edited by Jeff J. Güell, Jack Sanders-Reed, Proc. of SPIE Vol. 9087, 908701
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2074633

Proc. of SPIE Vol. 9087 908701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	Conference Committee
vii	Introduction

DVE SENSORS I

9087 02	3D surface imaging through visual obscurants using a sub-THz radar [9087-1] J. Fritz, Colorado Engineering, Inc. (United States); A. J. Gasiewski, K. Zhang, Univ. of Colorado at Boulder (United States)
9087 03	Overview of the commercial OPAL LiDAR optimized for rotorcraft platforms operating in degraded visual environments [9087-2] P. Church, K. Borribanbunpotkat, E. Trickey, P. Iles, M. Sekerka, Neptec Technologies Corp. (Canada)
9087 04	3D Flash LiDAR vision systems for imaging in degraded visual environments [9087-26] T. E. Laux, C.-I. Chen, Advanced Scientific Concepts, Inc. (United States)

DVE SENSORS II

9087 06	Imaging through obscurants with a heterodyne detection-based ladar system [9087-5] R. R. Reibel, P. A. Roos, B. M. Kaylor, T. J. Berg, J. R. Curry, Bridger Photonics, Inc. (United States)
9087 07	Three-dimensional landing zone joint capability technology demonstration [9087-6] J. Savage, S. Goodrich, Air Force Research Lab. (United States); C. Ott, Z. Szoboszlai, U.S. Army Aeroflightdynamics Directorate (United States); J. Soukup, 413th Flight Test Squadron (United States); A. Perez, Raytheon Space & Airborne Systems (United States); H. N. Burns, H. N. Burns Engineering Corp. (United States)
9087 08	REVS: a radar-based enhanced vision system for degraded visual environments [9087-7] A. Brailovsky, J. Bode, P. Cariani, J. Cross, J. Gleason, V. Khodos, G. Macias, R. Merrill, C. Randall, D. Rudy, Sierra Nevada Corp. (United States)
9087 09	System modelling of a real-time passive millimeter-wave imager to be used for base security and helicopter navigation in degraded visual environments [9087-8] C. D. Cameron, R. N. Anderton, J. G. Burnett, QinetiQ Ltd. (United Kingdom); J. J. Güell, J. N. Sanders-Reed, D. J. Yelton, The Boeing Co. (United States)

DAS/PANORAMIC VISION SYSTEMS

9087 0A	HALO: a reconfigurable image enhancement and multi-sensor fusion system [9087-11] F. Wu, RFEL Ltd. (United Kingdom); D. L. Hickman, Tektonex Ltd. (United Kingdom); S. C. J. Parker, RFEL Ltd. (United Kingdom)
---------	---

- 9087 OB **DVE: ground and airborne visualization functionalities** [9087-12]
N. Barratt, GE Intelligent Platforms (United Kingdom); O. Mise, D. Franklin, GE Intelligent Platforms (United States); A. Preece, GE Intelligent Platforms (United Kingdom); L. Schaffer, GE Intelligent Platforms (United States)

SYSTEMS EVALUATION AND METRICS

- 9087 OD **Degraded visual environment image/video quality metrics** [9087-14]
D. D. Baumgartner, Northrop Grumman Electronic Systems (United States); J. B. Brown, E. L. Jacobs, Univ. of Memphis (United States); B. J. Schachter, Northrop Grumman Electronic Systems (United States)
- 9087 OF **External Vision Systems (XVS) proof-of-concept flight test evaluation** [9087-16]
K. J. Shelton, S. P. Williams, L. J. Kramer, J. J. Arthur, L. Prinzel III, R. E. Bailey, NASA Langley Research Ctr. (United States)
- 9087 OG **Visual advantage of enhanced flight vision system during NextGen flight test evaluation** [9087-17]
L. J. Kramer, S. J. Harrison, R. E. Bailey, K. J. Shelton, K. K. E. Ellis, NASA Langley Research Ctr. (United States)

