SPIE

Volume 9297

Proceedings of SPIE 0277-786X, V. 9297

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Symposium on Optoelectronic Technology and Application 2014: Laser and Optical Measurement Technology;
and Fiber Optic Sensors, edited by J. Czarske, S. Zhang, D. Sampson, W. Wang, Y. Liao, Proc. of SPIE Vol. 9297,
929701 · © 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2179931

Proc. of SPIE Vol. 9297 929701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *International Symposium on Optoelectronic Technology and Application 2014: Laser and Optical Measurement Technology; and Fiber Optic Sensors*, edited by Jürgen Czarske, Shulian Zhang, David Sampson, Wei Wang, Yanbiao Liao, Proceedings of SPIE Vol. 9297 (SPIE, Bellingham, WA, 2014) Article CID Number.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

ix	<i>Authors</i>
xiii	<i>Symposium Committees</i>
xvii	<i>Conference Committee</i>
xix	<i>Introduction</i>

SESSION 1 LASER AND OPTICAL MEASUREMENT TECHNOLOGY

9297 02	An updated equation for the refractive index of air [9297-1]
9297 03	Influences of experimental parameters and inverse algorithms on nanometer particle size measured by self-designed system based on dynamic light scattering [9297-3]
9297 04	Measurement method of time-of-flight in pulsed laser ranging [9297-4]
9297 05	Lens wavefront measurement technique with a reflective Fresnel-zone hologram [9297-7]
9297 06	Development of a rapid optic bacteria detecting system based on ATP bioluminescence [9297-8]
9297 07	Frequency stabilization of distributed-feedback laser by time measurement [9297-9]
9297 08	Autofocusing research on terahertz off-axis digital holography [9297-10]
9297 09	Noninvasive detection of glucose level based on tunable pulsed laser induced photoacoustic technique [9297-11]
9297 0A	Sub-arcsecond precision detection for micro rolling angle by point array [9297-12]
9297 0B	Digital detection method design of the optic error of the beam expander [9297-14]
9297 0C	A degradation model for ranging ability evaluation through precision curves [9297-15]
9297 0D	Research on a kind of high precision and fast signal processing algorithm for FM/CW laser radar [9297-17]
9297 0E	Absolute measurement of square flats with Legendre polynomial fitting method [9297-18]
9297 0F	Optimized design of LED plant lamp [9297-19]
9297 0G	Low noise control and wavelength shift of high-power DFB laser [9297-20]
9297 0H	A high resolution laser ranging system based on time-correlated single-photon counting technology [9297-23]

- 9297 0I **The real-time realization of detecting weak multi-pulse laser echo signal [9297-25]**
- 9297 0J **Real-time 3D measurement based on structured light illumination considering camera lens distortion [9297-27]**
- 9297 0K **The height error range of multilayer diffractive optical element with consideration of polychromatic integral diffraction efficiency [9297-29]**
- 9297 0L **Experimental research on a ring beam with a phase-only spatial light modulator [9297-30]**
- 9297 0M **A new metric of analyzing the surface optical characteristic based on the measurement of Mueller matrices [9297-31]**
- 9297 0N **Character research on 2.52 terahertz coaxial reflection-mode confocal scanning microscopic imaging [9297-33]**
- 9297 0O **Characteristics and analysis of a type of simulator of atmospheric turbulence [9297-34]**
- 9297 0P **Advanced astigmatism-corrected Czerny-Turner imaging spectrometer in spectral broadband [9297-36]**
- 9297 0Q **Swept laser source based on acousto-optic tunable filter [9297-37]**
- 9297 0R **Spatial coherence measurement of high power broad area edge emitting laser [9297-38]**
- 9297 0S **Study on the feasibility of measuring relief grating parameters through the transmission spectrum [9297-41]**
- 9297 0T **Reconstruction of synthetic aperture digital Fresnel hologram by use of the screen division method [9297-43]**
- 9297 0U **Emulation and design of terahertz reflection-mode confocal scanning microscopy based on virtual pinhole [9297-44]**
- 9297 0V **Research on filling process of fuel and oxidant during detonation based on absorption spectrum technology [9297-46]**
- 9297 0W **Study on the testing technology of the strong bending losses from the optical fiber cables released from the bobbin [9297-48]**
- 9297 0X **Influence analysis of measuring beam's divergence on optics transmissivity testing [9297-50]**
- 9297 0Y **Analyses of multiple surfaces transform interferometry in parallel plate measurement [9297-51]**
- 9297 0Z **Optimized dithering technique for 3D shape measurement based on intensity residual error [9297-53]**
- 9297 10 **Principal and error analysis of mirror symmetry method in three-flat test [9297-55]**
- 9297 11 **Initial analysis of space target's stealth methods at laser wavelengths [9297-57]**

