Proceedings of SPIE 0277-786X, V. 8909

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Symposium on Photoelectronic Detection and Imaging 2013: Terahertz Technologies and Applications,
edited by Marco Rahm, Konstantin Vodopyanov, Wei Shi, Cunlin Zhang, Proc. of SPIE Vol. 8909, 890901
© 2013 SPIE · CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2044422

Proc. of SPIE Vol. 8909 890901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

ix	Introduction

TERAHERTZ TECHNOLOGIES AND APPLICATIONS

8909 02	Signature analysis of ballistic missile warhead with micro-nutation in terahertz band [8909-2] M. Li, Y. Jiang, BeiHang Univ. (China)
8909 03	Simulation for the radiation of Terahertz Horn Antenna with mixed-mode excitation source [8909-5] X. Zhu, Northwest Institute of Nuclear Technology (China); J. Wang, Northwest Institute of Nuclear Technology (China) and Xi'an Jiaotong Univ. (China); G. Wang, Z. Chen, L. Cai, Northwest Institute of Nuclear Technology (China)
8909 04	Transmission characteristics of 0.14 THz terahertz waves in metal overmoded waveguides [8909-6] G. Wang, Northwest Institute of Nuclear Technology (China); J. Wang, Northwest Institute of Nuclear Technology (China) and Xi'an Jiaotong Univ. (China); X. Wang, C. Tong, S. Li, X. Lu, Northwest Institute of Nuclear Technology (China)
8909 05	A calibration approach for terahertz wave measurements at frequencies from 0.11 THz to 0.17 THz [8909-7] X. Wang, Northwest Institute of Nuclear Technology (China); J. Wang, Northwest Institute of Nuclear Technology (China) and Xi'an Jiaotong Univ. (China); G. Wang, C. Tong, S. Li, Northwest Institute of Nuclear Technology (China)
8909 06	Progress of terahertz functional subwavelength devices -modulator, isolator and sensor [8909-10] F. Fan, S. Chang, Nankai Univ. (China)
8909 07	Design of a micromachined terahertz electromagnetic crystals (EMXT) channel-drop filter on silicon-substrate [8909-12] K. Zhou, Y. Liu, L. Si, X. Lv, Beijing Institute of Technology (China)
8909 08	A novel method about 0.14THz power divider based on 3dB directional coupler [8909-13] X. Kang, P. Chen, X. Deng, Z. Chen, China Academy of Engineering Physics (China)
8909 09	Experimental study on the effect of boundary condition for transmission properties of periodical metal hole arrays in terahertz range [8909-15] J. Xu, L. Xie, C. Gao, Z. Li, L. Chen, Y. Zhu, Univ. of Shanghai for Science and Technology (China)

