Volume 9281

Proceedings of SPIE 0277-786X, V. 9281

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

7th International Symposium on Advanced Optical Manufacturing and Testing Technologies: Advanced Optical Manufacturing Technologies, edited by Li Yang, Eric Ruch, Shengyi Li, Proc. of SPIE Vol. 9281, 928101
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2081422

Proc. of SPIE Vol. 9281 928101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

xiii	<i>Symposium Committee</i>
xv	<i>Introduction</i>
xvii	<i>AOMATT 2014 Sponsors</i>

ORAL SESSION

9281 02	Fourier transform based dynamic error modeling method for ultra-precision machine tool [9281-40] G. Chen, Y. Liang, Harbin Institute of Technology (China); K. F. Ehmann, Northwestern Univ. (United States); Y. Sun, Q. Bai, Harbin Institute of Technology (China)
9281 03	Fast axis servo for the fast and precise machining of non-rotational symmetric optics [9281-15] F. Tian, Z. Yin, S. Li, National Univ. of Defense Technology (China) and Hu'nan Key Lab. of Ultra-precision Machining Technology (China)
9281 04	A high efficiency machining method of SiC: ion-enhanced atmospheric pressure plasma machining [9281-70] B. Shi, X. Xie, Y. Dai, C. Liao, National Univ. of Defense Technology (China)
9281 05	Diamond tool wear detection method using cutting force and its power spectrum analysis in ultra-precision fly cutting [9281-1] G. Q. Zhang, S. To, The Hong Kong Polytechnic Univ. (Hong Kong, China)
9281 06	Fabrication of micro-lens array on convex surface by means of micro-milling [9281-114] P. Zhang, Y. Du, B. Wang, D. Shan, Harbin Institute of Technology (China)
9281 07	Form control in atmospheric pressure plasma processing of ground fused silica [9281-113] D. Li, B. Wang, Q. Xin, H. Jin, J. Wang, W. Dong, Harbin Institute of Technology (China)
9281 08	Dressing of diamond grinding wheels by abrasive water jet for freeform optical surface grinding [9281-60] W. Wang, P. Yao, Shandong Univ. (China) and Key Lab. Of High Efficiency and Clean Mechanical Manufacture (China); C. Li, Sinotruk (Hong Kong, China); C. Huang, J. Wang, H. Zhu, Z. Liu, Shandong Univ. (China) and Key Lab. Of High Efficiency and Clean Mechanical Manufacture (China)
9281 09	Novel MRF fluid for ultra-low roughness optical surfaces [9281-52] P. Dumas, C. McFee, QED Technologies (United States)
9281 0A	High performance fluoride optical coatings for DUV optics [9281-45] L. Zhang, X. Cai, Changchun Institute of Optics, Fine Mechanics and Physics (China)

- 9281 OB **Surface quality of silicon wafer improved by hydrodynamic effect polishing** [9281-62]
W. Peng, C. Guan, S. Li, National Univ. of Defense Technology (China) and Hu'nan Key Lab. of Ultra-precision Machining Technology (China)
- 9281 OC **Study on the method to test large-aperture hyperboloid convex mirror** [9281-38]
X. Meng, H. Dong, W. Guo, H. Wang, Beijing Institute of Space Mechanics and Electricity (China)
- 9281 OD **Study on optical polishing experiment of zerodur mirror** [9281-66]
H. Wang, H. Li, P. Wang, W. Guo, Y. Wang, Y. Du, H. Dong, Beijing Institute of Space Mechanics and Electricity (China)
- 9281 OE **On-machine measurement of the grinding wheels' 3D surface topography using a laser displacement sensor** [9281-115]
Y. Pan, Q. Zhao, B. Guo, Harbin Institute of Technology (China)
- 9281 OF **Temperature field simulation on Ti6Al4V and Inconel718 heated by continuous infrared laser** [9281-120]
Y. Wang, Z. Zhang, W. Feng, B. Wang, Y. Gai, Harbin Institute of Technology (China)
- 9281 OG **Dwell time algorithm for multi-mode optimization in manufacturing large optical mirrors** [9281-108]
Z. Liu, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 9281 OH **Numerical simulation on aspherical lens modulated by electrostatic force** [9281-93]
Z. Cao, C. Cheng, K. Wang, Univ. of Science and Technology of China (China)
- 9281 OI **Multi-tool sub-aperture polishing high-slope asphere with low mid-spatial frequency errors** [9281-125]
J. Zhang, F. Wang, G. Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 9281 OJ **Fabricating effect of charged ion beam on optical lenses** [9281-128]
Y. Gu, L. Dai, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 9281 OK **Research on mid-frequency errors in Nd-doped glass continuous polishing** [9281-109]
J. Cao, A. Dun, C. Wei, J. Gu, J. Shao, Shanghai Institute of Optics and Fine Mechanics (China)
- 9281 OL **The real-time monitoring surface figure of optical elements in continuous polishing** [9281-106]
J. Chen, X. Xu, C. Wei, J. Gu, A. Dun, J. Shao, Shanghai Institute of Optics and Fine Mechanics (China)
- 9281 OM **Subsurface damage on ground fused silica surfaces** [9281-105]
J. Xu, X. Xu, W. Gao, C. Wei, M. Yang, J. Shao, Shanghai Institute of Optics and Fine Mechanics (China)
- 9281 ON **Lightening techniques applied in reflect mirror** [9281-122]
W. Guo, X. Meng, Y. Wang, L. Xu, Beijing Institute of Space Mechanics and Electricity (China)