- 9297 12 **The study of the nonlinear correction of the FMCW absolute distance measurement using frequency-sampling and precision analysis [9297-58]**
- 9297 13 **Study on methods for measuring laser energy of large-aperture beam [9297-59]**
- 9297 14 **The development of a new-type atmosphere visibility meter [9297-60]**
- 9297 15 **Study on the mechanical analysis and the testing technology of the optical fiber cables released from the bobbin [9297-62]**
- 9297 16 **Experiment of THz transmission through plasma [9297-65]**
- 9297 17 **Study of simulating dynamic polarization laser echo signal [9297-66]**
- 9297 18 **A verification and errors analysis of the model for object positioning based on binocular stereo vision for airport surface surveillance [9297-67]**
- 9297 19 **The design of double telecentric lens with large aperture based on machine vision [9297-71]**
- 9297 1A **The technology of grating laser Doppler velocimeter for measuring transverse velocity of objects [9297-73]**
- 9297 1B **Design of high temperature adaptability cassegrain collimation system [9297-74]**
- 9297 1C **Anomalous laser deflection phenomena based on the interaction of electro-optic and graded refractivity effect in Cu:KTN crystal [9297-75]**
- 9297 1D **Stability precision dynamic testing system on artillery [9297-76]**
- 9297 1E **Aberration compensation in lensless digital holography [9297-80]**
- 9297 1G **Electrical speckle shearing phase-shifting pattern interferometry for measuring deformation of objects [9297-82]**
- 9297 1H **Frequency stabilization based on high finesse glass-ceramic Fabry-Perot cavity for a 632.8-nm He-Ne laser [9297-83]**
- 9297 1I **Three-dimensional surface reconstruction based on a novel phase-unwrapping algorithm [9297-84]**
- 9297 1J **A precise measurement method of each component gas pressures in rubidium vapor cell based on atom absorption spectra [9297-85]**
- 9297 1K **Drugs of abuse detection in saliva based on actuated optical method [9297-88]**
- 9297 1L **Laser Doppler vibrometer measurement on spiders in moving-coil loudspeakers [9297-89]**
- 9297 1M **A three-dimensional measuring system based on 2D laser displacement sensor [9297-93]**
- 9297 1N **Third-order nonlinear optical properties and photophysical mechanism of a novel In-porphyrin polymer [9297-95]**

