Volume 9064

Proceedings of SPIE 0277-786X, V. 9064

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Health Monitoring of Structural and Biological Systems 2014, edited by Tribikram Kundu, Proc. of SPIE Vol. 9064, 906401 ·
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2064465

Proc. of SPIE Vol. 9064 906401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

xi *Conference Committee*

NONLINEAR GUIDED WAVES AND OTHER NONLINEAR TECHNIQUES

- 9064 02 **Nonlinear damage detection in composite structures using bispectral analysis** [9064-1]
F. Ciampa, S. Pickering, Univ. of Bath (United Kingdom); G. Scarselli, Univ. del Salento (Italy);
M. Meo, Univ. of Bath (United Kingdom)
- 9064 04 **Linear and nonlinear characterization of limestone rock using a non-collinear ultrasonic wave mixing** [9064-3]
M. E. McGovern, H. Reis, Univ. of Illinois at Urbana-Champaign (United States)
- 9064 05 **Fatigue damage localization using time-domain features extracted from nonlinear Lamb waves** [9064-4]
M. Hong, The Hong Kong Polytechnic Univ. (Hong Kong, China) and Monash Univ. (Australia); Z. Su, The Hong Kong Polytechnic Univ. (Hong Kong, China); Y. Lu, Monash Univ. (Australia); L. Cheng, Hong Kong Polytechnic Univ. (Hong Kong, China)
- 9064 06 **Development of a wireless nonlinear wave modulation spectroscopy (NWMS) sensor node for fatigue crack detection** [9064-5]
P. Liu, S. Yang, H. J. Lim, KAIST (Korea, Republic of); H. C. Park, I. C. Ko, Seoul National Univ. of Science and Technology (Korea, Republic of); H. Sohn, KAIST (Korea, Republic of)
- 9064 07 **Nonlinear effect of debonding of wafer type piezoelectric actuator on the behaviour of Lamb wave** [9064-6]
N. P. Yelve, M. Mitra, P. M. Mujumdar, Indian Institute of Technology Bombay (India)

SHM OF CIVIL INFRASTRUCTURE: BRIDGE MONITORING

- 9064 08 **Evaluation of post-tensioning of a curved continuous girder using long-gauge fiber optic sensors** [9064-7]
H. Abdel-Jaber, B. Glisic, Princeton Univ. (United States)
- 9064 0A **A new approach for structural health monitoring by applying anomaly detection on strain sensor data** [9064-10]
K. Trichias, R. Pijpers, E. Meeuwissen, TNO (Netherlands)
- 9064 0B **Bridge condition assessment from dynamic response collected using wireless sensor networks** [9064-11]
A. K. M. A. Islam, H. F. Hamid, F. Li, Youngstown State Univ. (United States)

- 9064 0C **Bridge load rating from dynamic response collected using wireless sensor networks** [9064-12]
A. K. M. A. Islam, A. S. Jaroo, F. Li, Youngstown State Univ. (United States)

SHM OF COMPOSITES: EXPERIMENT AND MODELING

- 9064 0D **Instantaneous wavenumber estimation for damage quantification in layered plate structures** [9064-13]
O. Mesnil, Georgia Institute of Technology (United States); C. A. C. Leckey, NASA Langley Research Ctr. (United States); M. Ruzzene, Georgia Institute of Technology (United States)
- 9064 0E **Characterisation of CFRP surface contamination by laser induced fluorescence** [9064-14]
P. H. Malinowski, M. Sawczak, T. Wandowski, The Szewalski Institute of Fluid-Flow Machinery (Poland); W. M. Ostachowicz, The Szewalski Institute of Fluid-Flow Machinery (Poland) and Warsaw Univ. of Technology (Poland); A. Cenian, The Szewalski Institute of Fluid-Flow Machinery (Poland)
- 9064 0F **A nonlocal finite difference scheme for simulation of wave propagation in 2D models with reduced numerical dispersion** [9064-15]
A. Martowicz, AGH Univ. of Science and Technology (Poland); M. Ruzzene, Georgia Institute of Technology (United States); W. J. Staszewski, AGH Univ. of Science and Technology (Poland); J. J. Rimoli, Georgia Institute of Technology (United States); T. Uhl, AGH Univ. of Science and Technology (Poland)

