Proceedings of SPIE 0277-786X, V. 8904

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Symposium on Photoelectronic Detection and Imaging 2013: High Power Lasers and Applications,
edited by Andreas Tünnermann, Zejin Liu, Pu Wang, Chun Tang, Proc. of SPIE Vol. 8904, 890401
© 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2036857

Proc. of SPIE Vol. 8904 890401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

ix	Conference Committee
xi	Introduction

HIGH POWER LASERS AND APPLICATIONS

8904 02	Pulsed laser deposited cobalt-doped ZnO thin film [8904-1] L. Wang, X. Su, Y. Lu, J. Chen, Beijing Univ. of Technology (China)
8904 03	Performance of smoothing by spectral dispersion combined with distribute phase plate on SG-II [8904-2] Y. Jiang, R. Wu, S. Zhou, J. Li, X. Li, Z. Lin, Shanghai Institute of Optics and Fine Mechanics (China)
8904 04	Effect of nonideal wavefront on the near filed beam quality disturbed by flaw in target system [8904-3] Z. Jiao, Y. Zhang, J. Zhang, J. Zhu, Shanghai Institute of Optics and Fine Mechanics (China)
8904 05	Application of delrin in laser plasma micro-propulsion [8904-4] Z. Y. Zheng, H. Gao, L. Gao, J. Xing, Z. J. Fan, China Univ. of Geosciences (China)
8904 06	Study on the output of LD-pumped passively Q-switched subnanosecond microlasers [8904-5] H. Cheng, H. Chen, Beijing Institute of Technology (China); B. Ding, Anhui Dongfeng Mechanical and Electronic Technology Co., Ltd. (China); D. Cai, Beijing Institute of Technology (China)
8904 07	LD pumped high-repetition-rate high-power 532nm Nd:YAG/LBO solid state laser [8904-6] P. Li, D. Liu, J. Chi, C. Yang, Z. Zhao, H. Hu, G. Zhang, Y. Yao, Beijing Univ. of Technology (China)
8904 08	Long-pulse laser design and experimental work [8904-9] O. Helal, T. Yong, D. Yunfeng, H. Cai, Changchun Univ. of Science and Technology (China)
8904 09	Gain and reflective index combination guiding in a rod laser amplifier [8904-11] D. Wang, Institute of Applied Electronics (China)
8904 0A	Numerical research of two-dimension temperature distribution in bio-tissue induced by pulse laser and continuum laser based on FEM [8904-13] N. Shan, R. Zhan, H. Cui, The Chinese People's Armed Police Force (China)
8904 0B	The research of atmospheric transmittance of high power laser along a ground-space slant path [8904-14] Y. Wang, Y. Liu, H. Li, M. Yao, M. Wang, Q. Zou, F. Qi, C. Huang, Unit 63892 of People's Liberation Army (China)

- 8904 0C **Linewidth influenced by phase modulation and frequency modulation in optical feedback diode laser** [8904-16]
H. Wang, X. Zhao, Z. Cheng, S. Li, B. Zhang, Y. Li, Xi'an Univ. of Arts and Science (China)
- 8904 0D **Power scaling and beam divergence compression of bottom-emitting vertical-cavity surface-emitting lasers** [8904-17]
X. Zhang, Y. Ning, Changchun Institute of Optics, Fine Mechanics and Physics (China); J. Zhang, J. Zhang, J. Zhang, P. Jia, X. Li, Changchun Institute of Optics, Fine Mechanics and Physics (China) and Univ. of Chinese Academy of Sciences (China); J. Shi, L. Qin, Y. Liu, C. Tong, L. Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 8904 0F **Theoretical research on damage mechanism of ultrafast laser ablation crystal silicon** [8904-20]
J. Shao, Changchun Institute of Optics, Fine Mechanics and Physics (China) and Univ. of Chinese Academy of Sciences (China); J. Guo, T. Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 8904 0G **Design criteria of end-pumped Nd:YAG zigzag slab amplifiers** [8904-21]
B. Tang, X. Wang, H. Su, China Academy of Engineering Physics (China) and Institute of Applied Physics and Computational Mathematics (China)
- 8904 0H **A four kHz repetition rate compact TEA CO₂ laser** [8904-23]
Y. Zheng, R. Tan, Institute of Electronics (China)
- 8904 0I **High energy quadruple pass amplifier for high power laser preamplifier module** [8904-25]
Y. Peng, J. Wang, X. Pan, X. Lu, X. Li, Shanghai Institute of Optics and Fine Mechanics (China)
- 8904 0J **The influence of energy deposition parameters on laser plasma drag reduction** [8904-26]
Z. Dou, Academy of Equipment (China); Z. Liu, Beijing Space Information Relay Transmission Technology Research Ctr. (China); H. Yao, X. Li, Academy of Equipment (China)
- 8904 0K **Second harmonic generation study of the air/liquid interface of different solutions** [8904-30]
K. Sun, D. Li, L. Cao, Y. Li, Shandong Univ. (China); X. Song, Geological Scientific Research Institute (China); C. Li, Y. Li, Shandong Univ. (China); X. Cao, Geological Scientific Research Institute (China)
- 8904 0L **Morphology and chemical composition analysis on multi-pulsed CO₂ laser ablation of HgCdTe crystals** [8904-31]
W. Tang, Changchun Institute of Optics, Fine Mechanics and Physics (China) and Univ. of Chinese Academy of Sciences (China); J. Guo, Changchun Institute of Optics, Fine Mechanics and Physics (China); J. Shao, Changchun Institute of Optics, Fine Mechanics and Physics (China) and Univ. of Chinese Academy of Sciences (China); T. Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 8904 0M **Numerical study of thermal stress damage in dielectric film by long-pulse laser** [8904-32]
J. Cai, G. Jin, J. Bi, G. Chen, Y. Zhang, Changchun Univ. of Science and Technology (China)
- 8904 0N **The influence of the inflow speed on air-breathing supersonic laser propulsion** [8904-33]
L. Shi, H. Chen, L. Ma, Y. Chen, Z. Xu, H. Hong, Air Force Engineering Univ. (China)

