Proceedings of SPIE 0277-786X, V. 9277

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nanophotonics and Micro/Nano Optics II, edited by Zhiping Zhou, Kazumi Wada, Proc. of SPIE Vol. 9277, 927701
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2181559

Proc. of SPIE Vol. 9277 927701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

vii	<i>Authors</i>
ix	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>
xiii	<i>Introduction</i>

SILICON PHOTONICS I

9277 03	SOI (silicon-on-insulator)-compatible hybrid nanoplasmonics: waveguiding, polarization-handling, and thermal-tuning (Invited Paper) [9277-1]
9277 06	Large-scale silicon photonics circuit design [9277-58]

SILICON PHOTONICS II

9277 08	Hybrid III-V/silicon SOA for photonic integrated circuits (Invited Paper) [9277-6]
9277 0B	Ultra-compact broadband nanowire-to-slot waveguide mode converter based on SOI [9277-9]
9277 0C	High-contrast grating hollow-core waveguide splitter applied to optical phased array [9277-10]
9277 0E	GeSi photonics for telecommunication applications [9277-12]

NONLINEAR NANOPHOTONICS

9277 0N	Nonlinear Fano resonance in photonic crystal waveguide and cavity system: physical properties and applications [9277-21]
9277 0P	Manipulation of photonic spin Hall effect with space-variant Pancharatnam-Berry phase [9277-23]

QUANTUM OPTICS AND SPINTRONICS

9277 0Q	Exciton polariton laser diodes (Invited Paper) [9277-24]
---------	---

LIGHT MANIPULATION AND APPLICATIONS

- 9277 OT **Substrate-blind photonic integration based on high-index glass materials (Invited Paper)** [9277-28]
- 9277 OV **Floating AC-DEP (dielectrophoretic) manipulations of fluorescent nanoparticle at metal nano-structure for plasmonic applications** [9277-31]
- 9277 OW **Study about characteristics of extinction factor for PM_{2.5} particles based on mie scattering theory** [9277-32]
- 9277 OX **Continuing research on the classical spiraling photon model** [9277-33]
- 9277 OY **A new electro-absorption modulator structure based on Ge/SiGe coupled quantum wells for on-chip optical interconnects** [9277-25]
- 9277 OZ **Polarization aberration compensation method by adjusting illumination partial coherent factors in immersion lithography** [9277-70]

NANOWIRE LIGHT EMITTERS

- 9277 12 **High quality GaAs nanowires epitaxy on patterned Si substrates** [9277-37]
- 9277 14 **Ex-situ preparation of high conductive polymer/SWNTs nanocomposites for structure fabrication** [9277-39]
- 9277 15 **Fabrication of 2-inch nano patterned sapphire substrate with high uniformity by two-beam laser interference lithography** [9277-30]

LIGHT-HARVESTING MATERIALS AND DEVICES

- 9277 18 **Ultra-thin film nanostructured gallium arsenide solar cells** [9277-42]
- 9277 19 **Chemical exfoliation and optical characterization of threading-dislocation free gallium-nitride ultrathin nanomembranes** [9277-43]
- 9277 1A **Remote excitation fluorescence correlation spectroscopy using silver nanowires** [9277-44]

POSTER SESSION

- 9277 1C **Broadband polarizer or band-pass filter based on a dielectric grating with top and bottom metallic coverings** [9277-46]
- 9277 1D **Visible light stealth based on 2D holographic antireflection coatings** [9277-47]
- 9277 1F **Compact and high performance silicon-on-insulator polarization beam splitter based on microring resonator** [9277-49]

- 9277 1G **Tunable optical properties of gold semi-shell nanoparticles** [9277-50]
- 9277 1J **Tunable dual-band infrared polarization filter based on a metal-dielectric-metal compound rectangle strips array** [9277-53]
- 9277 1K **Optical fiber surface plasmon resonance sensor with surface modified gold nanorods for biochemical detection** [9277-54]
- 9277 1L **Properties of single wall carbon nanotubes array antennas in the optical regime** [9277-55]
- 9277 1N **Dual-band filter based on subwavelength metal grating with groove caved in and waveguide layer below** [9277-57]
- 9277 1P **Study on stimulated emission from polymer distributed feedback waveguide using interference ablation** [9277-60]
- 9277 1Q **A review: mid-infrared photonic crystals in silicon and porous silicon based on ion beam irradiation** [9277-61]
- 9277 1S **Slab-modulated uniform and sampled Bragg gratings in SOI ridge waveguides** [9277-63]
- 9277 1T **Analysis of sharpness Fano resonance curve based on eye-like resonators** [9277-64]
- 9277 1U **Fabrication of nano-pillar with sub-100nm resolution based on thiol-ene** [9277-65]
- 9277 1W **Kinetic study of self-assembly of multilayer films using a wavelength-interrogation surface plasmon resonance sensor** [9277-67]
- 9277 1X **Electrowetting actuation of a dye-doped fluorescent droplet** [9277-68]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committees