BIOMEDICAL APPLICATIONS

- 9064 0I **On the use of EMI for the assessment of dental implant stability** [9064-16]
E. La Malfa Ribolla, P. Rizzo, Univ. of Pittsburgh (United States); V. Gulizzi, Univ. degli Studi di Palermo (Italy)

EMERGING AND FUTURISTIC TECHNIQUES/INSTRUMENTS

- 9064 0J **Optical controller for 3D manipulation** [9064-19]
J. Leang, C. Tsui, S. Le, W. Wang, Univ. of Washington (United States)
- 9064 0K **Robust evaluation of time series classification algorithms for structural health monitoring** [9064-20]
D. Y. Harvey, Univ. of California, San Diego (United States); K. Worden, The Univ. of Sheffield (United Kingdom); M. D. Todd, Univ. of California, San Diego (United States)
- 9064 0M **Dual-core photonic crystal fiber Doppler velocimeter for small horizontal axis wind turbine blade rotational speed measurement** [9064-22]
X.-F. Huang, S.-J. Li, Hangzhou Dianzi Univ. (China); W.-C. Wang, Univ. of Washington (United States)
- 9064 0N **Evaluation of different scintillators for 1MV NDE x-ray imaging** [9064-23]
G. Zentai, A. Ganguly, G. Visrshup, Varian Medical Systems, Inc. (United States)

- 9064 0O **Anomaly detection in heterogeneous media via saliency analysis of propagating wavefields** [9064-25]
J. M. Druce, J. D. Haupt, S. Gonella, Univ. of Minnesota (United States)

VIBRATION-BASED SHM

- 9064 0P **Robust modal curvature features for identifying multiple damage in beams** [9064-27]
W. Ostachowicz, The Szwedowski Institute of Fluid-Flow Machinery (Poland) and Warsaw Univ. of Technology (Poland); W. Xu, Hohai Univ. (China); R. Bai, Shandong Agricultural Univ. (China); M. Radzieński, The Szwedowski Institute of Fluid-Flow Machinery (Poland); M. Cao, Hohai Univ. (China)
- 9064 0Q **Sideband frequency response function based damage identification of rotor system with open cracks** [9064-28]
J. Zhao, H. DeSmidt, The Univ. of Tennessee Knoxville (United States)
- 9064 0S **Continuous fatigue assessment of offshore wind turbines using a stress prediction technique** [9064-30]
A. N. Iliopoulos, C. Devriendt, S. N. Iliopoulos, D. Van Hemelrijck, Vrije Univ. Brussel (Belgium)
- 9064 0T **Vibration-based structural health monitoring using adaptive statistical method under varying environmental condition** [9064-32]
S.-S. Jin, H.-J. Jung, KAIST (Korea, Republic of)
- 9064 0U **Vibration test and health monitoring of membrane structure using non-contact laser excitation** [9064-33]
F. Huda, Hokkaido Univ. (Japan) and Univ. of Riau (Indonesia); I. Kajiwara, Hokkaido Univ. (Japan); N. Hosoya, Shibaura Institute of Technology (Japan)

GUIDED WAVES FOR SHM: NONCONTACT TECHNIQUES

- 9064 0V **Non-contact ultrasonic guided wave inspections of rails** [9064-34]
T. V. Nguyen, S. Mariani, F. Lanza di Scalea, Univ. of California, San Diego (United States)
- 9064 0W **On the processing of leaky guided waves propagating in immersed plates** [9064-35]
A. Bagheri, P. Rizzo, E. Pistone, Univ. of Pittsburgh (United States)

EMI-BASED SHM FOR AEROSPACE APPLICATIONS

- 9064 0X **Combined electromechanical impedance and fiber optic diagnosis of aerospace structures** [9064-36]
J. Schlavin, A. Zagari, R. Clemens, New Mexico Institute of Mining and Technology (United States); R. J. Black, J. Costa, B. Moslehi, R. Patel, V. Sotoudeh, F. Faridian, Intelligent Fiber Optic Systems Corp. (United States)
- 9064 0Y **New applications of a model of electromechanical impedance for SHM** [9064-37]
V. Pavelko, Riga Technical Univ. (Latvia)