POSTER SESSION

- 9281 0O **Active deformation and engineering analysis of CFRP mirror of various lay-up sequences within quasi-isotropic laminates** [9281-54]
C. Zeng, X. Yu, P. Guo, Institute of Modern Optical Technologies (China) and Soochow Univ. (China)
- 9281 0P **Research on the low speed stability control technology of fly-cutting machine for KDP crystals** [9281-46]
D. Chen, F. Ji, H. Chen, Institute of Mechanical Manufacturing Technology (China)
- 9281 0Q **Freeform manufacturing of a progressive addition lens by use of a voice coil fast tool servo** [9281-12]
Y. Y. Li, J. J. Chen, H. H. Feng, C. Li, J. Qu, H. Chen, Wenzhou Medical Univ. (China)
- 9281 0R **Influences of grinding and polishing parameters on the quality of super smooth surface** [9281-10]
Y. Jin, Y. Tong, L. Jiao, D. Wu, W. Guo, Tianjin Jinhang Institute of Technical Physics (China) and Tianjin Key Lab. of Optical Thin Film (China)
- 9281 0S **Optimal design of segmented quasi-phase-matching SHG+DFG wavelength conversion structure based on hybrid genetic algorithm** [9281-58]
L. Liu, J. Cui, North China Electric Power Univ. (China)
- 9281 0T **Theoretical and experimental investigation of grinding marks in sphere NC grinding process** [9281-9]
P. Wang, H. Zhang, C. Hui, Tianjin Jinhang Institute of Technical Physics (China)
- 9281 0U **Effect of the inflated-pressure to the tool influence function for polishing using SR bonnet** [9281-8]
C. Wang, Xiamen Univ. (China) and Research Ctr. of Laser Fusion (China); X. Yang, Xiamen Univ. (China); B. Zhong, Fine Optical Engineering Research Ctr. (China); Z. Wang, Y. Guo, Xiamen Univ. (China); Q. Xu, Research Ctr. of Laser Fusion (China)
- 9281 0V **Study on mechanism and process of ion beam machining on high-precision large optical surfaces** [9281-57]
X. Liang, Univ. of Science and Technology of China (China); Y. Gu, Changchun Institute of Optics, Fine Mechanics and Physics (China); X. Wang, Univ. of Science and Technology of China (China); Z. Ma, Y. Sui, Changchun Institute of Optics, Fine Mechanics and Physics (China); J. Zheng, Univ. of Science and Technology of China (China)
- 9281 0W **Stressed mirror polishing: finite element simulation of mirror blank deformation** [9281-127]
Y. Han, Tonghua Normal Univ. (China); L. Lu, Tianjin Polytechnic Univ. (China)
- 9281 0X **Design and realization of comb filter based on fiber grating with new structure** [9281-68]
M. Li, Y. Zhang, G. Xu, Navy Aeronautical and Astronautical Univ. (China)
- 9281 0Y **Fused silica fine grinding with low roughness** [9281-126]
L. Dai, Y. Gu, Changchun Institute of Optics, Fine Mechanics and Physics (China); D. Wu, Air Force Aviation Univ. (China)

