SPIE

Volume 9094

Proceedings of SPIE 0277-786X, V. 9094

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Pattern Recognition XXV, edited by David Casasent, Tien-Hsin Chao, Proc. of SPIE Vol. 9094,
909401 · © 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2064757

Proc. of SPIE Vol. 9094 909401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optical Pattern Recognition XXV*, edited by David Casasent, Tien-Hsin Chao, Proceedings of SPIE Vol. 9094 (SPIE, Bellingham, WA, 2014) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 INVITED PAPERS

- 9094 02 **High-speed optical processing using digital micromirror device (Invited Paper)** [9094-1]
T.-H. Chao, T. Lu, Jet Propulsion Lab. (United States); B. Walker, Georgia Institute of Technology (United States); G. Reyes, Jet Propulsion Lab. (United States)
- 9094 04 **Recent advances in correlation filter theory and application (Invited Paper)** [9094-3]
B. V. K. Vijaya Kumar, J. A. Fernandez, Carnegie Mellon Univ. (United States); A. Rodriguez, Air Force Research Lab. (United States); V. N. Boddeti, Carnegie Mellon Univ. (United States)
- 9094 05 **Performance comparison of photorefractive two-beam coupling correlator with optimal filter based correlators (Invited Paper)** [9094-4]
J. Khoury, Air Force Research Lab. (United States); M. S. Alam, Univ. of South Alabama (United States); P. P. Banerjee, G. T. Nehmetallah, Univ. of Dayton (United States); W. M. Durant, D. M. Martin, Univ. of South Alabama (United States); J. Donoghue, Solid State Scientific Corp. (United States); N. Peyghambarian, College of Optical Sciences, The Univ. of Arizona (United States); M. Yamamoto, Nitto Denko Technical Corp. (United States)

SESSION 2 NOVEL PATTERN RECOGNITION AND CORRELATOR SYSTEMS

- 9094 07 **GPU processing for parallel image processing and real-time object recognition** [9094-6]
K. Vincent, California State Univ. (United States); D. Nguyen, Saddleback College (United States); B. Walker, Georgia Institute of Technology (United States); T. Lu, T.-H. Chao, Jet Propulsion Lab. (United States)
- 9094 08 **Local binary patterns preprocessing for face identification/verification using the VanderLugt correlator** [9094-7]
T. Napoléon, A. AlFalou, ISEN Brest (France)
- 9094 09 **Performance evaluation of photorefractive two-beam coupling joint transform correlator** [9094-8]
G. Nehmetallah, P. P. Banerjee, Univ. of Dayton (United States); M. Alam, Univ. of South Alabama (United States); J. Khoury, Air Force Research Lab. (United States)

SESSION 3 OPTICAL TRACKING SYSTEMS

- 9094 0A **A novel multitracking system for the evaluation of high-level swimmers performances** [9094-9]
D. Benarab, T. Napoléon, A. Alfalou, ISEN Brest (France); A. Verney, ACTRIS (France); P. Hellard, FFN (France)
- 9094 0B **Target tracking using log-polar transform-based shifted phase-encoded joint transform correlation** [9094-10]
M. N. Islam, W. T. Bitew, The State Univ. of New York (United States)
- 9094 0C **Performance evaluation of optimal filters for target detection using SAR imagery** [9094-11]
M. S. Alam, Univ. of South Alabama (United States); J. Khoury, Air Force Research Lab. (United States); P. P. Banerjee, Univ. of Dayton (United States); W. M. Durant, D. M. Martin, Univ. of South Alabama (United States); G. T. Nehmetallah, Univ. of Dayton (United States)
- 9094 0D **A proposed optical system for implementing the novel super-fast image processing scheme: the LPED method** [9094-13]
C. J. Hu, Southern Illinois Univ. at Carbondale (United States) and SunnyFuture Software (United States)

SESSION 4 NOVEL OPTICAL COMMUNICATIONS AND IMAGE PROCESSING SYSTEMS AND APPLICATIONS

- 9094 0E **Addressing channel noise and bit rate in a multi-channel free space optical communication system** [9094-14]
B. Walker, Georgia Institute of Technology (United States); T. Lu, Jet Propulsion Lab. (United States); C. Costello, California Polytechnic State Univ. (United States); G. Reyes, T.-H. Chao, Jet Propulsion Lab. (United States)
- 9094 0F **A rotation-invariant pattern recognition using spectral fringe-adjusted joint transform correlator and histogram representation** [9094-15]
P. Sidike, T. Aspiras, V. K. Asari, Univ. of Dayton (United States); M. S. Alam, Univ. of South Alabama (United States)
- 9094 0G **Local directional pattern of phase congruency features for illumination invariant face recognition** [9094-16]
A. E. Essa, V. K. Asari, Univ. of Dayton (United States)
- 9094 0H **A novel two-pattern full lateral resolution structured light illumination method** [9094-17]
M. Wang, L. Hassebrook, Univ. of Kentucky (United States)
- 9094 0J **Wavelet analysis for compressed image sensing using matrices** [9094-19]
A. Sokolnikov, Visual Solutions and Applications (United States)

POSTER SESSION

- 9094 0K **MINACE filter: variants of realization in 4-f correlator** [9094-20]
D. V. Shaulskiy, N. N. Evtikhiev, R. S. Starikov, S. N. Starikov, E. Y. Zlokazov, National Research Nuclear Univ. MEPhI (Russian Federation)

9094 0L **Invariant correlation filters comparison for multiclass recognition of scaled objects**
[9094-21]
P. A. Ivanov, Yaroslavl State Technical Univ. (Russian Federation)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, & Security (United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chairs

David Casasent, Carnegie Mellon University (United States)

Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

Conference Program Committee

Mohammad S. Alam, University of South Alabama (United States)

Don A. Gregory, The University of Alabama in Huntsville (United States)

Bahram Javidi, University of Connecticut (United States)

B. V. K. Vijaya Kumar, Carnegie Mellon University (United States)

Yunlong Sheng, Université Laval (Canada)

Robert C. Stirbl, Jet Propulsion Laboratory (United States)

Ashit Talukder, National Institute of Standards and Technology
(United States)

Rupert C. Young, University of Sussex (United Kingdom)

Session Chairs

1 Invited Papers

David Casasent, Carnegie Mellon University (United States)

2 Novel Pattern Recognition and Correlator Systems

David Casasent, Carnegie Mellon University (United States)

Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

3 Optical Tracking Systems

Mohammad S. Alam, University of South Alabama (United States)

Tien-Hsin Chao, Jet Propulsion Laboratory (United States)

4 Novel Optical Communications and Image Processing Systems and Applications

B. V. K. Vijaya Kumar, Carnegie Mellon University (United States)

Tien-Hsin Chao, Jet Propulsion Laboratory (United States)
