Event: SPIE Asia-Pacific Remote Sensing, 2014, Beijing, China

PROCEEDINGS OF SPIE

Earth Observing Missions and Sensors: Development, Implementation, and Characterization III

**Xiaoxiong Xiong
Haruhisa Shimoda**
Editors

**13–15 October 2014
Beijing, China**

Sponsored by
SPIE

Cosponsored by
State Key Laboratory of Remote Sensing Science (China) • NASA—National Aeronautics and
Space Administration (United States) • Ministry of Earth Sciences (India)

Cooperating Organizations
Institute of Remote Sensing and Digital Earth (China) • JAXA—Japan Aerospace Exploration
Agency (Japan) • NICT—National Institute of Information and Communications Technology
(Japan) • ISRO—Indian Space Research Organization (India) • National Satellite
Meteorological Center (China) • State Key Laboratory of Information Engineering in
Surveying, Mapping and Remote Sensing (China) • State Key Laboratory of Resources and
Environmental Information System (China) • Center For Earth System Science, Tsinghua
University (China) • College of Global Change and Earth System Science, Beijing Normal
University (China) • Key Laboratory of Digital Earth Science (China)

Volume 9264

Proceedings of SPIE 0277-786-786X, V.9264

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Earth Observing Missions and Sensors: Development, Implementation, and Characterization III,
edited by Xiaoxiong Xiong, Haruhisa Shimoda, Proc. of SPIE Vol. 9264, 926401
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2181932

Proc. of SPIE Vol. 9264 926401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

SESSION 1 EXISTING AND NEW MISSIONS AND SENSORS I

9264 02	Overview of Suomi NPP VIIRS performance in the last 2.5 years (Invited Paper) [9264-1]
9264 03	EarthCARE mission, overview, implementation approach, and development status (Invited Paper) [9264-2]
9264 04	Total solar irradiance monitors, space instruments for measuring total solar irradiance on FY-3 satellites [9264-3]

SESSION 2 REFERENCE CALIBRATION AND INTER-COMPARISON

9264 08	In-flight intercalibration of FY-3C visible channels with AQUA MODIS [9264-7]
9264 09	FY3C IRAS on-orbit performance and measurements validation [9264-8]
9264 0A	Radiometric calibration of DMSP-OLS sensor using VIIRS day/night band [9264-9]
9264 0B	Inter-calibration of infrared bands of FY-3C MERSI and VIRR using hyperspectral sensor CrIS and IASI [9264-10]

SESSION 3 EXISTING AND NEW MISSIONS AND SENSORS II

9264 0E	Present status of the global change observation mission 1st - water 'SHIZUKU' (GCOM-W1) and the advanced microwave scanning radiometer 2 (AMS2) [9264-13]
9264 0F	An update on GOSAT standard products at five-and-a-half years after the launch [9264-14]
9264 0G	The development status of Second Generation Global Imager (SGLI), Infrared Scanning Radiometer (SGLI-IRS) [9264-15]

SESSION 4 NEW RESEARCH AND CALIBRATION TECHNIQUES

9264 0H	Electro-optical design for a space camera based on MODTRAN data analysis [9264-18]
---------	---

- 9264 0I **Can we monitor the bare soil freeze-thaw process using GNSS-R?: a simulation study** [9264-19]

SESSION 5 SENSOT PRE-LAUNCH AND POST-LAUNCH CALIBRATION I

- 9264 0K **Trending of Suomi-NPP VIIRS radiometric performance with lunar band ratio** [9264-21]
- 9264 0L **VIIRS reflective solar bands on-orbit calibration and performance: a three-year update** [9264-22]
- 9264 0M **Performance evaluation for on-orbit modulation transfer function of FengYun-3C medium resolution spectral imager (MERSI) using polar ice and snow** [9264-23]

SESSION 6 SENSOT PRE-LAUNCH AND POST-LAUNCH CALIBRATION II

- 9264 0O **First result from ALOS-2 operation** [9264-25]
- 9264 0Q **Proto Flight Model (PFM) performance and development status of Visible and Near Infrared Radiometer (VNR) on the Second-generation Global Imager (SGLI)** [9264-27]
- 9264 0R **Adjusting Aqua MODIS TEB nonlinear calibration coefficients using iterative solution** [9264-28]
- 9264 0S **Onboard blackbody calibration models of FY-2D SVISSR based on GSICS** [9264-29]

SESSION 7 SENSOR PERFORMANCE VALIDATION AND VICARIOUS CALIBRATION I

- 9264 0T **Progress of calibration and validation for quantitative remote sensing in China (Invited Paper)** [9264-30]
- 9264 0U **The radiometric performance of FY-3A/B MERSI reflective solar bands** [9264-31]
- 9264 0V **Automated test-site radiometer for vicarious calibration** [9264-32]
- 9264 0W **Detecting the radiometric changes of FY-3A/MERSI reflective solar bands by use of stable desert sites** [9264-33]

