LCLS** [8849-9]
D. Cocco, SLAC National Accelerator Lab. (United States); R. Abela, Paul Scherrer Institut (Switzerland); J. W. Amann, SLAC National Accelerator Lab. (United States); K. Chow, P. J. Emma, Lawrence Berkeley National Lab. (United States); Y. Feng, G. L. Gassner, J. Hastings, P. Heimann, Z. Huang, H. Loos, P. A. Montanez, D. Morton, H.-D. Nuhn, D. F. Ratner, SLAC National Accelerator Lab. (United States); L. N. Rodas, Lawrence Berkeley National Lab. (United States); U. Flechsig, Paul Scherrer Institut (Switzerland); J. J. Welch, J. Wu, SLAC National Accelerator Lab. (United States)
- 8849 0B **Temporal characterization of femtosecond x-ray pulses at free-electron lasers (Invited Paper)** [8849-27]
C. Behrens, Deutsches Elektronen-Synchrotron (Germany) and SLAC National Accelerator Lab. (United States)

8849 0C **Imaging of fine structures of cellular organelles in hydrated biological cells by a soft x-ray microscope combined with a fluorescence microscope** [8849-11]
M. Kado, M. Kishimoto, Japan Atomic Energy Agency (Japan); S. Tamotsu, K. Yasuda, M. Aoyama, Nara Women's Univ. (Japan); K. Shinohara, Japan Atomic Energy Agency (Japan) and Waseda Univ. (Japan)

8849 0D **Corrosion-resistant Mg/SiC multilayer coatings for EUV laser sources in the 25-80nm wavelength region (Invited Paper)** [8849-12]
R. Soufli, M. Fernández-Perea, J. C. Robinson, S. L. Baker, J. Alameda, C. C. Walton, Lawrence Livermore National Lab. (United States); L. Rodríguez-De Marcos, J. A. Méndez, J. I. Larruquert, Consejo Superior de Investigaciones Científicas (Spain); M. Vidal-Dasilva, Consejo Superior de Investigaciones Científicas (Spain) and Lawrence Berkeley National Lab. (United States); E. M. Gullikson, Lawrence Berkeley National Lab. (United States)

SESSION 4 APPLICATIONS I

8849 0E **Observation of the nano-scale surface dynamics of femtosecond laser ablation by time-resolved soft x-ray imaging technique (Invited Paper)** [8849-13]
M. Nishikino, N. Hasegawa, Japan Atomic Energy Agency (Japan); T. Tomita, Univ. of Tokushima (Japan); Y. Minami, R. Takei, M. Baba, The Univ. of Tokyo (Japan); T. Eyama, S. Takayoshi, Univ. of Tokushima (Japan); T. Kawachi, Japan Atomic Energy Agency (Japan); D. Hatomi, N. Ohnishi, Tohoku Univ. (Japan); M. Yamagiwa, Japan Atomic Energy Agency (Japan); T. Suemoto, The Univ. of Tokyo (Japan)

8849 0F **Nano-meter scale modifications on material surfaces induced by soft x-ray laser pulse irradiations** [8849-14]
M. Ishino, Japan Atomic Energy Agency (Japan); A. Faenov, Japan Atomic Energy Agency (Japan) and Joint Institute for High Temperatures (Russian Federation); M. Tanaka, Japan Atomic Energy Agency (Japan); S. Tamotsu, Nara Women's Univ. (Japan); T. Pikuz, Japan Atomic Energy Agency (Japan) and Joint Institute for High Temperatures (Russian Federation); N. Hasegawa, M. Nishikino, Japan Atomic Energy Agency (Japan); N. Inogamov, Landau Institute for Theoretical Physics (Russian Federation); I. Skobelev, V. Fortov, Joint Institute for High Temperatures (Russian Federation); G. Norman, S. Starikov, V. Stegailov, Joint Institute for High Temperatures (Russian Federation) and Moscow Institute of Physics and Technology (Russian Federation); T. Kaihori, T. Kawachi, M. Yamagiwa, Japan Atomic Energy Agency (Japan)