- 9281 0Z **Design of MWIR step-zoom detection imaging system with a large FPA** [9281-89]
Y. Bai, Institute of Optics and Electronics (China), Univ. of Electronic Science and Technology of China (China), and Univ. of Chinese Academy of Sciences (China); T. Xing, W. Lin, Institute of Optics and Electronics (China); Y. Jiang, Univ. of Electronic Science and Technology of China (China)
- 9281 10 **Dynamic fracture characteristics of brass foil subjected to laser shock loading** [9281-99]
C. Zheng, Z. Ji, J. Fu, Y. Zhu, L. Song, J. Zhang, Shandong Univ. (China)
- 9281 11 **Combined fabrication process for high-precision aspheric surface based on smoothing polishing and magnetorheological finishing** [9281-24]
X. Nie, S. Li, C. Song, H. Hu, National Univ. of Defense Technology (China) and Hu'nan Key Lab. of Ultra-precision Machining Technology (China)
- 9281 12 **Research on ultrasonic cleaning technology of optical components** [9281-22]
L. Jiao, Y. Tong, Y. Cui, J. Chen, Q. Bai, Tianjin Jinhang Institute of Technical Physics (China) and Tianjin Key Lab. of Optical Thin Film (China)
- 9281 13 **Preparation and optimization of the laser thin film filter** [9281-75]
J. Su, W. Wang, J. Xu, Xi'an Technological Univ. (China); Y. Cheng, Science and Technology Low-Light-Level Night Vision Lab. (China); T. Wang, Xi'an Technological Univ. (China)
- 9281 14 **Design of dual band imaging system for space debris** [9281-56]
H. Wang, Northwestern Polytechnical Univ. (China) and Xi'an Institute of Optics and Precision Mechanics (China); J. Luo, Northwestern Polytechnical Univ. (China); X. Lu, C. Li, Beijing Institute of Control Engineering (China)
- 9281 15 **Evaluate error correction ability of magnetorheological finishing by smoothing spectral function** [9281-131]
J. Wang, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); B. Fan, Y. Wan, C. Shi, B. Zhuo, Institute of Optics and Electronics (China)
- 9281 16 **Experiment study on the cutting property of hot press Zinc Sulfide by single point diamond turning** [9281-48]
W. Li, Y. Tong, W. Lian, D. Liu, H. Zhang, Tianjin Jinhang Institute of Technical Physics (China)
- 9281 17 **The method test of transition mirror method to process sphere output mirror with large radius curvature** [9281-117]
D. Wu, Y. Tong, W. Guo, L. Jiao, Y. Jin, Tianjin Jinhang Institute of Technical Physics (China) and Tianjin Key Lab. of Optical Thin Film (China)
- 9281 18 **Research on optical surface quality online monitoring based on support vector machine** [9281-196]
G. Bi, Z. Sun, D. Zhang, Xiamen Univ. (China)
- 9281 1A **Simulation research on cutting brittle optical material with diamond wire saw based on LS-DYNA** [9281-110]
J. Wang, J. Liu, Y. Xiao, S. Zhao, Institute of Computer Applications (China)

