, "Front Matter: Volume 9302," Proc. SPIE 9302, International Conference on Experimental Mechanics 2014, 930201 (11 March 2015); doi: 10.1117/12.2190461

SPIE.

Event: International Conference on Experimental Mechanics 2014, 2014, Singapore, Singapore

PROCEEDINGS OF SPIE

International Conference on Experimental Mechanics 2014

**Chenggen Quan
Kemao Qian
Anand Asundi
Fook Siong Chau**
Editors

**15–17 November 2014
Singapore, Singapore**

Co-organized by
Optics and Photonics Society of Singapore (Singapore)
Theoretical and Applied Mechanics Society (Singapore)

Supported by
National University of Singapore (Singapore) • Nanyang Technological University (Singapore)
Asian Committee for Experimental Mechanics • Chinese Society of Experimental Mechanics
(China) • Korean Society of Mechanical Engineers (Korea, Republic of) • The Japanese
Society for Experimental Mechanics (Japan)

Published by
SPIE

Volume 9302

Proceedings of SPIE 0277-786X, V. 9302

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Conference on Experimental Mechanics 2014, edited by Chenggen Quan,
Kemao Qian, Anand Asundi, Fook Siong Chau, Proc. of SPIE Vol. 9302, 930201
© 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2190461

Proc. of SPIE Vol. 9302 930201-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

ix	<i>Authors</i>
xi	<i>Conference Committees</i>
xv	<i>Introduction</i>

ADVANCES IN 3D PROFILE AND SHAPE MEASUREMENT

9302 07	Phase errors elimination in compact digital holoscope (CDH) based on a reasonable mathematical model [9302-67]
9302 08	A comparison study of denoising techniques in fringe pattern analysis [9302-220]
9302 09	Multiview 3D profilometry using resonance-based decomposition and three-phase shift profilometry [9302-251]

SPECKLE AND SPECKLE SHEARING FOR NDT AND STRAIN MEASUREMENT

9302 0A	High temperature deformation measurement based on ultraviolet DIC [9302-213]
9302 0C	Shearographic inspections by an interferoscope [9302-101]
9302 0D	Speckle shearing interferometer for measuring strain distribution using laser diodes [9302-65]
9302 0E	Review of recent developments of spatial phase-shift digital shearography [9302-40]

NDT AND SMART STRUCTURES I

9302 0I	Capability enhancement in compact digital holographic microscopy [9302-156]
9302 0J	Resonant loading of aircraft secondary structure panels for use with thermoelastic stress analysis and digital image correlation [9302-45]
9302 0K	Transmission system of guide-wave for a pipe using a long distance wave guide [9302-31]
9302 0L	Quality inspection on electrolytic capacitors using micro-computed tomography [9302-64]
9302 0N	Interpolation method in simple computed tomography scanner [9302-63]

PHASE RETRIEVAL AND IMAGE PROCESSING

- 9302 0O **Single-pixel optical imaging with compressed reference intensity patterns** [9302-97]
- 9302 0Q **Phase retrieval from a single fringe pattern using Teager-Hilbert-Huang transform** [9302-182]
- 9302 0R **Nonlinear optical security system with a modified amplitude phase retrieval algorithm** [9302-160]

MICRO AND NANO-MECHANICS I

- 9302 0S **Evaluation of crack-healing behavior in SiN_x/SiC nanolaminated thin film by microbending test** [9302-92]
- 9302 0V **Directional-sensitive differential laser Doppler vibrometry for in-plane motion measurement of specular surface** [9302-42]

3D TOMOGRAPHY AND SHAPE MEASUREMENT

- 9302 0W **Fast scanning and quick sampling in computed tomography** [9302-178]
- 9302 0X **A novel one-dimensional phase-shift technique by using crossed fringe for phase measuring deflectometry** [9302-257]
- 9302 0Y **3D image reconstruction on x-ray micro-computed tomography** [9302-177]

