The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 STEGANOGRAPHY

- 9028 02 **Challenging the doctrines of JPEG steganography** [9028-1]
V. Holub, J. Fridrich, Binghamton Univ. (United States)
- 9028 03 **Linguistic steganography on Twitter: hierarchical language modeling with manual interaction** [9028-2]
A. Wilson, P. Blunsom, A. D. Ker, Univ. of Oxford (United Kingdom)
- 9028 04 **Detection of content adaptive LSB matching: a game theory approach** [9028-3]
T. Denemark, J. Fridrich, Binghamton Univ. (United States)
- 9028 05 **Further study on the security of S-UNIWARD** [9028-34]
T. Denemark, J. Fridrich, V. Holub, Binghamton Univ. (United States)

SESSION 2 BIOMETRICS AND WATERMARKING

- 9028 06 **Are you threatening me?: Towards smart detectors in watermarking** [9028-5]
M. Barni, Univ. degli Studi di Siena (Italy); P. Comesaña-Alfaro, F. Pérez-González, ETSI Telecom, Univ. de Vigo (Spain); B. Tondi, Univ. degli Studi di Siena (Italy)
- 9028 07 **On accuracy, robustness, and security of bag-of-word search systems** [9028-6]
S. Voloshynovskiy, M. Diephuis, D. Kostadinov, F. Farhadzadeh, T. Holtyak, Univ. of Geneva (Switzerland)
- 9028 08 **An enhanced feature set for pattern recognition based contrast enhancement of contact-less captured latent fingerprints in digitized crime scene forensics** [9028-7]
M. Hildebrandt, S. Kiltz, Otto-von-Guericke-Univ. Magdeburg (Germany); J. Dittmann, Otto-von-Guericke-Univ. Magdeburg (Germany) and The Univ. of Buckingham (United Kingdom); C. Vielhauer, Otto-von-Guericke-Univ. Magdeburg (Germany) and Fachhochschule Brandenburg (Germany)
- 9028 09 **Robust human face recognition based on locality preserving sparse over complete block approximation** [9028-8]
D. Kostadinov, S. Voloshynovskiy, S. Ferdowsi, Univ. of Geneva (Switzerland)

SESSION 3 WATERMARKING

- 9028 0B **Blind detection for disparity-coherent stereo video watermarking** [9028-10]
C. Burini, S. Baudry, G. Doërr, Technicolor Research and Development (France)

- 9028 0C **Tuple decoders for traitor tracing schemes** [9028-11]
J.-J. Oosterwijk, Technische Univ. Eindhoven (Netherlands) and Irdeto B.V. (Netherlands);
J. Doumen, Irdeto B.V. (Netherlands); T. Laarhoven, Technische Univ. Eindhoven
(Netherlands)
- 9028 0D **Feature-based watermark localization in digital capture systems** [9028-12]
V. Holub, T. Filler, Digimarc Corp. (United States)
- 9028 0E **Self-synchronization for spread spectrum audio watermarks after time scale modification**
[9028-13]
A. Nadeau, G. Sharma, Univ. of Rochester (United States)
- 9028 0F **Drift-free MPEG-4 AVC semi-fragile watermarking** [9028-14]
M. Hasnaoui, M. Mitrea, Institut Mines Télécom, Télécom SudParis (France)
- 9028 0G **Watermarking textures in video games** [9028-4]
H. Liu, W. Berchtold, M. Schäfer, P. Lieb, M. Steinebach, Fraunhofer-Institut für Sichere
Informations-Technologie (Germany)

SESSION 4 STEGANALYSIS

- 9028 0H **Cover estimation and payload location using Markov random fields** [9028-15]
T.-T. Quach, Sandia National Labs. (United States)
- 9028 0I **A mishmash of methods for mitigating the model mismatch mess** [9028-16]
A. D. Ker, Univ. of Oxford (United Kingdom); T. Pevný, Czech Technical Univ. in Prague
(Czech Republic)
- 9028 0J **Study of cover source mismatch in steganalysis and ways to mitigate its impact** [9028-17]
J. Kodovský, V. Sedighi, J. Fridrich, Binghamton Univ. (United States)
- 9028 0K **Implementing the projected spatial rich features on a GPU** [9028-18]
A. D. Ker, Univ. of Oxford (United Kingdom)

VIDEO/DEMO II: KONICA MINOLTA LABORATORY

- 9028 0L **Self-verifiable paper documents and automatic content verification** [9028-35]
Y. Tian, X. Zhan, C. Wu, W. Ming, Konica Minolta Lab. USA, Inc. (United States)

SESSION 5 IDENTIFICATION

- 9028 0N **Estimation of lens distortion correction from single images** [9028-20]
M. Goljan, J. Fridrich, Binghamton Univ. (United States)
- 9028 0O **A reference estimator based on composite sensor pattern noise for source device
identification** [9028-21]
R. Li, C.-T. Li, Y. Guan, The Univ. of Warwick (United Kingdom)