SESSION 8 SENSOR PERFORMANCE VALIDATION AND VICARIOUS CALIBRATION II

- 9264 0Y **Performance assessment of FY-3C/MERSI on early orbit** [9264-35]
- 9264 0Z **FY-3C/MERSI pre-launch calibration for reflective solar bands** [9264-36]
- 9264 10 **Assessing the VIIRS RSB calibration stability using deep convective clouds** [9264-37]

SESSION 9 IMPROVED DATA ANALYSIS METHODOLOGIES AND RESULTS I	
9264 12	Electronic crosstalk correction for terra long wave infrared photovoltaic bands [9264-39]
9264 13	Evaluation of nonlinear calibration on the satellite TIR image applications [9264-40]
9264 14	The new single-channel approaches for retrieving land surface temperature and the preliminary results [9264-41]
9264 15	The comparison of BRDF model and validation of MCD43 products by the 2013 Dunhuang Gobi experiments [9264-42]
SESSION 10 IMPROVED DATA ANALYSIS METHODOLOGIES AND RESULTS II	
9264 1B	Detection of land subsidence of Shanghai: a research based on differential SAR interferometry [9264-48]
POSTER SESSION	
9264 1C	GOES-R AWG product processing system framework: research to operations [9264-49]
9264 1D	Monitoring the VIIRS ocean color band calibration using the Rayleigh scattering method [9264-50]
9264 1E	Modeling phase-angle dependence of lunar irradiance using long-term lunar measurements by VIRS on TRMM [9264-51]
9264 1F	The assessment of in-flight dynamic range and response linearity of optical payloads onboard GF-1 satellite [9264-52]
9264 1G	Simulation of wind performance in tropical cyclone for China's future dual-frequency wind field radar [9264-53]
9264 1I	System characteristics design of WindRadar on FengYun-3E meteorological satellite [9264-56]
9264 1K	Study on the main performances of interferometric radiometers with a rotating array [9264-58]
9264 1M	Suomi NPP VIIRS calibration knowledge base for SDR data quality assurance, anomaly investigation, and EDR applications [9264-60]
9264 1N	Pre-processing algorithm and airborne campaign result analysis of a rotating fan-beam scatterometer [9264-61]
9264 1O	SAR Image despeckling via sparse representation [9264-62]
9264 1P	Digital building model generation through the intergration of aerial LiDAR and multiple photo data in urban areas [9264-63]

- 9264 1Q **On-orbit performance of the MODIS SWIR bands** [9264-64]
- 9264 1R **A theoretical method for vanes profile design in star sensor baffle** [9264-66]
- 9264 1S **The new TSI radiometer CLARA** [9264-67]
- 9264 1T **The solar vector error within the SNPP Common GEO code, the correction, and the effects on the VIIRS SDR RSB calibration** [9264-68]
- 9264 1U **Analysis of signal to noise ratio for atmospheric ultraviolet remote sensing on geostationary orbit with variations of solar incident angles** [9264-69]
- 9264 1V **Adaptive and fast focusing technology research based on configurational entropy for high resolution satellites in orbit** [9264-70]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committees

Symposium Chairs

Upendra Singh, NASA Langley Research Center (United States)

Jiancheng Shi, Institute of Remote Sensing Applications and Digital Earth (China)

Honorary Symposium Chairs

George Komar, NASA Headquarters (United States)

Toru Fukuda, Japan Aerospace Exploration Agency (Japan)

Deren Li, Wuhan University (China)

Shailesh R. Nayak, Ministry of Earth Sciences (India)

Guanhua Xu, Former Minister of Science and Technology Department of China (China)

Symposium Co-chairs

Toshio Iguchi, National Institute of Information and Communications Technology (Japan)

A. S. Kiran Kumar, Space Applications Center (India)

International Organizing and Technical Program Committee

Akimasa Sumi, The University of Tokyo (Japan)

Allen M. Larar, NASA Langley Research Center (United States)

Delu Pan, The Second Institute of Oceanography, SOA (China)

Haruhisa Shimoda, Tokai University (Japan)

Huadong Guo, Institute of Remote Sensing and Digital Earth (China)

Jiancheng Shi, Institute of Remote Sensing and Digital Earth (China)

Jing Ming Chen, Nanjing University (China) and University of Toronto (Canada)

Kazuhiro Asai, Tohoku Institute of Technology (Japan)

Kohei Mizutani, National Institute of Information and Communications Technology (Japan)

Peng Gong, Tsinghua University (China)

Peng Zhang, China Meteorological Administration (China)