EXPERIMENTAL SOLID MECHANICS II

- 9302 10 **Alloy composition dependency of plastic deformation behavior in biaxial compressions of Ti-Nb alloys** [9302-72]
- 9302 11 **Identification of heterogeneous elastic material characteristics by virtual fields method** [9302-143]
- 9302 15 **Experimental investigation on fracture of layered plates** [9302-128]

MICRO AND NANO-MECHANICS II

- 9302 16 **Change and anisotropy of elastic modulus in sheet metals due to plastic deformation** [9302-39]
- 9302 17 **Temperature aspect of degradation of electrochemical double-layer capacitors (EDLC)** [9302-123]
- 9302 18 **A study on notch tip micromechanics in dynamic fracture of polycarbonate** [9302-153]

3D COORDINATE MEASURING AND DIGITAL IMAGE CORRELATION (DIC)

- 9302 1A **Whole field strain measurement in critical thin adhesive layer of single- and double-sided repaired CFRP panel using DIC** [9302-93]
- 9302 1B **Experimental study of leadscrew stresses in-service by digital image correlation** [9302-233]

MICROELECTROMECHANICAL SYSTEMS (MEMS) AND APPLICATIONS

- 9302 1G **MEMS-based tunable gratings and their applications (Invited Paper)** [9302-204]
- 9302 1H **Broadband vibration energy harvesting using triboelectric mechanism (Invited Paper)** [9302-132]
- 9302 1I **MEMS switchable infrared metamaterial absorber** [9302-158]
- 9302 1J **MEMS tunable terahertz metamaterials using out-of-plane mechanisms** [9302-174]

COMPOSITES FOR MARINE AND OFFSHORE APPLICATIONS I

- 9302 1M **Nanofiller reinforcement versus surface treatment effect on the mechanical properties of syntactic foams (Invited Paper)** [9302-242]
- 9302 1N **Non-solution treatment method of carbon nanotubes to prepare strong and tough polymer nanocomposites** [9302-239]
- 9302 1O **Experimental study on behavior of GFRP stiffened panels under compression** [9302-68]
- 9302 1P **Failure assessment of aluminum liner based filament-wound hybrid riser subjected to internal hydrostatic pressure** [9302-135]

OPTICS AND LASER APPLICATIONS I

- 9302 1R **An experimental model for minimizing errors in laser speckle contrast imaging for microcirculation analysis** [9302-76]
- 9302 1S **Study on non-invasive optical detection of the glucose concentration with scatters** [9302-117]
- 9302 1T **Fibre Bragg grating sensors for in-situ measurement of resin pressure in curing composites** [9302-215]
- 9302 1V **Dynamic measurement via laser interferometry: crystal growth monitoring and modal parameter analysis** [9302-133]

EXPERIMENTAL SOLID MECHANICS I

- 9302 1W **A stress-free model for residual stress assessment using thermoelastic stress analysis**
[9302-198]
- 9302 1X **Design and experimental investigation about a simulation device for particle impact rock breaking** [9302-10]
- 9302 1Z **High-resolution projection moiré and its application in out-of-plane displacement test on large area** [9302-211]

COMPOSITES FOR MARINE AND OFFSHORE APPLICATIONS II

- 9302 25 **Flexural behavior of epoxy-carbon composite with diffusion effect** [9302-218]
- 9302 26 **Evaluation of seawater exposure on mechanical properties and failure behavior of E-Glass/BMI composite for marine use** [9302-210]

OPTICS AND LASER APPLICATIONS II

- 9302 28 **Evaluation of expansion algorithm of measurement range suited for 3D shape measurement using two pitches of projected grating with light source-stepping method**
[9302-235]
- 9302 29 **Modeling of retardance in ferrofluid with Taguchi-based multiple regression analysis**
[9302-54]
- 9302 2B **iFringe: a fringe analysis application for mobile smart devices** [9302-217]

EXPERIMENTAL SOLID MECHANICS III

- 9302 2C **Can we use virtual reality tools in the planning of an experiment?** [9302-159]
- 9302 2F **The effect of elastic modulus and friction coefficient on rubber tube sealing performance**
[9302-144]

