Volume 9097

Proceedings of SPIE 0277-786X, V. 9097

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Cyber Sensing 2014, edited by Igor V. Ternovskiy, Peter Chin, Proc. of SPIE Vol. 9097, 909701
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2074552

Proc. of SPIE Vol. 9097 909701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v *Conference Committee*

SESSION 1 DETECTION AND PREVENTION ISSUES AT CYBER SENSING

- 9097 02 **Applying hardware-based machine learning to signature-based network intrusion detection** [9097-1]
G. Payer, ICF International (United States); C. McCormick, CogniMem Technologies, Inc. (United States); R. Harang, ICF International (United States)
- 9097 03 **Sensing network for electromagnetic fields generated by seismic activities** [9097-19]
N. I. Gershenzon, G. Bambakidis, Wright State Univ. (United States); I. Ternovskiy, Air Force Research Lab. (United States)
- 9097 04 **Proactive malware detection** [9097-3]
J. Gloster, M. Diep, D. Dredden, M. Mix, M. Olsen, B. Price, B. Steil, The Van Dyke Technology Group, Inc. (United States)
- 9097 05 **A smart grid simulation testbed using Matlab/Simulink** [9097-4]
S. Mallapuram, P. Moulema, W. Yu, Towson Univ. (United States)

SESSION 2 SOCIAL AND METHODOLOGICAL ASPECTS OF CYBER SENSING

- 9097 07 **Classification of group behaviors in social media via social behavior grammars** [9097-6]
G. Levchuk, L. Getoor, M. Smith, Aptima Inc. (United States)
- 9097 08 **Challenges to inferring causality from viral information dispersion in dynamic social networks** [9097-7]
J. Ternovski, Univ. of Oxford (United Kingdom)
- 9097 0A **Three tenets for secure cyber-physical system design and assessment** [9097-9]
J. Hughes, Tenet 3, LLC (United States); G. Cybenko, Dartmouth College (United States)

SESSION 3 VULNERABILITIES AND RISK ASSESSMENT IN CYBER SENSING

- 9097 0B **Securing radars using secure wireless sensor networking** [9097-10]
D. Tahmouh, Univ. of Maryland, Univ. College (United States) and U.S. Army Research Lab. (United States)
- 9097 0C **Designing for resilience** [9097-11]
A. Dwivedi, Johns Hopkins Univ. Applied Physics Lab. (United States)

SESSION 4 ENABLING TECHNOLOGIES FOR CYBER SENSING

- 9097 0F **Main control computer security model of closed network systems protection against cyber attacks** [9097-14]
B. Seymen, Turkish Air Force (Turkey)
- 9097 0G **Improvements of cyberspace and effects to the battlefield** [9097-15]
M. Gedikli, Turkish Air War College (Turkey)
- 9097 0H **Efficient non-resonant absorption of electromagnetic radiation in thin cylindrical targets: experimental evidence** [9097-17]
A. Akhmeteli, LTASolid Inc. (United States); N. G. Kokodiy, B. V. Safronov, V. P. Balkashin, I. A. Priz, Kharkov National Univ. (Ukraine); A. Tarasevitch, Univ. Duisburg-Essen (Germany)
- 9097 0I **Micro-mirror array simulation and far-field diffraction analysis** [9097-18]
X. Yuan, S. Liu, Univ. of North Texas (United States); J. D. Schmidt, I. Anisimov, Air Force Research Lab. (United States)
- 9097 0J **Robust volumetric change detection using mutual information with 3D fractals** [9097-2]
M. Rahmes, M. Akbari, R. Henning, J. Pokorny, Harris Corp. (United States)
- 9097 0L **Geometric multi-resolution analysis based classification for high dimensional data** [9097-21]
D. N. Tran, Johns Hopkins Univ. (United States); S. P. Chin, Johns Hopkins Univ. (United States) and Draper Lab. (United States)
- 9097 0M **No-hardware-signature cybersecurity-crypto-module: a resilient cyber defense agent** [9097-22]
A. R. M. Zaghloul, Y. A. Zaghloul, ITR Technologies Inc. (United States)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security
(United States)

Symposium Co-chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Conference Chairs

Igor V. Ternovskiy, Air Force Research Laboratory (United States)

Peter Chin, Draper Laboratory (United States) and Boston University
(United States)

Conference Program Committee

Chad D. Heitzenrater, Air Force Research Laboratory (United States)

Tony C. Kim, Air Force Research Laboratory (United States)

Session Chairs

- 1 Detection and Prevention Issues at Cyber Sensing
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
- 2 Social and Methodological Aspects of Cyber Sensing
Peter Chin, Draper Laboratory (United States) and Boston University
(United States)
- 3 Vulnerabilities and Risk Assessment in Cyber Sensing
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
- 4 Enabling Technologies for Cyber Sensing
Igor V. Ternovskiy, Air Force Research Laboratory (United States)
Andrey Akhmeteli, LTASolid Inc. (United States)

Panel Discussion: Trusted Systems in Defense

Anurag Dwivedi, Moderator, Johns Hopkins University Applied
Physics Laboratory (United States)

Jeff Hughes, Tenet 3, LLC (United States)

Igor V. Ternovskiy, Air Force Research Laboratory (United States)