- 8904 0O **Flat-top temporal and spatial profiles femtosecond pulse beam generated by phase only modulating** [8904-36]
Y. Nie, China Satellite Maritime Tracking and Control Dept. (China) and National Univ. of Defense Technology (China); J. Liu, P. Huang, J. Tang, X. Yang, China Satellite Maritime Tracking and Control Dept. (China); H. Ma, X. Li, National Univ. of Defense Technology (China)
- 8904 0P **Phase compensating algorithm investigation of real-time adaptive femtosecond pulse shaping** [8904-37]
X. Lou, T. Sun, China Satellite Maritime Tracking and Control Dept. (China) and National Univ. of Defense Technology (China); F. Duan, X. Yang, China Satellite Maritime Tracking and Control Dept. (China); Y. Nie, China Satellite Maritime Tracking and Control Dept. (China) and National Univ. of Defense Technology (China)
- 8904 0Q **Output spectrum of high-power CW fiber amplifier** [8904-42]
W. Liu, H. Xiao, X. Wang, P. Zhou, National Univ. of Defense Technology (China)
- 8904 0R **Analysis of the power scaling of resonantly pumped Tm-doped silica fiber lasers** [8904-43]
Y. Zhu, P. Zhou, H. Zhang, X. Wang, S. Guo, National Univ. of Defense Technology (China)
- 8904 0S **High-power all-fiber picosecond MOPA laser based on hybrid-doped Yb fibers** [8904-47]
H. Chen, L. Guo, Y. Lei, S. Chen, J. Hou, Q. Lu, National Univ. of Defense Technology (China)
- 8904 0T **The mechanism of laser disturbing infrared detector and its intelligent protection** [8904-48]
Y. Lu, Y. Feng, Y. Ling, Y. Qiao, Electronic Engineering Institute (China)
- 8904 0V **Numerical simulations of high power near-infrared supercontinuum generation from a nonlinear fiber amplifier** [8904-52]
R. Song, J. Hou, National Univ. of Defense Technology (China); Y.-B. Wang, Unit 63892 of People's Liberation Army (China); A.-J. Jin, L. Guo, Q.-S. Lu, National Univ. of Defense Technology (China)
- 8904 0W **Influence of storage causing packaging stress changes on smile effect for diode laser arrays** [8904-55]
H. Xu, China Electronics Technology Group Corp. (China); Y. Zhang, Hebei Univ. of Technology (China); Y. Fang, X. Liu, J. Niu, C. Yuan, C. Li, Y. Wang, X. Wang, M. Shen, Z. An, China Electronics Technology Group Corp. (China)
- 8904 0X **The technique of high power laser beam combination using liquid crystal spatial light modulator** [8904-56]
Y. Duan, X. Wang, Z. Huang, Univ. of Electronic Science and Technology of China (China)
- 8904 0Y **Design and development of 24 times high-power laser beam expander** [8904-58]
Z. Lin, X. Gong, S. Wu, Y. Tan, H. Jing, Institute of Optics and Electronics (China); Z. Wei, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China)
- 8904 0Z **Experimental research on mechanism of phase noise of laser amplifier** [8904-60]
L. Liu, Y. Liu, K. Zhang, X. Tang, C. Wang, H. Zhao, North China Research Institute of Electro-Optics (China)