General Chairs

H. Philip Stahl, NASA Marshall Space Flight Center (United States)
Bingkun Zhou, Tsinghua University (China)

General Co-chairs

Arthur Chiou, National Yang-Ming University (Taiwan, China)
Jianlin Cao, China Ministry of Science and Technology (China)
Junhao Chu, Shanghai Institute of Technical Physics (China)

Technical Program Chairs

Songlin Zhuang, Shanghai University of Science and Technology (China)
Xingde Li, Johns Hopkins University (United States)

Technical Program Co-chairs

Qiming Wang, Institute of Semiconductors (China)
Xu Liu, Zhejiang University (China)
Daoyin Yu, Tianjin University (China)
Qihuang Gong, Peking University (China)
Tianchu Li, National Institute of Metrology (China)
Wei Huang, Nanjing University of Posts and Telecommunications (China)

Local Organizing Committee Chair

Guangcan Guo, University of Science and Technology of China (China)

Local Organizing Committee Co-chairs

Guoqiang Ni, Beijing Institute of Technology (China)
Shusen Xie, Fujian Normal University (China)
Xiaomin Ren, Beijing University of Posts and Telecommunications
(China)
Ying Gu, People's Liberation Army General Hospital (China)
Huilin Jiang, Changchun University of Science and Technology
(China)

General Secretary

Qihuang Gong, Peking University (China)

Local Organizing Committee

Yan Li, Chinese Optical Society/Peking University (China)
Zhiping Zhou, Peking University (China)
Changhe Zhou, Shanghai Institute of Optics and Fine Mechanics
(China)
Qingming Luo, Huazhong University of Science and Technology
(China)

Hon Ki Tsang, The Chinese University of Hong Kong
(Hong Kong, China)
Dan-Xia Xu, National Research Council Canada (Canada)
Lianshan Yan, Southwest Jiaotong University (China)
Changhe Zhou, Shanghai Institute of Optics and Fine Mechanics
(China)
Weidong Zhou, The University of Texas at Arlington (United States)

Session Chairs

- 1 Silicon Photonics I
Zhiping Zhou, Peking University (China)
- 2 Silicon Photonics II
Eric Cassan, Institut d'Électronique Fondamentale (France)
- 3 Surface Plasmons and Near-Field Optics
Kazumi Wada, The University of Tokyo (Japan)
- 4 Nonlinear Nanophotonics
Anatoly V. Zayats, King's College London (United Kingdom)

- 5 Quantum Optics and Spintronics
Juejun Hu, University of Delaware (United States)
- 6 Light Manipulation and Applications
Xingjun Wang, Peking University (China)
- 7 Nanowire Light Emitters
Ching-Fuh Lin, National Taiwan University (Taiwan, China)
- 8 Light-Harvesting Materials and Devices
Linfei Gao, Peking University (China)

Introduction

Recent advances in Nanophotonics and Micro/Nano Optics have created the possibility for integrating photonic circuits and electronic circuits in a single chip, which have the potential to enable massive production at an affordable cost for many applications, including telecommunications, optical interconnects, photoelectric sensing, etc. Recent developments in diverse areas such as nanofabrication techniques, nonlinear nanophotonics, quantum optics, surface plasmons, nanoscale optical electronics, nanostructured photonic crystals, indicate that Nanophotonics and Micro/Nano Optics remain an extremely active research field.

"Nanophotonics and Micro/Nano Optics II (Year: 2014)" is the sequel of the "Nanophotonics and Micro/Nano Optics (Year: 2012)" series under the umbrella of SPIE/COS Photonics Asia. The focus of this conference is on the design, fabrication, and application of micro/nanostructures that facilitate the generation, propagation, manipulation, and detection of light from the infrared to the ultraviolet. The aim of this conference is creating an international forum for researchers to share the latest advancements on Nanophotonics and Micro/Nano Optics. The conference covers a wide range of topics relevant to Nanophotonics and Micro/Nano Optics, including: Silicon Photonics, Surface Plasmons and Near-Field Optics, Nonlinear Nanophotonics, Quantum Optics and Spintronics, Light Manipulation and Applications, Light Manipulation and Applications, and Nanowire Light Emitters.

These Conference Proceedings include the original conference presentations of "Nanophotonics and Micro/Nano Optics II", including a number of invited papers from world renowned scholars. We thank all the contributors for submitting their interesting work. We hope that these "Nanophotonics and Micro/Nano Optics II" Conference Proceedings will help advance research in this field.