GUIDED WAVES FOR SHM-MODELING ASPECTS

- 9064 0Z **Effect of piezoelectric actuator modeling for wave generation in LISA** [9064-38]
K. S. Nadella, C. E. S. Cesnik, Univ. of Michigan (United States)
- 9064 10 **Stiffness Transfer Matrix Method (STMM) for stable dispersion curves solution in anisotropic composites** [9064-39]
A. Kamal, V. Giurgiutiu, Univ. of South Carolina (United States)
- 9064 11 **WFR-2D: an analytical model for PWAS-generated 2D ultrasonic guided wave propagation** [9064-40]
Y. Shen, V. Giurgiutiu, Univ. of South Carolina (United States)
- 9064 12 **Use of augmented reality in aircraft maintenance operations** [9064-41]
L. De Marchi, A. Ceruti, N. Testoni, A. Marzani, A. Liverani, Univ. degli Studi di Bologna (Italy)
- 9064 13 **Vibro-acoustic 3D FE simulations to validate a SAFE-BEM formulation for leaky waves computation** [9064-42]
M. Mazzotti, I. Bartoli, Drexel Univ. (United States); G. Castellazzi, A. Marzani, Univ. degli Studi di Bologna (Italy); Q. Mao, Drexel Univ. (United States)
- 9064 14 **Improved damage imaging in aerospace structures using a piezoceramic hybrid pin-force wave generation model** [9064-43]
P.-C. Ostiguy, N. Quaegebeur, P. Masson, Univ. de Sherbrooke (Canada)

EMI-BASED SHM AND PRACTICAL CONSIDERATIONS

- 9064 15 **Characterisation of CFRP adhesive bonds by electromechanical impedance** [9064-44]
P. H. Malinowski, T. Wandowski, The Szwalski Institute of Fluid-Flow Machinery (Poland); W. M. Ostachowicz, The Szwalski Institute of Fluid-Flow Machinery (Poland) and Warsaw Univ. of Technology (Poland)
- 9064 18 **Monitoring of acoustic emission activity using thin wafer piezoelectric sensors** [9064-48]
B. Trujillo, A. Zagari, D. Meisner, New Mexico Institute of Mining and Technology (United States); S. Momeni, MISTRAS Group, Inc. (United States)

GUIDED WAVES FOR SHM OF COMPOSITES

- 9064 19 **Guided ultrasonic waves for impact damage detection in composite panels** [9064-49]
B. I. S. Murat, P. Khalili, P. Fromme, Univ. College London (United Kingdom)
- 9064 1B **Electromagnetomechanical elastodynamic model for Lamb wave damage quantification in composites** [9064-51]
L. Borkowski, A. Chattopadhyay, Arizona State Univ. (United States)

MODELING ASPECTS: DETERMINISTIC AND STOCHASTIC

- 9064 1C **Structural system identification of buildings by a wave method based on a layered Timoshenko beam model** [9064-52]
M. Ebrahimian, M. I. Todorovska, The Univ. of Southern California (United States)
- 9064 1E **Reliable prediction of micro-anomalies from macro-observables** [9064-54]
S. Das, S. Chakravarty, Univ. at Buffalo (United States)

NONLINEAR SHM TECHNIQUES AND MODELING

- 9064 1F **Fatigue crack detection using nonlinear vibro-acoustic cross-modulations based on the Luxemburg-Gorky effect** [9064-55]
T. Trojnar, A. Klepka, L. Pieczonka, W. J. Staszewski, AGH Univ. of Science and Technology (Poland)
- 9064 1G **Evaluation of frost damage in cement-based materials by a nonlinear elastic wave technique** [9064-56]
J. N. Eiras, Univ. Politècnica de València (Spain); T. Kundu, The Univ. of Arizona (United States); J. S. Popovics, Univ. of Illinois at Urbana-Champaign (United States); J. Monzó, L. Soriano, J. Payá, Univ. Politècnica de València (Spain)
- 9064 1I **Experiments on a wind turbine blade testing an indication for damage using the causal and anti-causal Green's function reconstructed from a diffuse field** [9064-58]
J. D. Tippmann, F. Lanza di Scalea, Univ. of California, San Diego (United States)
- 9064 1J **Local computational strategies for predicting wave propagation in nonlinear media** [9064-59]
M. J. Leamy, Georgia Institute of Technology (United States); T. B. Atrusson, EDF (France); W. J. Staszewski, T. Uhl, P. Packo, AGH Univ. of Science and Technology (Poland)