- 9297 1O **Nonlinearity properties of a phthalocyanine film researching by top-hat Z-scan techniques** [9297-98]
- 9297 1P **Sensitivity-enhanced top-hat Z-scan by absorbing part of the incident light** [9297-99]
- 9297 1Q **Optical nonlinearities of InN by reflection Z-scan technique** [9297-100]
- 9297 1R **The tilted-wave-interferometer: freeform surface reconstruction in a non-null setup** [9297-101]
- 9297 1S **Test target for characterizing 3D resolution of optical coherence tomography** [9297-102]
- 9297 1T **Opto-mechanical system design of test system for near-infrared and visible target** [9297-104]
- 9297 1U **TDLAS noise reduction algorithm for the raw spectral data under strong interference conditions** [9297-105]
- 9297 1V **Simulate different environments TDLAS On the analysis of the test signal strength** [9297-106]
- 9297 1W **Double-pulse digital speckle pattern interferometry for vibration analysis** [9297-107]
- 9297 1X **Research of misalignment between dithered ring laser gyro angle rate input axis and dither axis** [9297-108]
- 9297 1Y **The design and application of large area intensive lens array focal spots measurement system** [9297-109]
- 9297 1Z **Gaussian beam reflection characteristics on 2D randomly rough sea surface influenced by incident laser parameters** [9297-110]
- 9297 20 **The application of Raman laser in measuring gravity acceleration** [9297-111]
- 9297 21 **Compensation of kinematic geometric parameters error and comparative study of accuracy testing for robot** [9297-113]
- 9297 22 **Simulated characterization of soot in the flame based on laser induced incandescence** [9297-114]
- 9297 23 **Methodology on high ratio multiple configuration systems in image sensor** [9297-115]
- 9297 24 **The simulation study on optical target laser active detection performance** [9297-116]
- 9297 25 **Optimum design on refrigeration system of high-repetition-frequency laser** [9297-117]
- 9297 26 **Optimum design on thermal lensing effect of high-repetition-frequency laser based on LGS Q-switched** [9297-118]
- 9297 27 **659.5-nm high-power solid state laser with a two-rod telescope resonator** [9297-119]
- 9297 28 **Digital holographic inspection for a straight pipe inner surface using multiwavelength illuminations** [9297-120]

- 9297 29 **Nonlinearity correction and dispersion analysis in FMCW laser radar** [9297-121]
- 9297 2A **Visualization for starlight navigation simulation** [9297-122]
- 9297 2B **Gas emission analysis based on Fourier transformed infrared spectroscopy** [9297-123]
- 9297 2D **The research of 3D small-field imaging system based on fringe projection technique**
[9297-954]
- 9297 2E **Comparison of three coding strategies for a low cost structure light scanner** [9297-955]
- 9297 2F **Scanning freeform objects by combining shape from silhouette and shape from line
structured light** [9297-959]
- 9297 2G **An efficient solid modeling system based on a hand-held 3D laser scan device** [9297-965]

SESSION 2 FIBER OPTIC SENSORS

- 9297 2H **The research of improvements in Raman distributed temperature sensor** [9297-201]
- 9297 2I **Location of lightning stroke on OPGW by use of distributed optical fiber sensor** [9297-202]
- 9297 2J **A new method for reflectivity measurement of ultra-weak fiber Bragg gratings** [9297-204]
- 9297 2K **Research on the approach of restraining Faraday effect of fiber optic gyroscope with
twisting fiber reversely** [9297-205]
- 9297 2L **Analysis of the tunable asymmetric fiber F-P cavity for fiber sensor edge-filter
demodulation** [9297-206]
- 9297 2M **The application of BOTDR on health diagnosis in the Wangjiatan bridge** [9297-207]
- 9297 2N **Simulation study based on the single-point temperature monitoring system of LabVIEW**
[9297-209]
- 9297 2O **A kind of integrated method discuss of fOG signal processing circuit** [9297-211]
- 9297 2P **A high sensitivity humidity sensor based on micro-ring resonator with three coupling points**
[9297-212]
- 9297 2Q **Calibration test of the temperature and strain sensitivity coefficient in regional reference
grating method** [9297-213]
- 9297 2R **Simulation and analysis of sensitivity for tapered fiber Bragg grating evanescent wave
sensor** [9297-214]
- 9297 2S **Study on network model for methane concentration detection based on time and space
division multiplexing technology** [9297-216]
- 9297 2T **Developments in distributed optical fiber detection technology** [9297-217]