8849 0G **Composition depth profiling by soft x-ray laser-ablation mass spectrometry** [8849-15]
I. Kuznetsov, J. Filevich, M. Woolston, E. R. Bernstein, D. C. Crick, Colorado State Univ. (United States); D. Carlton, W. Chao, E. H. Anderson, Colorado State Univ. (United States) and Lawrence Berkeley National Lab. (United States); J. J. Rocca, C. S. Menoni, Colorado State Univ. (United States)

8849 0H **Prospects of ultrafast x-ray absorption investigations using laboratory based sources** [8849-16]
H. Stiel, Berlin Lab. for Innovative X-ray Technologies (Germany) and Max-Born-Institut für Nichtlineare Optik Kurzzeitspektroskopie (Germany); M. Schnürer, Max-Born-Institut für Nichtlineare Optik Kurzzeitspektroskopie (Germany); H. Legall, W. Malzer, L. Anklamm, C. Schlesiger, Berlin Lab. for Innovative X-ray Technologies (Germany) and Technische Univ. Berlin (Germany); K. A. Janulewicz, M. Iqbal, P. V. Nickles, Gwangju Institute of Science and Technology (Korea, Republic of)

- 8849 0I **Experimental setup for high resolution x-ray spectroscopy of solids and liquid samples** [8849-17]
Z. Yin, Max Planck Institute for Biophysical Chemistry (Germany) and Deutsches Elektronen-Synchrotron (Germany); I. Rajković, D. Raiser, M. Scholz, Max Planck Institute for Biophysical Chemistry (Germany); S. Techert, Max Planck Institute for Biophysical Chemistry (Germany), Deutsches Elektronen-Synchrotron (Germany), and Georg-August-Univ. Göttingen (Germany)

SESSION 5 X-RAY LASERS II

- 8849 0J **Multi-tens of GW peak power plasma-based soft x-ray laser (Invited Paper)** [8849-18]
E. Oliva, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); M. Fajardo, Instituto Superior Técnico (Portugal); L. Li, T. T. T. Le, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); D. Ros, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); S. Sebban, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); P. Velarde, Univ. Politécnica de Madrid (Spain); P. Zeitoun, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France)
- 8849 0L **Modeling and numerical simulations of seeded XUV lasers with the COLAX code: recent progress** [8849-20]
A. Klisnick, L. Meng, A. Le Marec, Institut des Sciences Moléculaires d'Orsay, CNRS, Univ. Paris-Sud 11 (France); O. Larroche, Commissariat à l'Énergie Atomique (France)
- 8849 0M **Wavefront of seeded soft x-ray laser based on a solid-target plasma amplifier** [8849-21]
L. Li, Lanzhou Univ. (China) and Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); Y. Wang, S. Wang, Colorado State Univ. (United States); E. Oliva, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); L. Yin, Colorado State Univ. (United States); T. T. T. Le, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); S. Daboussi, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); D. Ros, G. Maynard, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); S. Sebban, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); B. Hu, Lanzhou Univ. (China); J. J. Rocca, Colorado State Univ. (United States); P. Zeitoun, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France)
- 8849 0N **High-average-power 100-Hz repetition rate table-top soft x-ray lasers (Invited Paper)** [8849-22]
J. J. Rocca, B. A. Reagan, K. Wernsing, Y. Wang, L. Yin, S. Wang, M. Berrill, M. R. Woolston, A. H. Curtis, F. J. A. Furch, V. N. Shlyaptsev, B. M. Luther, D. Patel, M. C. Marconi, C. S. Menoni, Colorado State Univ. (United States)

SESSION 6 X-RAY FREE-ELECTRON LASERS

- 8849 0O **Status and achievements at FERMI@Elettra: the first double cascade seeded EUV-SXR FEL facility open to users (Invited Paper)** [8849-23]
C. Svetina, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and Univ. of Trieste (Italy); N. Mahne, L. Raimondi, L. Rumiz, Elettra-Sincrotrone Trieste S.C.p.A. (Italy); M. Zangrando, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and Istituto per l'Officina dei Materiali, CNR (Italy); E. Allaria, F. Bencivenga, C. Callegari, F. Capotondi, D. Castronovo, P. Cinquegrana,