- 8909 0A **Terahertz symmetric resonant cavities sensor based on parallel-palte waveguide** [8909-17]
C. M. Gao, L. Chen, J. M. Xu, Y. M. Zhu, Univ. of Shanghai for Science and Technology (China)
- 8909 0B **Gaussian beam scattering from a hemispherical boss** [8909-20]
H.-Y. Li, Q. Li, Z.-J. Liu, Y.-P. Zhao, D.-Y. Chen, Q. Wang, Harbin Institute of Technology (China)
- 8909 0C **A study of trapped mode resonances in asymmetric X-shape resonator for frequency selective surface** [8909-22]
K. Chen, H. Liu, Y. Wang, Y. Zhu, Univ. of Shanghai for Science and Technology (China)
- 8909 0D **Terahertz plasmon polariton formed in a Fabry-Pérot cavity and a grating-coupled two-dimensional electron gas** [8909-23]
Y. Huang, H. Qin, B. Zhang, Suzhou Institute of Nano-tech and Nano-bionics (China); J. Wu, Nanjing Univ. (China) and Univ. of Leeds (United Kingdom); G. Zhou, B. Jin, Nanjing Univ. (China)
- 8909 0F **Characterization of terahertz emission from laser-induced air plasma under different pump power** [8909-30]
Y. Luo, L. Zhang, Capital Normal Univ. (China); J. Zhao, Beijing Institute of Technology (China); C. Zhang, Capital Normal Univ. (China)
- 8909 0G **Perfect invisible terahertz cloak** [8909-32]
Z. Li, X. F. Zang, J. M. Xu, Y. M. Zhu, Univ. of Shanghai for Science and Technology (China)
- 8909 0H **A high Q terahertz one-dimensional photonic crystal cavity and its applications** [8909-35]
T. Chen, P. Liu, J. Liu, Z. Hong, China Jiliang Univ. (China)
- 8909 0I **Analysis of terahertz generation characteristic affected by injured photoconductive antenna** [8909-36]
H. Li, W. Fan, J. Liu, Xi'an Institute of Optics and Precision Mechanics (China)
- 8909 0J **The study of quasi-optical system used in a passive near-field tetrahertz imaging system** [8909-37]
Z. Wang, W. Zhu, W. Zhang, C. Zhang, Q. Ding, X. Bi, J. Wu, China Academy of Aerospace Aerodynamics (China)
- 8909 0K **Study on silicon nanostructure based solar cell by ultrafast terahertz spectroscopy** [8909-38]
L. Peng, China Academy of Engineering Physics (China) and Sichuan Univ. (China); L. Zhu, China Academy of Engineering Physics (China); H. Tang, City Univ. of Hong Kong (China); K. Meng, S. Zhong, Z. Li, China Academy of Engineering Physics (China); R. Zhang, Sichuan Univ. (China)
- 8909 0M **Characteristics of chiral and racemic ketoprofen drugs using terahertz time-domain spectroscopy** [8909-40]
Y. Du, J. Liu, Z. Hong, China Jiliang Univ. (China)
- 8909 0O **Development of the data acquisition and control system for a portable THz time-domain spectrometer** [8909-43]
W. Gao, Y. Wang, Z. Zhao, Tsinghua Univ. (China)

- 8909 OP **Fringe removal for continuous-wave terahertz imaging based on cartoon-texture decomposition** [8909-44]
L. Qiao, Y. Wang, Z. Zhao, Z. Chen, Tsinghua Univ. (China)
- 8909 OQ **Switchable terahertz metamaterials with dual resonance** [8909-47]
X. Zhao, J. He, C. Zhang, Capital Normal Univ. (China)
- 8909 OR **Retrieval of atmospheric parameters by radiometer at frequency of terahertz** [8909-48]
J. Li, L. Guo, Xidian Univ. (China); L. Lin, China Research Institute of Radiowave Propagation (China); H. Li, Y. Zhao, Xidian Univ. (China); T. Shu, X. Cheng, China Research Institute of Radiowave Propagation (China)
- 8909 OS **Passive terahertz imaging for security application** [8909-50]
L. Guo, Beijing Institute of Technology (China); C. Deng, Beijing Institute of Technology (China) and Capital Normal Univ. (China); Y. Zhao, C. Zhang, Capital Normal Univ. (China)
- 8909 OT **Design of 0.35THz 2D photonic crystal bandpass filter** [8909-51]
Q. Chen, Y. Zhang, X. He, J. Zhang, China Academy of Engineering Physics (China)
- 8909 OU **Measurement precision analysis for terahertz absorption spectrum of explosive materials by using terahertz transmissiome spectroscopy** [8909-52]
Z. Yang, Tsinghua Univ. (China); Q. Yin, Xi'an Jiaotong Univ. (China); H. Li, Xi'an Institute of Applied Optics (China)
- 8909 OV **Terahertz ISAR imaging in noise background** [8909-53]
L.-S. Li, S. Li, H.-C. Yin, Science and Technology on Electromagnetic Scattering Lab. (China)
- 8909 OW **The study on the continuum absorption of THz wave in atmosphere** [8909-54]
H. Li, Z. Wu, Xidian Univ. (China); L. Lin, China Research Institute of Radiowave Propagation (China); C. Lu, Xidian Univ. (China); Z. Zhao, China Research Institute of Radiowave Propagation (China)
- 8909 OX **The application of reduced absorption cross section on the identification of the compounds with similar function-groups** [8909-57]
F. Yu, J. Zuo, Capital Normal Univ. (China); K. Mu, Zhengzhou Univ. (China); Z. Zhang, L. Zhang, L. Zhang, C. Zhang, Capital Normal Univ. (China)
- 8909 OY **FDTD-based computed terahertz wave propagation in multilayer medium structures** [8909-58]
W. Tu, Fuzhou Univ. (China) and Jimei Univ. (China); S. Zhong, H. Yao, Fuzhou Univ. (China); Y. Shen, Fuzhou Univ. (China) and Univ. of Liverpool (United Kingdom)
- 8909 OZ **Far-infrared characteristics of NaCl and alkali halide** [8909-60]
T. Ji, Z. Zhang, M. Chen, T. Xiao, Shanghai Institute of Applied Physics (China)
- 8909 10 **Cherenkov phase-matched terahertz wave generation and its spectroscopic applications (Invited Paper)** [8909-61]
K. Suizu, T. Akiba, N. Kaneko, Chiba Institute of Technology (Japan); H. Uchida, Arkray Inc. (Japan); K. Miyamoto, T. Omatsu, Chiba Univ. (Japan)

