Proc. of SPIE Vol. 9156 915601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1	OPTICAL TELECOMMUNICATION TECHNOLOGIES AND SYSTEMS
9156 02	Electronic compensation of nonlinearly interacting signals in fiber-optical transmission lines with application of nonlinear phase filters [9156-9] V. A. Burdin, I. V. Grigorov, E. L. Tsveybelman, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
9156 03	Simulation of few-mode optical signal propagation over multimode fiber link under mode-field matched center-launching technique [9156-15] A. V. Bourdine, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
9156 04	Optical-domain mode coupling compensation for mode division multiplexing systems [9156-19] V. S. Lyubopytov, A. R. Gizatulin, A. Z. Tlyavlin, A. Kh. Sultanov, Ufa State Aviation Technical Univ. (Russian Federation)
9156 05	Interaction of PMD and Kerr-nonlinearities and its impact on WDM-signal transmission [9156-20] A. K. Sultanov, V. K. Bagmanov, R. V. Kutluyarov, Ufa State Aviation Technical Univ. (Russian Federation)
9156 06	Calculation of the basic parameters and of the construction of demultiplexers CWDM based on the angular dispersion effect [9156-28] M. S. Bylina, S. F. Glagolev, A. S. Golubev, The Bonch-Bruевич Saint-Petersburg State Univ. of Telecommunications (Russian Federation)
SESSION 2	PASSIVE AND ACTIVE COMPONENTS OF OPTICAL TELECOMMUNICATION
9156 07	Universal method for calculating the open dielectric waveguides with arbitrary cross-section [9156-3] G. S. Malyshev, A. S. Raevskii, S. B. Raevskii, A. A. Titarenko, Nizhny Novgorod State Technical Univ. (Russian Federation)
9156 08	Theoretical and experimental study of aperture size effects on the polarization sensitivity of near-field microscopy fiber-optic probes [9156-5] S. A. Degtyarev, S. N. Khonina, S. V. Alferov, S. V. Karpeev, Image Processing Systems Institute (Russian Federation)
9156 09	Sharp focusing by means of binary relief at the end of the optical fiber [9156-6] D. A. Savelyev, S. N. Khonina, Image Processing Systems Institute (Russian Federation)

- 9156 0A **Investigation of focusing of the fundamental linearly polarized mode using microrelief on the end of an optical fiber** [9156-7]
A. V. Karsakov, Samara State Aerospace Univ. (Russian Federation); S. N. Khonina, Samara State Aerospace Univ. (Russian Federation) and Image Processing Systems Institute (Russian Federation)
- 9156 0B **Intellectual parachute and balloon systems based on fiber optic technologies** [9156-11]
A. M. Nikolaev, P. M. Nikolaev, Y. M. Nikolaev, Ukraine Ballooning Federation (Ukraine); O. G. Morozov, M. Yu. Zastela, G. A. Morozov, Kazan National Research Technical Univ. (Russian Federation)
- 9156 0C **Modeling of splice of long non-identical optical fibers with precision transverse misalignment** [9156-16]
A. V. Bourdine, A. E. Zhukov, V. V. Kotorov, S. A. Serikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 0D **Diffraction of Bessel laser beams on a birefringent object** [9156-18]
O. V. Zoteeva, S. N. Khonina, Image Processing Systems Institute (Russian Federation)
- 9156 0E **Based on Gaussian approximation solution for arbitrary order guided mode of optical fiber with constant curvature** [9156-22]
V. A. Burdin, A. V. Bourdine, D. E. Praporshchikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 0F **Birefringence of standard step-index optical fiber with waveguide cladding microcrack** [9156-23]
V. A. Burdin, E. V. Dmitriev, D. E. Praporshchikov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 0G **About the parametric synthesis of an optical fiber using a dispersion characteristic** [9156-33]
V. A. Malakhov, G. S. Malyshev, A. S. Raevskii, Nizhny Novgorod State Technical Univ. (Russian Federation)

SESSION 3 ONE-DIMENSION AND MULTI-DIMENSION OPTICAL SIGNALS DATA PROCESSING

- 9156 0H **Variable multimode models of complex dynamic systems** [9156-10]
V. V. Afanasiev, M. P. Danilaev, S. S. Loginov, Y. E. Pol'skii, Kazan National Research Technical Univ. (Russian Federation)
- 9156 0I **Filter designing for image processing based on multidimensional linear extrapolation** [9156-36]
V. Kh. Bagmanov, A. R. Zainullin, I. K. Meshkov, A. Kh. Sultanov, Ufa State Aviation Technical Univ. (Russian Federation)
- 9156 0J **Coding of an optical signal by a superposition of spheroidal functions for undistorted transmission of information in the lens system** [9156-8]
M. S. Kirilenko, Samara State Aerospace Univ. (Russian Federation); S. N. Khonina, Samara State Aerospace Univ. (Russian Federation) and Image Processing Systems Institute (Russian Federation)

- 9156 OK **Principles of multiple frequencies characterization of stimulated Mandelstam-Brillouin gain spectrum** [9156-13]
O. G. Morozov, A. A. Talipov, G. A. Morozov, Kazan National Research Technical Univ. (Russian Federation)
- 9156 OL **Diffraction analysis of focusing optical elements** [9156-29]
P. G. Serafimovich, Image Processing Systems Institute (Russian Federation)
- 9156 OM **Theory of symmetrical two-frequency signals and key aspects of its application** [9156-35]
G. I. Il'in, O. G. Morozov, A. G. Il'in, Kazan National Research Technical Univ. (Russian Federation)

SESSION 4 OPTICAL NETWORK MAINTENANCE, CONTROL AND RESTORATION

- 9156 ON **Instantaneous microwave frequency measurement with monitoring of system temperature** [9156-14]
O. G. Morozov, A. A. Talipov, M. R. Nurgazizov, A. A. Vasilets, Kazan National Research Technical Univ. (Russian Federation)
- 9156 OO **Method of measurement of optical cable stiffness at low temperatures** [9156-17]
V. A. Burdin, I. N. Alekhin, T. G. Nikulina, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 OP **Method of excess fiber length estimating based on low subzero temperature climatic test** [9156-21]
V. A. Burdin, M. A. Vazhdaev, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 OQ **Algorithm for predictive control implementation on fiber optic transmission lines** [9156-26]
V. A. Andreev, V. A. Burdin, A. A. Voronkov, Povolzhskiy State Univ. of Telecommunications and Informatics (Russian Federation)
- 9156 OR **Effect of analog to digital conversion of the backscatter signal on OTDRs parameters** [9156-27]
S. F. Glagolev, I. A. Zuev, The Bonch-Bruевич Saint-Petersburg State Univ. of Telecommunications (Russian Federation)

SESSION 5 PROBLEMS OF TRAINING ON OPTICAL TELECOMMUNICATION SCIENCE TOPICS

- 9156 OS **Microwave signal processing in two-frequency domain for ROF systems implementation: training course** [9156-12]
O. G. Morozov, G. A. Morozov, Kazan National Research Technical Univ. (Russian Federation)

Y. B. Zubarev, Corresponding Member of the Russian Academy of Sciences (Russian Federation)

Introduction

This volume contains a selection of reports presented at the 13th International Conference on Optical Technologies for Telecommunications. The conference was held at Povolzhskiy State University of Telecommunications and Informatics in Samara, Russian Federation, on 27 – 29 November 2013.

The conference covered a large range of problems in optical technologies in telecommunications. We have no doubt that the proceedings from this conference will be helpful for both scientists and specialists working in the fields of telecommunication technologies.
