PROCEEDINGS OF SPIE

Quantum Dots and Nanostructures: Synthesis, Characterization, and Modeling XII

**Diana L. Huffaker
Holger Eisele**
Editors

**9–11 February 2015
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 9373

Proceedings of SPIE 0277-786X, V. 9373

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Dots and Nanostructures: Synthesis, Characterization, and Modeling XII,
edited by Diana L. Huffaker, Holger Eisele, Proc. of SPIE Vol. 9373, 937301
© 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2190559

Proc. of SPIE Vol. 9373 937301-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/15/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v	Authors
vii	Conference Committee

SESSION 1	DEVICES
9373 02	Combining fast electrical control and resonant excitation to create a wavelength-tuneable and coherent quantum-dot light source (Invited Paper) [9373-1]
9373 04	Low-noise four-wavelength simultaneous oscillation of a 1.3- μm external-cavity quantum-dot laser [9373-3]
9373 05	Towards on-chip generation, routing and detection of non-classical light [9373-4]
SESSION 2	WIRES
9373 06	High efficiency AlGaIn deep ultraviolet light emitting diodes on silicon (Invited Paper) [9373-5]
9373 07	Tailoring of GaAs/GaAsSb core-shell structured nanowires for IR photodetector applications [9373-6]
9373 08	Optical characterisation of catalyst free GaAsP and GaAsP core-shell nanowires grown directly on Si substrates by MBE [9373-7]
9373 0A	Complex emission dynamics from InGaAs/GaAs core-shell nanopillars [9373-9]
SESSION 3	OPTICAL CHARACTERIZATION
9373 0D	Plasmonic effect on photon antibunching and blinking behavior of single quantum dots near gold nanoparticles [9373-15]
SESSION 4	NANOSTRUCTURE DESIGN AND CHARACTERIZATION
9373 0G	Optimising the defect filter layer design for III/V QDs on Si for integrated laser applications [9373-17]
9373 0I	Stability in peak emission wavelength in strain-coupled multilayer InAs/GaAs quantum dot heterostructures when subjected to high-temperature rapid thermal annealing [9373-19]

SESSION 5 COLLOIDAL AND SYNTHESIZED NANOSTRUCTURES

- 9373 0L **Water-soluble CdTe nanocrystals under high pressure** [9373-22]
- 9373 0M **Shape and size controlled lead sulfide quantum dots for optical refrigeration applications** [9373-23]
- 9373 0N **Towards the fabrication of high quality superstructures from ionic liquid electrolytic bath** [9373-24]

POSTER SESSION

- 9373 0S **Cross-sectional TEM (XTEM) analysis for vertically coupled quaternary $\text{In}_{0.21}\text{Al}_{0.21}\text{Ga}_{0.58}\text{As}$ capped InAs/GaAs quantum dot infrared photodetectors** [9373-28]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia
(United Kingdom)
Alexei L. Glebov, OptiGrate Corporation (United States)

Symposium Co-chairs

Jean-Emmanuel Broquin, IMEP-LAHC (France)
Shibin Jiang, AdValue Photonics, Inc. (United States)

Program Track Chair

Ali Adibi, Georgia Institute of Technology (United States)

Conference Chairs

Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)

Conference Program Committee

Alberto Bramati, Laboratoire Kastler Brossel (France)
Massimo De Vittorio, Università del Salento (Italy)
Axel Hoffmann, Technische Universität Berlin (Germany)
Minjoo Larry Lee, Yale University (United States)
Huiyun Liu, University College London (United Kingdom)
Vinod M. Menon, Queens College (United States)
Zetian Mi, McGill University (Canada)
Jeffrey C. Owruksky, U.S. Naval Research Laboratory (United States)
Gregory J. Salamo, University of Arkansas (United States)
Jonathan Spanier, Drexel University (United States)
Frank Szmulowicz, University of Dayton Research Institute
(United States)

Session Chairs

- 1 Devices
Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)
- 2 Wires
Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)

- 3 Optical Characterization
Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)
- 4 Nanostructure Design and Characterization
Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)
- 5 Colloidal and Synthesized Nanostructures
Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)
