, "Front Matter: Volume 9290," Proc. SPIE 9290, Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2014, 929001 (16 December 2014); doi: 10.1117/12.2182444

SPIE.

Event: Symposium on Photonics Applications in Astronomy, Communications, Industry and High-Energy Physics Experiments, 2014, Warsaw, Poland

PROCEEDINGS OF SPIE

Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2014

Ryszard S. Romaniuk
Editor

26 May–1 June 2014
Wilga, Poland

Organized by
Institute of Electronic Systems, Faculty of Electronics and Information Technologies,
Warsaw University of Technology (Poland)

Sponsored by
PSP—Photonics Society of Poland
SPIE
Committee of Electronics and Telecommunications, Polish Academy of Sciences
EuCARD²—Enhanced European Coordination of Accelerator R&D (CERN, EU FP7)
IEEE Poland Section
PKOpto—Polish Committee of Optoelectronics of SEP
EuroFusion Collaboration
EuroFusion Poland

Published by
SPIE

Volume 9290

Proceedings of SPIE 0277-786X, V. 9290

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics
Experiments 2014, edited by Ryszard S. Romaniuk, Proc. of SPIE Vol. 9290, 929001
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2182444

Proc. of SPIE Vol. 9290 929001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Photonics Applications in Astronomy, Communications, Industry, and High-Energy Physics Experiments 2014*, edited by Ryszard S. Romaniuk, Proceedings of SPIE Vol. 9290 (SPIE, Bellingham, WA, 2014) Article CID Number.

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

xi	<i>Authors</i>
xv	<i>Conference Committee</i>
xvii	<i>Introduction</i>

OPTICS AND PHOTONICS

9290 02	Photonics applications in astronomy, communications, industry, and high energy physics experiments 2014 [9290-1]
9290 03	Sources of interference in passive optical networks based on multimode fibers (Invited Paper) [9290-8]
9290 04	Efficiency of various modulation types in Step Index Polymer Optical Fiber [9290-9]
9290 05	Polarization pulling based on stimulated Raman scattering for polarization division multiplexing system [9290-11]
9290 06	Uncertainty of EOP resulting from uncertain PMD estimation from transmitted signal [9290-17]
9290 07	Application of the error reduction algorithm to measurement of modal power distribution in a multimode fiber [9290-19]
9290 08	Time-domain characterization of MMF PON [9290-20]
9290 09	Automatic detection of characteristic points and form of optical signals in multiparametric capillary sensors [9290-25]
9290 0A	Infiltration of a photonic crystal fiber with cholesteric liquid crystal and blue phase (Invited Paper) [9290-26]
9290 0B	Experimental video signals distribution MMF network based on IEEE 802.11 standard [9290-28]
9290 0C	Optical communication as a perspective method of exchanging data in dedicated systems (Invited Paper) [9290-30]
9290 0D	Using PCA in flame vision monitoring system [9290-33]
9290 0E	Performance characterization of the IEEE 802.11 signal transmission over a multimode fiber PON [9290-41]

9290 OF	Technological aspects of producing gradient planar waveguides for LPWG structures [9290-46]
9290 OG	Luminescent optical fibre sensor for UV-A detection [9290-57]
9290 OH	Multicolor up-conversion emission in tellurite glasses co-doped with rare earth ions for white LED applications [9290-62]
9290 OI	New atmospheric visibility optical sensor based on correlation coding method [9290-64]
9290 OJ	Impact of the chirp and the chromatic dispersion on the high capacity single wavelength channel PolMux transmission in the 1310 nm wavelength domain [9290-66]
9290 OK	Comparison of different photometric algorithms on Pi of the Sky data [9290-83]
9290 OL	Summary of the Pi of the Sky photometry improving methods [9290-87]
9290 OM	Periodic alignment of liquid crystal molecules in silica micro-capillaries [9290-92]
9290 ON	Structural waveguide co-doped with Yb³⁺/Tm³⁺ for measurement of chlorophyll concentration [9290-99]
9290 OO	Er/Yb co-doped oxy-fluoride glass-ceramics core/polymer cladding optical fibers [9290-101]
9290 OP	On accuracy of holographic shape measurement method with spherical wave illumination [9290-103]
9290 OQ	Investigation of thermal and spectroscopic properties of Bi₂O₃-GeO₂-Ga₂O₃-Na₂O glasses doped with Er³⁺ ions [9290-104]
9290 OR	Nd³⁺, Yb³⁺ and Nd³⁺/Yb³⁺- doped borosilicate glasses for luminescent thermometry [9290-107]
9290 OS	Equipment, preliminary research and research opportunities at the High Power Laser Laboratory at Institute of Plasma Physics and Laser Microfusion [9290-119]
9290 OT	Pi of the Sky robotic observatories in Chile and Spain [9290-127]
9290 OU	Optogenetics in animal model of alcohol addiction [9290-128]
9290 OV	Analysis of local heating of liquid samples in multiparametric capillary sensors [9290-131]
9290 OW	Fibre Bragg grating for flood embankment monitoring [9290-132]
9290 OX	Impact of the fibre characteristics on four-wave mixing in the 1310-nm wavelength domain [9290-133]
9290 OY	Impact of fiber ring laser configuration on detection capabilities in FBG based sensor systems [9290-134]
9290 OZ	Inscription of the fibre Bragg gratings with femtosecond lasers [9290-135]

