, "Front Matter: Volume 8894," Proc. SPIE 8894, Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing IX, 889401 (5 November 2013); doi: 10.1117/12.2050698

SPIE.

Event: SPIE Remote Sensing, 2013, Dresden, Germany

PROCEEDINGS OF SPIE

Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing IX

Upendra N. Singh
Gelsomina Pappalardo
Editors

23–24 September 2013
Dresden, Germany

Sponsored by
SPIE

Cooperating Organisations
European Association of Remote Sensing Companies (Belgium)
Remote Sensing and Photogrammetry Society (United Kingdom)
Deutsche Gesellschaft für Photogrammetrie, Fernerkundung und Geoinformation e.V.
(Germany)
European Optical Society

SPIE

Volume 8894

Proceedings of SPIE 0277-786X, V. 8894

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Lidar Technologies, Techniques, and Measurements for Atmospheric Remote Sensing IX, edited
by Upendra N. Singh, Gelsomina Pappalardo, Proc. of SPIE Vol. 8894, 889401
© 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2050698

Proc. of SPIE Vol. 8894 889401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii Conference Committee

SESSION 1 DOPPLER LIDAR FOR WIND MEASUREMENTS

- 8894 02 **Fiber optic CW doppler lidar using a synthetic broadband source (Invited Paper)** [8894-1]
E. Brinkmeyer, T. Waterholter, Technische Univ. Hamburg-Harburg (Germany)
- 8894 04 **Wind measurement via direct detection lidar** [8894-3]
I. Afek, N. Sela, N. Narkiss, G. Shamai, S. Tsadka, Pentalum Technologies (Israel)

SESSION 2 LIDAR METHODS AND MEASUREMENTS OF GREENHOUSE GASES

- 8894 06 **A direct detection 1.6 μ m DIAL with three wavelengths for high accuracy measurements of vertical CO₂ concentration and temperature profiles** [8894-5]
Y. Shibata, C. Nagasawa, M. Abo, Tokyo Metropolitan Univ. (Japan)
- 8894 07 **Lidar sounding of volcanic plumes** [8894-6]
L. Fiorani, ENEA (Italy); A. Aiuppa, Univ. degli Studi di Palermo (Italy); F. Angelini, R. Borelli, M. Del Franco, D. Murra, M. Pistilli, A. Puiu, ENEA (Italy); S. Santoro, Univ. degli Studi di Palermo (Italy)
- 8894 09 **Investigating the effect of aerosol droplets in a volcanic plume for increasing sensitivity of a CO₂ DIAL measurement** [8894-8]
M. Queier, M. Burton, Istituto Nazionale di Geofisica e Vulcanologia (Italy); L. Fiorani, ENEA (Italy); W. R. Saleh, ENEA (Italy) and Univ. of Baghdad (Iraq)
- 8894 0A **Dual-wavelength resonant pumping of compact Er:YAG lasers providing high power output at 1645.55 nm for methane detection** [8894-9]
H. Fritsche, O. Lux, C. Schuett, Technische Univ. Berlin (Germany); S. Heinemann, W. Gries, DirectPhotonics Industries GmbH (Germany); H. J. Eichler, Technische Univ. Berlin (Germany)

SESSION 3 NOVEL LIDAR SYSTEMS FOR AIR AND SPACEBORNE MEASUREMENTS

- 8894 0B **Overview of Japan's spaceborne vegetation lidar mission (Invited Paper)** [8894-10]
J. Murooka, T. Kobayashi, T. Imai, K. Suzuki, D. Sakaizawa, S. Yamakawa, R. Sato, Japan Aerospace Exploration Agency (Japan); H. Sawada, The Univ. of Tokyo (Japan); K. Asai, Tohoku Institute of Technology (Japan)

