Volume 9098

Proceedings of SPIE 0277-786X, V. 9098

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Fiber Optic Sensors and Applications XI, edited by Henry H. Du, Gary Pickrell, Eric Udd, Christopher S. Baldwin,
Jerry J. Benterou, Anbo Wang, Proc. of SPIE Vol. 9098, 909801 · © 2014 SPIE
CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2074595

Proc. of SPIE Vol. 9098 909801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 OIL AND GAS APPLICATIONS

- 9098 03 **Brief history of fiber optic sensing in the oil field industry (Invited Paper)** [9098-2]
C. S. Baldwin, Weatherford International Ltd. (United States)
- 9098 04 **Downhole fiber optic sensing: the oilfield service provider's perspective: from the cradle to the grave** [9098-3]
N. G. Skinner, J. L. Maida Jr., Halliburton Applied Photonics Ctr. (United States)
- 9098 05 **Get smart, go optical: example uses of optical fibre sensing technology for production optimisation and subsea asset monitoring** [9098-4]
C. Staveley, Smart Fibres Ltd. (United Kingdom)
- 9098 06 **Design and performance of a high temperature/high pressure, hydrogen tolerant, bend insensitive single-mode fiber for downhole seismic systems and applications** [9098-5]
A. Gillooly, J. Hankey, M. Hill, L. Cooper, A. Bergonzo, Fibercore Ltd. (United Kingdom)

SESSION 2 FIBER BRAGG GRATING SENSORS I

- 9098 08 **High speed fiber grating sensors for structural monitoring (Invited Paper)** [9098-7]
E. Udd, Columbia Gorge Research LLC (United States)
- 9098 09 **Development of a long-gauge vibration sensor** [9098-8]
P. Kung, QPS Photonics Inc. (Canada); M. I. Comanici, McGill Univ. (Canada)
- 9098 0B **High speed fiber grating pressure sensors** [9098-10]
E. Udd, Columbia Gorge Research LLC (United States); G. Rodriguez, R. L. Sandberg, Los Alamos National Lab. (United States)

SESSION 3 FIBER BRAGG GRATING SENSORS II

- 9098 0C **High pressure sensing and dynamics using high speed fiber Bragg grating interrogation systems** [9098-11]
G. Rodriguez, R. L. Sandberg, Los Alamos National Lab. (United States); B. M. Lalone, B. R. Marshall, M. Grover, G. Stevens, National Security Technologies, LLC (United States); E. Udd, Columbia Gorge Research LLC (United States)

- 9098 0D **Concept and design of an FBG emulator for a scanning laser-based fiber optic interrogator** [9098-12]
N. Kuhenuri, P. Putzer, A. W. Koch, Technische Univ. München (Germany); J. Obermaier, S. Schweyer, A. Hurni, Kayser-Threde GmbH (Germany)
- 9098 0E **High signal-to-noise ratio acoustic sensor using phase-shifted gratings interrogated by the Pound-Drever-Hall technique** [9098-13]
P. Kung, QPS Photonics Inc. (Canada); M. I. Comanici, McGill Univ. (Canada)

SESSION 4 INTERFEROMETRIC SENSORS

- 9098 0G **Using a multimode fiber as a high-resolution, low-loss spectrometer (Invited Paper)** [9098-15]
B. Redding, H. Cao, Yale Univ. (United States)
- 9098 0H **Optical carrier-based microwave interferometers for sensing application** [9098-16]
J. Huang, X. Lan, H. Wang, L. Yuan, H. Xiao, Clemson Univ. (United States)
- 9098 0I **Optical vibration sensor based on Michelson interferometer arrangement with polarization-maintaining fibers** [9098-17]
J. Cubik, S. Kepak, A. Liner, M. Papes, T. Kajnar, O. Zboril, J. Jaros, V. Vasinek, VŠB-Technical Univ. of Ostrava (Czech Republic)
- 9098 0J **A practical approach to fast-light enhanced fiber sensing: experiments and modeling** [9098-18]
C. A. Christensen, A. Zavriyev, M. Cummings, A. C. Beal, M. Lucas, M. Lagasse, MagiQ Technologies, Inc. (United States)

SESSION 5 SENSORS FOR HUMAN HEALTH

- 9098 0O **Fiber loop ringdown glucose sensors: initial tests in human diabetic urines** [9098-24]
M. Kaya, C. Wang, Mississippi State Univ. (United States)
- 9098 0P **Fiber optic probe enabled by surface-enhanced Raman scattering for early diagnosis of potential acute rejection of kidney transplant** [9098-25]
J. Chi, H. Chen, P. Tolias, H. Du, Stevens Institute of Technology (United States)
- 9098 0Q **Understanding the role of hemoglobin in altering multilayered tissue intrinsic fluorescence in the visible region using fiber optics** [9098-26]
B. N. K., S. N., Indian Institute of Technology Madras (India)