CIVIL INFRASTRUCTURE: PIPE, RAIL, CONCRETE, AND BUILDING

- 9064 1M **Structural health monitoring of pipelines rehabilitated with lining technology** [9064-62]
A. Farhidzadeh, E. Dehghan-Niri, S. Salamone, Univ. at Buffalo (United States)
- 9064 1O **Temperature and axial stress effects in electromechanical-impedance-method-based structural health monitoring** [9064-64]
X. Zhu, F. Lanza Di Scalea, Univ. of California, San Diego (United States); M. Fateh, Federal Railroad Administration (United States)
- 9064 1P **Determination of optimal sampling rate and Hankel matrix size for subspace SI in shear building under earthquake** [9064-65]
S.-K. Park, Carnegie Mellon Univ. (United States); H. W. Park, Dong-A Univ. (Korea, Republic of)

- 9064 1Q **Characterization of oxidative aging in asphalt concrete pavements using its complex moduli** [9064-66]
M. McGovern, B. Behnia, B. Hill, W. G. Buttlar, H. Reis, Univ. of Illinois at Urbana-Champaign (United States)
- 9064 1R **Effect of applied load on the nondestructive measurement of concrete strength** [9064-67]
E. Mahmoudabadi, U. Amjad, T. Kundu, H. Saadatmanesh, The Univ. of Arizona (United States)

METAMATERIAL II

- 9064 1V **Active acoustic metamaterial with fractional derivative controller** [9064-71]
S. Althamer, A. Baz, Univ. of Maryland, College Park (United States)
- 9064 1W **Wave propagation in 2D magneto-elastic kagome lattices** [9064-72]
M. D. Schaeffer, M. Ruzzene, Georgia Institute of Technology (United States)
- 9064 1X **Acoustic metamaterial structures based on multi-frequency vibration absorbers** [9064-73]
P. Pai, H. Peng, Univ. of Missouri-Columbia (United States)
- 9064 1Y **Metamaterial structures with periodic local resonances** [9064-74]
M. Nouh, Univ. of Maryland, College Park (United States); O. Aldraihem, King Saud Univ. (Saudi Arabia) and King Abdulaziz City for Science of Technology (Saudi Arabia); A. Baz, Univ. of Maryland, College Park (United States)
- 9064 21 **Grazing incidence modeling of a metamaterial-inspired dual-resonance acoustic liner** [9064-105]
B. S. Beck, National Institute of Aerospace (United States) and NASA Langley Research Ctr. (United States)

GUIDED WAVES FOR SHM IN AEROSPACE APPLICATIONS I

- 9064 22 **Damage location by ultrasonic Lamb waves and piezoelectric rosettes** [9064-77]
P. Kijanka, AGH Univ. of Science and Technology (Poland); A. Manohar, F. Lanza di Scalea, Univ. of California, San Diego (United States); W. J. Staszewski, AGH Univ. of Science and Technology (Poland)
- 9064 23 **Guided wave interaction with defects in isotropic and composite plates** [9064-78]
M. B. Obenchain, C. E. S. Cesnik, Univ. of Michigan (United States)
- 9064 24 **Lamb wave based damage detection using Matching Pursuit and Support Vector Machine classifier** [9064-79]
S. Agarwal, M. Mitra, Indian Institute of Technology Bombay (India)

GUIDED WAVES FOR SHM IN AEROSPACE APPLICATIONS II

- 9064 26 **Guided ultrasonic waves for the monitoring of hidden fatigue crack growth in multi-layer aerospace structures** [9064-81]
I. Najjarre, E. Kostson, P. Fromme, Univ. College London (United Kingdom)
- 9064 27 **Approaches to hybrid SHM and NDE of composite aerospace structures** [9064-82]
J. E. Michaels, A. J. Dawson, T. E. Michaels, M. Ruzzene, Georgia Institute of Technology (United States)
- 9064 28 **Monitoring bolt torque levels through signal processing of full-field ultrasonic data** [9064-83]
C. Haynes, M. Yeager, M. Todd, Univ. of California, San Diego (United States); J.-R. Lee, Chonbuk National Univ. (Korea, Republic of)
- 9064 29 **Cross-validated detection of crack initiation in aerospace materials** [9064-84]
P. A. Vanniamparambil, J. Cuadra, U. Guclu, I. Bartoli, A. Kontsos, Drexel Univ. (United States)
- 9064 2A **2D aperture synthesis for Lamb wave imaging using co-arrays** [9064-85]
L. Ambrozinski, AGH Univ. of Science and Technology (Poland); T. Stepinski, AGH Univ. of Science and Technology (Poland) and Uppsala Univ. (Sweden); T. Uhl, AGH Univ. of Science and Technology (Poland)
- 9064 2B **Estimation of fatigue damage parameters using guided wave technique** [9064-86]
V. T. Rathod, D. Roy Mahapatra, Indian Institute of Science Bangalore (India)