- 9281 1B **The research and realization of digital management platform for ultra-precision optical elements within life-cycle** [9281-116]
J. Wang, J. Wang, L. Li, K. Zhou, Institute of Computer Applications (China)
- 9281 1C **A detail enhancement and dynamic range adjustment algorithm for high dynamic range images** [9281-59]
B. Xu, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); H. Wang, Institute of Optics and Electronics (China); M. Liang, NORINCO Group (China); C. Yu, J. Hu, H. Cheng, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China)
- 9281 1D **Study on machining mechanism of nanotwinned CBN cutting tool** [9281-18]
J. Chen, T. Jin, Yanshan Univ. (China); J. Wang, Q. Zhao, Harbin Institute of Technology (China); L. Lu, Yanshan Univ. (China)
- 9281 1E **Study of femtosecond laser-induced structural changes in lithium niobate crystal** [9281-118]
L. Zhang, J. Feng, Z. Fan, X. Wei, C. Shan, Q. Wu, Z. Zhou, Southwest Univ. of Science and Technology (China)
- 9281 1F **Calibration technology research of force sensor in the manufacture of large optics** [9281-133]
S. Li, Univ. of Chinese Academy of Sciences (China) and Institute of Optics And Electronics (China); H. Zhao, X. Li, W. Gu, Institute of Optics and Electronics (China)
- 9281 1G **Selection of the compensation quantity to the lens deformation caused by gravity** [9281-26]
L. Yang, Institute of Optics and Electronics (China) and Univ. of the Chinese Academy of Sciences (China); T. Xing, Institute of Optics and Electronics (China)
- 9281 1H **A path planning method used in fluid jet polishing eliminating lightweight mirror imprinting effect** [9281-134]
W. Li, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); B. Fan, C. Shi, Institute of Optics and Electronics (China); J. Wang, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); B. Zhuo, Institute of Optics and Electronics (China)
- 9281 1I **Ultra-precision process of CaF₂ single crystal** [9281-71]
G. Yin, S. Li, X. Xie, L. Zhou, National Univ. of Defense Technology (China) and Hu'nan Key Lab. of Ultra-precision Machining Technology (China)
- 9281 1J **Research on the processing technology of elongated holes based on rotary ultrasonic drilling** [9281-50]
Y. Tong, J. Chen, L. Sun, X. Yu, X. Wang, Tianjin Institute of Technical Physics (China)
- 9281 1K **Study on grinding of free-form optics surface in three-axis CNC machine** [9281-55]
H. Yang, Y. Zhang, F. Zhang, Z. Wang, Xi'an Institute of Applied Optics (China); L. Bao, AVIC China Precision Engineering Institute for Aircraft Industry (China); Y. Su, R. Guo, X. Liu, Xi'an Institute of Applied Optics (China)

- 9281 1L **New fabrication technology in single point diamond turning for IR aspheric optical parts** [9281-96]
Y. Su, X. Chen, X. Guo, R. Guo, X. Liu, F. Zhang, C. Yang, Y. Xiao, Z. Xu, Xi'an Institute of Applied Optics (China)
- 9281 1M **Research on precision grinding processing and compensation finishing experiment for mid-large- aperture square aspheric optical element** [9281-13]
F. Nie, Changchun Univ. of Science and Technology (China) and North China Institute of Materials Science and Engineering (China); Z. Li, Changchun Univ. of Science and Technology (China); D. Wang, G. Zhang, C. Guo, N. Pei, Y. Li, North China Institute of Materials Science and Engineering (China)
- 9281 1N **Simulation analysis of grinding wheel motion trajectory on SiC ceramics aspheric surface grinding** [9281-123]
F. Zhang, L. Liu, C. Li, Harbin Institute of Technology (China)
- 9281 1O **Analysis of composite flow field characteristics in fluid jet polishing** [9281-33]
R. Zhang, Y. Luo, X. Li, Y. Zhang, Sichuan Univ. (China)
- 9281 1P **Process optimization for ultrasonic vibration assisted polishing of micro-structured surfaces on super hard material** [9281-74]
Z. Sun, B. Guo, Z. Rao, Q. Zhao, Harbin Institute of Technology (China)
- 9281 1R **Research on the method of spherical optical fairing edge width tolerances** [9281-3]
F. Wang, Y. Jin, Tianjin Jinhang Institute of Technical Physics (China) and Tianjin Key Lab. of Optical Thin Film (China); J. An, Tianjin Jinhang Institute of Technical Physics (China); T. Liu, Y. Tong, Tianjin Jinhang Institute of Technical Physics (China) and Tianjin Key Lab. of Optical Thin Film (China)
- 9281 1S **Design and preparation of laser film on sapphire substrate** [9281-21]
S. Dang, J. Xu, J. Su, F. Guo, Xi'an Technological Univ. (China); Y. Cheng, National Defence Key Lab. of Science and Technology on Low Light Level Night Vision (China)
- 9281 1T **Finite element simulation of laser shock peening on bulk metallic glass** [9281-103]
J. Fu, H. Shi, C. Zheng, R. Liu, Z. Ji, Shandong Univ. (China)
- 9281 1U **Research on the magnetorheological finishing (MRF) technology with dual polishing heads** [9281-111]
W. Huang, Y. Zhang, J. He, Y. Zheng, Q. Luo, Institute of Mechanical Manufacturing Technology (China); J. Hou, Z. Yuan, Fine Optical Engineering Research Ctr. (China)
- 9281 1V **3D microstructure of optical fiber based on femtosecond laser and temperature characteristic** [9281-28]
Q. Zhao, Y. Dai, T. Li, B. Liu, G. Yin, Wuhan Univ. of Technology (China)
- 9281 1W **The thin mirror deformation and stress distribution analysis based on different influence functions** [9281-199]
H. Wang, Institute of Optics and Electronics (China) and Univ. of the Chinese Academy of Sciences (China); B. Fan, Y. Wu, Institute of Optics and Electronics (China); H. Liu, R. Liu, Institute of Optics and Electronics (China) and Univ. of the Chinese Academy of Sciences (China)