- 8909 11 **Anti-camouflage capacity study of THz** [8909-62]
J. Wang, D. Zhao, J. Shi, Electronic Engineering Institute (China); Y. Lu, Wuhan Machine College (China); Z. Chen, Q. Wang, Electronic Engineering Institute (China)
- 8909 12 **A 46 μ m AlGaAs/GaAs terahertz quantum-well infrared photodetector** [8909-63]
X. Liu, K. Liao, Shanghai Institute of Technical Physics (China) and Univ. of the Chinese Academy of Sciences (China); X. Zhou, Z. Li, N. Li, Shanghai Institute of Technical Physics (China)
- 8909 13 **Ion-implanted Si:P blocked-impurity-band photodetectors for far-infrared and terahertz radiation detection** [8909-64]
K. Liao, Shanghai Institute of Technical Physics (China) and Univ. of the Chinese Academy of Sciences (China); N. Li, Shanghai Institute of Technical Physics (China); X. Liu, L. Huang, Q. Zeng, Shanghai Institute of Technical Physics (China) and Univ. of the Chinese Academy of Sciences (China); X. Zhou, Z. Li, Shanghai Institute of Technical Physics (China)
- 8909 19 **Light control terahertz modulator based on the semiconductor material** [8909-69]
H. Cui, L. Jiao, Q. Zhou, L. Li, Capital Normal Univ. (China)
- 8909 1A **The research of progress of terahertz metamaterial modulators** [8909-71]
L. Li, L. Jiao, H. Cui, J. He, Capital Normal Univ. (China)
- 8909 1B **The research of resonant frequency and modulation depth of Metamaterial THz modulator** [8909-72]
L. Jiao, L. Li, H. Cui, J. He, Capital Normal Univ. (China)
- 8909 1C **Research on the influence of waveguide's exposure steepness on 0.345THz FWGTWT's performance** [8909-73]
F. Zhang, Z. Dong, Y. Dong, Institute of Applied Physics and Computational Mathematics (China) and China Academy of Engineering Physics (China)
- 8909 1D **Research of room-temperature continuous-wave terahertz imaging array based on microbolometer** [8909-74]
B. Su, Capital Normal Univ. (China); G. Duan, Beijing Institute of Technology (China); H. Cui, C. Zhang, Capital Normal Univ. (China)
- 8909 1E **Design of 1-THz field effect transistor detectors in 180-nm standard CMOS process** [8909-75]
Z. Liu, L. Liu, N. Wu, Institute of Semiconductors (China)
- 8909 1F **Mid-infrared (Mid-IR) optical frequency comb spectroscopy method for trace gas detection (Invited Paper)** [8909-76]
M. Zhu, Agilent Technologies, Inc. (United States)
- 8909 1G **A continuous-wave THz imaging system** [8909-77]
T.-H. Pei, Y.-T. Huang, Y.-J. Wang, W.-Z. Chen, C.-N. Kuo, Y.-T. Cheng, National Chiao Tung Univ. (Taiwan, China)
- 8909 1H **Application of laser diode in airplane engine nozzle temperature measurement system** [8909-78]
Y. Xia, Q. Ren, X. Li, The First Aeronautic Institute of Air Force (China)

Conference Committee

Conference Chairs

Konstantin Vodopyanov, Stanford University (United States) and CREOL,
The College of Optics and Photonics, University of Central Florida
(United States)
Guofan Jin, Tsinghua University (China)
Songlin Zhuang, University of Shanghai for Science and Technology
(China)