- 9028 OP **Content identification: binary content fingerprinting versus binary content encoding** [9028-22]
S. Ferdowsi, S. Voloshynovskiy, D. Kostadinov, Univ. of Geneva (Switzerland)
- 9028 OQ **Additive attacks on speaker recognition** [9028-23]
A. Farrokh Baroughi, S. Craver, Binghamton Univ. (United States)
- 9028 OR **Robust hashing for 3D models** [9028-24]
W. Berchtold, M. Schäfer, Fraunhofer-Institut für Sichere Informations-Technologie (Germany); M. Rettig, Hochschule Darmstadt (Germany); M. Steinebach, Fraunhofer-Institut für Sichere Informations-Technologie (Germany)

SESSION 6 AUTHENTICATION

- 9028 OT **A framework for fast and secure packaging identification on mobile phones** [9028-26]
M. Diephuis, S. Voloshynovskiy, T. Holotyak, N. Stendardo, Univ. of Geneva (Switzerland); B. Keel, U-NICA Group (Switzerland)
- 9028 OU **Printer technology authentication from micrometric scan of a single printed dot** [9028-27]
Q.-T. Nguyen, Y. Delignon, Institut Mines Telecom, CNRS, Télécom Lille 1 (France); L. Chagas, LGP2, CNRS (France); F. Septier, Institut Mines Telecom, CNRS, Télécom Lille 1 (France)

SESSION 7 FORENSICS

- 9028 OW **Digitized locksmith forensics: automated detection and segmentation of toolmarks on highly structured surfaces** [9028-29]
E. Clausung, C. Vielhauer, Fachhochschule Brandenburg (Germany)
- 9028 OX **Two improved forensic methods of detecting contrast enhancement in digital images** [9028-30]
X. Lin, X. Wei, C.-T. Li, The Univ. of Warwick (United Kingdom)
- 9028 OY **Copy-move forgery detection from printed images** [9028-31]
I. Amerini, R. Caldelli, A. Del Bimbo, Univ. degli Studi di Firenze (Italy); A. Di Fuccia, L. Saravo, A. P. Rizzo, Prime Minister Office (Italy)
- 9028 OZ **Countering anti-forensics by means of data fusion** [9028-32]
M. Fontani, CNIT, Univ. degli Studi di Siena (Italy); A. Bonchi, A. Piva, Univ. degli Studi di Firenze (Italy); M. Barni, Univ. degli Studi di Siena (Italy)
- 9028 IO **Image counter-forensics based on feature injection** [9028-33]
M. Iuliani, National Inter-Univ. Consortium for Telecommunications (Italy); S. Rossetto, Univ. degli Studi di Firenze (Italy); T. Bianchi, Politecnico di Torino (Italy); A. De Rosa, National Inter-Univ. Consortium for Telecommunications (Italy); A. Piva, Univ. degli Studi di Firenze (Italy); M. Barni, Univ. degli Studi di Siena (Italy)

Conference Committee

Symposium Chair

Sergio R. Goma, Qualcomm Inc. (United States)

Symposium Co-chair

Sheila S. Hemami, Northeastern University (United States)

Conference Chairs

Adnan M. Alattar, Digimarc Corporation (United States)

Nasir D. Memon, Polytechnic Institute of New York University
(United States)

Chad D. Heitzenrater, Air Force Research Laboratory (United States)

Conference Program Committee

Mauro Barni, Università degli Studi di Siena (Italy)

Sebastiano Battiato, Università degli Studi di Catania (Italy)

Jeffrey A. Bloom, Sirius XM Satellite Radio (United States)

Scott A. Craver, Binghamton University (United States)

Edward J. Delp III, Purdue University (United States)

Jana Dittmann, Otto-von-Guericke-Universität Magdeburg
(Germany)

Gwenaél Doërr, Technicolor Research and Development (France)

Tomas Filler, Digimarc Corporation (United States)

Jessica Fridrich, Binghamton University (United States)

Anthony T. S. Ho, University of Surrey (United Kingdom)

Jiwu Huang, Sun Yat-Sen University (China)

Ton Kalker, DTS, Inc. (United States)

Andrew D. Ker, University of Oxford (United Kingdom)

Alex Chichung Kot, Nanyang Technological University (Singapore)

Chang-Tsun Li, The University of Warwick (United Kingdom)

Pierre Moulin, University of Illinois at Urbana-Champaign
(United States)

Regunathan Radhakrishnan, Pivotal Systems (United States)

Husrev Taha Sencar, TOBB University of Economics and Technology
(Turkey)

Gaurav Sharma, University of Rochester (United States)

Yun Qing Shi, New Jersey Institute of Technology (United States)

Ashwin Swaminathan, Qualcomm Inc. (United States)

Claus Vielhauer, Fachhochschule Brandenburg (Germany)

Svyatoslav V. Voloshynovskiy, University of Geneva (Switzerland)

Chang Dong Yoo, KAIST (Korea, Republic of)

