Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	Conference Committee
ix	Introduction

NON-INVASIVE DISEASE DIAGNOSTICS FOR GLOBAL HEALTH I

9112 03	Rapid non-invasive tests for diagnostics of infectious diseases [9112-71] D. Malamud, New York Univ. (United States)
9112 06	Programmable bio-nano-chip system for saliva diagnostics [9112-7] N. Christodoulides, Rice Univ. (United States); R. De La Garza II, Baylor College of Medicine (United States); G. W. Simmons, M. P. McRae, J. Wong, Rice Univ. (United States); T. R. Kosten, Baylor College of Medicine (United States); C. S. Miller, J. L. Ebersole, Univ. of Kentucky (United States); J. T. McDevitt, Rice Univ. (United States)
9112 08	Next-generation confirmatory disease diagnostics [9112-73] R. Lin, R. Gerver, K. Karns, A. A. Apori, A. K. Denisin, A. E. Herr, Univ. of California, Berkeley (United States)

NON-INVASIVE DISEASE DIAGNOSTICS FOR GLOBAL HEALTH II

9112 0B	Human saliva proteome: an overview (Invited Paper) [9112-11] T. J. Griffin, Univ. of Minnesota (United States)
9112 0D	Experimental strategy to discover microbes with gluten-degrading enzyme activities [9112-10] E. J. Helmerhorst, G. Wei, Boston Univ. (United States)
9112 0G	Serum and salivary cardiac analytes in acute myocardial infarction related to oral health status (Invited Paper) [9112-13] J. L. Ebersole, R. J. Kryscio, C. Campbell, Univ. of Kentucky (United States); D. F. Kinane, Univ. of Pennsylvania (United States); J. T. McDevitt, N. Christodoulides, P. N. Floriano, Rice Univ. (United States); C. S. Miller, Univ. of Kentucky (United States)

MILITARY MEDICINE I: TRAUMATIC BRAIN INJURY AND PTSD

9112 0J	The military's approach to traumatic brain injury and post-traumatic stress disorder (Invited Paper) [9112-20] G. S. F. Ling, J. Grimes, Uniformed Services Univ. of the Health Sciences (United States); J. M. Ecklund, Uniformed Services Univ. of the Health Sciences (United States) and Inova Fairfax Hospital (United States)
---------	---

- 9112 0L **New approach to neurorehabilitation: cranial nerve noninvasive neuromodulation (CN-NINM) technology** [9112-23]
Y. P. Danilov, M. E. Tyler, K. A. Kaczmarek, K. L. Skinner, Univ. of Wisconsin-Madison (United States)

MILITARY MEDICINE II: PHYSIOLOGY AND MEDICINE OF EXTREME ENVIRONMENTS AND SPACEFLIGHT

- 9112 0R **Drug stability analyzer for long duration spaceflights** [9112-26]
C. Shende, W. Smith, C. Brouillette, S. Farquharson, Real-Time Analyzers, Inc. (United States)
- 9112 0U **Military target task performance after wavefront-guided (WFG) and wavefront-optimized (WFO) photorefractive keratectomy (PRK)** [9112-34]
T. Maurer, D. Deaver, C. Howell, S. Moyer, O. Nguyen, G. Mueller, U.S. Army Night Vision & Electronic Sensors Directorate (United States); D. Ryan, R. Sia, Warfighter Refractive Surgery and Research Ctr. (United States); R. Stutzman, J. Pasternak, Walter Reed National Military Medical Ctr. (United States); K. Bower, Johns Hopkins Univ. (United States)
- 9112 0V **Raman spectroscopic analysis of whole blood acetylcholinesterase** [9112-32]
P. G. Wilcox, U.S. Army Edgewood Chemical Biological Ctr. (United States) and Johns Hopkins Univ. (United States); J. U. Kang, Johns Hopkins Univ. (United States)
- 9112 0W **The challenges of analysing blood stains with hyperspectral imaging** [9112-35]
J. Kuula, H.-H. Puupponen, H. Rinta, I. Pölönen, Univ. of Jyväskylä (Finland)

SENSING TECHNOLOGIES FOR DISEASE DIAGNOSTICS AND ENVIRONMENTAL MONITORING II

- 9112 11 **Portable capillary electrophoresis-system for on-site food analysis with lab-on-a-chip based contactless conductivity detection (Invited Paper)** [9112-38]
C. Gärtner, R. Sewart, R. Klemm, H. Becker, microfluidic ChipShop GmbH (Germany)
- 9112 12 **Critical stages of a biodetection platform development from sensor chip fabrication to surface chemistry and assay development** [9112-39]
Y. Uludag, TÜBITAK BILGEM (Turkey)
- 9112 13 **Chemoselective surface attachment of antimicrobial peptides and its effects on interfacial behavior** [9112-40]
S. H. North, C. So, K. Fears, C. R. Taitt, U.S. Naval Research Lab. (United States)
- 9112 16 **Software system for computing material and structural properties of bone and muscle in the lower extremity from pQCT** [9112-43]
S. Makrogiannis, Delaware State Univ. (United States) and National Institutes of Health (United States); L. Ferrucci, National Institutes of Health (United States)