9290 10 **Pi of the Sky preparations towards advanced gravitational detector era** [9290-136]

MATERIALS AND TECHNOLOGIES

9290 11 **Analysis of laser cutting speed influence on the surface quality and shape deviation of steel parts** [9290-2]

9290 12 **Analysis of the surface roughness after the sintered carbides turning with PCD tools** [9290-18]

9290 13 **Example of quality assurance and optimization system for super hard materials turning** [9290-24]

9290 14 **Optical properties of C-Pd films prepared on silica substrate studied by UV-VIS-NIR spectroscopy** [9290-36]

9290 15 **Investigation of C-Pd films in hydrogen atmosphere using molecular spectroscopy** [9290-37]

9290 16 **Properties and structure of carbon nanotubes in the system C-Ni** [9290-38]

9290 17 **New applications of carbon nanostructures in microbial fuel cells (MFC) (Invited Paper)** [9290-39]

9290 18 **Short range order in Pd and PdO nanoparticles embedded in carbonaceous matrix studied with the XAFS spectroscopy** [9290-52]

9290 19 **Analysis of machining accuracy during free form surface milling simulation for different milling strategies** [9290-60]

9290 1A **Effective conductivity in two-dimensional two-component structures: macroscopic isotropy** [9290-70]

9290 1B **Changes of electrical properties of C-Pd films due to hydrogen presence: automation of measurements** [9290-71]

9290 1C **Electron microscopy studies of CNT layers** [9290-79]

9290 1D **Field emission from carbon nanotube films deposited on etched Si** [9290-80]

9290 1E **Carbon-palladium films as gas sensors (hydrogen, ammonia, methane)** [9290-81]

9290 1F **Spectroscopic study of ns-laser pulse interaction with Co:TiC sample** [9290-115]

BIOMEDICAL APPLICATIONS

9290 1G **Telemetric measurement system of beehive environment conditions** [9290-4]

9290 1H **Algorithm of detecting structural variations in DNA sequences (Invited Paper)** [9290-12]

- 9290 1I **K-nearest neighbors clustering algorithm** [9290-13]
- 9290 1J **Computational structural variation discovery in genomes: state of the art and challenges** [9290-14]
- 9290 1K **Virtual instrument based measurement system for analysis of static and dynamic characteristics of temperature transducers** [9290-16]
- 9290 1L **The discrepancies in the results of bioinformatics tools for genomic structural annotation** [9290-23]
- 9290 1M **Computer program for analysis of hemodynamic response to head-up tilt test** [9290-32]
- 9290 1N **Computer program for analysis of impedance cardiography signals enabling manual correction of points detected automatically** [9290-34]
- 9290 1O **Ankle Brachial Index: simple non-invasive estimation of peripheral artery disease** [9290-35]
- 9290 1P **Exploring EEG signals in a Brain-Computer Interface** [9290-43]
- 9290 1Q **Selection of physiological parameters for optoelectronic system supporting behavioral therapy of autistic children** [9290-53]
- 9290 1R **Asymmetry functions of joint angles in the human gait** [9290-73]
- 9290 1S **Neuroengineering control and regulation of behavior** [9290-74]
- 9290 1T **Influence of unilateral weight on bilateral cyclograms** [9290-76]
- 9290 1U **Symmetrical gait descriptions** [9290-77]
- 9290 1V **WP1: transgenic opto-animals** [9290-86]

