Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SESSION 1 SPECKLE TECHNOLOGIES

9322 03	Nematic liquid crystal spatial light modulator for mimicking laser speckle contrast imaging [9322-2]
---------	---

SESSION 2 TISSUE AND CELL DYNAMICS I

9322 0A	RBC aggregation based system for long-term photoplethysmography (PPG): new prospects for PPG applications (Invited Paper) [9322-10]
9322 0B	Quantitative assessment of hyaline cartilage elasticity during optical clearing using optical coherence elastography [9322-11]
9322 0C	Characterizing the micro structure and kinetics of fast changing samples by simultaneous polarization measurements [9322-51]

SESSION 3 TISSUE AND CELL DYNAMICS II

9322 0G	Application of new optical coherence elastography to monitor the mineralization processing in bone tissue engineering constructs [9322-15]
9322 0H	Towards non-invasive 3D hepatotoxicity assays with optical coherence phase microscopy [9322-16]
9322 0J	Photothermal light harvesting and light-gated molecular release by nanoporous gold disks (Invited Paper) [9322-18]

SESSION 4 CLINICAL IMAGING AND EVALUATION

9322 0K	Investigation of diseases through red blood cells' shape using photoacoustic response technique [9322-19]
9322 0L	Correlation mapping microscopy [9322-20]
9322 0N	In vivo imaging of microvascular changes in inflammatory human skin induced by tape stripping and mosquito saliva using optical microangiography [9322-22]

SESSION 5	OPTICAL CLEARING AND BIOMECHANICS
9322 00	Full skin quantitative optical coherence elastography achieved by combining vibration and surface acoustic wave methods [9322-23]
SESSION 6	FUNCTIONAL IMAGING AND SPECTROSCOPY
9322 0S	The role of camera and illumination choices in absolute blood velocity measurements (Invited Paper) [9322-29]
SESSION 7	CEREBRAL HAEMODYNAMICS
9322 0U	Effects of combined scattering and absorption coefficients on laser speckle contrast imaging values [9322-31]
	POSTER SESSION
9322 0Y	Measurement of total velocity components of particle flow with optical coherence tomography [9322-6]
9322 0Z	Quantitative analyses of spectral measurement error based on Monte-Carlo simulation [9322-27]
9322 10	SIFT-based error compensation for ear feature matching and recognition system [9322-28]
9322 11	THz-generation in semiconductor superlattice in the external tilted magnetic field [9322-32]
9322 12	Age-dependent seizures of absence epilepsy and sleep spindles dynamics in WAG/Rij rats [9322-35]
9322 13	Analysis of structural patterns in the brain with the complex network approach [9322-36]
9322 14	Cerebral venous dynamics in newborn mice with intracranial hemorrhage studied using wavelets [9322-37]
9322 16	Molecular effective coverage surface area of optical clearing agents for predicting optical clearing potential [9322-39]
9322 17	Combination of infrared thermography and reflectance spectroscopy for precise classification of hair follicle stage [9322-40]
9322 19	Imaging patients with glaucoma using spectral-domain optical coherence tomography and optical microangiography [9322-42]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States) and Harvard School of Medicine
(United States)

Program Track Chair

Steven L. Jacques, Oregon Health & Science University
(United States)

Conference Chairs

Valery V. Tuchin, N.G. Chernyshevsky Saratov State University
(Russian Federation) and University of Oulu (Finland)

Kirill V. Larin, University of Houston (United States)

Martin J. Leahy, National University of Ireland, Galway (Ireland)

Ruikang K. Wang, University of Washington (United States)

Conference Program Committee

Pierre O. Bagnaninchi, The University of Edinburgh (United Kingdom)

Wei R. Chen, University of Central Oklahoma (United States)

Joseph P. Culver, Washington University School of Medicine in
St. Louis (United States)

Ekaterina I. Galanzha, University of Arkansas for Medical Sciences
(United States)

Miya Ishihara, National Defense Medical College (Japan)

Jingying Jiang, Tianjin University (China)

Sean J. Kirkpatrick, Michigan Technological University (United States)

Jürgen M. Lademann, Charité Universitätsmedizin Berlin (Germany)

Hong Liu, The University of Oklahoma (United States)

Qingming Luo, Huazhong University of Science and Technology
(China)

Igor V. Meglinski, University of Otago (New Zealand)

Brian S. Sorg, University of Florida (United States)

Vladislav Toronov, Ryerson University (Canada)