- 9281 1X **Research on the 2-axis cup-wheel dressing technology of arc-diamond grinding wheel** [9281-20]
X. L. Chang, H. Y. Wu, Y. F. Peng, Xiamen Univ. (China)
- 9281 1Y **Influence factors of optical surface roughness in traditional polishing process** [9281-138]
L.-J. Shen, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); Y.-J. Wan, Institute of Optics and Electronics (China); K. Meng, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China)
- 9281 1Z **A study on the diamond lapping direction determination** [9281-47]
N. Yang, W. Zong, Z. Li, T. Sun, Harbin Institute of Technology (China)
- 9281 20 **Study on algorithm of dwell time in ion beam figuring based on RBF neural network** [9281-198]
D. Wang, China North Material Science and Engineering Technology Group Corp. (China); G. Ding, C. Wang, Q. Wang, Changchun Univ. of Science and Technology (China)
- 9281 21 **The effect of machining error on the diffraction efficiency of refraction and diffractive optical element** [9281-90]
L. Gao, C. Xue, H. Yang, X. Nie, Changchun Univ. of Science and Technology (China)
- 9281 22 **Modeling and analysis of ductility of brittle materials using indentation method** [9281-91]
G. Sun, Xi'an Institute of Optics and Precision Mechanics (China); Z. Lu, China Northwest Architecture Design and Research Institute Co., Ltd (China); J. Bai, F. Yu, Xi'an Institute of Optics and Precision Mechanics (China)
- 9281 23 **Research on aspheric focusing lens processing and testing technology in the high-energy laser test system** [9281-36]
D. Liu, X. Fu, Z. Jia, Z. Wang, H. Dong, Changchun Univ. of Science and Technology (China)
- 9281 24 **Precision truing of diamond wheel with sharp edge** [9281-14]
C. Ge, B. Guo, Q. Zhao, B. Chen, J. Wang, Harbin Institute of Technology (China)
- 9281 25 **Design of optical system for spectrometer involving a volume phase holographic transmission grating** [9281-5]
Z. Ren, Jiangxi Science and Technology Normal Univ. (China) and Nanchang Univ. (China); G. Liu, Z. Huang, Jiangxi Science and Technology Normal Univ. (China)
- 9281 26 **Stray light analysis for optical splitting system of micro-biochemical analyzer** [9281-6]
Z. Huang, G. Liu, Z. Ren, L. Zeng, Jiangxi Science and Technology Normal Univ. (China)
- 9281 27 **Manufacture of PMMA triangular pyramid microstructure film** [9281-27]
B. Wu, L. Dong, D. Mu, Y. Leng, M. Li, H. Yin, Changchun Univ. of Science and Technology (China)
- 9281 28 **Design and fabrication of visible and infrared laser HR coating** [9281-35]
M. Li, L. Dong, Changchun Univ. of Science and Technology (China); L. Zhang, Jilin Province Institute of Traffic Planning Designing (China); B. Wu, Changchun Univ. of Science and Technology (China); J. Ma, Changchun Institute of Optics, Fine Mechanics and Physics (China)