Part Two

- 9290 1W **Analysis of neural networks in subcortical visual structures using correlation methods (Invited Paper)** [9290-91]
- 9290 1X **Genomes correction and assembling: present methods and tools** [9290-96]
- 9290 1Y **Application of statistical mining in healthcare data management for allergic diseases** [9290-105]
- 9290 1Z **Distributed control network for optogenetic experiments (Invited Paper)** [9290-106]
- 9290 20 **Cataract influence on iris recognition performance** [9290-124]
- 9290 21 **Age and gender-invariant features of handwritten signatures for verification systems** [9290-75]
- 9290 22 **IntelliCages and automated assessment of learning in group-housed mice** [9290-89]

HIGH ENERGY PHYSICS APPLICATIONS

- 9290 23 **Data processing boards design for CBM experiment** [9290-5]
- 9290 24 **Python based integration of GEM detector electronics with JET data acquisition system (Invited Paper)** [9290-6]
- 9290 25 **FPGA implementation of overlap MTF trigger: preliminary study (Invited Paper)** [9290-7]
- 9290 26 **Machine optics studies for the LHC measurements (Invited Paper)** [9290-31]
- 9290 27 **Computer methods for ITER-like materials LIBS diagnostics** [9290-40]
- 9290 28 **Interface and protocol development for STS read-out ASIC in the CBM experiment at FAIR** [9290-45]
- 9290 29 **Diagnostic-management system and test pulse acquisition for WEST plasma measurement system** [9290-47]
- 9290 2A **Data acquisition methods for GEM detectors (Invited Paper)** [9290-48]
- 9290 2B **Data management software concept for WEST plasma measurement system** [9290-55]
- 9290 2C **3D imaging of nuclear reactions using GEM TPC** [9290-56]
- 9290 2D **Probing heavy-ion collisions with jets in the CMS experiment** [9290-82]
- 9290 2E **On precision measurement of the LHC absolute luminosity** [9290-90]
- 9290 2F **Fast modular data acquisition system for GEM-2D detector** [9290-94]
- 9290 2G **Melting and evaporation of materials exposed to intensive plasma flux** [9290-102]
- 9290 2H **Serial data acquisition for GEM-2D detector** [9290-108]
- 9290 2I **Data processing and analysis for 2D imaging GEM detector system** [9290-110]
- 9290 2J **Development of 2D imaging of SXR plasma radiation by means of GEM detectors** [9290-114]
- 9290 2K **Thermonuclear land of plenty** [9290-117]
- 9290 2L **The fast beam condition monitor BCM1F backend electronics upgraded MicroTCA-based architecture (Invited Paper)** [9290-123]
- 9290 2M **CMS physics highlights (Invited Paper)** [9290-125]
- 9290 2N **Discharge conditions in Hall thrusters: secondary electrons emission yield and magnetic mirror influence** [9290-137]
- 9290 2O **Fast data transmission in dynamic data acquisition system for plasma diagnostics** [9290-138]

COMPUTATIONAL INTELLIGENCE

- 9290 2P **The concept of a flexible system for use in software engineering** [9290-3]
- 9290 2Q **Descriptor positive discrete-time and continuous-time nonlinear systems (Invited Paper)** [9290-27]
- 9290 2R **Fast learning method for RAAM based on sensitivity analysis** [9290-29]
- 9290 2S **Fast Huffman encoding algorithms in MPEG-4 advanced audio coding** [9290-49]
- 9290 2T **Optimization of semi-global stereo matching for hardware module implementation** [9290-50]
- 9290 2U **Hardware-oriented simplifications of the prediction algorithms in the H.265/HEVC encoder** [9290-51]
- 9290 2V **Analysis and comparison of NoSQL databases with an introduction to consistent references in big data storage systems** [9290-65]
- 9290 2W **Online 3D face reconstruction with incremental Structure From Motion and a regressor cascade** [9290-67]
- 9290 2X **A computer method of finding valuations forcing validity of LC formulae** [9290-68]
- 9290 2Y **Combined P-type frames bitrate estimation** [9290-78]
- 9290 2Z **Analysis of selected methods for the recovery of encrypted WEP key** [9290-88]
- 9290 30 **3D reconstruction software comparison for short sequences** [9290-109]