- 8894 0C **Waveform simulator and analytical procedure for JAXA's future spaceborne lidar to measure canopy height** [8894-11]
T. Kobayashi, Japan Aerospace Exploration Agency (Japan); T. Endo, Remote Sensing Technology Ctr. of Japan (Japan); Y. Sawada, The Univ. of Tokyo (Japan); S. Endo, Tokyo Univ. of Science (Japan); M. Hayashi, National Institute for Environmental Studies (Japan); Y. Satoh, Y. Chishiki, S. Yamakawa, Japan Aerospace Exploration Agency (Japan)
- 8894 0D **Design and development of a compact lidar/DIAL system for aerial surveillance of urban areas** [8894-12]
P. Gaudio, M. Gelfusa, A. Malizia, M. Richetta, A. Antonucci, Univ. degli Studi di Roma Tor Vergata (Italy); P. Ventura, Ctr. Tecnico Logistico Interforze NBC (Italy); A. Murari, Consorzio RFX—Associazione EURATOM-ENEA (Italy); J. Vega, Asociación EURATOM/CIEMAT para Fusión (Spain)
- 8894 0E **Development and testing of a high-power Q-switched DPSS laser for lidar applications: ESA QOMA project case** [8894-13]
G. Avdikos, Raymetrics S.A. (Greece); C. Evangelatos, National Technical Univ. of Athens (Greece); D. Papadopoulos, Univ. of Ioannina (Greece); G. Tsaknakis, P. Bakopoulos, A. Papayannis, National Technical Univ. of Athens (Greece); G. Tzeremes, European Space Agency (Netherlands)

SESSION 4 ATMOSPHERIC AEROSOLS, CLOUDS, AND TEMPERATURE MEASUREMENTS

- 8894 0H **Lidar measurements of atmospheric temperature profiles (2–15 km) by utilizing Rayleigh-Brillouin scattering** [8894-16]
B. Witschas, C. Lemmerz, O. Reitebuch, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)
- 8894 0I **Polly^{NET}: a network of multiwavelength polarization Raman lidars (Invited Paper)** [8894-17]
D. Althausen, R. Engelmann, H. Baars, B. Heese, T. Kanitz, Leibniz Institut für Troposphärenforschung (Germany); M. Komppula, E. Giannakaki, A. Pfüller, Finnish Meteorological Institute (Finland); A. M. Silva, J. Preißler, F. Wagner, J. L. Rascado, S. Pereira, Univ. de Évora (Portugal); J.-H. Lim, J. Y. Ahn, National Institute of Environmental Research (Korea, Republic of); M. Tesche, Stockholm Univ. (Sweden); I. S. Stachlewska, Univ. of Warsaw (Poland)
- 8894 0J **Monitoring and characterization of atmospheric aerosols with Raman and dual-polarization lidars** [8894-18]
P. Royer, L. Sauvage, A. Bizard, L. Thobois, Leosphere (France)
- 8894 0K **Assessment of long scale plume transport to the US East coast using coordinated CREST lidar network and synergistic AERONET and satellite measurements (Invited Paper)** [8894-19]
F. Moshary, L. Cordero, Y. Wu, B. Gross, The City College of New York (United States) and NOAA-CREST (United States); D. Orozco, P. Sawamura, R. M. Hoff, R. Delgado, Univ. of Maryland, Baltimore County (United States); J. Su, K. Leavor, R. B. Lee III, M. P. McCormick, Hampton Univ. (United States)

- 8894 OL **A versatile instrument with an optical parametric oscillator transmitter tunable from 1.5 to 3.1 μm for aerosol lidar and DIAL** [8894-20]
I. Robinson, J. W. Jack, The Univ. of Edinburgh (United Kingdom); C. F. Rae, Univ. of St. Andrews (United Kingdom); J. Moncrieff, The Univ. of Edinburgh (United Kingdom)

