Event: SPIE Optical Engineering + Applications, 2013, San Diego, California, United States

PROCEEDINGS OF SPIE

Lidar Remote Sensing for Environmental Monitoring XIV

Upendra N. Singh
Editor

25–26 August 2013
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 8872

Proceedings of SPIE 0277-786X, V. 8872

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Lidar Remote Sensing for Environmental Monitoring XIV, edited by Upendra N. Singh, Proc. of SPIE
Vol. 8872, 887201 · © 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2044292

Proc. of SPIE Vol. 8872 887201-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Lidar Remote Sensing for Environmental Monitoring XIV*, edited by Upendra N. Singh, Proceedings of SPIE Vol. 8872 (SPIE, Bellingham, WA, 2013) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii Conference Committee

APPROACHES TO TECHNOLOGY READINESS LEVEL FOR EARTH SCIENCE

- 8872 03 **Approach to space-qualification of the ICESat-2 laser transmitter (Invited Paper)** [8872-2]
F. Hovis, N. Sawruk, Fibertek, Inc. (United States); M. Stephen, NASA Goddard Space Flight Ctr. (United States); J. Edelman, S. Litvinovitch, R. Edwards, J. Rudd, J. Bautch, E. Fakhoury, Fibertek, Inc. (United States)
- 8872 04 **Space certification and qualification programs for laser diode modules on the NASA ICESat-2 Mission** [8872-3]
N. W. Sawruk, Fibertek, Inc. (United States); M. A. Stephen, NASA Goddard Space Flight Ctr. (United States); K. Bruce, nLIGHT Corp. (United States); T. F. Eltringham, F. R. Nash, A. B. Piccirilli, W. J. Slusark, LGS Innovations, LLC (United States); F. E. Hovis, Fibertek, Inc. (United States)
- 8872 05 **Development of a TRL-5 conductively-cooled 2-micron laser transmitter for coherent doppler wind lidar system** [8872-4]
T. Shuman, F. E. Hovis, Fibertek, Inc. (United States); U. N. Singh, M. Petros, J. Yu, M. J. Kavaya, NASA Langley Research Ctr. (United States)

TECHNOLOGY DEVELOPMENT WIND AND ATMOSPHERIC COMPOSITION I

- 8872 06 **2- μ m coherent lidar for CO₂ and wind measurements (Invited Paper)** [8872-5]
S. Ishii, H. Iwai, K. Mizutani, P. Baron, T. Itabe, National Institute of Information and Communications Technology (Japan); H. Fukuoka, Hamamatsu Photonics K.K. (Japan); T. Ishikawa, Nippon Aleph Co. (Japan); A. Sato, National Institute of Information and Communications Technology (Japan) and Tohoku Institute of Technology (Japan); K. Asai, Tohoku Institute of Technology (Japan)
- 8872 07 **Lab demonstration of the hybrid Doppler wind lidar (HDWL) transceiver** [8872-6]
C. T. Marx, B. Gentry, P. Jordan, NASA Goddard Space Flight Ctr. (United States); P. Dogoda, Sigma Space Corp. (United States) and NASA Goddard Space Flight Ctr. (United States); E. Faust, SGT, Inc. (United States) and NASA Goddard Space Flight Ctr. (United States); M. Kavaya, NASA Langley Research Ctr. (United States)
- 8872 08 **Two-component wind fields from scanning aerosol lidar and motion estimation algorithms** [8872-7]
S. D. Mayor, P. Drian, C. F. Mauzey, M. Hamada, California State Univ., Chico (United States)

TECHNOLOGY DEVELOPMENT WIND AND ATMOSPHERIC COMPOSITION II

- 8872 09 **Development of a pulsed 2-micron integrated path differential absorption lidar for CO₂ measurement (Invited Paper)** [8872-8]
U. N. Singh, J. Yu, M. Petros, NASA Langley Research Ctr. (United States); T. F. Refaat, Old Dominion Univ. (United States); K. Reithmaier, Science Systems and Applications, Inc. (United States)
- 8872 0A **Efficient 1.6 micron laser source for methane DIAL** [8872-9]
T. Shuman, R. Burnham, Fibertek, Inc. (United States); A. R. Nehrir, S. Ismail, J. W. Hair, NASA Langley Research Ctr. (United States); T. Refaat, Old Dominion Univ. (United States)