GUIDED WAVE-BASED SHM AND OTHER ADVANCED TECHNIQUES I

- 9064 2F **Monitoring of corrosion damage using high-frequency guided ultrasonic waves** [9064-89]
D. Chew, P. Fromme, Univ. College London (United Kingdom)
- 9064 2H **A vision-based technique for damage assessment of reinforced concrete structures** [9064-91]
A. Farhidzadeh, A. Ebrahimkhanlou, S. Salamone, Univ. at Buffalo (United States)

POSTER SESSION

- 9064 2L **Research on prognostics and health management technology of numerical control equipment** [9064-95]
R. Zheng, H. Sun, Jiangsu Automation Research Institute (China); Y. Zhang, Jilin Univ. (China)
- 9064 2M **The phase transition method for SAR measurement in MRI** [9064-96]
R. Romano, R. Canonico, F. Acernese, G. Giordano, F. Barone, Univ. degli Studi di Salerno (Italy)
- 9064 2N **Biological NMR FIDs and spectra normalization** [9064-97]
R. Romano, R. Canonico, F. Acernese, G. Giordano, F. Barone, Univ. degli Studi di Salerno (Italy)

- 9064 2O **Damage detection and locating using tone burst and continuous excitation modulation method** [9064-98]
Z. Li, Z. Wang, L. Xiao, W. Qu, Wuhan Univ. (China)
- 9064 2P **Nonlinear ball chain waveguides for acoustic emission and ultrasound sensing of ablation** [9064-99]
S. H. Pearson, D. Huston, The Univ. of Vermont (United States)
- 9064 2Q **Dual-durometer soft suction foot robot for concrete inspection** [9064-100]
D. Huston, D. Burns, J. Gardner-Morse, P. Montane, E. Angola, The Univ. of Vermont (United States)
- 9064 2S **Optical feather and foil for shape and dynamic load sensing of critical flight surfaces** [9064-106]
R. J. Black, J. M. Costa, F. Faridian, B. Moslehi, M. Pakmehr, Intelligent Fiber Optic Systems Corp. (United States); J. Schlavin, New Mexico Institute of Mining and Technology (United States); V. Sotoudeh, Intelligent Fiber Optic Systems Corp. (United States); A. Zagrai, New Mexico Institute of Mining and Technology (United States)

Author Index

Conference Committee

Symposium Chairs

Victor Giurgiutiu, University of South Carolina (United States)
Christopher S. Lynch, University of California, Los Angeles
(United States)

Symposium Co-chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Theodoros E. Matikas, University of Ioannina (Greece)

Conference Chair

Tribikram Kundu, The University of Arizona (United States)

Conference Co-chair

Wolfgang Grill, ASI Analog Speed Instruments GmbH (Germany)

Conference Program Committee

Douglas E. Adams, Purdue University (United States)
Sourav Banerjee, University of South Carolina (United States)
Yoseph Bar-Cohen, Jet Propulsion Laboratory (United States)
Fu-Kuo Chang, Stanford University (United States)
Anthony J. Croxford, University of Bristol (United Kingdom)
Paul Fromme, University College London (United Kingdom)
Victor Giurgiutiu, University of South Carolina (United States)
Daniel J. Guyomar, Institut National des Sciences Appliquées
de Lyon (France)
Shivan Haran, Arkansas State University (United States)
Guoliang Huang, University of Arkansas at Little Rock (United States)
Xiaoning Jiang, North Carolina State University (United States)
Sridhar Krishnaswamy, Northwestern University (United States)
Francesco Lanza di Scalea, University of California, San Diego
(United States)
Jerome P. Lynch, University of Michigan (United States)
Jennifer E. Michaels, Georgia Institute of Technology (United States)
Won-Bae Na, Pukyong National University (Korea, Republic of)
Christopher Nizrecki, University of Massachusetts Lowell
(United States)
Wieslaw Mieczyslaw Ostachowicz, The Szewalski Institute of Fluid-
Flow Machinery (Poland)