- 9297 2U **Four wave mixing experiment research of photonic crystal fiber** [9297-218]
- 9297 2V **Fiber inline Mach-Zehnder interferometer fabricated by fusion splicing for high temperature sensing** [9297-220]
- 9297 2W **Highly birefringent photonic crystal fibers with triple defect core and squeezed lattice of air holes** [9297-221]
- 9297 2X **Analysis of the channel crosstalk in multiplexing system of the fiber laser sensors** [9297-222]
- 9297 2Y **A 4-element fiber laser hydrophone towed linear array** [9297-223]
- 9297 2Z **Crosstalk analyse of DFB fiber laser hydrophone array based on time division multiplexing** [9297-225]
- 9297 30 **A fiber Bragg grating demodulation system using high-birefringence fiber loop mirror** [9297-226]
- 9297 31 **A novel fiber optic geophone with high sensitivity for geo-acoustic detection** [9297-227]
- 9297 32 **Hydrogen loading to the optic fibers for fiber grating sensors** [9297-228]
- 9297 33 **Design of low frequency fiber Bragg grating acceleration sensing system** [9297-229]
- 9297 34 **Study on the DFB fiber laser accelerometer with a metal-shell-packaged single-cylinder mandrel structure** [9297-230]
- 9297 35 **Investigation on a fiber optic accelerometer based on FBG-FP interferometer** [9297-232]
- 9297 36 **Performance comparison of fiber laser geophones and moving-coil geophones** [9297-233]
- 9297 37 **Light-leaking energy estimation and its application on assembling quality control of IFOG** [9297-234]
- 9297 38 **Experimental research of optical fiber current sensors based on the Loren magnetic force** [9297-235]
- 9297 39 **Detection of optical circulator crosstalk based on signal modulation** [9297-236]
- 9297 3A **Study on sensing characteristics of three-core photonic crystal fibers** [9297-237]
- 9297 3B **Effects of Rayleigh backscattering on distributed feedback fiber laser sensors** [9297-133]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committees

Symposium Chairs

Guofan Jin, Tsinghua University (China)
Songlin Zhuang, University of Shanghai for Science and Technology (China)

Conference Committee

Bingheng Lu, Xi'an Jiaotong University (China)
Byoungcho Lee, Seoul National University (Republic of Korea)
Daren Lv, Institute of Atmospheric Physics (China)
David Webb, Aston University (United Kingdom)
Dianyuan Fan, Shanghai Institute of Optics and Fine Mechanics (China)
Feng Zhang, Academy of Chinese Aerospace Science and Industry Feihang Technology (China)
Gaurav Sharma, University of Rochester (United States)
Guangjun Zhang, Beihang University (China)
Huitao Fan, Luoyang Optoelectro Technology Development Center (China)
Huixing Gong, Shanghai Institute of Technical Physics (China)
Jannick Rolland, University of Rochester (United States) and LightTopTech Corporation (United States)
Jianquan Yao, Tianjin University (China)
Jiaqi Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Jingshan Jiang, Center for Space Science and Applied Research (China)
Junhao Chu, Shanghai Institute of Technical Physics (China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Lin Li, Laser Processing Research Centre, The University of Manchester (United Kingdom)
Liwei Zhou, Beijing Institute of Technology (China)
Ming C. Leu, Missouri University of Science and Technology (United States)
Norbert Kaiser, Fraunhofer Institute for Applied Optics and Precision Engineering (Germany)
Qifeng Yu, National University of Defense Technology (China)
Qingxi Tong, The Institute of Remote Sensing and Digital Earth (China)
Shouhuan Zhou, North China Research Institute of Electro-optics (China)

Tianchu Li, National Institute of Metrology (China)
Ting-Chung Poon, Virginia Polytechnic Institute and State University
(United States)
Wei Wang, Beijing Institute of Aerospace Control Devices (China)
Zuyan Xu, The Technical Institute of Physics and Chemistry (China)

Program Committee

Songlin Zhuang, Chair, University of Shanghai for Science and
Technology (China)
Huaming Wang, Co-chair, Beihang University (China)
Huikai Xie, Co-chair, University of Florida (United States)
Jannick Rolland, Co-chair, University of Rochester (United States)
Jürgen Czarske, Co-chair, Technische Universität Dresden
(Germany)
Yongtian Wang, Co-chair, Beijing Institute of Technology (China)
Anatoli G. Borovoi, V.E. Zuev Institute of Atmospheric Optics
(Russian Federation)
Bincheng Li, Institute of Optics and Electronics (China)
Binghen Lu, Xi'an JiaoTong University (China)
Byoungcho Lee, Seoul National University (Republic of Korea)
Changxiang Yan, Changchun Institute of Optics, Fine Mechanics and
Physics (China)
Dae Wook Kim, The University of Arizona (United States)
David Webb, Aston University (United Kingdom)