- 8904 10 **Mid-infrared supercontinuum generated from a single-cladding Tm-Ho co-doped fiber** [8904-62]
X. Wang, P. Zhou, X. Wang, J. Hou, Z. Liu, National Univ. of Defense Technology (China)
- 8904 11 **Simulation for thermal blooming of the axial pipe flow** [8904-66]
Y. Sun, China Aerodynamics Research and Development Ctr. (China); F. Xi, National Univ. of Defense Technology (China); Z. Ren, Z. Chen, Q. Peng, China Aerodynamics Research and Development Ctr. (China); H. Chen, Institute of Optics and Electronics (China); L. Guo, China Aerodynamics Research and Development Ctr. (China); Q. Lu, National Univ. of Defense Technology (China)
- 8904 12 **Optical nonlinearity measurements of copper phthalocyanine film** [8904-69]
L. Luo, Y. Fang, X. Chu, X. Wu, J. Yang, Soochow Univ. (China); Y. Song, Soochow Univ. (China) and Harbin Institute of Technology (China)
- 8904 13 **Thermal effect in pulsed laser diode dual-end pumped Tm:YAG laser** [8904-73]
J. Wu, C. Wu, E. Fan, C. Wang, X. Chen, Y. Yu, G. Jin, Changchun Univ. of Science and Technology (China)
- 8904 14 **Influence of BBO temperature distribution on phase mismatching distribution in fourth harmonic** [8904-74]
C. Wang, M. Yu, X. Chen, X. Tan, Y. Yu, G. Jin, C. Wan, Changchun Univ. of Science and Technology (China)
- 8904 15 **The research of wavefront compensation of a reflective beam shaping system** [8904-76]
D. Gu, W. Liu, Q. Zhou, National Univ. of Defense Technology (China)
- 8904 16 **The comparison between MFD and MOI on the simulation of combiner insertion loss** [8904-78]
L. Kong, J. Leng, J. Cao, S. Guo, H. Jiang, National Univ. of Defense Technology (China)
- 8904 17 **LD dual-end-pumped CW Tm:YLF laser** [8904-79]
X. Chen, Y. Zhang, Y. Yu, C. Wang, G. Jin, Changchun Univ. of Science and Technology (China)
- 8904 18 **Numerical analysis of supercontinuum generation in cascaded photonic crystal fiber tapers** [8904-80]
H. Chen, China Satellite Maritime Tracking and Control Dept. (China); J. Hou, National Univ. of Defense Technology (China)
- 8904 19 **Research on output characteristics of continuous-wave operation of Ho:YAG laser pumped by Tm:YLF laser** [8904-81]
X. Chen, J. Bie, Z. Huang, X. Song, G. Jin, Changchun Univ. of Science and Technology (China)
- 8904 1A **Directly writing embedded optical waveguides in LiNbO₃ by a femtosecond laser** [8904-82]
Z. Zhou, L. Zhang, Z. Fan, Y. Yang, C. Luo, Southwest Univ. of Science and Technology (China)
- 8904 1B **Comparison of different methods for stripping cladding light in the high-power fiber laser** [8904-85]
W. Guo, Z. Chen, H. Zhou, J. Hou, National Univ. of Defense Technology (China)