- 9112 17 **Label-free single cancer marker protein detection using a nanoplasmonic-photonic hybrid whispering gallery mode biosensor** [9112-44]
S. Holler, Fordham Univ. (United States); V. R. Dantham, D. Keng, Polytechnic Institute of New York Univ. (United States); V. Kolchenko, New York City College of Technology (United States); S. Arnold, Polytechnic Institute of New York Univ. (United States)
- 9112 18 **Miniature Fabry-Perot sensor with polymer dual optical cavities for simultaneous pressure and temperature measurements** [9112-45]
H. Bae, M. Yu, Univ. of Maryland, College Park (United States)
- 9112 19 **Prototype spectral analysis of water samples for monitoring and treatment of public water resources (Invited Paper)** [9112-46]
S. G. Lambrakos, M. Lee, U.S. Naval Research Lab. (United States); C. Yapijakis, The Cooper Union (United States); L. S. Ramsey, L. Huang, U.S. Naval Research Lab. (United States); A. Shabaev, George Mason Univ. (United States); L. Massa, Hunter College (United States)
- 9112 1A **Estimation of suspended sediment concentrations from remotely sensed spectral reflectance: a field calibration for the Yellow River (Invited Paper)** [9112-47]
L. Qu, D. Civco, Univ. of Connecticut (United States); T. Lei, China Agricultural Univ. (China); X. Yang, Univ. of Connecticut (United States)

POSTER SESSION

- 9112 1C **Environmental data analysis and remote sensing for early detection of dengue and malaria** [9112-31]
M. Z. Rahman, LaGuardia Community College (United States); L. Roytman, The City College of New York (United States); A. Kadik, LaGuardia Community College (United States); D. A. Rosy, Univ. of Dhaka (Bangladesh)
- 9112 1D **Simulation studies in biochemical signaling and enzyme reactions** [9112-49]
S. R. Nelatury, Penn State Erie, The Behrend College (United States); M. C. Vagula, Gannon Univ. (United States)
- 9112 1E **Radiation hazards of radio frequency waves on the early embryonic development of Zebrafish** [9112-50]
R. Harkless, M. Al-Quraishi, M. C. Vagula, Gannon Univ. (United States)
- 9112 1F **Remote laser spectroscopy of oil and gas deposits** [9112-51]
A. P. Zhevlakov, V. G. Bespalov, V. V. Elizarov, A. S. Grishkanich, S. V. Kascheev, E. A. Makarov, S. A. Bogoslovsky, National Research Univ. of Information Technologies, Mechanics and Optics (Russian Federation); A. A. Il'inskiy, All Russian Petroleum Research Exploration Institute (Russian Federation)
- 9112 1H **Analysis of a generalized model for influenza including differential susceptibility due to immunosuppression** [9112-53]
D. Hincapié, Univ. de Antioquia (Colombia); J. Ospina, Univ. EAFIT (Colombia)
- 9112 1I **Using computer algebra and SMT-solvers to analyze a mathematical model of cholera propagation** [9112-54]
M. Trujillo Arredondo, Univ. EAFIT (Colombia)

- 9112 1J **Computational algebraic geometry of epidemic models** [9112-55]
M. Rodríguez Vega, Univ. EAFIT (Colombia)
- 9112 1K **Using Tutte polynomials to characterize sexual contact networks** [9112-56]
J. J. Cadavid Muñoz, Univ. EAFIT (Colombia)
- 9112 1L **Computing R_0 in a population with heterogeneity in sexual activity and proportionate mixing using a STM-solver** [9112-57]
N. A. Gutierrez A., Univ. EAFIT (Colombia)
- 9112 1M **Bessel filters applied in biomedical image processing** [9112-58]
J. P. Mesa López, D. L. Castañeda Saldarriaga, Univ. EAFIT (Colombia)
- 9112 1N **Application of a Morse filter in the processing of brain angiograms** [9112-59]
S. Venegas Bayona, Univ. EAFIT (Colombia)
- 9112 1O **Using special functions to model the propagation of airborne diseases** [9112-60]
D. Bolaños, Univ. EAFIT (Colombia)
- 9112 1P **Optimal control in a model of malaria with differential susceptibility** [9112-61]
D. Hincapié, Univ. of Antioquia (Colombia); J. Ospina, Univ. EAFIT (Colombia)
- 9112 1Q **Using quantum filters to process images of diffuse axonal injury** [9112-62]
M. Pineda Osorio, Univ. EAFIT (Colombia)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security
(United States)

Symposium Co-chair

Wolfgang Schade, Technische Universität Clausthal (Germany) and
Fraunhofer Heinrich-Hertz-Institut (Germany)

Conference Chair

Šárka O. Southern, Gaia Medical Institute (United States)

Conference Co-chairs

Mark A. Mentzer, Neuroscience Applications Group, LLC
(United States)

Isaac Rodriguez-Chavez, National Institute of Dental and
Craniofacial Research (United States)