Guangya Zhou, National University of Singapore (Singapore)
Haimei Gong, Shanghai Institute of Technical Physics (China)
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)
Jun Zhou, Shanghai Institute of Optics and Fine Mechanics (China)
Kai Cheng, Brunel University (United Kingdom)
Ligong Zheng, Changchun Institute of Optics Fine Mechanics and Physics
(China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and
Physics, (China)
Lin Li, Laser Processing Research Centre, The University of Manchester
(United Kingdom)
Ming C. Leu, Missouri University of Science and Technology
(United States)
Minlin Zhong, Tsinghua University (China)
Mircea Guina, Tampere University of Technology (Finland)

Norbert Kaiser, Fraunhofer Institute for Applied Optics and Precision Engineering (Germany)
Pu Wang, Beijing University of Technology (China)
Roland Winston, University of California (United States)
Rongbing W. B. Lee, The Hong Kong Polytechnic University (Hong Kong, China)
Shulian Zhang, Tsinghua University (China)
Ting-Chung Poon, Virginia Polytechnic Institute and State University (United States)
Wei Wang, Beijing Institute of Aerospace Control Devices (China)
Wenli Ma, The Institute of Optics and Electronics (China)
Yi Luo, Tsinghua University (China)
Yiqin Ji, Tianjin Jinhang Institute of Technical Physics (China)
Yong Bi, Academy of Opto-electronics (China)
Yong Cheng, Wuhan Ordnance Non-Commissioned Officers Academy (China)
Yongnian Yan, Jiangsu YONGNIAN Laser Forming Technology Company, Ltd. (China)
Zhichuan Niu, Institute of Semiconductors (China)

Conference Committee

Conference Chairs

Jürgen Czarske, Technische Universität Dresden (Germany)

Shulian Zhang, Tsinghua University (China)

David Sampson, The University of Western Australia (Australia)

Wei Wang, Beijing Aerospace Control Instrument Research Institute
(China)

Yanbiao Liao, Tsinghua University (China)

Introduction

We had the great honor of organizing the International Symposium on Optoelectronic Technology and Application 2014 (IPTA 2014) in Beijing. It was truly a great pleasure for us to greet nearly 1,000 participants from many different countries attending IPTA 2014! We firmly believe that the symposium will become an important international event in the field of photoelectronic technology.

IPTA 2014 was sponsored by Chinese Society of Astronautics (CSA) and China High-tech Industrialization Association, technically co-sponsored by SPIE, and organized by Photoelectronic Technology Committee, Chinese Society of Astronautics. 27 cooperating organizations supported the conference. There were nearly 600 papers accepted for presentation at IPTA 2014, contributed by over 1078 authors from more than 10 countries, including United States, United Kingdom, Germany, France, Norway, Australia, Canada, Japan, Korea, Russia, and China. We had six plenary speeches and 228 well-known scientists and experts, from both home and abroad to give invited talks at different sessions.

The purpose of IPTA 2014 was to provide a forum for the participants to report and review innovative ideas, with up-to-date progress and developments, and discuss the novel approaches to application in the field of photoelectronic technology. We sincerely hope that the research and development in the optical and photoelectronic fields will be promoted, and international cooperation sharing the common interest will be enhanced.

On behalf the Organization Committee of IPTA 2014, we would like to heartily thank our sponsors and cooperating organizations for all they have done for the conference. We would also like to thank the authors for their contribution to the proceedings; the participants and friends of IPTA 2014, for their interest and efforts in helping us to make the symposium possible; and the Program Committee for their effective work and valuable advice, especially the IPTA 2014 Secretariat and the SPIE staff, for their tireless efforts and outstanding services in preparing the conference and publishing the Proceedings.

Guofan Jin
Songlin Zhuang
IPTA 2014 Symposium Committee Chairs