- 9281 29 **Design of a vertical ultra-precision linear axis modular driven by dual linear motors** [9281-83]
E. Qi, Z. Fang, T. Sun, B. Wang, Harbin Institute of Technology (China)
- 9281 2C **Simulation on turning aspheric surface method via oscillating feed** [9281-81]
F. Kong, Harbin Institute of Technology (China) and Jilin Institute of Chemical Technology (China); Z. Li, T. Sun, Harbin Institute of Technology (China)
- 9281 2D **Research on beam splitting prism in laser heterodyne interferometer** [9281-67]
X. Fu, S. Xiong, Y. Kou, Y. Pan, H. Chen, Changchun Univ. of Science and Technology (China); Z. Li, Jilin Dongguang Precision Machinery Factory (China); C. Zhang, Shanghai Engineering Ctr. for Microsatellites (China)
- 9281 2E **Research on the polishing technology of high-precision aspherical cylindrical lens** [9281-42]
X. Fu, Z. Wang, Z. Jia, H. Dong, D. Liu, Changchun Univ. of Science and Technology (China); C. Zhang, Shanghai Engineering Ctr. for Microsatellites (China)
- 9281 2F **Research on processing technology of odd-form off-axis aspherical lens** [9281-43]
X. Fu, H. Dong, Z. Jia, Z. Wang, D. Liu, Changchun Univ. of Science and Technology (China); C. Zhang, Shanghai Engineering Ctr. for Microsatellites (China)
- 9281 2G **Nearly arc-length tool path generation and tool radius compensation algorithm research in FTS turning** [9281-44]
M. Zhao, X. Zhao, Z. Li, T. Sun, Harbin Institute of Technology (China)
- 9281 2H **Research of multi-band laser high reflection mirror** [9281-63]
X. Fu, Y. Pan, F. Wang, D. Liu, J. Zhang, Changchun Univ. of Science and Technology (China)
- 9281 2I **The research on conformal acid etching process of glass ceramic** [9281-17]
K. Wang, P. Guo, Soochow Univ. (China)
- 9281 2J **Research of the residual stress in grinding surface of glass-ceramics** [9281-49]
P. Zhou, P. Guo, Soochow Univ. (China)
- 9281 2K **Simulation of surface topography of big aspheric fabrication by ultra-precision diamond turning based on tool swing feeding** [9281-88]
H. Yao, Z. Li, T. Sun, Harbin Institute of Technology (China)
- 9281 2L **Study on the auto-leveling adjustment vibration isolation system for the ultra-precision machine tool** [9281-84]
X. Zou, Z. Li, X. Zhao, T. Sun, Harbin Institute of Technology (China); K. Zhang, Beijing U-Precision Tech Co., Ltd. (China)
- 9281 2M **20-W passive mode-locked picosecond oscillator** [9281-11]
Z. Bai, Beijing GK Laser Technology Co., Ltd. (China); Z. Fan, Beijing GK Laser Technology Co., Ltd. (China) and Academy of Opto-Electronics (China); F. Lian, Academy of Opto-Electronics (China); Z. Bai, Harbin Institute of Technology (China); Z. Kan, Academy of Opto-Electronics (China); J. Zhang, Beijing GK Laser Technology Co., Ltd. (China)

- 9281 2N **Towards fusion technique for astronomical images with high dynamic range** [9281-197]
L. Du, H. Sun, Z. Hou, The Academy of Equipment (China); Y. Qi, Xi'an Satellite Control Ctr. (China)
- 9281 2O **Boundary marking by three-dimensional coordinate machine in the field of optical manufacturing** [9281-53]
X. Chen, P. Guo, Soochow Univ. (China)
- 9281 2P **Correction of the removal function of lap in manufacturing large aspherical mirror** [9281-37]
W. Zhang, Institute of Optics and Electronics (China) and Univ. of the Chinese Academy of Sciences (China); Z. Zeng, F. Wu, Institute of Optics and Electronics (China); L. Feng, Institute of Optics and Electronics (China) and Univ. of the Chinese Academy of Sciences (China)
- 9281 2Q **Research on the fluid jet polishing in advanced optical fabrication** [9281-98]
T. Sun, L. Sun, Y. Jin, F. Wang, D. Sun, Dalian Institute of Chemical Physics (China)
- 9281 2R **Digital calibration method for defects evaluation of large fine optical surfaces** [9281-130]
X. Chen, D. Liu, Y. Yang, L. Yan, L. Li, P. Cao, S. Wang, Y. Shen, Zhejiang Univ. (China)
- 9281 2S **Stray light analysis in the TV system for tracking and measuring** [9281-136]
L. Cao, Institute of Optics and Electronics (China), Univ. of Electronic Science and Technology of China (China), and Univ. of Chinese Academy of Sciences (China); H. Chen, Institute of Optics and Electronics (China); Q. Qiu, Univ. of Electronic Science and Technology of China (China); G. Ren, Y. Jiang, B. Qi, Institute of Optics and Electronics (China)
- 9281 2T **Research on the design of surface acquisition system of active lap based on FPGA and FX2LP** [9281-135]
H. Zhao, Institute of Optics and Electronics (China) and Univ. of Chinese Academy of Sciences (China); X. Li, B. Fan, Z. Zeng, Institute of Optics and Electronics (China)