Local Organizing Committee

Jiaqi Wang, Changchun Institute of Optics, Fine Mechanics and Physics
(China)
Zuyan Xu, Technical Institute of Physics and Chemistry (China)
Zunqi Lin, Shanghai Institute of Optics and Fine Mechanics (China)
Dianyuan Fan, Shanghai Institute of Optics and Fine Mechanics (China)
Jingshan Jiang, Center for Space Science and Applied Research (China)
Liwei Zhou, Beijing Institute of Technology (China)
Shouhuan Zhou, North China Research Institute of Electro-optics (China)
Desheng Jiang, Wuhan University of Technology (China)
Jianquan Yao, Tianjin University (China)
Qingxi Tong, Institute of Remote Sensing and Digital Earth (China)
Junhao Chu, Shanghai Institute of Technical Physics (China)
Yongqi Xue, Shanghai Institute of Technical Physics (China)

Program Committee

Junhao Chu, *Chair*, Shanghai Institute of Technical Physics (China)
Jinxue Wang, *Chair*, Raytheon Company (United States)
Min Gu, Swinburne University of Technology (Australia)
Andreas Tünnermann, Friedrich-Schiller-Universität Jena (Germany)
Connie Chang, University of California, Berkeley (United States)
Shibin Jiang, AdValue Photonics Inc. (United States)
H. C. Liu, Shanghai Jiao Tong University (China)
Xiacong Yuan, Nankai University (China)
Wei Shi, Tianjin University (China)
Min Qiu, Zhejiang University (China)
Nanjian Wu, Institute of Semiconductors (China)

Session Chairs

Terahertz Technologies and Applications

Marco Rahm, Technische Universität Kaiserslautern (Germany)

Konstantin Vodopyanov, Stanford University (United States) and CREOL,
The College of Optics and Photonics, University of Central Florida
(United States)

Wei Shi, Tianjin University (China)

Cunlin Zhang, Capital Normal University (China)

Yiming Zhu, University of Shanghai for Science and Technology (China)

Yongzhong Xiong, China Academy of Engineering Physics (China)

Jiancheng Shi, Institute of Remote Sensing Application (China)

Introduction

We have had the great honor of organizing the Fifth International Symposium on Photoelectronic Detection and Imaging (ISPDl) in Beijing. It was truly a great pleasure for us to greet the more than 1,200 participants from many different countries attending ISPDl 2013! I firmly believe that the symposium will become an important international event in the field of photoelectronic detection and imaging technology.

ISPDl 2013 was sponsored by SPIE, The Optical Society, European Optical Society, and the Chinese Society of Astronautics, and was organized by the Photoelectronic Technology Committee, Chinese Society of Astronautics, Tianjin Jinhang Institute of Technical Physics, Science and Technology on Low Light Level Night Vision Laboratory, Science and Technology on Optical Radiation Lab. and Science and Technology on Electromagnetic Scattering Lab. There were 26 cooperating organizations that supported the meeting. Nearly 850 papers were accepted for presentation at ISPDl 2013, contributed by over 1,370 authors from more than 10 countries, including the United States, United Kingdom, Germany, France, Norway, Australia, Canada, Japan, Korea, Russia, China, and so on. We had seven plenary speeches and 135 famous scientists and experts from home and abroad to present the invited talks at 10 different conferences.

The purpose of ISPDl 2013 is to provide a forum for the participants to report and review the innovative ideas and up-to-date progress and developments, and discuss the novel approaches to applications in the field of photoelectronic detection and imaging. It is sincerely hoped that the research and developments in optical and photoelectronic fields will be promoted, and that international cooperation and the sharing of common interests will be enhanced.

On behalf of Prof. Konstantin Vodopyanov, and the other conference chairs, and the Organization Committee of ISPDl, I would like to heartily thank our sponsors and cooperating organizations for all they have done for the meeting. Thanks also to all the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us make the symposium possible, to the Program Committee for their effective work and valuable advice, and especially the ISPDl 2013 Secretariat and the SPIE staff for their tireless effort and outstanding service in preparing the meeting and publishing the conference proceedings.

Guofan Jin
