SPIE

Volume 9178

Proceedings of SPIE 0277-786X, V. 9178

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Next Generation Technologies for Solar Energy Conversion V, edited by Oleg V. Sulima,
Gavin Conibeer, Proc. of SPIE Vol. 9178, 917801 · © 2014 SPIE
CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2176689

Proc. of SPIE Vol. 9178 917801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>The renaissance of CdTe-based photovoltaics (Solar Energy Plenary Paper) [9177-302]</i>
xvii	<i>International PV QA Task Force's proposed comparative rating system for PV modules (Solar Energy Plenary Paper) [9179-305]</i>

SOLAR ENERGY PLENARY SESSION

9178 02	Hot carrier solar cell absorbers: materials, mechanisms and nanostructures (Solar Energy Plenary Paper) [9178-304]
---------	---

PHOTON UP AND DOWN CONVERSION IN PV

9178 04	Recent developments in luminescent solar concentrators (Invited Paper) [9178-1]
9178 06	Luminescent down-shifting layers with Eu²⁺ and Eu³⁺ doped strontium compound particles for photovoltaics [9178-3]

NOVEL MATERIALS AND DESIGNS FOR SOLAR ENERGY CONVERSION I

9178 08	Coherence-limited solar power conversion: the fundamental thermodynamic bounds and the consequences for solar rectennas [9178-5]
---------	---

NANOSTRUCTURES FOR LIGHT MANAGEMENT

9178 0I	Scattering of long wavelengths into thin silicon photovoltaic films by plasmonic silver nanoparticles [9178-17]
9178 0J	Plasmonic rear reflectors for thin-film solar cells: design principles from electromagnetic modelling [9178-18]
9178 0K	Enhancing solar cell efficiency by lenses on the nano- and microscale [9178-19]

SI NANOWIRES FOR PV

- 9178 0L **Minority carrier lifetime of thin polycrystalline silicon nanowire films on polycrystalline silicon layer prepared by aluminum-induced crystallization** [9178-20]
- 9178 0M **Influence of substrates on formation of polycrystalline silicon nanowire films** [9178-21]
- 9178 0N **Effect of tapered shape on performance of silicon nanowire solar cells** [9178-22]
- 9178 0O **Fabrication of nano-walls for solar cell application** [9178-23]
- 9178 0P **Properties of Si/SiO₂ superlattice nanodisc array prepared by nanosphere lithography** [9178-24]

POSTER SESSION

- 9178 0Q **Enhanced near-infrared response of CdS/CdTe solar cell using Tm³⁺ and Yb³⁺ co-doped upconverting glass phosphors** [9178-25]
- 9178 0R **Development of nanostructured luminophor coating for broadening of solar cell absorption spectrum** [9178-27]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Oleg V. Sulima, GE Global Research (United States)

Conference Chairs

Oleg V. Sulima, GE Global Research (United States)

Gavin Conibeer, The University of New South Wales (Australia)

Conference Program Committee

Amanda J. Chatten, Imperial College London (United Kingdom)

Andrew J. Ferguson, National Renewable Energy Laboratory
(United States)

Alberto Salleo, Stanford University (United States)

Sean E. Shaheen, University of Colorado at Boulder (United States)

Wilfried G. J. H. M. van Sark, Utrecht University (Netherlands)

Xianfan Xu, Purdue University (United States)

Session Chairs

- 1 Photon Up and Down Conversion in PV
Gavin Conibeer, The University of New South Wales (Australia)
- 2 Novel Materials and Designs for Solar Energy Conversion I
Sean E. Shaheen, University of Colorado at Boulder (United States)
- 3 Novel Materials and Designs for Solar Energy Conversion II
Andrew J. Ferguson, National Renewable Energy Laboratory
(United States)
- 4 Quantum Dot PV
Xianfan Xu, Purdue University (United States)
- 5 Nanostructures for Light Management
Wilfried G. J. H. M. van Sark, Utrecht University (Netherlands)
- 6 Si Nanowires for PV
Oleg V. Sulima, GE Global Research (United States)