Author Index

Symposium Committee

Honorary Chair

Bingkun Zhou, Chinese Optical Society (China)

Symposium General Chair

Liwei Zhou, Beijing Optical Society (China)

Symposium General Co-chairs

Jianlin Cao, Ministry of Science and Technology of China

H. Philip Stahl, NASA Marshall Space Flight Center (United States)

Yudong Zhang, Institute of Optics and Electronics (China)

Larry Stepp, Thirty Meter Telescope Project (United States)

Yingchun Liang, Harbin Institute of Technology (China)

Yu Yao, Harbin Engineering University (China)

International Academic Committee

Wenhan Jiang, Chair, Chinese Academy of Engineering (China)

Liwei Zhou, Chinese Academy of Engineering (China) and Beijing
Institute of Technology (China)

Harald Giessen, University of Stuttgart (Germany)

Junhua Pan, Chinese Academy of Engineering (China) and
Soochow University (China)

Myung K. Cho, National Optical Astronomy Observatory
(United States)

Organizing Committee

Yudong Zhang, Co-chair, IOE, CAS (China)

Jinghua Cao, Co-chair, Bureau of International Cooperation, CAS
(China)

Libin Xiang, Co-chair, Shanghai Engineering Center for Microsatellites
(China)

Yadong Jiang, Co-chair, University of Electronic Science and
Technology (China)

Program Committee

Xiangdi Lin, Chair, Chinese Academy of Engineering (China)

Hu Yang, Co-chair, IOE, CAS (China)

Wei Gao, Co-chair, Tohoku University (Japan)

Huadong Yu, Co-chair, Changchun University of Science and Technology (China)

Secretary General of the Symposium

Li Yang, Committee of Optical Manufacturing Technology, COS (China)

Session Chairs

Session 1-1 Fan Wu

Session 2-1 Qiming Xin

Session 3-1 Shangming Wen

Session 4-1 Tingwen Xin

Session 5-1 Xiao Wang

Session 6-1 Xiangang Luo

Session 1-2 Bin Fan

Session 2-2 Shengyi Li

Session 3-2 Rongzhu Zhang

Session 4-2 Qingliang Zhao

Session 5-2 Yige Qi

Session 6-2 Changtao Wang

Introduction

The 7th International Symposium on Advanced Optical Manufacturing and Testing Technology (AOMATT) was held 26–29 April 2014 at the Harbin International Conference Center, China.

AOMATT 2014 was kicked off with a formal opening ceremony. The ceremony started with the introduction of VIP guests, symposium chairs, conference chairs, and plenary speakers, followed by opening speeches by Prof. Liwei Zhou, AOMATT 2014 Symposium Chairman, Prof. Bin Xu, Vice President of IOE, a sponsor of AOMATT 2014, and Prof. Yingchun Liang, Assistant President of Harbin Institute of Technology, a local co-sponsor of AOMATT 2014. Dr. H. Philip Stahl, 2014 President of SPIE, technical cosponsor of AOMATT 2014, could not attend the symposium this year due to a schedule conflict, but sent his congratulation letter. In his letter, Dr. Stahl gave high marks for AOMATT and stated:

AOMATT is a very successful collaboration between SPIE, the Institute of Optics and Electronics of the Chinese Academy of Sciences, and the Chinese Optical Society. It has become a well-known international symposium on advanced optical manufacturing and testing technologies. The vision of AOMATT is closely aligned with SPIE's mission to promote optics and photonics around the world.

All of the conference sponsors and attendees greatly appreciate SPIE and Dr. Stahl's long-standing support of AOMATT since its inception in 2002.