FLUID AND HYBRID MECHANICS

- 9302 2G **J-integral evaluation for an interface crack under thermal load using digital image correlation** [9302-56]
- 9302 2H **Study about oil displacement efficiency of different position in very high water cut reservoir**
[9302-43]

DIGITAL PHOTOELASTICITY

- 9302 2P **Analysis of stress distribution in dry masonry walls using three fringe photoelasticity** [9302-181]
- 9302 2Q **Birefringence characterization of injection molded microplates** [9302-120]
- 9302 2R **Characterization of friction at three contact pairs by photoelastic isotropic point (IP)** [9302-253]

NDT AND SMART STRUCTURES II

- 9302 2S **In-flight measurements of aircraft propeller deformation by means of an autarkic fast rotating imaging system** [9302-185]
- 9302 2T **Pipe inspection system of a pipe by three-modes guide wave using polarized-transverse wave EMATs** [9302-22]
- 9302 2U **Study of ultrasonic sensor that is effective for all direction using an electromagnetic force** [9302-73]

EXPERIMENTAL SOLID MECHANICS IV

- 9302 2V **Impact face influence on low velocity impact performance of interply laminated plates** [9302-209]

POSTER SESSION

- 9302 2X **Deformation measurement for a rotating deformable lap based on inverse fringe projection** [9302-95]
- 9302 2Y **High-speed 3D face measurement based on color speckle projection** [9302-51]
- 9302 2Z **The design of a low-speed wind tunnel for studying the flow field of insects' flight** [9302-98]
- 9302 33 **On the motion of a falling circular cylinder in flows after water entry** [9302-166]
- 9302 37 **Measurement of thin film adhesion by single cantilever beam method equipped with adjustable jig** [9302-214]
- 9302 39 **Modeling and compensation of flexible modes in 3-DOF H-gantry with decoupling design: a primitive study** [9302-246]
- 9302 3A **Reinforced polyethylene/clay nanocomposites: influence of different silane** [9302-232]
- 9302 3E **Design and characterization of a silicon piezoresistive three-axial force sensor for micro-flapping wing MAV applications** [9302-163]

- 9302 3F **Two-dimensional phase unwrapping algorithms for fringe pattern analysis: a comparison study** [9302-157]
- 9302 3I **Silicon wafer microstructure imaging using InfraRed Transport of Intensity Equation** [9302-89]
- 9302 3J **Research on inner defect detection of pressure vessels with digital shearography** [9302-206]
- 9302 3K **Two-wavelength microscopic speckle interferometry using colour CCD camera** [9302-155]
- 9302 3L **Estimation of stress relaxation time for normal and abnormal breast phantoms using optical technique** [9302-134]
- 9302 3M **A new phase error compensation method in digital holographic microscopy** [9302-59]
- 9302 3N **A time-sequential backlight based on a LED collimation module** [9302-208]
- 9302 3O **Multiple reflectors based autocollimator for three-dimensional angle measurement** [9302-62]
- 9302 3Q **The design and fabrication of an optical diffuser for head-up displays** [9302-212]
- 9302 3R **White light interferometer with color CCD for 3D-surface profiling of microsystems** [9302-152]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Session Chairs

KN-1	Keynote Lecture 1 A. Asundi , Nanyang Technological University (Singapore)
KN-2	Keynote Lecture 2 F. S. Chau , National University of Singapore (Singapore)

