Front Matter: Volume 9190

, "Front Matter: Volume 9190," Proc. SPIE 9190, Thirteenth International Conference on Solid State Lighting, 919001 (6 October 2014); doi: 10.1117/12.2085341

SPIE.

Event: SPIE Optical Engineering + Applications, 2014, San Diego, California, United States

PROCEEDINGS OF SPIE

Thirteenth International Conference on Solid State Lighting

**Matthew H. Kane
Jianzhong Jiao
Nikolaus Dietz
Jian-Jang Huang**
Editors

**20–21 August 2014
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 9190

Proceedings of SPIE 0277-786X, V. 9190

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Thirteenth International Conference on Solid State Lighting, edited by Matthew H. Kane,
Jianzhong Jiao, Nikolaus Dietz, Jian-Jang Huang, Proc. of SPIE Vol. 9190, 919001
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2085341

Proc. of SPIE Vol. 9190 919001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

SSL CONTROL SYSTEMS AND METHODS

9190 02	Accurate chromatic control and color rendering optimization in LED lighting systems using junction temperature feedback [9190-1]
9190 03	Investigation of correlation of LF power modulation of light in natural and artificial illumination situations and acoustic emission [9190-2]
9190 04	LED illuminant on the ambient light [9190-3]
9190 05	A high efficiency LED driver based on optical feedback [9190-4]
9190 06	Real time compensation of in aging effects in solid state lighting [9190-5]

LED LIFETIME/CHROMATICITY ISSUES

9190 07	A new lifetime estimation model for a quicker LED reliability prediction [9190-6]
9190 08	Uncertainty analysis for chromaticity coordinates and luminous flux measurements of LED light sources [9190-7]
9190 09	Optical simulations of organic light-emitting diodes through a combination of rigorous electromagnetic solvers and Monte Carlo ray-tracing methods [9190-8]
9190 0A	Foil based optical elements for beam shaping and color homogenization of phosphor converted white LED sources [9190-10]

NOVEL SSL EMITTERS

9190 0C	Laser-activated remote phosphor conversion with ceramic phosphors [9190-12]
9190 0E	An imaging-based photometric and colorimetric measurement method for characterizing OLED panels for lighting applications [9190-14]

SSL SYSTEM DESIGN

9190 0I	Complete solid state lighting (SSL) line at CEA LETI [9190-19]
---------	---

- 9190 0J **Optimization of optical systems for LED spot lights concerning the color uniformity** [9190-20]
- 9190 0K **A lighting metric for quantitative evaluation of accent lighting systems** [9190-21]
- 9190 0L **Design a LED coupler to collocate with a light guide plate for illumination** [9190-22]

PHOSPHORS IN LED LIGHTING

- 9190 0N **High-thermal-stability white light-emitting diodes employing broadband glass phosphor (Invited Paper)** [9190-24]
- 9190 0P **Fabrication and performance of dual-wavelength white light-emitting diodes assisted with red-emitting nanocrystals** [9190-26]
- 9190 0Q **Optical and thermal performance of a remote phosphor plate** [9190-27]
- 9190 0R **Mathematical model to analyze phosphor layer heat transfer of an LED system** [9190-9]
- 9190 0S **The impact of individual materials parameters on color temperature reproducibility among phosphor converted LED sources** [9190-28]

POSTER SESSION

- 9190 0Y **Lightweight LED fluorescent lamp using engineering poly carbonate** [9190-33]
- 9190 0Z **Improved light extraction of nitride-based flip-chip light-emitting diodes by forming air voids on Ar-implanted sapphire substrate** [9190-34]
- 9190 10 **Investigation of structure in the modular light pipe component for LED automotive lamp** [9190-35]
- 9190 12 **Realization of quantum dot-based polarized white LEDs using short-wavelength pass dichroic filters and reflective polarizer films** [9190-37]
- 9190 13 **High color rendering index of remote-type white LEDs with multi-layered quantum dot-phosphor films and short-wavelength pass dichroic filters** [9190-38]
- 9190 14 **Tri-wavelength single output Infrared LED based on QW area selective intermixing** [9190-39]
- 9190 15 **Solution of multi-element LED light sources development automation problem** [9190-40]
- 9190 17 **Investigation of optical intensity in indoor visible light communication with different LEDs array** [9190-42]
- 9190 18 **New understandings of failure modes in SSL luminaires** [9190-43]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Ian T. Ferguson, The University of North Carolina at Charlotte
(United States)

Conference Chairs

Matthew H. Kane, Texas A&M University at Galveston (United States)
Jianzhong Jiao, OSRAM Opto Semiconductors Inc. (United States)
Nikolaus Dietz, Georgia State University (United States)
Jian-Jang Huang, National Taiwan University (Taiwan)

Conference Program Committee

Lianghui Chen, Institute of Semiconductors (China)
Wood-Hi Cheng, National Sun Yat-Sen University (Taiwan)
John W. Curran, LED Transformations, LLC (United States)
Christoph Hoelen, Philips Lighting B.V. (Netherlands)
Asif M. Khan, University of South Carolina (United States)
Michael R. Krames, Soraa, Inc. (United States)
Yung Sheng Liu, National Tsing Hua University (Taiwan)
Eun-Hyun Park, Kyung Hee University (Korea, Republic of)
Seong-Ju Park, Gwangju Institute of Science and Technology
(Korea, Republic of)
Jeff Quinlan, Acuity Brands Lighting, Inc. (United States)
Christian Wetzel, Rensselaer Polytechnic Institute (United States)
Chih-Chung Yang, National Taiwan University (Taiwan)
Yiting Zhu, Rensselaer Polytechnic Institute (United States)

Session Chairs

- 1 SSL Control Systems and Methods
Matthew H. Kane, Texas A&M University at Galveston (United States)
- 2 LED Lifetime/Chromaticity Issues
Yiting Zhu, Rensselaer Polytechnic Institute (United States)
- 3 Novel SSL Emitters
Jianzhong Jiao, OSRAM Opto Semiconductors Inc. (United States)
- 4 Light Extraction in SSL Services and Systems
Jian-Jang Huang, National Taiwan University (Taiwan)

- 5 SSL System Design
Wood-Hi Cheng, National Sun Yat-Sen University (Taiwan)
- 6 Phosphors in LED lighting
Nikolaus Dietz, Georgia State University (United States)
- 7 III-Nitride LEDs for SSL
Matthew H. Kane, Texas A&M University at Galveston (United States)
