Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>
xv	<i>Introduction</i>

SESSION 1 OPTICAL METROLOGY METHODS I

9276 02	Phase retrieval for optical metrology (Invited Paper) [9276-1]
9276 03	Single-shot three-dimensional shape measurement of specular surfaces by orthogonal color fringe pattern reflection technique [9276-9]
9276 04	Pixel correspondence calibration method of a 2CCD camera based on absolute phase calculation [9276-3]
9276 05	Matching method of the vision image captured by the lunar rover exploring on lunar surface [9276-4]

SESSION 2 OPTICAL METROLOGY METHODS II

9276 08	A high-reflective surface measurement method based on conoscopic holography technology [9276-7]
9276 09	Three-dimensional reconstruction of specular reflecting technical surfaces using structured light microscopy [9276-8]
9276 0A	Optimized design of a TOF laser range finder based on time-correlated single-photon counting [9276-10]

SESSION 3 OPTICAL METROLOGY METHODS III

9276 0C	Optimizing binary dithering patterns to improve phase quality (Invited Paper) [9276-12]
9276 0D	A hand-held, high-resolution 3D shape measurement system using structured and unstructured illumination [9276-13]
9276 0F	Polarization scattering methods applied in particle analyzing [9276-15]
9276 0G	Compact camera for 3D position registration of cancer in radiation treatment [9276-16]

SESSION 4	OPTICAL METROLOGY METHODS IV
9276 0I	Real-time scanner error correction in white light interferometry (Invited Paper) [9276-18]
9276 0J	A robust automatic registration method for hand-held structured light 3D scanner [9276-19]
9276 0K	System implementation of self-mixing interferometry technique-based measurement on Young's modulus [9276-20]
9276 0L	Research on high-accuracy two-dimensional digital image correlation hardware measurement systems used in the engineering practice [9276-21]
9276 0M	The art of specifying surface quality (Invited Paper) [9276-22]
SESSION 5	OPTICAL METROLOGY METHODS V
9276 0N	Dynamic 3D shape measurement based on grating projection and Fourier fringe analysis (Invited Paper) [9276-23]
9276 0Q	Comparing digital-light-processing (DLP) and liquid-crystal-display (LCD) projection technologies for high-quality 3D shape measurement (Invited Paper) [9276-26]
SESSION 6	OPTICAL METROLOGY METHODS VI
9276 0S	Solutions on micro lens applied in multiple configuration systems [9276-28]
9276 0T	The assessment of industrial CT's probing error [9276-29]
9276 0U	A driving step auto-access method for single-wavelength microscopic interference [9276-30]
9276 0V	Long-range active retroreflector to measure the rotational orientation in conjunction with a laser tracker [9276-31]
9276 0W	Experimental study for the influence of surface characteristics on the fringe patterns (Invited Paper) [9276-32]
SESSION 7	OPTICAL METROLOGY APPLICATIONS I
9276 0Y	New method of verifying optical flat flatness [9276-34]
9276 0Z	Mode-disturbing effect of laser speckle in optical fibers [9276-35]
9276 10	The model about the package structure of LED and the light intensity distribution [9276-36]

SESSION 8 OPTICAL METROLOGY APPLICATIONS II

- 9276 13 **Effects of lens aberrations in phase space (Invited Paper) [9276-39]**
- 9276 15 **Optical fiber power measurement using different transfer standards [9276-41]**
- 9276 17 **A high accuracy subaperture stitching system for nonflatness measurement of wafer stage mirror [9276-43]**
- 9276 19 **A high speed camera with auto adjustable ROI for product's outline dimension measurement [9276-71]**