Elettra-Sincrotrone Trieste S.C.p.A. (Italy); P. Craievich, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and Paul Scherrer Institute (Switzerland); I. Cudin, M. Dal Forno, M. B. Danailov, G. D'Auria, R. De Monte, Elettra-Sincrotrone Trieste S.C.p.A. (Italy); G. De Ninno, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and Nova Gorica Univ. (Slovenia); A. Demidovich, S. Di Mitri, B. Diviacco, A. Fabris, R. Fabris, W. M. Fawley, M. Ferianis, E. Ferrari, L. Froehlich, P. Furlan Radivo, G. Gaio, Elettra-Sincrotrone Trieste S.C.p.A. (Italy); L. Giannessi, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and ENEA C.R. Frascati (Italy); M. Kiskinova, M. Lonza, Elettra-Sincrotrone Trieste S.C.p.A. (Italy); B. Mahieu, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and CEA/DSM/DRECAM/SPAM (France); C. Masciovecchio, I. P. Nikolov, Elettra-Sincrotrone Trieste S.C.p.A. (Italy); F. Parmigiani, Elettra-Sincrotrone Trieste S.C.p.A. (Italy) and Univ. of Trieste (Italy); E. Pedersoli, G. Penzo, M. Predonzani, E. Principi, F. Rossi, C. Scafuri, C. Serpico, P. Sigalotti, S. Spampinati, C. Spezzani, M. Svandrlik, M. Trovo, A. Vascotto, M. Veronese, R. Visintini, D. Zangrando, Elettra-Sincrotrone Trieste S.C.p.A. (Italy)

8849 OQ **LCLS mirror switching of x-ray beam** [8849-25]

J. Yin, D. Zhang, B. Arnold, B. Nagler, H. Lee, E. Galtier, P. Heimann, SLAC National Accelerator Lab. (United States)

8849 OR **Scanning coherent x-ray microscopy as a tool for XFEL nanobeam characterization** [8849-26]

A. Schropp, Technische Univ. Dresden (Germany) and SLAC National Accelerator Lab. (United States); R. Hoppe, J. Patommel, F. Seiboth, Technische Univ. Dresden (Germany); F. Uhlén, U. Vogt, KTH Royal Institute of Technology (Sweden); H. J. Lee, B. Nagler, E. C. Galtier, U. Zastrau, B. Arnold, P. Heimann, J. B. Hastings, SLAC National Accelerator Lab. (United States); C. G. Schroer, Technische Univ. Dresden (Germany)

SESSION 7 NOVEL X-RAY SOURCES AND APPLICATIONS

8849 OT **Development of x-ray sources using PW laser systems at APRI GIST (Invited Paper)** [8849-28]

H. T. Kim, K. H. Lee, H. Yun, I. J. Kim, C. M. Kim, K. H. Pae, J. H. Sung, S. K. Lee, T. J. Yu, Gwangju Institute of Science and Technology (Korea, Republic of); S. Sebban, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France) and Institute of Physics of the ASCR, v.v.i. (Czech Republic); F. Tissandier, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); J. Gautier, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France) and Institute of Physics of the ASCR, v.v.i. (Czech Republic); A. Depresseux, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); J. Nejd, M. Kozlová, Institute of Physics of the ASCR, v.v.i. (Czech Republic); T. M. Jeong, C. H. Nam, Gwangju Institute of Science and Technology (Korea, Republic of)

SESSION 8 APPLICATIONS II

8849 OW **Coherent nanopatterning with table-top soft x-ray lasers (Invited Paper)** [8849-32]

W. Li, V. Martinez Esquiroz, D. Patel, L. Urbanski, C. S. Menoni, J. J. Rocca, Colorado State Univ. (United States); A. Stein, Brookhaven National Lab. (United States); W. Chao, E. Anderson, Lawrence Berkeley National Lab. (United States); M. C. Marconi, Colorado State Univ. (United States)