Session Chairs

- 1 Steganography
Jessica Fridrich, Binghamton University (United States)
- 2 Biometrics and Watermarking
Svyatoslav V. Voloshynovskiy, University of Geneva (Switzerland)
- Keynote Session I
Tomas Filler, Digimarc Corporation (United States)
- 3 Watermarking
Gwenaél Doërr, Technicolor Research and Development (France)
- 4 Steganalysis
Andrew D. Ker, University of Oxford (United Kingdom)
- Keynote Session II
Nasir D. Memon, Polytechnic Institute of New York University (United States)
- 5 Identification
Gaurav Sharma, University of Rochester (United States)
- 6 Authentication
Sebastiano Battiato, Università degli Studi di Catania (Italy)
- Keynote Session III
Edward J. Delp III, Purdue University (United States)
- 7 Forensics
Mauro Barni, Università degli Studi di Siena (Italy)

Introduction

It is our pleasure to bring you the papers presented at the 2014 Media Watermarking, Security, and Forensics Conference. This year's conference was a great success, as it maintained and strengthened its status as the premier conference in the field. It was held at the Hilton, in the popular tourist destination of downtown San Francisco. This convenient location let the attendees enjoy their San Francisco stay while participating in the outstanding technical exchange this forum is well known for.

For three full days, researchers from all over the globe in the field of watermarking, steganography, and forensics presented state-of-the-art research results in a lecture style. Thirty-one top-quality, original research papers were presented in a well-attended single track. Many great papers were submitted, but unfortunately not all could be accommodated by the conference. Attendees from academic, industrial, and governmental establishments enjoyed the presentations of latest research results. After the presentations and during the coffee breaks, presenters enjoyed discussing their research approaches and results with colleagues. The valuable feedback and comments they received planted the seeds for more research to advance the state-of-the-art of watermarking, security, and forensics.

Attendees also enjoyed the strong industrial flavor of this conference. This year, three distinguished keynote speakers from industry and academia addressed recent technological developments in their field of expertise:

- Sunil Jain from Intel Corporation gave an excellent speech on digital wallet and mobile payment, which included a description of his "Dream Wallet."
- Markus Jakobsson from ZapFraud gave a wonderful speech titled, "Authenticate or Not." He exposed an array of mistaken beliefs relating to authentication and authenticity.
- Hany Farid from Dartmouth College gave a great talk titled, "Photo Forensics from Shadows and Shading." He presented a clever way to detect inconsistency in lighting from shading and shadows in an image.

All three speeches were informative, illuminating, and well-received by the audience.

In addition to the keynote speeches, representatives from the industry gave three demos of their innovative products and solutions of related technologies:

- Digimarc Corporation gave a video demo of their Digimarc Barcode technology, which is an outstanding application of watermarking. This demo was a recording of Digimarc breaking the Guinness World Record for fastest scanning and bagging of 50 items at the National Retail Forum in NYC.
- Konica Minolta demoed their self-verifiable paper documents and automatic content verification system. Verification is done using a 2D color barcode printed on the document. A compressed version of the information on the document is stored in this barcode.
- Hewlett Packard demoed their watermark-based Weekend GoGuide application that allows a participant to receive printed promotions on his or her Internet-connected printer. The user can view more information about this promotion by snapping a photo of it using his or her mobile device.

All three demos showed the great potential of the technology being developed by the attendees of the conference.

New this year, to acknowledge excellent contributions to the field, the program committee of the conference decided to offer a Best Paper award. The committee sought input from the session chairs of the conference, and in response they received the following nominations:

1. "Feature-based watermark localization in digital capture systems," by Vojtech Holub, Binghamton Univ. (United States); Tomas Filler, Digimarc, (United States).
2. "A Mishmash of Methods to Mitigate the Model Mess Mismatch," by Andrew Ker, Univ. of Oxford (United Kingdom); Tomas Pevny, Czech Technical Univ. in Prague (Czech Republic).
3. "Cover Estimation and Payload Location using Markov Random Fields" by Tu-Thach Quach, Sandia National Labs (United States).
4. "A framework for fast and secure packaging identification on mobile phones," by Maurits Diephuis, Svyatoslav V. Voloshynovskiy, Taras Holotyak, Nabil Stendardo, Univ. of Geneva (Switzerland); Bruno Keel, U-NICA Group (Switzerland).
5. "Content identification: binary content fingerprinting versus binary content encoding," by Sohrab Ferdowsi, Univ. of Geneva (Switzerland); Svyatoslav V. Voloshynovskiy, Univ. of Geneva (Switzerland); Dimche Kostadinov, Univ. of Geneva (Switzerland).

All nominated papers will be reviewed by the technical committee of the conference. The papers will be judged based on their originality, creativity, clarity, and potential impact on the field of watermarking, security, and forensics. The winner will be announced in the next year's call for papers or in a special event during next year's conference.

Finally, the conference chairs express appreciation for all the hard work and for the enthusiastic participation of the researchers, scientists, practitioners, industry and government representatives, keynote speakers, and the organization committee of the conference. The chairs also congratulate all of you on the success of this conference. Without your dedicated effort, little could have been achieved. Together, we will have another great conference next year. Thank you.

Adnan Alattar