The plenary sessions started immediately after the conclusion of the opening ceremony. There were a total of nine plenary presentations: Dr. Larry Stepp, Telescope Department Head for the Thirty Meter Telescope (TMT) Project, USA, presented "Manufacturing the Optics for the Thirty Meter Telescope"; Dr. Bernard Delabre, Optical Design Engineer of European Southern Observatory (ESO), Germany, presented "The Progress of the European Extremely Large Telescope"; Dr. Tao Sun, Director of the Centre for Precision Engineering(CPE) of Harbin Institute of Technology, presented "Method and procedure for the high-efficiency and ultra-precision diamond turning of large optical mirrors"; Dr. Wei Gao, Professor and Director of Research Center for Precision Nanosystems, Dept. of Nanomechanics of Tohoku University, Japan, presented "Precision nanometrology for fabrication of micro optics"; Dr. Xuejun Zhang, Vice President of Changchun Institute of Optics, Fine Mechanics and Physics (CIOMP), CAS, presented "Advanced manufacturing and testing technologies for multiple mirror space telescopes"; Dr. A.G. Poleshchuk, Head of the Laboratory of Diffractive Optics, and Dr. Victor P. Korolkov, senior scientist of Institute of Automation and Electrometry, Siberian Branch of Russian Academy of Sciences, Novosibirsk, Russia, presented "Diffractive optical elements: fabrication and application"; Dr.

Axel Schindler, Science and Technology Consultant of Leibniz Institute of Surface Modification (IOM), Germany, presented "Advanced ion beam finishing and atmospheric plasma technology for high end optics"; Dr. Harald Giessen, Chair for Ultrafast Nano-Optics in the Department of Physics at the University of Stuttgart, Germany, presented "Complex hybrid plasmonics: new materials and new functionalities"; Dr. Xiangang Luo, Director of State Key Laboratory of Optical Technologies on Nano-Fabrication and Micro-Engineering of Institute of Optics and Electronics, CAS, presented "Manipulating the polarization states of electromagnetic waves using subwavelength structures". More than 600 people attended the opening ceremony and the full-day plenary sessions.

More than 400 oral and poster papers were selected for AOMATT 2014. About 102 oral papers were presented in six parallel conference sessions on 27 April. A special Technical Workshop was held in the morning of 28 April. An all-symposium poster session was held in the afternoon of 28 April. Authors and attendees had active discussions and exchange of ideas throughout the symposium. Many papers presented cutting-edge research and development work in optical design, manufacturing, and testing. The success of AOMATT 2014 continued the tradition of focus and excellence of this biannual international topical symposium in China.

We would like to express our sincere appreciation to COS—The Chinese Optical Society, IOE—Institute of Optics and Electronics, Chinese Academy of Sciences, and to SPIE for sponsoring and supporting AOMATT 2014. We would like to thank all chairs, committee members, authors, and attendee for their contributions to the symposium and sharing their research with colleagues around the world.

The 8th AOMATT is planned for 2016, and we look forward to seeing everyone at AOMATT 2016. Please watch for the Call for Papers and symposium announcements on the SPIE, IOE and COS web sites.

Li Yang
Secretary General, AOMATT 2014

AOMATT 2014 SPONSORS

Sponsored by

COS—The Chinese Optical Society

中国光学学会
The Chinese Optical Society

IOE—Institute of Optics and Electronics, Chinese Academy of Sciences

中国科学院光电技术研究所
THE INSTITUTE OF OPTICS AND ELECTRONICS
THE CHINESE ACADEMY OF SCIENCES

Technical Cosponsor
SPIE

SPIE.

Supporting Organizations

Ministry of Science and Technology of China
Chinese Academy of Sciences
National Natural Science Foundation of China

Cooperating Organizations

Harbin Institute of Technology (China) • Harbin Engineering University (China) •
National University of Defense Technology (China) • University of Electronic
Science and Technology of China • Sichuan University (China) • Sichuan Optical
Society • State Key Laboratory of Optical Technologies on Nano-Fabrication and
Micro-Engineering, IOE, CAS • Key Laboratory of Adaptive Optics, IOE, CAS •
Changchun Institute of Optics, Fine Mechanics and Physics (China) • Beijing
Institute of Technology (China) • Changchun University of Science and
Technology (China)