Virginia E. Wotring, Universities Space Research Association/NASA JSC
(United States)

Conference Program Committee

James Delehanty, U.S. Naval Research Laboratory (United States)

Theresa G. Evans-Nguyen, Draper Laboratory (United States)

Peter Kiesel, Palo Alto Research Center, Inc. (United States)

Baochuan Lin, U.S. Naval Research Laboratory (United States)

Daniel Malamud, New York University (United States)

Igor Medintz, U.S. Naval Research Laboratory (United States)

Richard M. Ozanich, Pacific Northwest National Laboratory
(United States)

Ava M. Puccio, University of Pittsburgh Medical Center (United States)

Steven A. Ripp, The University of Tennessee (United States)

Albert Skip Rizzo III, The University of Southern California
(United States)

Kim E. Sapsford, U.S. Food and Drug Administration (United States)

Shadrian B. Strong, Johns Hopkins University Applied Physics
Laboratory (United States)

David E. Wolf, Radiation Monitoring Devices, Inc. (United States)

Aurel Ymeti, Ostendum R&D BV (Netherlands)

Session Chairs

- 1 Non-invasive Disease Diagnostics for Global Health I
Šárka O. Southern, Gaia Medical Institute (United States)
Isaac R. Rodriguez-Chavez, National Institute of Dental and Craniofacial Research (United States)
Daniel Malamud, New York University (United States)
- 2 Non-invasive Disease Diagnostics for Global Health II
Timothy J. Griffin, University of Minnesota (United States)
Charles F. Streckfus, The University of Texas at Houston (United States)
Šárka O. Southern, Gaia Medical Institute (United States)
- 3 Military Medicine I: Traumatic Brain Injury and PTSD
Mary E. Michel, National Institutes of Health (United States)
Geoffrey Ling, Uniformed Services University of the Health Sciences (United States)
Barry D. Jordan, Sports Concussion Institute (United States)
- 4 Military Medicine II: Physiology and Medicine of Extreme Environments and Spaceflight
Virginia E. Wotring, Universities Space Research Association/NASA JSC (United States)
Jonathan D. Stallings, U.S. Army Center for Environmental Health Research (United States)
- 5 Sensing Technologies for Disease Diagnostics and Environmental Monitoring I
Stephen M. Hewitt, National Cancer Institute (United States)
Richard Conroy, National Institutes of Health (United States)
Šárka O. Southern, Gaia Medical Institute (United States)
- 6 Sensing Technologies for Disease Diagnostics and Environmental Monitoring II
Stephen M. Hewitt, National Cancer Institute (United States)
Claudia Gärtner, microfluidic ChipShop GmbH (Germany)

Introduction

The 2014 SPIE Sensing Technologies for Global Health, Military Medicine, and Environmental Monitoring conference embraced a wealth of state-of-the-art information in basic and applied science. This event covered the latest developments in the following areas:

- Non-invasive Disease Diagnostics for Global Health— This opening series of two consecutive sessions focused on oral biospecimen based rapid assays and point-of-care devices for the detection of pathogens causing infectious diseases, biomarkers for cancer, and analytes for non-communicable diseases such as diabetes. They also covered presentations on the human proteasome and microbiome with linkage to human diseases and diagnostic approaches. The sessions were built on the past experience and expertise of the National Institutes of Health, National Institutes of Dental and Craniofacial Research.
- Military Medicine I: Traumatic Brain Injury and PTSD—This assembly covered oral-biomarker based diagnostics for brain damage and TBI as well as prevention and rehabilitation technologies. Neurorehabilitation and noninvasive neuromodulation were also discussed as critical approaches for effective functioning.
- Military Medicine II: Physiology and Medicine of Extreme Environments and Spaceflight—This scientific segment showcased physiological, pharmacological and diagnostic sensing methodologies during spaceflight per the National Aeronautics and Space Administration as well as military-relevant toxicants and future sensing trends per the Department of Defense. It also included latest technologies to determine hydration status in warfighters, eye surgery using the latest laser technologies, and sensing tools for blood analysis.
- Sensing Technologies for Disease Diagnostics and Environmental Monitoring—This closing series of two consecutive sessions provided the venues to learn and discuss more results on the next generation of diagnostic tools and field technologies for diseases, including biomarker detection by digital imaging, multiplex technologies, capillary electrophoresis and molecular platforms serving as labs-on-chips.

This conference allowed cross-fertilization of ideas, projects and collaborative work by a multidisciplinary audience of national and international colleagues from the academia, industry and federal government: The National Institutes of Health, National Aeronautics and Space Administration, and the Department of Defense.

In 2015, this conference will enhance its focus on Global Health as an encompassing umbrella to include sensing technologies at early, medium and advanced level of development and implementation for communicable and non-communicable diseases impacting public and military health.

The success of this conference lied in the compelling talks presented by distinguished speakers and the active and perceptive audience of colleagues who actively participated. The knowledge shared in this conference seeded projects that will translate into tangible and novel sensing tools to improve human health and quality of life. We look forward to enhancing the productivity and the success of this conference in 2015.