- 8849 OX **Analysis of spatial resolution and coherence demands in soft x-ray image-plane holographic microscopy with two zone plates** [8849-33]
J. Nejd, Colorado State Univ. (United States) and Institute of Physics of the ASCR, v.v.i. (Czech Republic); I. D. Howlett, Colorado State Univ. (United States); D. Carlton, E. H. Anderson, W. Chao, Colorado State Univ. (United States) and Lawrence Berkeley National Lab. (United States); M. C. Marconi, J. J. Rocca, C. S. Menoni, Colorado State Univ. (United States)
- 8849 OY **Tabletop coherent diffraction imaging with a discharge plasma EUV source** [8849-34]
L. Juschk, RWTH Aachen (Germany), Jülich Aachen Research Alliance (Germany), and Forschungszentrum Jülich GmbH (Germany); L. Loetgering, RWTH Aachen (Germany) and Jülich Aachen Research Alliance (Germany); D. Rudolf, Forschungszentrum Jülich GmbH (Germany) and Jülich Aachen Research Alliance (Germany); R. Xu, Univ. of California, Los Angeles (United States); S. Brose, S. Danylyuk, RWTH Aachen (Germany) and Jülich Aachen Research Alliance (Germany); J. Miao, Univ. of California, Los Angeles (United States)
- 8849 10 **Multiple pulses EUV laser pumping: ASE, seeded operations, and applications (Invited Paper)** [8849-36]
D. Ros, S. Kazamias, Univ. Paris-Sud 11 (France) and Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); K. Cassou, Univ. Paris-Sud 11 (France) and Lab. de l'Accélérateur Linéaire, CNRS, Univ. Paris-Sud 11 (France); M. Pittman, O. Guilbaud, Univ. Paris-Sud 11 (France) and Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); S. Daboussi, Univ. Paris-Sud 11 (France), Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France), and Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France); O. Delmas, Univ. Paris-Sud 11 (France) and Amplitude Technologies (France); J. Demailly, O. Neveu, A. Mestrallain, D. Sall, Lab. de Physique des Gaz et des Plasmas, CNRS, Univ. Paris-Sud 11 (France); L. Li, P. Zeitoun, Lab. d'Optique Appliquée, CNRS, École Polytechnique ParisTech (France)

SESSION 9 X-RAY LASERS III

- 8849 11 **Probing of laser-irradiated solid targets using extreme ultraviolet radiation** [8849-37]
G. J. Tallents, M. Shahzad, A. K. Rossall, The Univ. of York (United Kingdom); O. Guilbaud, S. Kazamias, M. Pittman, K. Cassou, J. Demailly, O. Delmas, A. Mestrallain, Univ. Paris-Sud 11 (France); V. Aslanyan, O. Culfa, The Univ. of York (United Kingdom); L. A. Wilson, The Univ. of York (United Kingdom) and Rutherford Appleton Lab. (United Kingdom); M. Farjardo, Instituto Superior Técnico (Portugal); D. Ros, Univ. Paris-Sud 11 (France)
- 8849 12 **High energy density plasmas produced by x-ray and extreme ultraviolet lasers** [8849-38]
A. K. Rossall, V. Aslanyan, G. J. Tallents, The Univ. of York (United Kingdom)

SESSION 10 APPLICATIONS III

- 8849 14 **Development of coherent EUV scatterometry microscope with high-order harmonic for EUV mask inspection (Invited Paper)** [8849-40]
Y. Nagata, RIKEN (Japan), Univ. of Hyogo (Japan), and JST CREST (Japan); T. Harada, M. Nakasuji, Univ. of Hyogo (Japan) and JST CREST (Japan); H. Kinoshita, RIKEN (Japan), Univ. of Hyogo (Japan), and JST CREST (Japan); K. Midorikawa, RIKEN (Japan)