Lihong V. Wang, Washington University in St. Louis (United States)

Ying Yang, Keele University (United Kingdom)

Anna N. Yaroslavsky, University of Massachusetts Lowell
(United States)

Vladimir P. Zharov, University of Arkansas for Medical Sciences
(United States)

Dan Zhu, Huazhong University of Science and Technology (China)

Session Chairs

- 1 Speckle Technologies
Ruikang K. Wang, University of Washington (United States)
- 2 Tissue and Cell Dynamics I
Sean J. Kirkpatrick, Michigan Technological University (United States)
- 3 Tissue and Cell Dynamics II
Valery V. Tuchin, N.G. Chernyshevsky Saratov State University
(Russian Federation)
- 4 Clinical Imaging and Evaluation
Jürgen M. Lademann, Charité Universitätsmedizin Berlin (Germany)
- 5 Optical Clearing and Biomechanics
Kirill V. Larin, University of Houston (United States)
- 6 Functional Imaging and Spectroscopy
Martin J. Leahy, National University of Ireland, Galway (Ireland)
- 7 Cerebral Haemodynamics
Anna N. Yaroslavsky, University of Massachusetts Lowell
(United States)

Introduction

This proceedings volume is from *Dynamics and Fluctuations in Biomedical Photonics XII*, held on February 7 through 8, 2015, at the SPIE Photonics West Conference in San Francisco, California. It was a three-day meeting featuring 33 oral presentations and a joint one-day poster session of 12 poster presentations from leading international research groups.

The goal of the conference was to gather essentially different groups of leading researchers such as biophysicists, medical doctors and physicians, mathematicians, and optical and laser engineers, together with students to report the current state of the art and to facilitate future progress in the development of optical and laser technologies based on dynamics and fluctuations approaches (such as laser-speckle, speckle-based coherence imaging, microcirculation analysis using various optical techniques and methods, dynamics of molecular diffusion, including nanoparticles, etc.) towards biomedical science and clinical applications. These approaches should be useful for diagnosis and therapy of devastating life-threatening diseases such as those of the heart, cancer, vascular, mental illness, and many others that manifest as a breach of the living organism's immune systems at the level of molecule, cell, organ, or organism as a whole. We hope that proceedings of this conference will contribute to the development of such interdisciplinary fields of science and applications as dynamics and structures of living systems, biomedical optics and laser medicine, and that it will be useful to scientists, medical doctors, engineers and students.

The conference was organized into several sessions: Speckle Technologies (chaired by Prof. Wang); Tissue and Cell Dynamics I and II (chaired by Profs. Larin and Tuchin); Clinical Imaging and Evaluation (chaired by Prof. Lademann); Optical Clearing and Biomechanics (chaired by Prof. Larin); Functional Imaging and Spectroscopy (chaired by Prof. Leahy); and Cerebral Hemodynamics (chaired by Prof. Yaroslavsky). Most of the sessions featured invited presentations.

The conference kicked off with an invited lecture by Prof. Vyacheslav Kalchenko from Weizmann Institute of Science (Israel) entitled "Multi-modal imaging approach for functional quantitative visualization of acute vascular reaction." Prof. Kalchenko presented original work on visualizing vasculature of subcutaneous tissues and the brain completely noninvasively. This presentation drew significant attention from the audience and resulted in wide coffee break discussion.

It is also necessary to note invited lectures given by Leonid D. Shvartsman from The Hebrew Univ. of Jerusalem (Israel), Juergen M. Lademann from Charité Universitätsmedizin Berlin (Germany), Wei-Chuan Shih from University of Houston (United States), Dan Zhu from Huazhong University of Science and Technology (China), Bruce J. Tromberg from Beckman Laser Institute and Medical Clinic (United States), Jessica C. Ramella-Roman from Florida International University

(United States), and Elizabeth M. Hillman from Columbia University (United States). These talks provided a nice overview of recent advances in multiple fields.

The oral sessions and corresponding poster session featured many presentations that described different methods and techniques developed and applied to study complex problems of dynamics and fluctuations in biological systems on the scale ranging from cell to the whole body. The reader is encouraged to browse the table of contents for this issue to learn the full scope of the conference.

The conference chairs would like to thank the members of the Technical Program Committee for their help in organizing the conference. We sincerely appreciate the support of the SPIE and conference staff. Finally, we would like to thank all of the conference attendees and manuscript authors for their contributions and participation, especially invited speakers, who helped to make this meeting a success.