POSTER SESSION

- 9276 1A **A registration method based on profile matching for vegetation canopy measurement [9276-2]**
- 9276 1C **Correction of refraction index based on adjacent pulse repetition interval lengths [9276-46]**
- 9276 1D **Accurate and automatic extrinsic calibration method for blade measurement system integrated by different optical sensors [9276-47]**
- 9276 1G **Analysis on how spectrum affects the test of solar cell electrical property [9276-50]**
- 9276 1H **A new technique of recognition for coded targets in optical 3D measurement [9276-51]**
- 9276 1I **Binocular videogrammetric system for three-dimensional measurement in low-speed wind tunnel [9276-52]**
- 9276 1J **An improved bundle adjustment model and algorithm with novel block matrix partition method [9276-53]**
- 9276 1K **High-speed three-dimensional shape measurement using spatial frequency encoding and DLP projector [9276-54]**
- 9276 1L **Verification and analysis of stray light in high-power laser system [9276-55]**
- 9276 1M **Cost-effective and full-field method for measuring vibration of loudspeaker membrane using fringe projection [9276-56]**
- 9276 1N **Optical image encryption in phase space [9276-57]**
- 9276 1O **Influence of both angle and position error of pentaprism on accuracy of pentaprism scanning system [9276-58]**
- 9276 1P **Optimal design of optical length in low turbidity measurement system with wavelength 1310 nm and 1550 nm [9276-59]**
- 9276 1Q **The research of filtering on images with noises of the three-mirror aperture optical system [9276-60]**

- 9276 1R **Measuring the displacement of the movable guard electrode in the new vertical calculable capacitor at NIM** [9276-61]
- 9276 1S **Cramér-Rao analysis of three-channel phase diverse wave-front sensing for Golay3 aperture** [9276-62]
- 9276 1T **Dual-frequency laser displacement and angle interferometer** [9276-63]
- 9276 1U **A 2-dimensionalal thickness measurement ellipsometer based on the liquid crystal variable retarder** [9276-64]
- 9276 1W **Precision judgment criteria and supplement data processing method in high-precision ranging with dual-comb lasers** [9276-66]
- 9276 1X **Novel high speed method using gray level vector modulation for 3D shape measurement** [9276-67]
- 9276 1Y **A new usage of ASIFT for the range image registration** [9276-68]
- 9276 1Z **A new geometrical model and mathematical method for three-dimensional surface reconstruction based on phase-shifting structured light technique** [9276-69]
- 9276 20 **An optimized FBG-based fatigue monitoring strategy on deepwater risers** [9276-70]
- 9276 22 **Hyperspectral visible-near infrared imaging for the detection of waxed rice** [9276-73]
- 9276 23 **Soluble solids content and firmness non-destructive inspection and varieties discrimination of apples based on visible near-infrared hyperspectral imaging** [9276-74]
- 9276 24 **Sensing driver's awareness by combining fisheye camera and Kinect** [9276-75]
- 9276 25 **High-frequency deformation grating fabrication techniques and applications** [9276-76]
- 9276 26 **Precision issues in angle measurements by means of autocollimator** [9276-77]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

This is the proceedings of the conference on Optical Metrology and Inspection for Industrial Applications III that was held as part of SPIE/COS Photonics Asia (in Beijing, China, 9–11 October 2014). This conference focuses on methods, analysis, and applications of optical metrology and inspection that have been applied to various industries with a particular emphasis on the manufacturing industry. The field of optical metrology and inspection has rapidly grown to wide acceptance for many industrial applications. For example, the requirement from industry realized high-speed and downsized measurement systems, and advances in machine/robot vision have provided compact and smart camera systems, new lighting systems, and better ways of data transfer.

Non-contact methods based on optical imaging principles have been seen wide use in the mechanical engineering and electronics industry, and also made advances in traditional manufacturing areas such as automotive and aerospace manufacturing. These methods are also being used for defect and flaw inspection, and precision measurements. Recent computing power has made analysis methods such as phase-shifting a viable tool for fast on-line inspection for process control and metrology applications. This conference is intended to address the latest advances and future developments in the areas of optical metrology and inspection as they are applied to practical applications in various industries.

In these proceedings, papers submitted to the conference are presented in the following eight sessions: Optical Metrology Methods I to VI and Optical Metrology Applications I and II, and one Poster Session.

In addition to optical principles and techniques, imaging methods and analysis techniques have also become more and more popular in practical applications due to rapid advanced computational processing methods, camera systems and device technologies including various optoelectrical elements and devices. In the next conference scheduled in 2016, more papers are expected to be presented in those areas as well.