Paul D. Panetta, Applied Research Associates, Inc. (United States)
Perngjin Frank Pai, University of Missouri-Columbia (United States)
Xinlin P. Qing, Commercial Aircraft Corporation of China, Ltd.
 (China)
Henrique L. Reis, University of Illinois at Urbana-Champaign
 (United States)
Piervincenzo Rizzo, University of Pittsburgh (United States)
Hoon Sohn, KAIST (Korea, Republic of)
Wieslaw Jerzy Staszewski, AGH University of Science and
 Technology (Poland)
Nobuo Takeda, The University of Tokyo (Japan)
Michael D. Todd, University of California, San Diego (United States)
Wei-Chih Wang, University of Washington (United States)
Andrei N. Zagrai, New Mexico Institute of Mining and Technology
 (United States)
George Zentai, Varian Medical Systems, Inc. (United States)

Session Chairs

- 1a Nonlinear Guided Waves and Other Nonlinear Techniques
Wolfgang Grill, ASI Analog Speed Instruments GmbH (Germany)
- 1b SHM of Civil Infrastructure: Bridge Monitoring
Piervincenzo Rizzo, University of Pittsburgh (United States)
George Zentai, Varian Medical Systems, Inc. (United States)
- 2a SHM of Composites: Experiment and Modeling
Paul Fromme, University College London (United Kingdom)
Wieslaw Mieczyslaw Ostachowicz, The Szwedowski Institute of Fluid-
 Flow Machinery (Poland)
- 2b Biomedical Applications
Xiaoning Jiang, North Carolina State University (United States)
- 3a Emerging and Futuristic Techniques/Instruments
George Zentai, Varian Medical Systems, Inc. (United States)
Wei-Chih Wang, University of Washington (United States)
- 3b Vibration-Based SHM
Henrique L. Reis, University of Illinois at Urbana-Champaign
 (United States)
Perngjin Frank Pai, University of Missouri-Columbia (United States)

- 4a Guided Waves for SHM: Noncontact Techniques
Wieslaw Jerzy Staszewski, AGH University of Science and Technology (Poland)
- 4b EMI-Based SHM for Aerospace Applications
Christopher Niezrecki, University of Massachusetts Lowell (United States)
Andrei N. Zagrai, New Mexico Institute of Mining and Technology (United States)
- 5a Guided Waves for SHM-Modeling Aspects
Wolfgang Grill, ASI Analog Speed Instruments GmbH (Germany)
- 5b EMI-Based SHM and Practical Considerations
Andrei N. Zagrai, New Mexico Institute of Mining and Technology (United States)
Lingyu Yu, University of South Carolina (United States)
- 6a Guided Waves for SHM of Composites
Jennifer E. Michaels, Georgia Institute of Technology (United States)
- 6b Modeling Aspects: Deterministic and Stochastic
Michael D. Todd, University of California, San Diego (United States)
- 7a Nonlinear SHM Techniques and Modeling
Sourav Banerjee, University of South Carolina (United States)
- 7b Civil Infrastructure: Pipe, Rail, Concrete, and Building
Henrique L. Reis, University of Illinois at Urbana-Champaign (United States)
- 8 Metamaterial I
Guoliang Huang, University of Arkansas at Little Rock (United States)
- 9 Metamaterial II
Guoliang Huang, University of Arkansas at Little Rock (United States)
- 10 Guided Waves for SHM in Aerospace Applications I
Sourav Banerjee, University of South Carolina (United States)
- 11 Guided Waves for SHM in Aerospace Applications II
Piervincenzo Rizzo, University of Pittsburgh (United States)
Xuan Zhu, University of California, San Diego (United States)
- 12 Metamaterial III
Paul Fromme, University College London (United Kingdom)

- 13 Guided Wave-Based SHM and Other Advanced Techniques I
Wieslaw Mieczyslaw Ostachowicz, The Szewalski Institute of Fluid-
Flow Machinery (Poland)
Zhongqing Su, The Hong Kong Polytechnic University (Hong Kong,
China)
- 14 Guided Wave-Based SHM and Other Advanced Techniques II
Wieslaw Mieczyslaw Ostachowicz, The Szewalski Institute of Fluid-
Flow Machinery (Poland)