POSTER SESSION

- 8894 OO **Multi-wave finely tuned laser source for simultaneous probing the atmosphere constituents and/or chemicals** [8894-23]
S. M. Bashchenko, L. S. Marchenko, Institute of Physics (Ukraine); O. S. Bashchenko, National Taras Shevchenko Univ. of Kyiv (Ukraine)
- 8894 OP **Stand-off mapping of the soot extinction coefficient in a refinery flare using a 3-wavelength elastic backscatter lidar** [8894-24]
R. F. da Costa, R. Bourayou, E. Landulfo, Instituto de Pesquisas Energéticas e Nucleares (Brazil); R. Guardani, Escola Politécnica da Univ. de São Paulo (Brazil); I. Veselovskii, A. M. Prokhorov General Physics Institute (Russian Federation); J. Steffens, URI Erechim (Brazil)
- 8894 OS **Mid-IR DIAL for high-resolution mapping of explosive precursors** [8894-27]
V. Mitev, Ctr. Suisse d'Electronique et de Microtechnique SA (Switzerland); S. Babichenko, Laser Diagnostic Instruments AS (Estonia); J. Bennes, Ctr. Suisse d'Electronique et de Microtechnique SA (Switzerland); R. Borelli, ENEA (Italy); A. Dolfi-Bouteyre, ONERA (France); L. Fiorani, ENEA (Italy); L. Hespel, T. Huet, ONERA (France); A. Palucci, M. Pistilli, A. Puiu, ENEA (Italy); O. Rebane, Laser Diagnostic Instruments AS (Estonia); I. Sobolev, Tallinn Univ. of Technology (Estonia)
- 8894 OT **Automatic methods to detect the top of atmospheric boundary layer** [8894-28]
G. A. Moreira, R. Bourayou, F. J. da Silva Lopes, Instituto de Pesquisas Energéticas e Nucleares (Brazil); T. A. Albuquerque, N. C. Reis Jr., Univ. Federal do Espírito Santo (Brazil); G. Held, Univ. Estadual de São Paulo (Brazil); E. Landulfo, Instituto de Pesquisas Energéticas e Nucleares (Brazil)
- 8894 OW **Ceilometer, sun photometer and ozonometer measurements of the aerosol optical depth, angstrom coefficients, water vapor and total ozone content over Sofia (Bulgaria)** [8894-32]
N. Kolev, T. Evgenieva, Institute of Electronics (Bulgaria); N. Miloshev, P. Muhtarov, National Institute of Geophysics, Geodesy and Geography (Bulgaria); D. Petkov, Space Research and Technology Institute (Bulgaria); E. Donev, D. Ivanov, Sofia Univ. "St. Kliment Ohridski" (Bulgaria); I. Kolev, Institute of Electronics (Bulgaria)
- 8894 OX **Studying Taklamakan aerosol properties with lidar (STAPL)** [8894-33]
P. Cottle, The Univ. of British Columbia (Canada); D. Mueller, Univ. of Hertfordshire (United Kingdom) and Science Systems and Applications Inc. (United States); D.-H. Shin, Gwangju Institute of Science and Technology (Korea, Republic of); X. X. Zhang, G. Feng, Xinjiang Institute of Ecology and Geography (China); I. McKendry, The Univ. of British Columbia (Canada); K. Strawbridge, Environment Canada (Canada)

8894 OY **Vertically resolved optical and microphysical properties of Portuguese forest fire smoke observed in February 2012** [8894-34]

J. Preißler, Univ. de Évora (Portugal) and Univ. of Ireland Galway (Ireland); S. Pereira, A. M. Silva, Univ. de Évora (Portugal); F. Wagner, Univ. de Évora (Portugal) and Hohenpeißenberg Meteorological Observatory (Germany)

Author Index

Conference Committee

Symposium Chair

Charles R. Bostater Jr., Florida Institute of Technology (United States)

Symposium CoChair

Ulrich Michel, Pädagogische Hochschule Heidelberg (Germany)

Conference Chairs

Upendra N. Singh, NASA Langley Research Center (United States)

Gelsomina Pappalardo, Istituto di Metodologie per l'Analisi Ambientale (Italy)

Conference Programme Committee

Arnoud Apituley, Rijksinstituut voor Volksgezondheid en Milieu (Netherlands)

Errico Armandillo, European Space Research and Technology Center (Netherlands)

Andreas Behrendt, Universität Hohenheim (Germany)

Gerhard Ehret, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)

Barry M. Gross, The City College of New York (United States)

Animesh Jha, University of Leeds (United Kingdom)

Philippe L. Keckhut, LATMOS (France)

George J. Komar, NASA Goddard Space Flight Center (United States)

Eduardo Landulfo, Instituto de Pesquisas Energéticas e Nucleares (Brazil)

Kohei Mizutani, National Institute of Information and Communications Technology (Japan)

Doina Nicoleta Nicolae, National Institute of Research and Development for Optoelectronics (Romania)

Alexandros D. Papayannis, National Technical University of Athens (Greece)

Vincenzo Rizi, Università degli Studi dell'Aquila (Italy)

Laurent Sauvage, Leosphere France (France)

Ulla Wandinger, Leibniz Institut für Troposphärenforschung (Germany)

Jirong Yu, NASA Langley Research Center (United States)

Session Chairs

- 1 Doppler Lidar for Wind Measurements
Adolfo Comerón, Universitat Politècnica de Catalunya (Spain)
- 2 Lidar Methods and Measurements of Greenhouse Gases
Adolfo Comerón, Universitat Politècnica de Catalunya (Spain)

- 3 Novel Lidar Systems for Air and Spaceborne Measurements
Shahid Habib, NASA Goddard Space Flight Center (United States)
- 4 Atmospheric Aerosols, Clouds, and Temperature Measurements
Shahid Habib, NASA Goddard Space Flight Center (United States)
