Proc. of SPIE Vol. 9079 907901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

DATA-TO-DECISION (D2D)

9079 02	The Warfighter Associate: decision-support software agent for the management of intelligence, surveillance, and reconnaissance (ISR) assets [9079-1] N. Buchler, L. R. Marusich, U.S. Army Research Lab. (United States); S. Sokoloff, Velocity Products, Inc. (United States)
9079 03	Decisions-to-Data using Level 5 information fusion [9079-2] E. Blasch, Air Force Research Lab. (United States)
9079 04	Application of the dynamically allocated virtual clustering management system to emulated tactical network experimentation [9079-3] K. Marcus, U.S. Army Research Lab. (United States)
9079 05	Agile sensor tasking for CoIST using natural language knowledge representation and reasoning [9079-4] D. Braines, IBM United Kingdom Ltd. (United Kingdom); G. de Mel, IBM Thomas J. Watson Research Ctr. (United States); C. Gwilliams, C. Parizas, D. Pizzocaro, Cardiff Univ. (United Kingdom); F. Bergamaschi, IBM United Kingdom Ltd. (United Kingdom); A. Preece, Cardiff Univ. (United Kingdom)
9079 06	Evaluation and prioritization of scientific data based on its level of support or refutation of an experimental thesis [9079-5] J. Straub, The Univ. of North Dakota (United States)
9079 07	Secure complex event processing in a heterogeneous and dynamic network [9079-6] T. Buddhika, I. Ray, Colorado State Univ. (United States); M. Linderman, Air Force Research Lab. (United States); A. Jayasumana, Colorado State Univ. (United States)
9079 08	Practical use of a framework for network science experimentation [9079-7] A. Toth, U.S. Army Research Lab. (United States); F. Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

PERSISTENT SURVEILLANCE

9079 0A	Architecture for persistent surveillance using mast and UAS-based autonomous sensing with bio-inspired technologies [9079-9] J. Burman, Intelligent Recognition Systems (United States)
---------	---

- 9079 0B **Real-time movement detection and analysis for video surveillance applications** [9079-10]
N. Hueber, C. Hennequin, P. Raymond, J.-P. Moeglin, Institut Franco-Allemand de
Recherches de Saint-Louis (France)
- 9079 0C **Robust human detection, tracking, and recognition in crowded urban areas** [9079-11]
H.-W. Chen, M. McGurr, Booz Allen Hamilton Inc. (United States)
- 9079 0D **Advanced MicroObserver UGS integration with and cueing of the BattleHawk squad level
loitering munition and UAV** [9079-12]
B. Steadman, J. Finklea, J. Kershaw, C. Loughman, P. Shaffner, D. Frost, S. Deller, TEXTRON
Defense Systems (United States)

ANOMALY DETERMINATION

- 9079 0F **An algorithm for monitoring the traffic on a less travelled road using multi-modal sensor
suite** [9079-14]
T. Damarla, G. Chatters, B. Liss, H. Vu, U.S. Army Research Lab. (United States);
J. M. Sabatier, Univ. of Mississippi (United States)
- 9079 0G **Actively learning to distinguish suspicious from innocuous anomalies in a batch of vehicle
tracks** [9079-15]
Z. Qiu, D. J. Miller, The Pennsylvania State Univ. (United States); B. Stieber, T. Fair, Toyon
Research Corp. (United States)

ANOMALY DETERMINATION

- 9079 0L **Open standards for unattended sensors (OSUS) power managed controller** [9079-21]
M. Rohrer, R. Porter, R. Fish, R. Knobler, McQ, Inc. (United States)