- 8849 15 **X-ray Thomson scattering for partially ionized plasmas including the effect of bound levels** [8849-41]
J. Nilsen, Lawrence Livermore National Lab. (United States); W. R. Johnson, Univ. of Notre Dame (United States); K. T. Cheng, Lawrence Livermore National Lab. (United States)

POSTER SESSION

- 8849 17 **Beam characteristics of CAPEX XUV argon laser** [8849-43]
J. Schmidt, K. Kolacek, O. Frolov, V. Prukner, J. Straus, Institute of Physics of the ASCR, v.v.i. (Czech Republic); J. Kaufman, Czech Technical Univ. in Prague (Czech Republic)
- 8849 18 **Molecular dynamics simulation of cluster formation in femtosecond laser ablation** [8849-44]
D. Hatomi, N. Ohnishi, Tohoku Univ. (Japan); M. Nishikino, Japan Atomic Energy Agency (Japan)

- 8 Applications II
Gregory J. Tallents, The University of York (United Kingdom)
- 9 X-Ray Lasers III
Jorge J. Rocca, Colorado State University (United States)
- 10 Applications III
Carmen S. Menoni, Colorado State University (United States)

Introduction

The X-ray Lasers and Coherent X-ray Sources: Development and Applications X conference held 27–29 August 2013 in San Diego, California, provided a premier forum for the presentation and discussion of the most recent developments in the generation of intense x-rays from plasma-based x-ray lasers, fourth generation accelerator-based sources, and high-order harmonic (HOH) generation. The unique and complimentary characteristics of these sources in combination with novel optics are making possible applications and fundamental studies ranging from nano-imaging and patterning to the study of laser/materials interactions to novel spectroscopies.

Work presented at the conference in plasma based x-ray lasers showed these table-top sources have achieved high average power, a fraction of a milliwatt at sub-20-nm wavelength, and laser emission down to 7.3 nm with substantially lower pump energies. Seeding of x-ray laser amplifiers with HOH is paving the way to realize a peak brightness that approaches that of free electron lasers with fully phase-coherent x-ray laser pulses. New modeling results show that sub-100 femtosecond pulses with tens of microjoule energies would be possible to achieve from seeded solid x-ray amplifiers. Different new approaches for HOH source development were reported. The generation of keV HOH was demonstrated using mid-infrared pump lasers in high pressure gas capillaries and at relativistic laser intensities into a gas jet respectively. Already established TW laser facilities and new ones in construction will provide critical infrastructure to advance plasma based x-ray lasers and HOH. Work on free electron laser (FEL) sources reported fully coherent x-ray emission in the 20-100 eV range at Fermi@Elettra FEL, with the first implementation of a double-cascade seeding technique. Works on FELs operating in the keV range focused on the characterization of the laser pulse duration and on the future implementation of a self-seeding technique to achieve full temporal coherence.

X-ray optics and x-ray laser applications were discussed in several sessions. Important advances have been achieved in the mitigation of laser-induced-corrosion of multilayer optics for the 20-60 eV range. Key applications of mature x-ray plasma based sources in microscopy, nanopatterning, and spectroscopy have been demonstrated. In the technologically relevant 13.5-nm wavelength range, a HOH scatterometer microscope capable to identify 20-nm defects on extreme ultraviolet lithography masks was demonstrated, complementing synchrotron and plasma x-ray lasers defect inspection microscopes. X-ray sources also enabled the investigation of femtosecond laser ablation by time resolved reflectivity and the implementation of novel absorption, mass, and nuclear spectroscopies. The interaction of intense x-ray pulses with gas phase molecules and solids was covered in several papers describing modeling and experiments.

We gratefully acknowledge the continued support of SPIE for the field of x-ray lasers. We thank SPIE for the outstanding organization of the conference at all stages as well as the considerable efforts of the staff towards the publication of the proceedings volume. We would like to thank the program committee for their support and guidance and to the session chairs for their help in the running of the conference. Finally we thank the many participants for their high quality scientific contributions to the 2013 meeting.