- 8904 1C **Optical fiber polarization control system based on fast locating algorithm** [8904-86]
Z. Huang, D. Zhang, H. Cheng, Y. Luo, M. Han, J. Li, C. Liu, China Academy of Engineering Physics (China)
- 8904 1D **Flexibly controllable multi-pulse mode-locked MOPA Yb-doped fiber laser in all normal dispersion regime** [8904-89]
C. Bu, C. Wang, Soochow Univ. (China)
- 8904 1E **Influence of the 400mm-aperture Nd:glass slab-amplifier gain nonuniformity on $1\omega(1053\text{nm})$ near-field performance** [8904-90]
W. Wang, Y.-C. Geng, L. Chen, Y. Luo, Y. Chen, J. Zhao, W. Huang, Y. Zhang, L. Liu, K. Zheng, Q.-H. Zhu, X. Wei, China Academy of Engineering Physics (China)
- 8904 1F **Enhancement of third harmonics generation during ultrashort pulse diffraction in multi-layer volume grating** [8904-92]
Y. Tan, Y. Yang, J. Liao, M. Zhang, National Univ. of Defense Technology (China)
- 8904 1G **Modeling of 1.2- μm phosphorus doped Raman fiber laser** [8904-94]
Y. Li, Y. Song, J. Tian, Z. Yu, Z. Dou, X. Zhang, Beijing Univ. of Technology (China)
- 8904 1H **Design and preparation of frequency-doubled laser optical coatings for double wavelength with low waviness in short-wave** [8904-97]
H. Liu, L. Wang, Y. Jiang, C. Jiang, Y. Ji, Tianjin Jinhang Institute of Technology Physics (China)
- 8904 1I **The study on the scaling relations between impulse coupling with aluminum by pulsed ultraviolet laser and by x-ray** [8904-98]
Y. Wang, Northwest Institute of Nuclear Technology (China); F. Liu, Northwest Institute of Nuclear Technology (China) and State Key Lab. of Laser Interaction with Matter (China); G. Peng, S. Ding, Y. Gao, Northwest Institute of Nuclear Technology (China); X. Zhao, Northwest Institute of Nuclear Technology (China) and State Key Lab. of Laser Interaction with Matter (China)
- 8904 1J **Passive coherent combination of all-fiber multichannel pulsed laser based on optical feed-back ring cavity** [8904-99]
X. Ji, National Univ. of Defense Technology (China) and Unit 63880 of People's Liberation Army (China); P. Zhou, X. Wang, National Univ. of Defense Technology (China); H. Zhang, National Univ. of Defense Technology (China) and Unit 63880 of People's Liberation Army (China); Q. Lu, Y. Zhao, National Univ. of Defense Technology (China)
- 8904 1K **High power Yb-doped fiber laser operates at special wavelength** [8904-100]
H. Zhang, M. Jiang, H. Xiao, X. Wang, P. Zhou, Z. Liu, National Univ. of Defense Technology (China)
- 8904 1L **Linearly polarized operation of a Yb³⁺-doped double-clad fiber laser (Invited Paper)** [8904-102]
D. Feng, W. Huang, P. Zhang, Shandong Univ. (China); J. Zhou, Shanghai Institute of Optics and Fine Mechanics (China); X. Gu, Ryerson Univ. (Canada)
- 8904 1M **Pulse multi-pass stretcher using linear chirped fiber Bragg grating** [8904-103]
C. Zhang, X. Wang, W. Fan, D. Rao, Z. Lin, Shanghai Institute of Optics and Fine Mechanics (China)

Introduction

We have had the great honor of organizing the Fifth International Symposium on Photoelectronic Detection and Imaging (ISPDl) in Beijing. It was truly a great pleasure for us to greet the more than 1,200 participants from many different countries attending ISPDl 2013! I firmly believe that the symposium will become an important international event in the field of photoelectronic detection and imaging technology.

ISPDl 2013 was sponsored by SPIE, The Optical Society, European Optical Society, and the Chinese Society of Astronautics, and was organized by the Photoelectronic Technology Committee, Chinese Society of Astronautics, Tianjin Jinhang Institute of Technical Physics, Science and Technology on Low Light Level Night Vision Laboratory, Science and Technology on Optical Radiation Lab. and Science and Technology on Electromagnetic Scattering Lab. There were 26 cooperating organizations that supported the meeting. Nearly 850 papers were accepted for presentation at ISPDl 2013, contributed by over 1,370 authors from more than 10 countries, including the United States, United Kingdom, Germany, France, Norway, Australia, Canada, Japan, Korea, Russia, China, and so on. We had seven plenary speeches and 135 famous scientists and experts from home and abroad to present the invited talks at 10 different conferences.

The purpose of ISPDl 2013 is to provide a forum for the participants to report and review the innovative ideas and up-to-date progress and developments, and discuss the novel approaches to applications in the field of photoelectronic detection and imaging. It is sincerely hoped that the research and developments in optical and photoelectronic fields will be promoted, and that international cooperation and the sharing of common interests will be enhanced.

On behalf of Prof. Konstantin Vodopyanov, and the other conference chairs, and the Organization Committee of ISPDl, I would like to heartily thank our sponsors and cooperating organizations for all they have done for the meeting. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us make the symposium possible, to the Program Committee for their effective work and valuable advice, and especially the ISPDl 2013 Secretariat and the SPIE staff for their tireless effort and outstanding service in preparing the meeting and publishing the conference proceedings.

Guofan Jin
