Proceedings of SPIE 0277-786X, V. 9254

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Emerging Technologies in Security and Defence II; and Quantum-Physics-based Information Security III, edited by
M. T. Gruneisen, M. Dusek, J. G. Rarity, K. L. Lewis, R. C. Hollins, T. J. Merlet, A. Toet, Proc. of SPIE
Vol. 9254, 925401 · © 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2081410

Proc. of SPIE Vol. 9254 925401-1

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
xi	<i>Introduction to Part B: Emerging Technologies</i>

Part A Quantum-Physics-Based Information Security III

SATELLITE QUANTUM COMMUNICATION

9254 02	The NanoQEY mission: ground to space quantum key and entanglement distribution using a nanosatellite (Keynote Paper) [9254-1]
9254 04	Adaptive spatial filtering for daytime satellite quantum key distribution [9254-3]

PHOTON SOURCES, TRANSCEIVERS, AND REPEATERS FOR QUANTUM INFORMATION SYSTEMS

9254 05	Room-temperature single-photon sources based on nanocrystal fluorescence in photonic/plasmonic nanostructures (Invited Paper) [9254-4]
---------	---

IMPLEMENTATION OF QUANTUM KEY DISTRIBUTION AND OTHER QUANTUM PROTOCOLS

9254 0B	Quantum hyperdense coding [9254-9]
9254 0C	Efficient quantum key distribution based on pulse-position modulation [9254-10]
9254 0D	An in fiber experimental approach to photonic quantum digital signatures that does not require quantum memory [9254-11]

QUANTUM COMPUTATION AND QUANTUM INFORMATION THEORY

9254 0I	Programming non-trivial algorithms in the measurement-based quantum computation model [9254-16]
9254 0J	A periodic probabilistic photonic cluster state generator [9254-17]
9254 0K	Device-independent randomness extraction for arbitrarily weak min-entropy source [9254-18]
9254 0L	Misinterpretation of statistical distance in security of quantum key distribution shown by simulation [9254-19]

POSTER SESSION

9254 ON **Special properties of single-photon optical fiber sensor for security needs** [9254-21]

Part B *Emerging Technologies in Security and Defence II*

SENSOR TECHNOLOGIES AND ISR

9254 OP **High operating temperature SWIR HgCdTe APDs for remote sensing** [9254-31]

9254 OQ **Demonstration of an InAsBi photodiode operating in the MWIR** [9254-32]

9254 OR **The future dynamic world model (Keynote Paper)** [9254-33]

9254 OS **Photonically enabled Ka-band radar and infrared sensor subscale testbed** [9254-34]

9254 OT **Photonics and bioinspiration (Keynote Paper)** [9254-36]

9254 OU **Artificial human vision camera** [9254-37]

PHOTONIC SYSTEMS AND THEIR APPLICATION

9254 OW **Atmospheric energy harvesting: use of Doppler Wind Lidars on UAVs to extend mission endurance and enable quiet operations** [9254-39]

9254 OX **Active photonic sensor communication cable for field application of optical data and power transmission** [9254-40]

9254 OZ **AlGaInN laser diode technology for defence, security and sensing applications** [9254-42]

9254 IO **Monolithic CMOS-MEMS integration for high-g accelerometers** [9254-43]

POSTER SESSION

9254 II **Digital orthogonal receiver for wideband radar based on compressed sensing** [9254-35]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David H. Titterton, Defence Science and Technology Laboratory
(United Kingdom)

Symposium Co-chairs

Reinhard Ebert, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung (Germany)

Ric H. Schleijsen, TNO Defence, Security and Safety (Netherlands)

Part A: Quantum-Physics-Based Information Security

Conference Chairs

Mark T. Gruneisen, Air Force Research Laboratory (United States)

Miloslav Dusek, Palacký University Olomouc (Czech Republic)

John G. Rarity, University of Bristol (United Kingdom)

Conference Programme Committee

Jan Bouda, Masaryk University (Czech Republic)

Robert W. Boyd, University of Ottawa (Canada)

Gerald S. Buller, Heriot-Watt University (United Kingdom)

Ryan Camacho, Sandia National Laboratories (United States)

John D. Gonglewski, European Office of Aerospace Research and
Development (United Kingdom)

Richard J. Hughes, Los Alamos National Laboratory (United States)

Gregory S. Kanter, NuCrypt LLC (United States)

Prem Kumar, Northwestern University (United States)

