Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Introduction

Baltimore Maryland, Inner Harbor Convention Center — This year's exciting conference proceeding features frontier S&T research in Human Components - Compressive Sensing, ICA, Nano-engineering, Biomedical Wellness Engineering, and System Biology. The Wavelet 'sensory system' Pioneer Award was folded into a new and emerging category called Large Data Analysis. Through the tremendous contributions from authors, presenters, and attendees, new ideas and technologies can be carried to the world and serve the aging global village.

Historically, our section has been part of the SPIE Defense, Security and Sensing Symposium, and is now highlighted in the brand new Sensing Technology + Applications section (STA). The conference proceedings will serve as a wonderful summary of the work presented this year, but nothing can replace physically attending and interacting with our talented scientists and investigators. The Pioneer Awardees for this year were selected by past recipients, and the nomination and selection committee was chaired by the recipients listed below. The 2014 recipients of the following pioneer awards will serve as the nomination selection committee chair or co-chair for next year's conference:

The 2014 Pioneer Award recipients are:

- Compressive Sampling Pioneer Award, Michael Lustig, University of California, Berkeley
- Large Data Analysis Pioneer Award, John Daugman, University of Cambridge
- Unsupervised Learning ICA Pioneer Award, Jong-Hwan Jay Lee, Korea University
- Nano-engineering Pioneer Award, Chair: Ritesh Agarwal, University of Pennsylvania
- Biomedical Wellness Pioneer Award, Chair: Elisa Konpfigou, Colombia University
- Systems Biology Pioneer Award, Chair: Scott Fraser, University of Southern California

We thank you for making 2014 a successful and memorable year, and encourage past, present, and future associates to participate in the knowledge discovery and sharing through SPIE.