BACKSCATTER LIDAR TECHNOLOGY DEVELOPMENT

- 8872 0B **Recent improvements to the Raman-shifted eye-safe aerosol lidar (REAL) (Invited Paper)** [8872-10]
S. D. Mayor, A. Petrova-Mayor, California State Univ., Chico (United States); B. Morley, S. Spuler, National Ctr. for Atmospheric Research (United States)
- 8872 0E **Some new lidar equations for laser pulses scattered back from optically thick media such as clouds, dense aerosol plumes, sea ice, snow, and turbid coastal water** [8872-13]
A. B. Davis, Jet Propulsion Lab. (United States)
- 8872 0F **Profiling the optical parameters of the atmosphere with lidar: measurement or a simulation based on past observations?** [8872-14]
V. Kovalev, C. Wold, A. Petkov, W. M. Hao, U.S. Forest Service (United States)

NOVEL REMOTE SENSING TECHNOLOGIES AND TECHNIQUES

- 8872 0I **Development of an underwater fiber-optic lidar for the characterization of sea water and ice properties (Invited Paper)** [8872-17]
G. Roy, P. Mathieu, Defence Research and Development Canada, Valcartier (Canada); X. Cao, Consultant (Canada); A. Cinq-Mars, S. Roy, G. Fournier, Defence Research and Development Canada, Valcartier (Canada); C. Marec, G. Bécu, Univ. Laval (Canada)
- 8872 0K **Enhancements to INO's broadband SWIR/MWIR spectroscopic lidar** [8872-20]
S. Lambert-Girard, INO (Canada) and Univ. Laval (Canada); F. Babin, M. Allard, INO (Canada); M. Piché, Univ. Laval (Canada)
- 8872 0L **Development of a field-widened Michelson spectroscopic filter for a polarized near-infrared high spectral resolution lidar** [8872-21]
D. Liu, Y. Yang, Z. Cheng, T. Ling, H. Huang, Y. Zhou, Q. Zhang, B. Zhang, Y. Shen, Zhejiang Univ. (China)

POSTER SESSION

- 8872 0N **Analysis of the characters of chromophoric dissolved organic matter in water using laser induced fluorescence and spectral fluorescence signature** [8872-22]
P. Chen, Wuhan Univ. (China); Z. Mao, H. Huang, The Second Institute of Oceanography, SOA (China)
- 8872 0P **Design of a field-widened Michelson interferometer for a near-infrared high spectral resolution lidar** [8872-24]
H. Huang, D. Liu, Y. Yang, Z. Cheng, S. Wang, T. Ling, Y. Shen, Zhejiang Univ. (China)
- 8872 0Q **A spectroscopic transmittance analytical modeling for field-widened Michelson interferometer employed by high spectral resolution lidars** [8872-25]
Z. Cheng, D. Liu, Y. Yang, H. Huang, S. Wang, T. Ling, Y. Shen, Zhejiang Univ. (China)
- 8872 0R **Photon counting detector for satellite laser ranging with sub-picosecond timing stability** [8872-26]
J. Blazej, I. Prochazka, Czech Technical Univ. in Prague (Czech Republic); J. Kodet, Czech Technical Univ. in Prague (Czech Republic) and Technical Univ. Munich (Germany)
- 8872 0S **ICESat-2 laser technology development** [8872-27]
R. Edwards, N. W. Sawruk, F. E. Hovis, P. Burns, T. Wysocki, J. Rudd, B. Walters, E. Fakhoury, V. Prisciandaro, Fibertek, Inc. (United States)

Author Index

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chair

Upendra N. Singh, NASA Langley Research Center (United States)

Conference Program Committee

Floyd E. Hovis, Fibertek, Inc. (United States)

Yongxiang Hu, NASA Langley Research Center (United States)

George J. Komar, NASA Goddard Space Flight Center (United States)

Kohei Mizutani, National Institute of Information and Communications
Technology (Japan)

Jirong Yu, NASA Langley Research Center (United States)

Session Chairs

- 1 Keynote Session
Upendra N. Singh, NASA Langley Research Center (United States)
- 2 Approaches to Technology Readiness Level for Earth Science
George J. Komar, NASA Goddard Space Flight Center (United States)
Upendra N. Singh, NASA Langley Research Center (United States)
- 3 Technology Development Wind and Atmospheric Composition I
Floyd E. Hovis, Fibertek, Inc. (United States)
Upendra N. Singh, NASA Langley Research Center (United States)
- 4 Technology Development Wind and Atmospheric Composition II
Floyd E. Hovis, Fibertek, Inc. (United States)
Upendra N. Singh, NASA Langley Research Center (United States)
- 5 Backscatter Lidar Technology Development
Upendra N. Singh, NASA Langley Research Center (United States)
Floyd E. Hovis, Fibertek, Inc. (United States)
- 6 Novel Remote Sensing Technologies and Techniques
Shane D. Mayor, California State University, Chico (United States)
George J. Komar, NASA Goddard Space Flight Center (United States)
