Proc. of SPIE Vol. 9192 919201-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	Authors
ix	Conference Committee
xi	Introduction
xiii	<i>Radiance and photon noise: Imaging in geometrical optics, physical optics, quantum optics and radiology</i> (Plenary Paper) [9193-200]
xxxi	<i>Optical design for consumer products</i> (Plenary Paper) [9197-201]

SESSION 1 LENS DESIGN METHODOLOGY I

9192 04	Using saddle points for challenging optical design tasks [9192-2]
9192 05	Double surface imaging designs with unconstrained object to image mapping under rotational symmetry [9192-3]
9192 07	Design and analysis of an adaptive lens that mimics the performance of the crystalline lens in the human eye [9192-5]

SESSION 2 LENS DESIGN METHODOLOGY II

9192 08	Caustic surface of a plane wavefront refracted by a smooth arbitrary surface [9192-6]
9192 09	Research on the controlling thermal defocus aberration for the infrared imaging system based on wavefront coding [9192-7]
9192 0A	Complex imaging with ray-rotating windows [9192-8]
9192 0B	Study of camera calibration process with ray tracing [9192-9]

SESSION 3 ADVANCED OPTICAL TECHNIQUES

9192 0C	Diffraction limited integral field spectrographs for large telescopes (Invited Paper) [9192-10]
9192 0D	Conception of a cheap infrared camera using a Fresnel lens [9192-11]
9192 0E	Multi-aperture microoptical system for close-up imaging [9192-12]
9192 0F	Optical performance analysis of plenoptic camera systems [9192-13]

- 9192 0G **Proof-of-concept demonstration of a miniaturized multi-resolution refocusing imaging system using an electrically tunable lens** [9192-14]
- 9192 0H **Consumer electronic optics: how small can a lens be: the case of panomorph lenses** [9192-15]

SESSION 4 SPECIAL OPTICAL SURFACES

- 9192 0I **Overview of diffraction gratings technologies for space-flight satellites and astronomy** [9192-16]
- 9192 0J **Chromatic error correction of diffractive optical elements at minimum etch depths** [9192-16]
- 9192 0L **Moth's eye: anti-reflection gratings on germanium freeform surfaces** [9192-19]

SESSION 5 APPLICATIONS AND ANALYSIS

- 9192 0O **3D head mount display with single panel** [9192-22]
- 9192 0P **Afocal viewport optics for underwater imaging** [9192-23]
- 9192 0Q **Vibration analysis and testing for the LLST optical module** [9192-24]

SESSION 6 SOLID STATE LIGHTING

- 9192 0S **Packaging efficiency analysis of phosphor-converted white LEDs (Invited Paper)** [9192-26]
- 9192 0T **Optical design of low glare luminaire applied for tunnel light** [9192-27]
- 9192 0U **Nonimaging achromatic lens design for LED direct-lit backlight applications** [9192-28]
- 9192 0V **A novel method for designing dichroic color filter transmittance curves for lighting applications** [9192-29]
- 9192 0W **Six-color solid state illuminator for cinema projector** [9192-30]

SESSION 7 POLYMER/MOLDED GLASS OPTICS

- 9192 0Y **Fabrication of heterogeneous microlenses using self-surface tension** [9192-32]
- 9192 0Z **Miniaturized camera system for an endoscopic capsule for examination of the colonic mucosa** [9192-33]
- 9192 10 **Stability of glass versus plastics for transmissive high-power LED optics** [9192-34]

- 9192 11 **Surface micro-structuring of glassy carbon for precision glass molding of diffractive optical element** [9192-35]
- 9192 12 **Employment of fluorescence for autofocusing in direct laser writing micro-/nano-lithography** [9192-36]

POSTER SESSION

- 9192 13 **High quality UV: NIR thin film interference polarizers** [9192-37]
- 9192 14 **Investigation of diamond turning: of rapidly solidified aluminum alloys** [9192-38]
- 9192 16 **Comparison of refractive rotating dual-prism scanner used in near and far field** [9192-40]
- 9192 18 **Analysis of double conjugate zoom lens using tunable-focus lenses** [9192-42]
- 9192 19 **Research on properties of an infrared imaging diffractive element** [9192-43]
- 9192 1A **Near-infrared imaging equipment that detects small organic substances in thick foods** [9192-44]
- 9192 1B **Analyzing of light pattern uniformity in multi-chips LED lighting** [9192-45]
- 9192 1C **Study of CCT varying by volume scattering diffuser with moving and rotating white light LED** [9192-47]
- 9192 1D **LED collimation module for time sequential back light system** [9192-48]
- 9192 1E **Manufacturing of freeform mirror by milling and altering its optical characteristics by Ns-laser polishing and ALD coatings** [9192-49]
- 9192 1F **Portable system to luminaries characterization** [9192-50]
- 9192 1G **Phase retrieval of microscope objects using the Wavelet-Gabor transform method from holographic filters** [9192-51]
- 9192 1H **Controllable focal spot for direct-drive laser fusion based on electro-optic effect** [9192-52]
- 9192 1I **Research on chromatic properties of high order kinoform** [9192-53]
- 9192 1J **Optimized restoration of wavefront coded images** [9192-54]
- 9192 1L **Mold production for polymer optics** [9192-56]
- 9192 1M **Effect of injection molding processing conditions on optical properties of polyetherimide** [9192-59]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We accepted 56 papers, including 20 poster papers, for our conference on Current Developments in Lens Design and Optical Engineering, of which 49 were presented at the conference over a period of three days. The papers were organized in 7 sessions that ranged from lens design methodology, advanced optical techniques, special optical surfaces, applications and analysis, solid-state lighting, and polymer/molded glass optics. A total of 46 papers are presented in these Proceedings that include two invited papers, one on diffraction-limited integral-field spectrographs for large telescopes, and the other on packaging efficiency analysis of phosphor-converted white LEDs. There are 10 papers from Taiwan, 6 each from the United States and Germany, 5 from Mexico, 3 from China, 2 each from Canada, France, and Poland, and 1 each from Belgium, Czech Republic, Finland, Japan, Lithuania, Netherlands, Russian Federation, Spain, Switzerland, and United Kingdom.