TARGET CLASSIFICATION AND IDENTIFICATION

- 9079 0M **Distributed fusion and automated sensor tasking in ISR systems** [9079-22]
J. Preden, R. Pahtma, S. Astapov, J. Ehala, A. Riid, L. Motus, Tallinn Univ. of Technology
(Estonia)
- 9079 0N **Exploiting vibration-based spectral signatures for automatic target recognition** [9079-23]
L. Crider, Arizona State Univ. (United States); S. Kangas, Etegent Technologies, Ltd. (United
States)
- 9079 0O **An end-to-end vehicle classification pipeline using vibrometry data** [9079-24]
A. Smith, Wright State Univ. (United States); O. Mendoza-Schrock, Air Force Research Lab.
(United States); S. Kangas, Etegent Technologies, Ltd. (United States); M. Dierking, Air Force
Research Lab. (United States); A. Shaw, Wright State Univ. (United States)
- 9079 0P **Long-range dismount activity classification: LODAC** [9079-25]
D. Garagic, J. Peskoe, F. Liu, M. Cuevas, BAE Systems (United States); A. M. Freeman, Air
Force Research Lab. (United States); B. J. Rhodes, BAE Systems (United States)

- 9079 0Q **Laser vibrometry exploitation for vehicle identification** [9079-29]
A. Nolan, A. Lingg, S. Goley, K. Sigmund, S. Kangas, Etegent Technologies, Ltd. (United States)
- 9079 0R **Gender classification under extended operating conditions** [9079-26]
H. N. Rude, M. Rizki, Wright State Univ. (United States)
- 9079 0S **Gender classification from video under challenging operating conditions** [9079-27]
O. Mendoza-Schrock, Air Force Research Lab. (United States); G. Dong, Wright State Univ. (United States)
- 9079 0T **Deep learning for image classification** [9079-28]
R. McCoppin, M. Rizki, Wright State Univ. (United States)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security (United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chair

Michael A. Kolodny, U.S. Army Research Laboratory (United States)

Conference Co-chairs

Tien Pham, U.S. Army Research Laboratory (United States)

Kevin L. Priddy, Air Force Research Laboratory (United States)

Conference Program Committee

Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

Robert Heathcock, U.S. Defense Intelligence Agency (United States)

Olga Mendoza-Schrock, Air Force Research Laboratory
(United States)

Gavin Pearson, Defence Science and Technology Laboratory
(United Kingdom)

King K. Siu, U.S. Army Armament Research, Development and
Engineering Center (United States)

Raja Suresh, General Dynamics Advanced Information Systems
(United States)

Robert Williams, Air Force Research Laboratory (United States)

Session Chairs

- 1 Data-to-Decision (D2D)
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
Tien Pham, U.S. Army Research Laboratory (United States)
- 2 Persistent Surveillance
Gavin Pearson, Defence Science and Technology Laboratory
(United Kingdom)
Flavio Bergamaschi, IBM United Kingdom Ltd. (United Kingdom)

- 3 Anomaly Determination
King K. Siu, U.S. Army Armament Research, Development and Engineering Center (United States)
Olga Mendoza-Schrock, Air Force Research Laboratory (United States)
- 4 Interoperability
Tien Pham, U.S. Army Research Laboratory (United States)
King K. Siu, U.S. Army Armament Research, Development and Engineering Center (United States)
- 5 Target Classification and Identification
Olga Mendoza-Schrock, Air Force Research Laboratory (United States)
Kevin L. Priddy, Air Force Research Laboratory (United States)

Introduction

In its fifth year as part of the SPIE Defense and Security Sensing Symposium, held 5–9 May 2014, in Baltimore, Maryland, the goal of this conference was to bring together the technical, operational (users), and policy community and provide a forum for the discussion of problems, issues, and technology involving interoperability for persistent intelligence, surveillance, and reconnaissance (ISR). This Conference is about promoting and advancing technology and interoperability for persistent ISR, resulting in enhanced situational understanding for the warfighter decision makers!

The conference hosted 21 technical papers in oral presentations and was highlighted by two keynote speakers who are the U.S. leads for Unified Vision, which is a multinational, biannual NATO exercise that focuses on coalition ISR interoperability. The Conference featured five different session topics, including Data-to-Decision, Persistent Surveillance, Anomaly Determination, Interoperability and Target Classification/Identification.

I hope you find the proceedings both provocative and informative. I am looking forward to an even more exciting SPIE Defense and Security Sensing Symposium in 2015 and hope that everyone will join us.

Michael A. Kolodny