SYNTHETIC VISION, SYMBOLOGY, AND CUEING

- 9087 OI **Sensor-enhanced 3D conformal cueing for safe and reliable HC operation in DVE in all flight phases** [9087-19]
T. Münsterer, T. Schafhitzel, M. Strobel, P. Völschow, S. Klasen, Airbus Defence and Space (Germany); F. Eisenkeil, Univ. Konstanz (Germany)
- 9087 OJ **Visual-conformal display format for helicopter guidance** [9087-20]
H.-U. Doepler, S. Schmerwitz, T. Lueken, German Aerospace Ctr. (Germany)
- 9087 OK **Synthetic vision meets ARINC 661: feasibility study of the integration of terrain visualization in ARINC 661 avionic displays** [9087-21]
E. Lipinski, L. Ebrecht, German Aerospace Ctr. (Germany)

SYNTHETIC VISION, SYMBOLOGY, AND CUEING II

- 9087 OM **Identifying opportune landing sites in degraded visual environments with terrain and cultural databases** [9087-23]
M. Moody, R. Fisher, J. K. Little, The Boeing Co. (United States)
- 9087 ON **Detection of helicopter landing sites in unprepared terrain** [9087-24]
N. Peinecke, German Aerospace Ctr. (Germany)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security
(United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chairs

Jeff J. Güell, The Boeing Company (United States)
Jack Sanders-Reed, The Boeing Company (United States)

Conference Program Committee

Jarvis J. Arthur III, NASA Langley Research Center (United States)
Cory Dixon, Stratom, Inc. (United States)
Thomas R. Münsterer, Airbus Defence and Space (Germany)
Niklas Peinecke, German Aerospace Center (Germany)
Christian Pschierer, Jeppesen GmbH (Germany)
Carlo L. Tiana, Rockwell Collins, Inc. (United States)

Session Chairs

- 1 DVE Sensors I
Thomas R. Münsterer, Airbus Defence and Space (Germany)
- 2 Army: DVE Overview
Jeff J. Güell, The Boeing Company (United States)
- 3 DVE Sensors II
Thomas R. Münsterer, Airbus Defence and Space (Germany)
- 4 DAS/Panoramic Vision Systems
Carlo L. Tiana, Rockwell Collins, Inc. (United States)
- 5 USAF: Perspective on Challenges for DVE
Jack Sanders-Reed, The Boeing Company (United States)
- 6 Systems Evaluation and Metrics
Jarvis J. Arthur III, NASA Langley Research Center (United States)

- 7 Synthetic Vision, Symbology, and Cueing
Jeff J. Güell, The Boeing Company (United States)
- 8 ONR: Long Range ISR in DVE
Jack Sanders-Reed, The Boeing Company (United States)
- 9 Synthetic Vision, Symbology, and Cueing II
Cory Dixon, Stratom, Inc. (United States)
- 10 DARPA: Beyond the Landing Problem
Jeff J. Güell, The Boeing Company (United States)

Introduction

This is the 20th edition of the Degraded Visual Environments; Enhanced, Synthetic, and External Vision Solutions conference. Papers from the first two conferences were published in *Image Sensing, Processing, and Understanding for Control and Guidance of Aerospace Vehicles*, SPIE Proceedings Vol. 2220 (1994) and *Synthetic Vision for Vehicles Guidance and Control*, Vol. 2463 (1995). The subsequent conferences, during the years 1996–2011, were titled *Enhanced and Synthetic Vision*. While the name of the Conference has been reshaping as technology and the challenges have changed, the focus is still to offer a forum to discuss enhanced and synthetic vision systems technologies with today's emphasis in platform operations in degraded visual environments. The primary goal is to provide research and development guidance and alignment between academia, industry, and government organizations, and to raise awareness of emerging concepts, capabilities, testing, standards, and requirements for enhanced and synthetic vision solutions.

Jeff J. Güell