SESSION 6 CHEMICAL SENSORS

- 9098 0R **Exploration of higher-order mode coupling in long-period gratings for sensitive monitoring of polyelectrolyte self-assembly at nanoscale** [9098-27]
F. Tian, Stevens Institute of Technology (United States); J. Kanka, Institute of Photonics and Electronics of the ASCR, v.v.i. (Czech Republic); X. Li, H. Du, Stevens Institute of Technology (United States)

- 9098 0S **Fiber pigtailed thin wall capillary coupler for excitation of microsphere WGM resonator in chemical sensing** [9098-28]
H. Wang, X. Lan, J. Huang, L. Yuan, H. Xiao, Clemson Univ. (United States)
- 9098 0T **Sapphire fiber optic-based surface-enhanced Raman scattering by direct and evanescent-field excitation** [9098-29]
H. Chen, F. Tian, J. Chi, H. Du, Stevens Institute of Technology (United States)
- 9098 0V **Multimaterial fibers: a new concept in infrared fiber optics** [9098-31]
G. Tao, A. F. Abouraddy, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

SESSION 7 DISTRIBUTED AND OTHER ADVANCED SENSORS

- 9098 0W **A multicore optical fiber for distributed sensing (Invited Paper)** [9098-32]
X. Sun, J. Li, D. T. Burgess, M. Hines, OFS (United States); B. Zhu, OFS Labs. (United States)
- 9098 0Y **Balanced PIN-TIA photoreceiver with integrated 3 dB fiber coupler for distributed fiber optic sensors** [9098-34]
S. Datta, S. Rajagopalan, S. Lemke, A. Joshi, Discovery Semiconductors, Inc. (United States)
- 9098 0Z **Performance analyses for fast variable optical attenuator-based optical current transformer** [9098-35]
P. Wei, C. Chen, X. Wang, X. Shan, X. Sun, Southeast Univ. (China)
- 9098 10 **A fiber optic voltage sensor based on intensity modulation** [9098-36]
M. Ndiaye, The Copperbelt Univ. (Zambia)
- 9098 11 **Intensity insensitive one-dimensional optical fiber tilt sensor** [9098-37]
B. Vadakkapattu Canthadai, Vidya Jyothi Institute of Technology (India); D. Sengupta, Univ. degli Studi di Padova (Italy); V. Pachava, P. Kishore, National Institute of Technology, Warangal (India)

POSTER SESSION

- 9098 13 **Novel diaphragm microfabrication techniques for high-sensitivity biomedical fiber optic Fabry-Perot interferometric sensors** [9098-23]
S. Poeggel, D. Tosi, D. Durairababu, J. Kelly, M. Munroe, G. Leen, E. Lewis, Univ. of Limerick (Ireland)
- 9098 15 **Measurement of the microwave emitter's inhomogeneity using optical fiber DTS** [9098-41]
J. Jaros, M. Papes, A. Liner, V. Vasinek, VŠB-Technical Univ. of Ostrava (Czech Republic); P. Smira, A. Nasswetrova, Thermo Sanace Ltd. (Czech Republic); J. Cubik, S. Kepak, VŠB-Technical Univ. of Ostrava (Czech Republic)

- 9098 16 **Laser line wavelength sensor based in a dual-wavelength fiber laser with a Hi-Bi loop Sagnac interferometer** [9098-42]
M. Durán Sánchez, R. I. Álvarez Tamayo, Univ. Tecnológica de Puebla (Mexico); O. Pottiez, Ctr. de Investigaciones en Óptica, A.C. (Mexico); E. A. Kuzin, B. Ibarra-Escamilla, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); A. González-García, Instituto Tecnológico Superior de Guanajuato (Mexico); A. Barcelata Pinzón, Univ. Tecnológica de Puebla (Mexico)
- 9098 17 **Fiber laser strain sensor based in the measurement of a Sagnac interferometer optical power spectrum** [9098-43]
M. Durán Sánchez, R. I. Álvarez Tamayo, Univ. Tecnológica de Puebla (Mexico); O. Pottiez, Ctr. de Investigaciones en Óptica, A.C. (Mexico); E. A. Kuzin, B. Ibarra-Escamilla, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); A. Barcelata Pinzón, Univ. Tecnológica de Puebla (Mexico)
- 9098 1A **Temperature-insensitive ultrasonic sensor system based on a fiber ring laser for acoustic emission detection** [9098-54]
T. Liu, G. Liu, L. Hu, M. Han, Univ. of Nebraska-Lincoln (United States)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security
(United States)

