SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

OPTICAL REMOTE SENSING TECHNOLOGY AND APPLICATIONS

9299 02	Assessing the capabilities of hyperspectral remote sensing to map oil films on waters [9299-2]
9299 03	Development of sea ice monitoring with aerial remote sensing technology [9299-3]
9299 04	The coastline remote sensing survey for Zhao Shu Island in Xisha Islands based on WorldView-2 [9299-6]
9299 05	An analysis on effecting factors of ultra-violet imaging appliance in corona discharge [9299-7]
9299 06	Relative radiometric calibration method based on linear CCD imaging the same region of non-uniform scene [9299-8]
9299 07	The design and study of a new micropulse Lidar [9299-13]
9299 08	Design of transient light signal simulator based on FPGA [9299-14]
9299 09	Laser radar range profile, Doppler spectra and range resolved Doppler imaging technologies for the target recognition [9299-16]
9299 0A	Design of a multi-spectral TDICCD focal plane imaging and processing system based on FPGA [9299-17]
9299 0B	Lifetime radiometric calibration of HJ-1A/B CCD sensor using Dunhuang Gobi site [9299-18]
9299 0C	Telecentric system with large-field for surveillance and measuring camera in space station [9299-19]
9299 0D	During air cool process aerosol absorption detection with photothermal interferometry [9299-20]
9299 0E	The vegetation coverage dynamics due to geohazards after the 2008 earthquake in Wenchuan [9299-21]

92990F	Typhoon center location algorithm based on fractal feature and gradient of infrared satellite cloud image [9299-25]
92990G	Multiscale snapshot imaging spectrometer with large FOV and fast speed [9299-26]
92990H	An infrared remote sensor with high integration and multi-spectral bands [9299-27]
9299 0I	A data preprocessing method based on multi-threshold [9299-28]
9299 0J	An integrated GIS application system for soil moisture data assimilation [9299-29]
9299 0K	Design and realization of data acquisition system of FTS based on FPGA [9299-30]
9299 0L	Observations of atmospheric trace gases by MAX-DOAS in the coastal boundary layer over Jiaozhou Bay [9299-33]
9299 0M	Sun glitter imaging analysis of submarine sand waves in HJ-1A/B satellite CCD images [9299-35]
9299 0N	Research on influence of space-borne stereo mapping camera's time synchronization precision on attitude angle errors [9299-37]
9299 0O	Investigation on navigation patterns of inertial/celestial integrated systems [9299-38]
9299 0P	Quantum-inspired remote sensing image denoising with double density dual-tree complex wavelet transform [9299-39]
9299 0Q	Spatial decision supporting for winter wheat irrigation and fertilizer optimizing in North China Plain [9299-41]
9299 0R	Online sparse representation for remote sensing compressed-sensed video sampling [9299-42]
9299 0S	Retrieval and validation of the true leaf area index using MODIS data [9299-43]
9299 0T	CS-based infrared remote sensing video reconstruction with a linearized Bregman error iteration algorithm for l1-regularized minimization [9299-45]
9299 0U	Radiometric quality evaluation of ZY-02C satellite panchromatic image [9299-46]
9299 0V	A study to measure optical properties of waters by oceanographic lidar with variable field-of-view [9299-47]
9299 0W	Parameters inversing of polarized bidirectional reflectance distribution function model for target rough surface [9299-53]
9299 0X	Towards aerial natural gas leak detection system based on TDLAS [9299-54]
9299 0Y	An integrated method of measuring wave-front aberrations and optical axis jitters of space camera [9299-58]

- 9299 0Z **The research of remote sensing in karst collapse remote sense based on airborne LiDAR system: taking Meitanba mining area in Hunan Province as an example** [9299-59]
- 9299 10 **Lidar signal de-noising by singular value decomposition** [9299-61]
- 9299 11 **Study of modified band selection methods of hyperspectral image based on optimum index factor** [9299-64]
- 9299 12 **Dynamic monitoring of vegetation coverage change in Lu County based on TM/OLI-NDVI** [9299-66]
- 9299 13 **Snow cover monitoring model and change over both time and space in pastoral area of northern China** [9299-68]
- 9299 14 **Modeling and validation of spectral BRDF on material surface of space target** [9299-69]
- 9299 15 **A precise laboratory goniometer system to collect spectral BRDF data of materials** [9299-70]
- 9299 16 **Development of dual-wavelength Mie polarization Raman lidar for aerosol and cloud vertical structure probing** [9299-71]
- 9299 17 **Development of semi-sphere field-of-view sun sensor integrated with multiple linear CMOS image sensor** [9299-72]
- 9299 18 **Study on river segmentation and bridge recognition for SAR image based on FSVM** [9299-73]
- 9299 19 **Military reconnaissance application of high-resolution optical satellite remote sensing** [9299-74]
- 9299 1A **Study on the effects of the space environment on laser transmission characteristics** [9299-76]
- 9299 1B **A study on correlation between national imagery interpretability rating scale and discrimination probability** [9299-77]
- 9299 1C **Establishing monitoring model of Haze event with multi-satellite data and application-a case: Yangtze River Delta** [9299-78]
- 9299 1D **Application of the polarization Raman Mie lidar system to monitor the particulate matter and water vapor in the aerosol pollution and haze episodes** [9299-80]
- 9299 1E **System calibration of Stokes imaging polarimeter using Fourier series analysis** [9299-218]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the International Symposium on Optoelectronic Technology and Application 2014 (IPTA 2014) in Beijing. It was truly a great pleasure for us to greet nearly 1,000 participants from many different countries attending IPTA 2014! We firmly believe that the symposium will become an important international event in the field of photoelectronic technology.

IPTA 2014 was sponsored by Chinese Society of Astronautics (CSA) and China High-tech Industrialization Association, technically co-sponsored by SPIE, and organized by Photoelectronic Technology Committee, Chinese Society of Astronautics. 27 cooperating organizations supported the conference. There were nearly 600 papers accepted for presentation at IPTA 2014, contributed by over 1078 authors from more than 10 countries, including United States, United Kingdom, Germany, France, Norway, Australia, Canada, Japan, Korea, Russia, and China. We had six plenary speeches and 228 well-known scientists and experts, from both home and abroad to give invited talks at different sessions.

The purpose of IPTA 2014 was to provide a forum for the participants to report and review innovative ideas, with up-to-date progress and developments, and discuss the novel approaches to application in the field of photoelectronic technology. We sincerely hope that the research and development in the optical and photoelectronic fields will be promoted, and international cooperation sharing the common interest will be enhanced.

On behalf the Organization Committee of IPTA 2014, we would like to heartily thank our sponsors and cooperating organizations for all they have done for the conference. We would also like to thank the authors for their contribution to the proceedings; the participants and friends of IPTA 2014, for their interest and efforts in helping us to make the symposium possible; and the Program Committee for their effective work and valuable advice, especially the IPTA 2014 Secretariat and the SPIE staff, for their tireless efforts and outstanding services in preparing the conference and publishing the Proceedings.