Norbert Lütkenhaus, University of Waterloo (Canada)

Vadim V. Makarov, Norwegian University of Science and Technology
(Norway)

Ronald E. Meyers, U.S. Army Research Laboratory (United States)

Jane E. Nordholt, Los Alamos National Laboratory (United States)

Miles J. Padgett, University of Glasgow (United Kingdom)

Momtchil Peev, Austrian Research Centres GmbH - ARC (Austria)

Renato Renner, ETH Zürich (Switzerland)

Andrew J. Shields, Toshiba Research Europe Ltd. (United Kingdom)

Rupert Ursin, Austrian Academy of Sciences (Austria)

Session Chairs

- 1 Satellite Quantum Communication
Ryan Camacho, Sandia National Laboratories (United States)
- 2 Photon Sources, Transceivers, and Repeaters for Quantum Information Systems
Miloslav Dusek, Palacký University Olomouc (Czech Republic)
- 3 Implementation of Quantum Key Distribution and other Quantum Protocols
Mark T. Gruneisen, Air Force Research Laboratory (United States)
- 4 Continuous Variables Approaches to Quantum Key Distribution
Rupert Ursin, Austrian Academy of Sciences (Austria)
- 5 Quantum Computation and Quantum Information Theory
Timothy Ralph, The University of Queensland (Australia)

Part B: Emerging Technologies

Conference Chairs

Keith L. Lewis, Sciovis Ltd. (United Kingdom)
Richard C. Hollins, Defence Science and Technology Laboratory (United Kingdom)
Thomas J. Merlet, Thales Optronique S.A.S. (France)
Alexander Toet, TNO Defence, Security and Safety (Netherlands)

Conference Programme Committee

Tibor Bercei, Budapest University of Technology and Economics (Hungary)
Gerald S. Buller, Heriot-Watt University (United Kingdom)
John J. R. David, The University of Sheffield (United Kingdom)
Didier Decoster, Université des Sciences et Technologies de Lille (France)
Daniel Dolfi, Thales Research & Technology (France)
John D. Goglewski, European Office of Aerospace Research and Development (United Kingdom)
Hugh D. Griffiths, University College London (United Kingdom)
Dominique Hamoir, ONERA (France)
Andrew R. Harvey, University of Glasgow (United Kingdom)
Steven R. Jost, BAE Systems (United States)
Robert A. Lamb, SELEX Galileo Ltd. (United Kingdom)
Javier Marti-Sendra, Universidad Politècnica de València (Spain)
Stephen P. McGeoch, Thales Optronics Ltd. (United Kingdom)

Miguel A. Piqueras, DAS Photonics (Spain)
Julien Poette, Institut National Polytechnique de Grenoble (France)
Ian K. Proudler, Malvern Innovations (United Kingdom)
Robert Rehm, Fraunhofer-Institut für Angewandte Festkörperphysik
(Germany)
Kevin Ridley, Malvern Innovations (United Kingdom)
Béla Szentpáli, Research Institute for Technical Physics and Materials
Science (Hungary)
Mauro G. Varasi, Finmeccanica (Italy)
Jean-Pierre Vilcot, Université des Sciences et Technologies de Lille
(France)

Session Chairs

- 6 Sensor Technologies and ISR
Keith L. Lewis, Sciovis Ltd. (United Kingdom)
Richard C. Hollins, Defence Science and Technology Laboratory
(United Kingdom)
- 7 Photonic Systems and their Application
Alexander Toet, TNO Defence, Security and Safety (Netherlands)
Keith L. Lewis, Sciovis Ltd. (United Kingdom)

Introduction to Part B: Emerging Technologies

This conference brought together emerging activities in photonic technologies, including discriminative imaging, computational imaging, micro- and nanotechnology sensors, photonic micro-devices, spectroscopic technologies and energy harvesting techniques, within the context of their associated defence exploitation as well as their potential civilian application. To help focus interest, the conference sessions were deliberately organised around a group of four keynote presentations, highlighting the growing impact of plasmonic technologies, the relevance of bio-inspiration for sensors, as well as accounts of selected programs being supported by DARPA's Strategic Technology Office and a review of active electro-optic (EO) imaging recently carried out by the National Research Council of the US Academies. Other papers covered research on EO detectors for the SWIR and MWIR bands, CMOS-MEMS integration, quaternary laser diodes for the blue spectral band and the exploitation of photonics in radar systems and for data/power transmission.