KN-3	Keynote Lecture 3 S. L. Toh , National University of Singapore (Singapore)
Special S111	Advances in 3D Profile and Shape Measurement L. J. Chen , Singapore University of Technology and Design (Singapore)
Special S112	Speckle and Speckle Shearing for NDT and Strain Measurement L. X. Yang , Auckland University (New Zealand)
Special S113	Dynamic Behavior of Materials and Structures and Vibration Analysis J. S. Dhupia , Nanyang Technological University (Singapore)
S121	NDT and Smart Structures I J. M. Dulieu-Barton , University of Southampton (United Kingdom)
S122	Phase Retrieval and Image Processing K. M. Qian , Nanyang Technological University (Singapore)
S123	Micro and Nano-Mechanics I C. J. Tay , National University of Singapore (Singapore)
S131	3D Tomography and Shape Measurement L. J. Chen , Singapore University of Technology and Design (Singapore)
S132	Experimental Solid Mechanics II W. Chen , National University of Singapore (Singapore)
S133	Micro and Nano-Mechanics II S. B. Lee , Korea Advanced Institute of Science and Technology (Korea, Republic of)
Special S211	3D Coordinate Measuring and Digital Image Correlation (DIC) Q. F. Yu , National University of Defense Technology (China)
Special S212	Microelectromechanical Systems (MEMS) and Application G. Y. Zhou , National University of Singapore (Singapore)
Special S213	Composites for Marine and Offshore Applications I J. Yang , Nanyang Technological University (Singapore)
S221	Optics and Laser Applications I W. J. Qu , Ngee Ann Polytechnic (Singapore)
S222	Experimental Solid Mechanics I X. Y. He , Southeast University (China) Y. Fu , Nanyang Technological University (Singapore)
S223	Composites for Marine and Offshore Applications II Z. Jiang , South China University of Technology (China)
S231	Optics and Laser Applications II Y. L. Lo , National Cheng Kung University (Taiwan)

S232	Experimental Solid Mechanics III W. C. Wang , National Tsing Hua University (Taiwan)
S233	Fluid and Hybrid Mechanics T. Chen , National Cheng Kung University (Taiwan)
Special S311	Biomechanics A. Kishen , University of Toronto (Canada)
Special S313	Digital Photoelasticity S. Yoneyama , Aoyama Gakuin University (Japan)
S321	NDT and Smart Structures II M. Fujigaki , Wakayama University (Japan)
S323	Experimental Solid Mechanics IV L. Y. Zhang , Nanyang Technological University (Singapore)

Introduction

The International Conference on Experimental Mechanics (ICEM 2014), in conjunction with 13th Asian Conference on Experimental Mechanics (ACEM13), was successfully held 15–17 November 2014, at Holiday Inn Atrium Hotel, Singapore. The conference was attended by 155 delegates from 14 countries.

The conference program included three keynote talks given by eminent experts in their respective fields. Professor Janice M. Dulieu-Barton of Southampton University (United Kingdom) delivered a lecture entitled "Imaging Techniques for Performance Assessments of Composite Structures based on Combining Thermoelastic Stress Analysis and Digital Image Correlation." Professor Qifeng Yu of National University of Defense Technology (China) presented the second keynote lecture, "Displacement-relay Videometric Methods for Surface Multi-position Subsidence Surveillance." Professor Anil Kishen of the University of Toronto (Canada) presented the third keynote lecture on "A Biomechanical Understanding of Dentin Hard Tissue."

Apart from the above, 101 papers were presented in 22 oral sessions and 28 papers were presented in 8 poster sessions. The conference covered topics ranging from traditional solid mechanics to fluid mechanics and dynamics, to the more current micro- and nano-mechanics, biomechanics, and smart structures and nondestructive testing (NDT). There were 8 special sessions: 1) Advances in 3D Profile and Shape Measurement; 2) Speckle and Speckle Shearing for NDT and Strain Measurement; 3) Dynamic Behavior of Materials and Structures, Vibration Analysis; 4) 3D Coordinate Measuring and Digital Image Correlation (DIC); 5) Microelectromechanical Systems (MEMS) and Application; 6) Composites for Marine and Offshore Applications; 7) Biomechanics; and 8) Digital Photoelasticity.

We take this opportunity to thank all speakers and authors for contributing to the success of the conference, members of the International Advisory Committee for their assistance and enthusiastic support, the session chairs, our sponsors, and the organizing committee for ensuring the efficient execution of the conference program.

Chenggen Quan

Chair, Scientific Program Committee, ICEM2014
