Front Matter: Volume 9177

, "Front Matter: Volume 9177," Proc. SPIE 9177, Thin Films for Solar and Energy Technology VI, 917701 (11 November 2014); doi: 10.1117/12.2084870

SPIE.

Event: SPIE Solar Energy + Technology, 2014, San Diego, California, United States

PROCEEDINGS OF SPIE

Thin Films for Solar and Energy Technology VI

**Louay A. Eldada
Michael J. Heben**
Editors

**17, 18 and 20 August 2014
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 9177

Proceedings of SPIE 0277-786X, V. 9177

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Thin Films for Solar and Energy Technology VI, edited by Louay A. Eldada,
Michael J. Heben, Proc. of SPIE Vol. 9177, 917701 · © 2014 SPIE
CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2084870

Proc. of SPIE Vol. 9177 917701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Hot carrier solar cell absorbers: materials, mechanisms and nanostructures (Solar Energy Plenary Paper) [9178-304]</i>
xxi	<i>International PV QA Task Force's proposed comparative rating system for PV modules (Solar Energy Plenary Paper) [9178-305]</i>

SOLAR ENERGY PLENARY SESSION

9177 02	The renaissance of CdTe-based photovoltaics (Solar Energy Plenary Paper) [9177-302]
---------	--

SESSION 1 TESTING AND CHARACTERIZATION

9177 03	IR-imaging and non-destructive loss analysis on thin film solar modules and cells [9177-1]
9177 04	Test and analysis of thin film photovoltaic (TFPV) for UAV application [9177-2]
9177 05	Synchronized thermography for multi-layer thin film characterization [9177-3]

SESSION 2 THIN-FILM ABSORBERS

9177 08	Effects of sputtering technique on quaternary sputtered Cu(In,Ga)Se₂ films [9177-6]
---------	---

SESSION 3 PEROVSKITES AND ADVANCED CONCEPTS

9177 0C	Systematic study of metal-insulator-metal diodes with a native oxide [9177-12]
9177 0E	Microcrystalline silicon oxides for silicon-based solar cells: impact of the O/Si ratio on the electronic structure [9177-14]

SESSION 4 HYDROGEN GENERATION AND CONTACTS

9177 0F	Strain dependence of the optical properties and band gap of transparent conducting BaSnO₃ and SrSnO₃ [9177-15]
9177 0G	Development of transparent and conductive Al doped Zn_{1-x}Mg_xO thin film by sol-gel process with two-step annealing [9177-16]

- 9177 OI **Metal nanowire-graphene composite transparent electrodes** [9177-18]
- 9177 OJ **Transparent conducting electrodes based on thin, ultra-long copper nanowires and graphene nano-composites** [9177-19]

SESSION 5 ANTI-REFLECTION AND LIGHT TRAPPING

- 9177 OK **Optimization of hybrid antireflection structure integrating surface texturing and multi-layer interference coating** [9177-20]
- 9177 OM **Light trapping in thin-film solar cells: the role of guided modes** [9177-22]
- 9177 ON **Light trapping in photonic crystals** [9177-23]

POSTER SESSION

- 9177 OR **Bilayer structures optimization as antireflective coating for silicon solar cells** [9177-24]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