Robert J. Frouin, Scripps Institution of Oceanography (United States) and University of California, San Diego (United States)

Shunlin Liang, Beijing Normal University (China) and University of Maryland (United States)

Thomas J. Jackson, U. S. Department of Agriculture (United States)

Tiruvallam N. Krishnamurti, Florida State University (United States)
Toru Fukuda, Japan Aerospace Exploration Agency (Japan)
Toshiyoshi Kimura, Japan Aerospace Exploration Agency (Japan)
Upendra N. Singh, NASA Langley Research Center (United States)
Xiaoxiong Xiong, NASA Goddard Space Flight Center (United States)
Zhanqing Li, Beijing Normal University (China) and University of
Maryland, College Park (United States)
Guoqing Zhou, Guilin University of Technology (China)

Local Organizing Committee

Liangfu Chen, Institute of Remote Sensing and Digital Earth (China)
Zifeng Wang, Institute of Remote Sensing and Digital Earth (China)
Mingmei Chen, Institute of Remote Sensing and Digital Earth (China)
Dandan Li, Institute of Remote Sensing and Digital Earth (China)
Tianxing Wang, Institute of Remote Sensing and Digital Earth (China)
Xiliang Ni, Institute of Remote Sensing and Digital Earth (China)
Xiaofeng Yang, Institute of Remote Sensing and Digital Earth (China)
Ying Zhang, Institute of Remote Sensing and Digital Earth (China)
Tiantian Wang, Institute of Remote Sensing and Digital Earth (China)
Xiaoying Ouyang, Institute of Remote Sensing and Digital Earth
(China)
Le Yang, Institute of Remote Sensing and Digital Earth (China)
Man Peng, Institute of Remote Sensing and Digital Earth (China)

Conference Committee

Conference Chairs

Xiaoxiong Xiong, NASA Goddard Space Flight Center (United States)
Haruhisa Shimoda, Tokai University (Japan)

Conference Co-chairs

Changyong Cao, NOAA National Environmental Satellite, Data, and Information Service (United States)
Xingfa Gu, Institute of Remote Sensing and Digital Earth (China)
A.S. Kiran Kumar, Space Applications Center (India)

Conference Program Committee

Xiaolong Dong, Center for Space Science and Applied Research (China)
J. C. Duh, NASA Headquarters (United States)
James J. Butler, NASA Goddard Space Flight Center (United States)
Raju U. Datla, National Institute of Standards and Technology (United States)
Dennis L. Helder, South Dakota State University (United States)
Xiuqing Hu, China Meteorological Administration (China)
Chuanrong Li, The National Remote Sensing Center of China (China)
Jens Nieke, European Space Research and Technology Center (Netherlands)
Sanjeevi Shanmugam, Anna University Chennai (India)
Kazuhiro Tanaka, Japan Aerospace Exploration Agency (Japan)

Session Chairs

- 1 Existing and New Missions and Sensors I
Xiaoxiong Xiong, NASA Goddard Space Flight Center (United States)
J. C. Duh, NASA Headquarters (United States)
- 2 Reference Calibration and Inter-comparison
Xingfa Gu, Institute of Remote Sensing and Digital Earth (China)
Xiuqing Hu, National Satellite Meteorological Center (China)
- 3 Existing and New Missions and Sensors II
Changyong Cao, NOAA National Environmental Satellite, Data, and Information Service (United States)
Chuanrong Li, Academy of Opto-Electronics (China)

- 4 New Research and Calibration Techniques
Kazuhiro Tanaka, Japan Aerospace Exploration Agency (Japan)
Jim Butler, NASA Goddard Space Flight Center (United States)
- 5 Sensor Pre-launch and Post-launch Calibration I
J. C. Duh, NASA Headquarters (United States)
Haruhisa Shimoda, Tokai University (Japan)
- 6 Sensor Pre-launch and Post-launch Calibration II
Haruhisa Shimoda, Tokai University (Japan)
Xiaolong Dong, Center for Space Science and Applied Research (China)
- 7 Sensor Performance Validation and Vicarious Calibration I
Xiuqing Hu, National Satellite Meteorological Center (China)
- 8 Sensor Performance Validation and Vicarious Calibration II
Chuanrong Li, Academy of Opto-Electronics (China)
Kazuhiro Tanaka, Japan Aerospace Exploration Agency (Japan)
- 9 Improved Data Analysis Methodologies and Results I
Aisheng Wu, Sigma Space Corp. (United States)
Xingfa Gu, Institute of Remote Sensing and Digital Earth (China)
- 10 Improved Data Analysis Methodologies and Results II
Xiaolong Dong, Center for Space Science and Applied Research (China)
Changyong Cao, NOAA National Environmental Satellite, Data, and Information Service (United States)