Symposium Co-chair

Wolfgang Schade, Technische Universität Clausthal (Germany) and
Fraunhofer Heinrich-Hertz-Institut (Germany)

Conference Chairs

Henry H. Du, Stevens Institute of Technology (United States)
Gary Pickrell, Virginia Polytechnic Institute and State University
(United States)
Eric Udd, Columbia Gorge Research LLC (United States)

Conference Co-chairs

Christopher S. Baldwin, Weatherford International Ltd. (United States)
Jerry J. Benterou, Lawrence Livermore National Laboratory
(United States)
Anbo Wang, Virginia Polytechnic Institute and State University
(United States)

Conference Program Committee

Ole Bang, Technical University of Denmark (Denmark)
Eric A. Bergles, BaySpec Inc. (United States)
Jeff Bush, Optiphase, Inc. (United States)
Kevin Peng Chen, University of Pittsburgh (United States)
Brian Culshaw, University of Strathclyde (United Kingdom)
Abdessama Elyamani, Northrop Grumman Navigation Systems
(United States)
Xudong Fan, University of Michigan (United States)
Yoel Fink, Massachusetts Institute of Technology (United States)
Eric Lee Goldner, US Sensor Systems, Inc. (United States)
Tom W. Graver, Micron Optics, Inc. (United States)
Ming Han, University of Nebraska-Lincoln (United States)
Hajime Haneda, National Institute for Materials Science (Japan)
Kazuo Hotate, The University of Tokyo (Japan)
Jiri Kanka, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)

Victor I. Kopp, Chiral Photonics, Inc. (United States)
Katerina Krebber, Bundesanstalt für Materialforschung und -prüfung (Germany)
Steven T. Kreger, Luna Innovations Inc. (United States)
David A. Krohn, Light Wave Venture Consulting, LLC (United States)
Paul Lefebvre, LxDATA (Canada)
Alexis Mendez, MCH Engineering LLC (United States)
Stephen J. Mihailov, Communications Research Center Canada (Canada)
Thomas D. Monte, KVH Industries, Inc. (United States)
Glen A. Sanders, Honeywell Technology (United States)
Fei Tian, Stevens Institute of Technology (United States)
Dennis J. Trevor, OFS Laboratories (United States)
Xingwei Wang, University of Massachusetts Lowell (United States)
Reinhardt Willsch, Institut für Photonische Technologien e.V. (Germany)
Hai Xiao, Missouri University of Science and Technology (United States)

Session Chairs

Keynote Session
Henry H. Du, Stevens Institute of Technology (United States)

- 1 Oil and Gas Applications
Henry H. Du, Stevens Institute of Technology (United States)
- 2 Fiber Bragg Grating Sensors I
Gary Pickrell, Virginia Polytechnic Institute and State University (United States)
- 3 Fiber Bragg Grating Sensors II
Fei Tian, Stevens Institute of Technology (United States)
- 4 Interferometric Sensors
Eric Udd, Columbia Gorge Research LLC (United States)
- 5 Sensors for Human Health
Christopher S. Baldwin, Weatherford International Ltd. (United States)
- 6 Chemical Sensors
Jerry J. Benterou, Lawrence Livermore National Laboratory (United States)
- 7 Distributed and Other Advanced Sensors
Christopher S. Baldwin, Weatherford International Ltd. (United States)

Introduction

Fiber optic sensor technology continues to move strongly into a broader base of applications. Since the development of early fiber optic sensor technology in the late 1970s and early 1980s that was highly directed toward aerospace and defense, fiber sensors have found their way into civil structures worldwide to monitor bridges, buildings, and dams. Medical applications continue to be developed and they have become increasingly important tools to support the oil and gas industry.

To highlight the importance to the oil and gas industry and the role fiber sensors are playing in improving the safety and viability of oil exploration and extraction, *Fiber Optic Sensors and Applications XI* includes a special section on using fiber optic sensor technology for this important field.

Other important sections include papers on medical and chemical applications, as well as the continued development of interferometric, distributed, and fiber grating sensors that are playing increasingly significant roles in many more areas. While fiber optic sensor technology has matured considerably for certain fields of use, significant development is ongoing to improve the viability of the technology for aerospace, defense, and civil structures. In parallel, the relatively recent introduction of the technology into the medical and oil and gas application area is rapidly expanding, while new capabilities and applications continue to be found.

Fiber Optic Sensors and Applications XI continues the tradition of recording the development of fiber optic sensor technology begun by SPIE Proceedings in the late 1970s. There are now hundreds of proceedings and thousands of papers. We hope that current and future researchers will build on this work to more fully realize the potential of this amazing technology.