ELECTRONIC SYSTEMS

- 9290 31 **Development of the unmanned aerial vehicle flight recorder** [9290-42]
- 9290 32 **An algorithm for a lossless compression of raw radar data** [9290-44]
- 9290 33 **Lumped circuit model of RF amplifier for SPICE simulator** [9290-54]
- 9290 34 **Modeling of a 3DTV service in the software-defined networking architecture** [9290-63]
- 9290 35 **Variability-based global sensitivity analysis of circuit response** [9290-84]
- 9290 36 **Macrosimulation of nonlinear dynamic systems for wave-shaping applications** [9290-85]
- 9290 37 **Geant4 simulations of detector response matrix for Caliste-SO** [9290-97]
- 9290 38 **Solar Orbiter spacecraft instrument interface simulator and its applications for the STIX telescope tests (Invited Paper)** [9290-98]

- 9290 39 **Power transformer testing** [9290-100]
- 9290 3A **Python based high-level synthesis compiler** [9290-118]
- 9290 3B **Improvement of pipeline ADC resolution in sequential stages of conversion** [9290-122]
- 9290 3C **Robust constant modulus algorithms for channel equalization** [9290-126]
- 9290 3D **Research on impact of the environmental factors on National Institute of Telecommunications time standards stability** [9290-129]
- 9290 3E **Soft-output demapper and Viterbi decoder for software-defined radio** [9290-130]
- 9290 3F **General principles and stages of optimal AFCS design** [9290-139]
- 9290 3G **Overview of electric propulsion** [9290-140]
- 9290 3H **The research of the solar panels-commutator-inverter-load system with the pulse-amplitude control** [9290-143]
- 9290 3I **Evolution of architectures and conversion algorithms in adaptive sub-ranging A/D converters** [9290-93]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Warsaw University of Technology (Poland)

Introduction

The **SPIE-IEEE-PSP WILGA** symposium [wilga.ise.pw.edu.pl] is a multi-conference event, and is kind of an international Forum of Young Science in Photonics, Advanced Electronics and Internet Engineering. It is organized twice yearly under the eminent patronage of two big international engineering institutions SPIE [www.spie.org/] and IEEE [www.ieee.org/] and their Polish Counterparts: PSP—Photonics Society of Poland [www.photonics.pl/], successor of Polish Chapter of SPIE [www.spie.pl/] and IEEE Poland Section [www.ieee.pl/], with participation of IEEE R8 [ewh.ieee.org/reg/8/sac/cms]. The patrons of the symposium are: PAS—Polish Academy of Science (The Committee on Electronics and Telecommunication) [keit.pan.pl], Association of Polish Electrical Engineers (SEP) [www.sep.com.pl], Polish Committee of Optoelectronics SEP [pkopto.ise.pw.edu.pl], Warsaw University of Technology [www.pw.edu.pl], Faculty of Electronics and Information Technology [www.elka.pw.edu.pl], Institute of Electronic Systems [www.ise.pw.edu.pl].

WILGA Organizers: The Symposium is organized by a group of devoted young people - photonics, mechatronics and electronics researchers - gathered in the PERG/ELHEP Research Group of the Institute of Electronic Systems at the Faculty of Electronics and Information Technology at the Warsaw University of Technology. Most of these young researchers are active members of PSP, SEP, SPIE, OSA and IEEE. The symposium is diligently done by young researchers for young fellow researchers, and the main aim is to have a lot of fun and to learn a lot.

WILGA Publications: The WILGA Symposium publishes its papers in the following proceedings series, technical and peer-reviewed journals: Proceedings of SPIE, since 2002; IEEE eXplore, Internet publication data base; Photonics Letters of Poland, since 2009; Elektronika, SEP Journal, since 1998; IJET—International Journal of Electronics and Telecommunications, PAS [ijet.pl].

