Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Introduction

Optical Systems and Modern Optoelectronic Instruments has been a sub-conference of OIT since its inauguration in 2008. In 2013 there were nearly 100 submissions to this sub-conference, from which 13 invited talks, 19 oral presentations and 37 posters were selected. Experts from the United States, Japan, Poland, Canada, mainland and Taiwan of China came to Beijing, attending the sub-conference and presenting their newest research results. Most of the presented papers are published in this SPIE Proceedings volume.

There were six sessions in the sub-conference, reporting recent progress on optical systems and instruments, aberration analysis and correction for imaging systems, digital holography, display systems and illumination systems, image analysis and applications, respectively.

We believe that this year's Optical Systems and Modern Optoelectronic Instruments conference was a high-quality conference, and the papers included in these proceedings are of good reference value to our fellow scientists and engineers.