WILGA Proceedings of SPIE: There has been a long tradition of WILGA publishing its works in the Proceedings of SPIE. This volume is the 14th published with WILGA papers. All of the WILGA-SPIE volumes contain around 1,500 total papers. All WILGA Symposiums have published more than 2,500 papers with around 5,000 participants. This is an extraordinary achievement for a modest symposium oriented solely on young researchers. No one event of similar character could compare to this achievement. This success was only possible due to big involvement of young researchers and their work. The following WILGA Proc. SPIE were published: Wilga 2002 – Proc. SPIE 5125; Wilga 2003 – Proc. SPIE 5484; Wilga 2004 – Proc. SPIE 5775; Wilga 2005 bis – Proc. SPIE 5948; Wilga 2005 – Proc SPIE 6159; Wilga 2006 – Proc. SPIE 6347; Wilga 2007 – Proc. SPIE 6937; Wilga 2008 – Proc.

SPIE 7124; Wilga 2009 – Proc. SPIE 7502; Wilga 2010 – Proc. SPIE 7745; WILGA 2011 – Proc. SPIE 8008; WILGA 2012 – Proc. SPIE 8454, WILGA 2013 – Proc. SPIE 8903.

SPIE Poland 2005: The SPIE Poland meetings in 2005 were very special because then the Polish Chapter of SPIE (predecessor of Photonics Society of Poland) hosted together with SPIE and some other regional SPIE Chapters, the SPIE Warsaw Congress on Optics and Optoelectronics – SPIE COO Warsaw 2005. WILGA 2005 Symposium was split to two parts – one held usually in WILGA and the second jointly with the COO'05.

WILGA ways and topics: The official language of the Symposium is English. Peer reviewed papers are published in a renowned, worldwide recognized series called the Proceedings of SPIE. The symposium is designed mainly for Ph.D., M.Sc., and B.Sc. students (from physics, electronics and mechatronics, as well as material research) and their tutors/mentors. WILGA has a number of main topical tracks. Historically, the first one was photonics and web engineering. Generally, WILGA embraces advanced photonic, mechatronic and electronic systems, in the following aspects: theory, modeling, algorithms, simulations, emulations, design, hardware, software, hardware-software interaction and integration, measurements, testing, commissioning and exploitation. WILGA also addresses new research tendencies like 3D photonics and electronics design, micro- and nano-systems, and material engineering including meta-materials.

Topical sessions are organized by leading experts. Sessions usually begin with current tutorials and are filled with contributed papers by students and young researchers. One of the most important session tracks in WILGA are photonics applications and systems for superconductive accelerator (and free electron laser) technology and high energy physics experiments. We warmly invite students, young researchers, and their tutors to participate in WILGA.

WILGA XXXth Jubilee Symposium: The WILGA 2012 January Edition was held on 26–29 January 2012 at WUT's FE&IT. WILGA 2012, the May edition, was held on 28 May–2 June 2012 in a resort owned by Warsaw University of Technology. More than 300 presentations were delivered during both editions of Wilga, covering a broad area of photonics applications and web engineering. Nearly 350 persons participated. An exceptionally efficient chair of the Organization Committee of WILGA 2012 was traditionally Dr. Maciek Linczuk [M.Linczuk@elka.pw.edu.pl].

WILGA 2014: The Wilga 2014 Symposium was held during the last week of May 2014. The working research sessions of the 34th WILGA 2014 symposium were held traditionally as in previous years: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER tokomaks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object oriented design of hardware, terabit optical data links, software-hardware co-design, biomedical engineering, computational intelligence of advanced

systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD2 – Enhanced European Coordination of Accelerator Research and Development, TIARA, EuroFusion Project, etc.

WILGA offspring: The WILGA Symposium gave birth to a few topical meetings and conferences which then struck out on their own. These include student regional meetings (Opole, Wrocław, Kielce, Białystok, Lublin, Toruń and others), of SPIE student chapters, IEEE student branches, but also stand-alone conferences. Some of these meetings are still held periodically with Wilga, while some of them gained complete independence. WILGA is very proud of this sort of parentship, since the very good idea of WILGA is proliferating elsewhere. One of such meetings is, now fully nondependent, SPS – Signal Processing Symposium which started at Wilga in 2003.

SPIE – PSP WILGA 2015: The organizers of the WILGA 2015 Symposium, to be held on 25 – 31 May 2015, warmly invite interested young researchers and students in photonics and related fields to participate in this exceptional and very friendly research event oriented to host young researchers from Poland and from all over Europe.
